Add'l Edu. Details:

Accounting and Business

Years of Full-Time Work Experience:

10+

Relevant Experience Level:

Some. I have worked for a plumber, steamfitter or HVAC/R contractor.

Pipe Welding Proficiency:

Stick - Some Knowledge, Flux Core - Some Knowledge

Tell Us About Any Relevant Jobs :

I currently work for a swimming pool contractor. I have a lot of experience plumbing with sch 40 pvc in pressure applications. I have also installed and serviced gas furnaces including the necessary work that goes along with that; replacing conduit and electrical lines to the furnace as well as reconfiguring the plumbing lines to and from and running gas pipe to the furnace. I have dug out trenches for pipe and learned the importance of bedding pipe. I have also done numerous repairs where I was required to saw and break concrete and then dig out the area to repair in order to fix the section of pipe and replace the faulty fitting. I have also worked on installing septic fields.

Why are you exploring an apprenticeship program?

The financial outcome is what I am looking for primarily. I also like how the path is laid out. I have confidence I can fulfill the requirements. Having the assurance that as long as I do my part, I can go from a to b is attractive to me.

Tell Us About Any Relevant Hobbies:

I like to play basketball and softball. I like the competitive nature of sports. This gives me good stamina but also demonstrates a desire to compete and improve myself. It also shows that I can get along with others in both working towards a goal and in competition.

What Interested You in Plumbing?

In my current position I perform many tasks that involve general construction, electrical, concrete, and plumbing. I like the challenge of plumbing and want to make it a career.

Relevant Experience Level:

Some. I have worked for a plumber, steamfitter or HVAC/R contractor.

Pipe Welding Proficiency:

Tell Us About Any Relevant Hobbies:

I enjoy fixing electrical and plumbing issues around the house and for my friends, I stay pretty active at the gym which keeps my strength up, and I enjoy learning new things

Tell Us About Any Relevant Jobs :

I worked as a septic plumber for a year and a half, where I helped install new septic and well systems. I also learned how to service these systems, and diagnose electrical issues

What Interested You in Plumbing?

I worked as a septic plumber for about a year and a half, I liked it and was pretty good at it. My reasons for leaving it was the workplace environment and the on call hours that I had to do on occasion. Since then I've been looking into different areas of the trades, and realized that plumbing has always been what I've wanted to do.

Why are you exploring an apprenticeship program?

I enjoy hands on learning, and the idea of being able to work while also attending classes that translate to my work have always appealed to me

Pipe Welding Proficiency:

Flux Core - Some Knowledge

Tell Us About Any Relevant Jobs :

Contracting work has taught me how to problem solve, manage the workload, and be persistent in finishing the task at hand regardless of how many hours in a week it took.

Replacing sixty feet of cast iron drain pipe to PVC while in a crawl space has demonstrated I'm capable of dedication to the craft. Furnace repair and replacement has taught me to be efficient through working on a deadline. Painting and drywall has taught me to be patient through the meticulous aspect. Overall, everything has made me understand the importance of paying attention to detail and doing things correctly the first time.

Why are you exploring an apprenticeship program?

The opportunity to work towards being a master at the craft would be a great opportunity. Along with learning from the best, I can also achieve the goals I set for myself and my career.

Tell Us About Any Relevant Hobbies:

I enjoy golfing and helping family and friends with projects around their homes. One of the many lessons golf has to offer is patience. This virtue can be easily transferrable to the trades in navigating through the unpredictability of any situation and having the resilience to do so. Also, when playing golf as a team, we learn to communicate to achieve the same goal.

What Interested You in Plumbing?

As I was growing up, my dad was a landlord and contractor which exposed me to a variety of different trades all through my childhood and on. The last 10 years, I've been working in contracting under my dad who has taught me almost everything I know. Out of all of the trades I have experience with, plumbing work has intrigued me the most.

Outside looking in, plumbing may be seen as arduous, but I feel as though the unique mechanics that are involved make the most sense. Plumbing is a really important career choice that I have considered thoroughly and I know I would excel at for many years to come.

I have some land with my finances family and we are constantly upgrading things.

I am also an Eagle Scout so I was taught from a young age to think on the spot to help complete tasks

Tell Us About Any Relevant Jobs :

Other than working with family on our house and property, and the few weeks of working for a plumber I don't have any jobs to list.

What Interested You in Plumbing?

I've always enjoyed working and learning with my hands. I had an opportunity to do some plumbing and other work while rebuilding a family home in Arkansas and enjoyed every second of it.

Why are you exploring an apprenticeship program?

I love the idea of learning a profession more on the job rather than in a classroom.

I'm a hands on person who knows there will be time in a class and have no problem with that either.

I had another opportunity to be an extra hand to a plumber for a few weeks. It was a lot of fun learning this trade and made me very interested in it.

I previously was a supervisor at a wastewater treatment plant and have my advanced certification in wastewater. I currently work at a precast company installing precast, but we are slow and currently laying people off.

What Interested You in Plumbing?

I am formerly a wastewater treatment operator, I have some experience in that type of plumbing. I also have a few friends that work for Hooper that have been talking to me about the perks and benefits of Local 75. I am very interested in a certain level of security that being a plumber offers and also the lesser price of student loan debt that goes along with it.

Why are you exploring an apprenticeship program?

I am interested in learning a trade through a hands on approach. I like the fact that I can earn and learn all at the same time. Having an apprenticeship in my eyes, puts you above a lot of others because of the simple fact that you have a credential that is well recognized and accepted.

None. Nothing even close-but I'm a hard worker and willing to learn!

Pipe Welding Proficiency:

Tell Us About Any Relevant Jobs :

My job or hobbies would not be similar to the trades. I have worked at Harley's liquor and bait and Harleys wine and spirits for the past three years while in school, and I still work there. And most of my hobbies don't have anything to do with the trades. I golf, walk my dogs, collect board games and old coins, and play video games.

What Interested You in Plumbing?

My grandfather worked in trades, and that's how I first learned about them. Initially, I wanted to become a computer engineer. But after two years in that, I discovered that I was not too fond of it and wanted to stick to something more like my current job, which is hands-on and physical labor, instead of sitting at a computer all day. And after talking with my grandfather, he told me two good ones to look at were plumbing and electrician, but I drew more towards plumber after doing some research.

After doing some research and talking to my grandfather, I talked to some advisors at Madison College and tried to join the program there, but I didn't get anywhere with it last semester. Then this spring semester rolled around, and I got into contact with an advisor who sent me to talk to Jeff Kennedy. He further solidified my desire to try and

Why are you exploring an apprenticeship program?

I am exploring this program because it is similar to what I like to do at my job, which is hands-on and physical labor. I have been working part-time at a liquor store for the past three years, which has been mostly customer service and moving cases of alcohol around the store. I wanted to do something where it would be a lot of hands-on learning instead
