

Youth Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

Plumber

Work Zones in Preference Order:

Appleton Area (Green)

High School:

Iola Scandinavia High School

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:**Welding Experience:**

MIG - Skilled, TIG - Some Knowledge, Stick - Skilled, Flux Core - Some Knowledge

Shift Availability:

Full-time, summer employment, Part-time, school

Tell us about any jobs where you've learned pipetrades relevant skills:

Although I haven't had a job specifically in the pipe trades, I've gained valuable skills from other work experiences that are applicable to this field. For instance, I worked as a part-time laborer during the summer, where I was responsible for various tasks such as organizing supplies, assisting with basic maintenance, and helping to clean work areas. This job taught me the importance of safety and proper tool usage, which are crucial in the pipe trades. Additionally, I learned how to follow instructions and work as part of a team.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I enjoy spending my free time outdoors, and some of my favorite hobbies include hunting and fishing. These activities have taught me valuable skills that are transferable to the construction trades. For instance, while hunting, I need to be patient and observant, paying attention to my surroundings and understanding how to navigate different terrains. This attention to detail and ability to assess my environment is crucial in construction, where safety and precision are essential. Additionally, fishing requires me to be persistent and adaptable.

What trades-related courses did you take in school?

Math-Geometry, Math-Algebra, Welding, Woodworking / Woodshop, Metals, Building Trades / Construction, Drafting and Design, Construction Technology

Why is an apprenticeship an attractive option to you?

An apprenticeship is an attractive option for me because it combines hands-on learning with real-world experience, allowing me to earn while I learn. I appreciate the idea of getting practical training in a specific trade while being mentored by experienced professionals. This hands-on approach helps me develop valuable skills that I can apply immediately in the workplace, rather than just learning from books. Additionally, an apprenticeship gives me the opportunity to build a network within the industry, which

What construction software or technologies do you have training in?

AutoCAD, Inventor, CNC

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I have always been fascinated by how things work and the intricate systems that keep our buildings functional. The building trades offer a unique opportunity to combine practical skills with creativity, allowing me to see the tangible results of my hard work. I enjoy hands-on activities and problem-solving, which makes the building trades an appealing career path for me. The sense of accomplishment that comes from completing a project and knowing that I contributed to something useful is incredibly rewarding.

Any Safety Certificates:

First Aid / CPR

Specifically, my interest in the pipe trades stems from the vital role that plumbing and piping systems play in our everyday lives. I find it intriguing to learn about the various types of pipes, fittings, and fixtures that ensure clean water is delivered to our homes and that waste is efficiently removed.

Disciplines of Interest:

HVAC/R Service Tech, Pipe Fabricator, Steamfitter (Pipefitter)

Work Zones in Preference Order:Appleton Area (Green) **High School:** Clintonville high**Relevant Experience Level:**

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:**Welding Experience:**

MIG - Skilled, Stick - Skilled, TIG - Some Knowledge

Shift Availability:

Full-time, summer employment

Tell us about any jobs where you've learned pipetrades relevant skills:

No job experience in pipe trades yet.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

My hobbies and activities have significantly boosted my skills for trades. For example, woodworking and DIY projects have honed my ability to work with different materials, and accurately measure and operate tools safely. Tinkering with mechanical components in my spare time has improved my skills and understanding of how things work, which is beneficial in fields such as welding and automotive repair. These activities have taught me patience, precision, and the importance of attention to detail, all of which are crucial in the trades industry.

What trades-related courses did you take in school?

Drafting and Design, Welding, Woodworking / Woodshop, Building Trades / Construction, Math-Algebra, Math-Geometry, Metals

Why is an apprenticeship an attractive option to you?

An apprenticeship is an attractive option to me because it offers a unique opportunity to learn directly from experienced professionals while gaining hands on experience in real world settings. The combination of on the job training and classroom learning allows me to develop practical skills that are helping me build a strong foundation in my chosen trade. The mentorship aspect is also valuable, as it allows me to receive guidance and feedback from experts, helping me grow both personally and professionally.

What construction software or technologies do you have training in?

AutoCAD

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

My high school welding class sparked my interest in trades because it provided hands on experience and a sense of accomplishment that I had never felt before. This class helped me realize how trades can offer a satisfying career with plenty of opportunities for growth, and it opened my eyes to the many possibilities beyond traditional academic paths.

Tell us about any jobs where you've learned pipetrades relevant skills:

I have learned through my School and my teachers told me to find a job that has welding because they see good in my future

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I take a welding class and I weld daily when I get the chance to, I also have family and friends that are in the trades and they have told me they love it.

What trades-related courses did you take in school?

Welding, Math-Algebra, Building Trades / Construction, Automotive Technology

Why is an apprenticeship an attractive option to you?

I want to be an apprentice because I would like to learn more and experience the difficulties that are involved in welding

What construction software or technologies do you have training in?

Machining

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I started welding my junior year and I have had a huge change in what I have wanted to do after high-school. It went from going to the military to becoming a welder in the trades. I have heard that people in the trades become successful and have a great future and they also love doing their job. It has been my dream to go and work for something that I love doin on a daily and never get bored.

Youth Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

Pipe Fabricator, Steamfitter (Pipefitter)

Work Zones in Preference Order:Appleton Area (Green) **High School:** Kickapoo**Relevant Experience Level:**

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:**Welding Experience:**Flux Core - Some Knowledge, MIG - Skilled, TIG - Some Knowledge,
Stick - Skilled**Shift Availability:**

Full-time, summer employment

Tell us about any jobs where you've learned pipetrades relevant skills:

I have approximately 8 months - 1 year experience as a CAD Draftsman, using AutoCAD.

I have 3 years experience MIG welding, some FCAW, Brazing, Pulse Welding, Hard Surface Welding, & Spray transfer Welding.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I have my structural & wildland firefighting certifications which I believe directly relate to the trades. It is a very, "hands on," job.

I have also always enjoyed doing heavy equipment operation & farm work.

What trades-related courses did you take in school?

Automotive Technology, Welding, Woodworking / Woodshop, Metals, Math-Precalculus / Trigonometry, Math-Geometry, Math-Algebra, Drafting and Design, Building Trades / Construction

Why is an apprenticeship an attractive option to you?

An apprenticeship is an attractive option to me because it is a phenomenal way for kids to be involved in the trades. Not only are we constantly getting hands on experience, we are also getting paid to be there.

What construction software or technologies do you have training in?

AutoCAD, Inventor, CNC, Solidworks

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I have worked in the trades since I was 14 & earlier doing work as a farmhand. I have always enjoyed doing manual labor. More specifically, metal working. Doing things such as welding, fabricating, & more.

When it comes to pipe fitting, it is something new to me. I think it's something that I want to explore & continue to gain more knowledge in as a trade.

I'm a welder at wabash international currently I have skills in aluminum welding and steel, Wabash National Youth Apprenticeship - MIG Welding, TIG Welding, reading blueprints, reading a measuring tape, cut and grind metal, using a level to make sure parts are welded to tankers properly, keeping a clean and safe working environment, Wearing proper PPE,

Tell us about any hobbies that have boosted pipetrade-relevant skills:

Like to weld in my free time or help out with projects, I have played multiple years of sports which have taught me leadership skills, working with a team, and listening to instructions, so that I can be the best version of myself. I have participated in two years of project grill. Thus learning how to take a project from concept to reality. I enjoyed the brainstorming to come up with ideas. Then using autocad to create the blueprint. Which becomes the plans in which we start the building process. Creating something from raw materials and troubleshooting the issues to create something real has been a great experience.

What trades-related courses did you take in school?

Building Trades / Construction, Construction Technology, Math-Algebra, Math-Geometry, Metals, Welding, Drafting and Design, Building Trades / Construction, Math-Algebra, Welding, Math-Geometry, Woodworking / Woodshop, Metals, Construction Technology

Why is an apprenticeship an attractive option to you?

Get better with certain skills we'll also gaining experience and techniques from veterans in the trades, On the job training and hands on schooling are places that I tend to excel. Seeing the opportunities that apprenticeship has available to learn different trades to figure out exactly where my skill set lies and pursue a career that suits me well. Working side by side with experienced journey men in my selected career path that will guide me through the training to help me better myself and my skills is very appealing. The

What construction software or technologies do you have training in?

CNC, Inventor

Chief Architect

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I am currently employed at wabash international as a welder and have always had a passion for hands on work ever sense I was a little kid, I have enjoyed working with my hands since I was a little kid, and have found that I learn better in situations where I can have hands on experience. In high school I took 4 years of metals/fabrication class, which I have enjoyed. I used that knowledge to pursue a Youth Apprenticeship at Wabash National where I have been working since February of this year. Through this journey I have decided that I would like to better myself and my career with the opportunities that the Union will provide in pay, benefits, and training.

Full-time, summer employment

Tell us about any jobs where you've learned pipetrades relevant skills:

I was a framer who got first hand experience building houses. This also led me to see plumbers at times starting their rough-ins. Framing also had me measuring and cutting studs and building walls.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I like to plan out projects and see them come together. I also like building different things. This will keep me interested in projects and reading blueprints.

What trades-related courses did you take in school?

Woodworking / Woodshop, Welding, Math-Algebra, Math-Precalculus / Trigonometry, Math-Geometry, Drafting and Design

Why is an apprenticeship an attractive option to you?

It interests me to earn money instead of spend it going to college. I believe that is the better path to go for me as it is hands-on and debt-free.

What construction software or technologies do you have training in?

AutoCAD, CNC, Inventor

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I am interested because college does not seem right for me as I am more interested in hands-on work. The option to grow further after journeyman and foreman is a big reason as well. Also, to be able to accomplish many different jobs under the plumbing umbrella peaks my interest.

Tell us about any jobs where you've learned pipetrades relevant skills:

Currently welding in a fab shop here in town. A lot of the skills I have gained there are applicable to the pipe trades. Some of the many skills include welding, measuring, reading prints, fitting, etc.

I've had 2 other jobs but neither are applicable to pipe trades other than learning to be patient. I used to be a charter fisherman. One of the main things that I have gained from that is how to talk to people.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

One of my favorite hobbies is hunting. There are a lot of skills that can be transferred from hunting to welding. Patience is one of them. If you don't take your time and rush everything, your outcome will not be good.

Another one of my hobbies is welding. Obviously this has a lot of skills that are the same as my job. I don't just think of welding as a job. I think of it as one of my hobbies as well.

What trades-related courses did you take in school?

Welding, Metals, Woodworking / Woodshop, Math-Geometry, Math-Algebra

Why is an apprenticeship an attractive option to you?

I think an apprenticeship is a good decision because you are able to learn from others who have been using their skills for many years. I would like to become an apprentice because I don't want to be "thrown to the wolves" when I first start working in a new environment. I think that local 400 is a great apprenticeship program because you are taking in knowledge which will be needed for your job. Even better, you are getting paid to do it.

What construction software or technologies do you have training in?

AutoCAD, CNC

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I took a shop class my 7th grade year. I really enjoyed that class and it was honestly my favorite one. Then I received to join a welding and fab class as a sophomore. I fell even harder for that type of work. I had my mind set on being a welder for a few years now. And I am currently welding in one of our local shops. I decided to look more into local 400 so then I would be able to do union work. I've never really looked into pipe fitting. But that was really the only option for welding.

Years of Full-Time Work Experience:**Welding Experience:**

MIG - Some Knowledge, Stick - Some Knowledge

Shift Availability:

Full-time, summer employment

Tell us about any jobs where you've learned pipetrades relevant skills:

The only place I have learned skills in pipe trades is at school in welding classes.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I like to hunt, fishing, build trucks, and ride dirt bikes. Building trucks and doing mechanical work helps learn skills that transfer to construction trades. By learning problem solving. Like locating a problem figuring out the solution and then carrying out with the solution to fix the problem.

What trades-related courses did you take in school?

Building Trades / Construction, Electrical Trades / Electronics, Construction Technology, Math-Algebra, Math-Geometry, Welding, Woodworking / Woodshop

Why is an apprenticeship an attractive option to you?

I like an apprenticeship because of the opportunities. I can get paid to learn a trade. Unlike college where I would pay large amounts of money. I like how when you get your journey mans card you can go anywhere you want and work.

The trades is the smartest way to go because of the high pay and the great benefits. And how they help you get set up with a company through your apprenticeship.

What construction software or technologies do you have training in?

CNC

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I'm interested in the pipe trades because I like to weld. I have done many trades. I work at a Desil shop. I also go to skills USA for carpentry for Oconto Falls. Welding and pipe fitting is my favorite trade to do.

I like all the work opportunities and benefits of steam fitting. I want to get my journey mans card in steam fitting.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

One of my favorite hobbies is welding and that will help just Becuase doing it you get better the more you do it. Another one is problem solving, One of my favorite hobbys is welding. I really like to weld when bored and work on getting better when I can.

What trades-related courses did you take in school?

Math-Geometry, Math-Algebra, Metals, Welding, Woodworking / Woodshop, Math-Algebra, Math-Geometry, Welding, Metals, Woodworking / Woodshop

Why is an apprenticeship an attractive option to you?

An apprenticeship is one thing that I would really like because it would help me gain experiences in welding and other trade but also teaches me more skills that I may not have., I would really like an apprenticeship to get experience with being around pipe welding or even just welding. Another reason is I like to learn new things.

What construction software or technologies do you have training in?

AutoCAD, Inventor, AutoCAD, Inventor

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I am interested in the trades because ever since I was young I liked working with my hands and then liked to build things from scratch. Another reason is I like to weld. I am in interested in the pipe trades because after high school I would like a career in underwater welding so I believe that it would be good to get some experience with pipes, Since I was younger I have always liked working with my hands and thinking this way, than I got to middle school and realized in my tech ed class that I really liked building things and working with my hands. Then I got to high school and joined ATECH and got introduced to welding and it really clicked for me. I've also really liked to swim and be under water since I was little so I decided over the past few months that I would like a future in underwater welding.

n/a

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I've been a part of organized sports (football and basketball) since I was 5 which has taught me how to work hard both individually and as a team.

What trades-related courses did you take in school?

Welding, Math-Algebra, Math-Geometry

Why is an apprenticeship an attractive option to you?

It will provide me with on-the-job learning experience with some of the top tradespeople around.

What construction software or technologies do you have training in?

CNC

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I am a senior in high school that would like to enter the workforce and learn while obtaining on the job experience rather than attending a traditional 4-year college. I learn better in a hands-on environment rather than typical classroom.

I see a need and opportunity in trades that I wouldn't normally have if I were to go a traditional 4-year route and would be able to begin working right away.

Tell us about any jobs where you've learned pipetrades relevant skills:

I haven't had many jobs that are applicable to the pipe trades.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I enjoy welding. Laying a nice even consistent bead, it is an art. I also spend time in our auto shop, because I like the problem solving, and trying to find what is wrong.

What trades-related courses did you take in school?

Automotive Technology, Building Trades / Construction, Electrical Trades / Electronics, Drafting and Design, Math-Algebra, Math-Geometry, Robotics, Metals, Welding, Woodworking / Woodshop

Why is an apprenticeship an attractive option to you?

It is quicker way into the workforce, less to no student debt, and with grades like my English and history ones. I don't have bad grades, but they are not my best. I work better hands on, and in things I am interested in.

What construction software or technologies do you have training in?**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

I enjoy working with my hands, and problem solving. With that I also love that it is a high demand jobs, so there will always be a need for someone. There is also lot of room for growth, and so many options or paths to learn.

MIG - Some Knowledge, TIG - Some Knowledge, Stick - Some Knowledge

Shift Availability:

Full-time, summer employment, Part-time, school

Tell us about any jobs where you've learned pipetrades relevant skills:

I have worked on two different farms in the last 4 years. Working on a farm gives you a great range of learning experiences. Knowledge of tools/power tools are gained through use of them. Team work and communication skills are must haves in order to complete tasks such as moving and separating animals. These are applicable in nearly all jobs.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I love welding and spend much of my free time at school in the shop doing this building my skills and knowledge in this area. Outside of school I enjoy working on my truck. I have minimal knowledge when it comes to vehicles. This often provides challenges for me that I enjoy working on and researching to solve. This builds great problem solving skills that can be used in nearly any job.

What trades-related courses did you take in school?

Engineering, Math-Algebra, Math-Geometry, Metals, Welding, Woodworking / Woodshop

Why is an apprenticeship an attractive option to you?

As a hands on learner, an apprenticeship enables me to be out in the field learning trades from experienced people who enjoy and have the same love for them that I do, rather than sitting in a classroom everyday.

What construction software or technologies do you have training in?

CNC

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've always been a hands on learner and worker. As I have gone through highschool, I've loved to be in the shop weather I have a project to work on or I'm helping someone else. I spend nearly all my free time there. I've grown a specific fascination and love for metal manufacturing and welding, which has brought me here.

It would have to be the campground again where i was hands on basicly a aprentic for a master plumber and i was 1 on 1 learning with him.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

In my school i have taken 5 fvtc college credit classes. Ive taken 2 woodworking classes, 2 autobody car classes, and a welding class. i like to work with my hands and in my freetime i work alot at fleet farm and that doesnt help me too much but i have meet and conected with alot of people in the trades like plumbers, electritans, hvac, construction workers, etc.

What trades-related courses did you take in school?

Automotive Technology, Drafting and Design, Math-Algebra, Welding, Woodworking / Woodshop, Math-Geometry, Construction Technology, Building Trades / Construction, Engineering, Metals

Why is an apprenticeship an attractive option to you?

I like to work on things with my hands so when i found out i can work on the site or on jobs instead of going to college i thought "i like plumbing anyway and i dont need to go to college to be one" And i thought that really intrestst me i also like to learn hands on valuble skills that will benifit me later in life

What construction software or technologies do you have training in?**Any Safety Certificates:****Add'l Details:****What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

When i was 13 i got my first job at spencer lake campground. And till i was 15 and i was a maintnenc worker, i was doing a project because we were building a new large bathroom for the campground. And i got the oportunity to work alongside a master plumber and electrician. They showed me the ropes and how i needed to install lines, toilets, showers etc and i enjoyed the work on both the plumbing and electric side but i moslty did plumbing and i did enjoy it and found a intrest in the trade. And over the past 2 years ive been reaserching the job i asked my dad about it and he said it was a great job to get into so after that i decided that thats what i wanted to be.

MIG - Some Knowledge, Stick - Some Knowledge

Shift Availability:

Full-time, summer employment, Part-time, school

Tell us about any jobs where you've learned pipetrades relevant skills:

I have no job experience related to the pipe trades other than a welding class in school or outside hands on work, I have worked at a golf course using equipment to maintain and repair the course which can help with my ability to operate new machines or learn how to do something and use it effectively. I have had multiple other jobs that don't relate to the pipe trades but have taught me lots about communication and work ethic.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I enjoy my welding class in school. I enjoy working my current job operating machinery to take care of a golf course and I enjoy working outside in the elements and working with my hands, I enjoy welding in my class, which can help me learn more about welding. I enjoy learning how to operate machines or equipment for my own knowledge. I am very active in the gym lifting weights which helps with overall strength and health.

What trades-related courses did you take in school?

Automotive Technology, Math-Algebra, Math-Geometry, Welding, Metals, Welding

Why is an apprenticeship an attractive option to you?

I would prefer to start making money right away and not have to go into debt for knowledge. I enjoy hands on learning and find it most affective for me. I am young and want to start making money and start my life., I enjoy working and learning new things and I don't feel that sitting in a classroom to learn is right for me. I enjoy being active and learning hands on and I like the idea of getting paid to try your best and learn something new.

What construction software or technologies do you have training in?**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

I grew up without much knowledge about what college is and if I should go or not so I never decided to make that change. I don't think college is for me and I really enjoy working with my hands and doing hard work. I know there is still good money to be made without the college degree everyone talks about so I think a trade is for me., I have always loved working with my hands and never really felt college was for me, so I am interested in a trade. I think being in a trade will pair well with my abilities to learn and try new things

Any Safety Certificates:**Add'l Details:****Contact Information:**To speak with candidate #12244868, access your Candidate Request Tool at <https://pipetradecareers.com/contractors/candidates/WI400>**Additional Information:**If you have questions on candidates or the Pipefolio process, please contact: Career@UA400.org**Contractor Notes:**

Youth Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

Pipe Fabricator, HVAC/R Service Tech

Work Zones in Preference Order:

Fond du Lac Area (Orange)

High School:

Random Lake High School

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:

Welding Experience:

MIG - Some Knowledge, Stick - Some Knowledge, Flux Core - Some Knowledge, TIG - Some Knowledge

Shift Availability:

Part-time, school year employment

Tell us about any jobs where you've learned pipetrades relevant skills:

I've help weld things with my dad fixing stuff on our farm.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I help my dad work on tractors and truck outside of working on our small dairy farm and I enjoy to tinker on things such as fourwheelers and snowmobiles

What trades-related courses did you take in school?

Metals, Welding, Woodworking / Woodshop, Math-Geometry, Math-Algebra

Why is an apprenticeship an attractive option to you?

Because it allows me to learn about a future career, make money, and be able to learn something other than school work.

What construction software or technologies do you have training in?

AutoCAD

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I want to be able to make good money in a trade which I have a little bit of experience in and would enjoy doing.

Part-time, school year employment, Full-time,

Tell us about any jobs where you've learned pipetrades relevant skills:

I've worked on an orchard using equipment and building my communication skills

Tell us about any hobbies that have boosted pipetrade-relevant skills:

Some hobbies I have are hunting, fishing, building things. They boost me skills because building this is gonna help me because I know what I'm doing and how to change things if they need to be changed and reading measurements

What trades-related courses did you take in school?

Building Trades / Construction, Math-Algebra, Woodworking / Woodshop

Why is an apprenticeship an attractive option to you?

Because it offers help to knowing what career you want to do in the future and it is a good way for younger people to start learning earlier.

What construction software or technologies do you have training in?

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

What interested me in the building trades was the little women that work in the trades and I want to help show that not all male jobs are only for them. What also interested me in the building trades was how wide spread the welding industry is and the many places you can go.

I have worked with my dad in his shop and welded before

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I do a lot of stuff in the shop and have taken a welding class at school before and it seemed interesting.

What trades-related courses did you take in school?

Woodworking / Woodshop, Metals, Welding, Math-Algebra, Math-Geometry

Why is an apprenticeship an attractive option to you?

My parents have a business that i help at and do work with them. I also took welding class in school and thought the trades would be interesting to me

What construction software or technologies do you have training in?

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I am looking into going into the trades and do not want to go to college or do not want to go to school for too long. The trades seem like a good career to get into at a young age because you can do them for a lifetime.

I am currently a junior in High School and would like to get a good job by the end of this school year or even during this year.

Tell us about any jobs where you've learned pipetrades relevant skills:

I was a Youth Apprenticeship at Case New Holland (CNH) in St. Nazianz, I was doing all fixture welding. I was employed there for six months. This was my first jump into the real world welding. At CNH I learned the basics of the basic for welding.

My second Youth Apprenticeship was at M-B aebi Schmidt in Chilton. I was employed there for two months. I was doing layout welding, I liked how each day was a different part to weld.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I have been racing in the four cylinder class for about two years. I have accomplished rookie of year and sixth in points in 2023. In 2024 I accomplished fourth in points. Between races I work by self and with my father to make the necessary repairs which often include welding.

What trades-related courses did you take in school?

Metals

Why is an apprenticeship an attractive option to you?

To learn on the job while earning an income

What construction software or technologies do you have training in?

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I became interested in the field of welding as a young girl. Both my grandfather and father are welders by trade. I enjoy working with my hands and having the satisfaction that I have created or built something.

I became interested in the Pipe trades after attending a Women in the Trades event last school year. The physical nature of the job and the idea that each day brings a new challenge appeal to me.

Unfortunately, I have not had any jobs regarding anything about the pipe trades.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

My skills and hobbies offer a lot of advantages in various roles and industries. As someone who is an effective communicator, I always make sure to ask questions and seek clarity to ensure that I'm doing things correctly. This attention to detail is essential in fields that require precise instructions and teamwork. Being an advocate for myself and others also helps me create a supportive environment, where I'm always ready to assist those who are struggling or find someone with more experience to help out. My hard-working and analytical nature allows me to approach complex

What trades-related courses did you take in school?

Math-Algebra, Math-Geometry, Math-Precalculus / Trigonometry, Automotive Technology

Why is an apprenticeship an attractive option to you?

A youth apprenticeship is highly attractive to me because it offers a unique opportunity to gain hands-on experience in a specific skill or trade. The practical, on-the-job training provided through an apprenticeship allows me to apply theoretical knowledge in real-world scenarios, which is invaluable for mastering a craft.

What construction software or technologies do you have training in?**Any Safety Certificates:****Add'l Details:****What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

I am interested in the pipe trades because of my hands-on experience with plumbing at home. My father has always been the go-to person for fixing things around the house, and when we tackled plumbing projects together, I found that I really enjoyed the process. Cutting copper pipes and attaching new ones was not only satisfying but also gave me a sense of accomplishment. That experience sparked my curiosity about the larger world of pipe trades, and I want to explore the technical skills and problem-solving that the profession offers.

In addition to my interest, I am a hard worker who takes pride in doing a job well. I never stop until I am satisfied with the results, and I know that this determination will serve me well in a field like plumbing, where precision and perseverance are key. Whether it's ensuring a system runs smoothly or so

I have also taken and am taking several Technologie educations classes that cover construction, drawing, and metal work. I am continuing to look for opportunities to increase my work experience.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I have always had an interest in building models like Legos and other plastic models. Building these models has made me good at following instructions and keeping an eye out for important details.

I have also taken and am taking classes in high school that are teaching me how to work with wood and metal and their respective tools. In these classes I have learned how to work with and around other people safely and efficiently.

What trades-related courses did you take in school?

Automotive Technology, Building Trades / Construction, Metals, Woodworking / Woodshop, Welding, Math-Algebra, Drafting and Design, Math-Geometry

Why is an apprenticeship an attractive option to you?

An apprenticeship is a very enticing option for me because I would be able to get payed to learn. This would allow me to start saving up to get things like vehicles and housing very early on in my life.

I also prefer to do hands on activities to learn rather than sitting still for hours listening to power point presentations.

What construction software or technologies do you have training in?**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

I became interested in the building trades when I realized that I wanted to work outside for my career. I also enjoy working with my hands and actually doing physical work rather than typing on a computer.

I became interested in the pipe trades specifically when I took a class in junior year where I was able to weld and work with metal. I realized that I liked working with metal more than other materials like wood and plastic.

Tell us about any jobs where you've learned pipetrades relevant skills:

I work for a guy in door county where we maintain his properties. We will have to deal with small issues that include plumbing and hvac. I have my own business besides this so I am working just about everyday in the summer months. I am definitely willing to work hard and always want to better myself., I work for a guy maintaining his properties. We have to do a little bit of everything and I have got a little experience in trade type work at his places. Also while working this job and running a business, I am working just about everyday in the summer months. I like to think I work hard and take pride in it.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I currently run a business in the exterior cleaning field, I have gained many skills from that, whether it be from communication to keeping track of all my paper work. I have had good success with my business but it is seasonal in Wisconsin so I plan to keep it as a side business as I enter the next chapter of my career., I own an exterior cleaning business. I run the business entirely by myself meaning I deal with customers, actually doing the work, billing, estimating, and paperwork.

What trades-related courses did you take in school?

Math-Algebra, Math-Geometry, Math-Precalculus / Trigonometry, Woodworking / Woodshop, Math-Algebra, Math-Geometry, Math-Precalculus / Trigonometry, Woodworking / Woodshop

Why is an apprenticeship an attractive option to you?

I feel that the apprentice offers you a way to have a very successful career without paying tens of thousands for schooling. It allows a lot of hands on learning which I believe I learn best from., It is a great way to learn without paying for schooling. Actually getting paid to learn it awesome compared to paying for a 4 year degree from a big university.

What construction software or technologies do you have training in?**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

I think it is a great opportunity to get experience right away and getting paid to learn is huge. It's reversed from a college setting where people pay to learn. The pay is great and I like the working hard doing hands on work., I'm interested in the apprentice program. Not spending a lot and actually making money to learn. The wage and benefits are great as well. I love to work with my hands and always work hard.

Tell us about any jobs where you've learned pipetrades relevant skills:

I have never had a job that directly relates to the pipe trades.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

Some of my hobbies include playing soccer, fishing, and being outside. I played soccer freshman year for Preble and also my sophomore year. I was the JV1 captain having an undefeated season going 18-0 and earned defensive MVP my freshman year. I can use these skills I have gained playing soccer with a team to be a good team player in a work environment, be a team leader, and solve problems that I may face from day to day.

What trades-related courses did you take in school?

Math-Algebra, Welding, Math-Geometry, Metals, Woodworking / Woodshop

Why is an apprenticeship an attractive option to you?

An apprenticeship is an attractive option to me because it can help open my mind to other paths that I may not have known of otherwise. I also like that it can help me expand a knowledge base that I already have to help further my education in something that I have an interest in. It serves as a good learn on the job experience and will help me get ahead in life while having something I enjoy.

What construction software or technologies do you have training in?

CNC, AutoCAD

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

What interested me the most would have to be welding. I started welding my freshman year, and continued my sophomore year and I'm enrolled in a dual credit NWTC class at Green Bay Preble High School. I really enjoyed all that I could learn while doing something that I really enjoyed but what really got me into welding was my teacher, Weston Berndt. He showed me all of the potential and even more that I can learn and do. When I first started mig and stick welding,

I thought it was super fun and I got pretty good after doing it for some time which made me eager to learn even more about this career opportunity. I just started my junior year, and I've been looking forward to this ever since I learned about it.

Years of Full-Time Work Experience:**Welding Experience:****Shift Availability:**

Part-time, school year employment

Tell us about any jobs where you've learned pipetrades relevant skills:

Right now, I am in school and in football. I can tell you from football, they did put me in five different positions. This helped me enhance my memorization. I had to learn 5 to 10 different plays than everyone else.

I also run my own lawn mowing business. I just turned 16 in June and have not had the opportunity to have a job yet, besides the lawn mowing/yard work. Working hard and giving it your all is worth the result you see in the end. My lawn mowing business has taught me hard work and dedication, which I know you need in the trades.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

My main hobbies right now are sports and my small business I am running. I am the running back on my football team. I practice hard and have to remember all the plays. I feel like memory plays a big part when you're working with your hands and in the trades.

My other hobby would be my lawn mowing/yard work business. I started about a year ago, I made my own business cards. I have plenty of client and keep getting more. I feel I am some sort of perfectionist when it comes to yard work now. When I put in the hard work, I love to see the clients face when I'm done.

What trades-related courses did you take in school?

Math-Algebra, Math-Geometry

Why is an apprenticeship an attractive option to you?

An apprenticeship is an attractive option for me because I love working with my hands and I enjoy the satisfaction of completing a project. I feel like when I can't figure something out, I find a way to figure it out. I enjoy learning and always want to learn more. I feel like if I am guided in the right direction I will become great at what I do.

Also, all my uncles were in the trades. Whether it was electricians, plumbers or welders. They always give me the benefits of being in a trade. Such as stability, income, learning

What construction software or technologies do you have training in?

What interests me in this career field is the hands-on learning. To be honest, I have never been a fan of school, but have always maintained good grades. I always enjoy when we do hands-on projects. I also know the world needs people in the trades. I enjoy working and then seeing my accomplishments.

My passion for traits came from my mother. She has raised me, making sure I was able to use my hands and memory. She had me fixing things and putting things together since I was 8. If something broke, she told me to figure it out. Eventually, I would figure it out, even if it took hours. I feel like with plumbing, I am able to help someone fix something. Then, I get the satisfaction of seeing the work I accomplished, and the customer satisfied.

Years of Full-Time Work Experience:**Welding Experience:****Shift Availability:**

Part-time, school year employment

Tell us about any jobs where you've learned pipetrades relevant skills:

I do not have experience in the pipe trades. However, I am a hands on learner, quick, respectful, and have an eagerness to learn. It took me a long time to figure out what I wanted to do. I knew that I wanted to use my hands and I wanted to be proud of my work. I also wanted to be part of something bigger. A team, that would help me grow.

I also believe my lawn business will/has helped me. I have experience with hard work, work ethic, and being able to work with a variety of people. This business has taught me patience, critical, thinking, and perfection.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

Right now, I am a junior in high school. Football season just started and I also play basketball. I would say sports take up a large amount of time. I practice football six days a week and I also have a basketball trainer twice a week. This helps me with memorization and attention to detail.

My other hobby would be my side business, which is all types of yard work. I made my own business cards and market myself. I continue to get new clients by word-of-mouth. This has helped me learn work ethic, hard work, and communication with clients.

What trades-related courses did you take in school?

Math-Algebra, Math-Geometry

Why is an apprenticeship an attractive option to you?

I am attracted to an apprenticeship because I know there are many benefits. I will be learning hands-on and in class. I will be able to look at the work I did and be proud of what I accomplished. There will be room for advancement and I will be able to prove myself through my work.

I am being raised by a single mom. Anytime, since I was eight, if anything broke/needed to be fixed, she'd have me do it, still does. I would research it and then fix it, even if it

What construction software or technologies do you have training in?

I feel I excel with hands-on-training. To be honest, I have never been a fan of school. However, I keep my grades up and know how important it is. I want to join the trades because I know my passion is working with my hands and memory.

I choose to go into plumbing because I know I am ensured job security, advancements, and I know it will keep my body and mind strong/in shape. I also know that I am passionate about the work I do, and am very personable.

Years of Full-Time Work Experience:**Welding Experience:**

Stick - Some Knowledge

Shift Availability:

Part-time, school year employment

Tell us about any jobs where you've learned pipetrades relevant skills:

I have reached out to multiple welding and machining companies and went in for an interview for one of them and they said they would love to have me but they had already hired too many people but want to keep me on their radar. But unfortunately I have not had a job in this work field yet.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I love going into my garage and taking some scrap pieces of wood and just building random objects or trying to build little boxes to store things in. During my metals class we could come in after school and work on a personal project and I would go in and find some scrap metal and practice my welding and also used some sheet metal and made a tool box which was a lot of fun to do. I think this could help me in the trades because it gave me determination and also thought me how to persevere through tuff challenges and work through them.

What trades-related courses did you take in school?

Welding, Metals

Why is an apprenticeship an attractive option to you?

I want an apprenticeship because it can teach me real world skills for a career I would like to pursue and give me a wider skill set to work with for different classes while I can still go to school and learn at the same time without having to loose time on one or the other. It is also an attractive option because if I were to get an apprenticeship, after i graduate school, I would have experience in the trades and help me find what career fits me best.

What construction software or technologies do you have training in?

I have taken a welding class and a beginner construction class in school and it was a lot of fun and was very interesting to me that you can take two pieces of metal and join them together and how you can build so many things with blueprints and some manual labor. I think that going into the trades would teach me some discipline as well as give me multiple opportunities to meet new people and learn new skills and help me learn more about this career.

Years of Full-Time Work Experience:

Welding Experience:

Shift Availability:

Part-time, school year employment

Tell us about any jobs where you've learned pipetrades relevant skills:

I have not had a job that has given me skills to the pipe trades. I have done asphalt sealing which is hands on but not really any skills for the pipe trades.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I play basketball and football for Kimberly Highschool and although they might not be a direct correlation to the trades I think I can use a lot of the skills i've learned to use towards the trades. Something in particular that I think is a great thing i've learned is not being afraid to ask questions. In football there is plays that sometimes are confusing and it's no big deal to ask a coach quick. Same goes for working in the trades, there are people all around who are willing to help when your confused.

What trades-related courses did you take in school?

Building Trades / Construction, Electrical Trades / Electronics, Math-Algebra

Why is an apprenticeship an attractive option to you?

I really want to try something new and see where it takes me. I enjoy taking classes in our shop at the high school and i'm very interested in learning about a new career opportunity for me. Being able to learn something new that could benefit me while getting paid sounds like a no brainer to go out and try it. A apprenticeship also sounds like something for me because I like to be working hands on and be able to work with other people who are also passionate about their jobs.

What construction software or technologies do you have training in?

Laser Scanning

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

What Interested me to try a career in the pipe trades was the idea to be working hands on and using skills that most people don't have. Being able to do a hands on job for me is something that I really want to pursue in my future.
Another reason I am interested in this career path is I know a few people who are in the career and love it. Being able to learn and get paid at the same time is something that really stands out to me. The people that I know in these trades really encourage me to try it out because they enjoy it and think I will to.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Definitely the money i have looked at multiple careers through the college route but none of them seem like the right fit in the world today. With inflation and with how much housing is now, I want to have a career that is gonna be good for me and make me a pretty good amount of money. I used to do physical therapy because it is was I wanted to do for awhile now but with most people already knowing how to lift or heal from an injury I would be wasting more money then making it., The money, I have looked at multiple careers thought the college route. But none of them seem like the right fit in the world today. With inflation and seeing how much gas,housing,food,ext is now,I want to have a good and string career that is gonna be good for me and make money. For awhile I wanted to do physical therapy because I wanted to help people with there injury they cant do themselves, but I took a deeper dive into it and found out I'll be wasting more money then making it

Welding, Engineering, Metals

Why is an apprenticeship an attractive option to you?

Getting me on the job experience and in a field im intrested in

What construction software or technologies do you have training in?**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

I am interested in the trades for the different experiences it has to offer. I grew up in a house and with other family members working in the trades, and listening their stories and experiences makes me think that this is something that I would enjoy also. I believe i would enjoy working in the pipe trades as I enjoy using my creative side and working hands on

Tell us about any jobs where you've learned pipetrades relevant skills:

Ki in bondual, i work in the weld fab department for the summer of 24'

Tell us about any hobbies that have boosted pipetrade-relevant skills:

Some of my hobbies are hunting and fishing. I love helping my grandpa out with his excavating business, this helped me be able to learn more about machines. I also like to help my uncle do concrete work, this helps me by learning more about tools and measurements. I also like to help out on my distant family's farm, this helped me become the person i am. It taught how to be clam during a stressful situations, along with being able to work in any work conditions.

What trades-related courses did you take in school?

Engineering, Math-Algebra, Math-Geometry, Metals, Welding, Building Trades / Construction

Why is an apprenticeship an attractive option to you?

It will help me get into a trade and find something to do after high school. It will also let me experience hands on activities outside of school in the "real world"

What construction software or technologies do you have training in?

AutoCAD, CNC

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Growing up my grandpa owned an excavating company. My whole family is in the trades and it is something i always wanted to do while i've been in high school. I currently work at Ki in the weld fab department. I love the trades. Outside of work my uncle is a plumber I have helped him do some work on the side. My other uncle does concrete on the side i also enjoy helping him with that. I love the benefits the trades has to offer.

Years of Full-Time Work Experience:**Welding Experience:****Shift Availability:**

Full-time, summer employment, Part-time, school

Tell us about any jobs where you've learned pipetrades relevant skills:

I have not had any jobs related to this

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I like the outdoors such as hunting and fishing. Doing both of these hobbies requires me to plan ahead before a hunting or fishing trip, gather my equipment and also use it safely to accomplish the goal. This is a similar skill needed in the trades field. I also enjoy small construction jobs such as helping my grandpa with repairs on his duplex he rents or at his home. I also do small construction jobs for my hobbies such as building new tree stands.

What trades-related courses did you take in school?

Math-Geometry, Math-Algebra

Why is an apprenticeship an attractive option to you?

I enjoy working with my hands rather than a classroom learning environment. On the job training appeals to me rather than spending years in a classroom learning a degree.

What construction software or technologies do you have training in?**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

I really became interested because most of my friends and family are either in trades or wanting to be in a trade. Also i'm really not interested at all to go to college because I think I would dislike it. I also feel that there is a lot more opportunities within the trades than other jobs. I also enjoy lots of hands on work and activities in general. Another reason i'm interested is the skills you learn from this work. These skills will help with other aspects of life rather than just the trade in general.

Tell us about any jobs where you've learned pipetrades relevant skills:

No experience, just looking to learn and get started.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

Doing sports, volunteering, and helping my dad build a house taught me a lot of skills that transfer to construction trades. The skills I learned from sports are teamwork, leadership, responsibility, and communication. The skills I learned from volunteering to feed my starving children are organization and attention to detail, which is also important on a construction site. I have hands-on experience in construction from helping my dad build a house. Watching and helping him put things together helped my technical skills and problem-solving.

What trades-related courses did you take in school?

Woodworking / Woodshop, Math-Precalculus / Trigonometry, Math-Geometry, Math-Algebra

Why is an apprenticeship an attractive option to you?

A apprenticeship is an attractive option to me because I like working with others. Also I like working with my hands and using my strength and brain to an advantage to help me succeed. Another reason an apprenticeship is attractive to me is because I want to learn new skills that can help me in the future. Lastly I always wanted to work work in an apprenticeship because I love helping around my community and using my hands.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**What construction software or technologies do you have training in?**

Working hands on, helping my community and learning new skills.

Tell us about any jobs where you've learned pipetrades relevant skills:

I've only had one job that in a way relates to pipe welding. I have been working at Robinson Inc. For almost a year and a half now and throughout the trainings i've done there and jobs i've worked on, I got to weld exhaust piping for the units and other Piping for venting. I absolutely loved doing that style of welding work and that's another reason why I want to be a pipe welder.

While I was learning to do those style of pipe welding it was mostly flux welding and mig welding. I learned a lot about speed and the angles of your cup while welding

Tell us about any hobbies that have boosted pipetrade-relevant skills:

One of my main hobbies is riding in my side by side, me and my dad built it and fabricated the cage on it and that taught me a lot based on pipe fitting and the angles of all the bars. That's what sparked me to become a welder and have the building mindset.

Some of my other hobbies are hunting, fishing, boating, love going to off-road races, and I love working on my truck. I love the outdoors when i'm not working that's all i'm doing is outside doing something. I also love building things. Like for example I made a

What trades-related courses did you take in school?

Engineering, Math-Algebra, Math-Geometry, Metals, Welding, Woodworking / Woodshop, Automotive Technology

Why is an apprenticeship an attractive option to you?

My first thought of joining is the process in which you can move up and get rewarded for a hardworking, work ethic, this is something i've always wanted to do and pursue a career doing. My mindset is I'm young and I want to work my way up and work very hard to help the company I would work for.

Another reason would have to be the learning experience and people I would meet along

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I think what interests me the most is going to different job sites and being able to fix the problems or install piping around the building. From the experience I have welding i've always liked welding pipe or anything round, just is something i've found joy in and want to make my career out of it. I think something else that interests me is just the fabrication side of things where I can use the knowledge and skills I have and get what's needs to be done, achieved in a timely manner.

What's interests me the most in the specific trade it self is how it is all done and knowing what the end result is, is a good feeling. I think with having knowledge about pipefitting/pipe welding, I will benefit from it when I need to fix things on my own just having that experience and understanding of the right way to do it is a great skill to have.

What construction software or technologies do you have training in?

Solidworks

I never had a "job" for skills I mainly learned by my stepdad with stuck welding.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

So in my free time at home I would find scrap metal and just weld on it I practice side by side and the "J" moves and just moving down (or drag) I practice when I can when ever I am done working for others.

I like to work especially on the farm get to have hands-on experience on the farm and get to build a few things and work on the tractors.

What trades-related courses did you take in school?**Why is an apprenticeship an attractive option to you?**

If I continue to work and show others what I am worth of and work for others they would think highly and would Want me to come back again and work (sorry it's not two paragraph)

What construction software or technologies do you have training in?

AutoCAD

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Well, I am only 14 years old, and I am very interested into hands-on experience, I am also interested in to the welding on to pipes and more I am still trying to learn.

So, I think being a plumber would be pretty cool or a steam lifter, but I will have to see in the future. The Plumber interested me because of installing safe drinking water and waste water and etc. I get to work with pipes and give others safe water and have a way to Release there waste.

The steam lifter interested me because I love repairing stuff and I get to repair pipes that carry steam, chemicals etc. and assemble and maintain the pipes aswell. So that's what interested me in to those two positions.

Why is an apprenticeship an attractive option to you?

I like the idea of learning and getting paid at the same time. I learn better by doing and not just sitting in a classroom. I want to be able to learn and not be left debt afterwards., I am excited to learn new skills while being able to practice them immediately. I like the idea of being taught hands-on rather than sitting in a classroom. Being an apprentice will allow me to learn from people in my career field and give me the best understanding from people who have taken the same path I will. Along with learning new skills, I like

What construction software or technologies do you have training in?

CNC

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I am interested in jobs that are hands on. I enjoy learning on the job and learning new skills. My grandfather is a general contractor and he has helped build my interest in a trade job.

In the classroom I am a good student but not looking to go the four year route. I am a hard worker and willing to learn any skill needed. I like the idea of working on new projects everyday. Plumbing is very hands on and that interests me., I am applying for the Apprenticeship Program because I am interested in a career in plumbing. I enjoy working with my hands and learning on the job. I understand instructions well and am a very attentive listener. I am a hard worker and will put all my energy into completing projects.

I enjoy being part of a team and working with others to complete a common goal. I strive to do my best for myself and my team and to finish things on time. I work well with others or independently and always seek constructive criticism.

I look forward to working with people who have experience and knowledge. I want to

I learned some welding skills in high school., I've learned for what I know in pipe trades in school. We have done stick welding and in college right now. We are going to start doing more pipe welding in 2nd semester.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I am a fast learner and I am also a visual learner. I can learn on the job and be great. Patient is key but everything will be great in the end., I do weld in my free times here and there now that I bought a welder. But most of the times, I would work on my car or my friend's cars. Whether it's doing exhaust work or cutting mufflers and making straight pipes. Or wiring up new speakers up. I've learned to use a lot of power tools over the years and all the safety that comes with it. And yes.. I did learn the hard way, but now I learned from my mistakes and learned the safety plays a big role in power tools. Whether it's a small or big tool, safety always

What trades-related courses did you take in school?

Welding, Metals, Robotics, Woodworking / Woodshop, Welding

Why is an apprenticeship an attractive option to you?

It will help me save money and it will help me improve for my career path., I love the idea of getting paid while getting taught. As of right now, I am not in a high paying job, so I want to do everything that I can to earn more. I strive to always make up my time and others and to not waste any opportunity that is available.

What construction software or technologies do you have training in?

CAD

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I want to be a welder and learn to become a great and better welder. I would like to start right away and I am in school but will try my best to put in as much hours as I can. I am looking forward to seeking this as my career path and looking to become a great worker and a great person overall., I never knew how much I liked welding till, I got into high school. I've welded in high school for awhile and realized that welding is actually really fun. Not only was it fun, but my high school welding teacher. Steve Bartels from Chilton High school, would just tell me all the great things in welding, If I go take that career path. He talked about the pay, benefits, traveling, hands on work. All of those things clicked for me and made me realize. That I need to do more. I am currently in Fox Valley Tech for one year. But trying to pursue into a bigger step in life. I hope I get accepted into local 400.
