

Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

Plumber, Steamfitter (Pipefitter), HVAC/R Service Tech, Pipe Fabricator

Work Zones in Preference Order:

Appleton Area (Green), Green Bay Area (Yellow)

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:

7-9

Welding Experience:**Tell us about any jobs where you've learned pipetrades relevant skills:**

I was an industrial maintenance apprentice about 7 years ago that I had finished. It consisted of working with steam pipes. Rebuilding mac valves, replacing and fabricating small braided steel hose. And diagnostic work. Unfortunately this was with a private company so I received no credit towards apprenticeship outside of the company.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I do the maintenance on my vehicles as well as my home. I enjoy building, and fixing things.

Shift Availability:

Full-time, 1st Shift (Days), Weekends, Overtime

Post HS Education:

No

Add'l Edu. Details:**What trades-related courses did you take in school?****What construction software or technologies do you have training in?****Any Safety Certificates:****Add'l Details:****Why is an apprenticeship an attractive option to you?**

I would like to get straight to work while learning a trade. I have found I pick up skills the best while active applying them.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I enjoy working with my hands and using my knowledge, to achieve results. I have been a truck driver for the last 5 years and haven't found it as fulfilling as when I had positions where I was working with tools. I have experience as a industrial maintenance technician, and found that the steam work was my favorite part.

Disciplines of Interest: Plumber, Steamfitter (Pipefitter), HVAC/R Service Tech, Pipe Fabricator
Work Zones in Preference Order: Green Bay Area (Yellow), Appleton Area (Green)

Relevant Experience Level: None. Nothing even close-but I'm a hard worker and willing to learn!
Years of Full-Time Work Experience: 7-9

Welding Experience:

Tell us about any jobs where you've learned pipetrades relevant skills:

I haven't worked in the construction field outside of attending the carpentry program at NWTC. I'd have a lot to learn but through my work experience I have a good track record of being responsible and punctual.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I frequently help family with home renovation projects so I'm no stranger around some power tools. I've been through the carpentry program at NWTC but didn't pursue it out of the classroom. My work experience is primarily in restaurant industry so that could transfer to the skills of needing to be attentive and organized in a fast pace environment. Through that I've also become very attentive to detail to make sure service is up to standard. I believe these are qualities important in any job I take on to ensure all work is done to the best and fullest of my abilities.

Shift Availability: Full-time, Overtime, Weekends, Part-time, 1st Shift (Days), 2nd Shift (Nights)

Post HS Education: Other Relevant Courses & Certifications, Some 2-year college

Add'l Edu. Details: NWTC Carpentry course, One year of college (basic credits)

What trades-related courses did you take in school?

What construction software or technologies do you have training in?

Any Safety Certificates: First Aid / CPR

Add'l Details:

Why is an apprenticeship an attractive option to you?

I've always been a hands on learner because I very much prefer to see the work being done in front of me in order to understand it better. Books only teach you so much when you can't visualize the way their information is applied. Not only is it the way I learn best but I also have a situation in which I need to keep making money as I go to survive. Without a steady income bills would fall through which I can't let happen when my baby girl is being born this March. Developing skills and career while being payed is the best

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I had gone to NWTC after a year of college and joined the carpentry program. Through experience in that I realized I didn't really enjoy doing it for work but while there I was able to visit various other trade programs to get more insight about the work they do. Plumbing and Electrician programs seemed a much better fit to me and I was much more interested. I've been hesitant to start and looking for an apprenticeship in the past due to frequently moving around Wisconsin for the past 3-4 years. Now things have changed and I have a child on the way this March. I won't be traveling as frequently and would like to build my career in pursuit of supporting that family along with my own self interest in the trade. It would mean the world to secure a future in plumbing.

What trades-related courses did you take in school?

Math-Algebra, Math-Geometry, Welding, Woodworking / Woodshop

What construction software or technologies do you have training in?**Any Safety Certificates:****Add'l Details:****Why is an apprenticeship an attractive option to you?**

Why an apprenticeship is a attractive option for me is how you get to work alongside with people who've been in the industry for 20 plus years. That is something I take pride in, having the opportunity to work with people with so much skill is such a fortune. You get to learn so much from them on how there are different ways to overcome obstacles while learning new techniques to overcome them. Opportunities like that don't come very often so getting front seats is the one of the best ways, for me, to learn different welding tips

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

What interested me in a career of pipetrades was how fascinating it was, it was something that I've never heard of while being in high school and trying to figure out what I wanted to do after high school. 6 months in, and taking the NWTC welding classes definitely has drawn me in more and my involved to learn more and more about what type of welds are out there and the different techniques out on the field the people use to overcome problems that I wish to learn and to overcome as well.

Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

Steamfitter (Pipefitter), Pipe Fabricator

Work Zones in Preference Order:

Appleton Area (Green), Fond du Lac Area (Orange)

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:

10+

Welding Experience:

Flux Core- Skilled, MIG - Skilled, TIG - Some Knowledge, Stick - Some Knowledge

Tell us about any jobs where you've learned pipetrades relevant skills:

I started welding full-time in 2014 at Jay manufacturing in Oshkosh, Wisconsin. I started on a robotic welder and from there worked my way up into the weld shop where I welded full-time on a MIG welder sometimes stick and sometimes TIG. In 2017 I started a job at proto one in winneconne, Wisconsin which is where I was training to become a CNC machinist for a year and a half. I worked at Switchgear Power Systems fabricating and welding galvanized switch gear. Currently I work at American roller company welding ASME pressure vessel rolls.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I am big into the outdoors which often means having to build something or repair something. I've built fishing shacks hunting blinds. I've welded treestands and repaired broken trailers. Also, for the last 4 years I've helped assist in coaching my son's youth football team. Proud to say we took home the championship the last two years.

Add'l Edu. Details:

Associates in Arts & Science, Welding Industrial Technical Diploma

What trades-related courses did you take in school?

Welding, Math-Precalculus / Trigonometry, Math-Algebra

Why is an apprenticeship an attractive option to you?

An apprenticeship is a good opportunity to learn from someone who has more knowledge and skills. Their skills and knowledge would be an absolute asset to being a successful welder and being able to problem solve in a different mindset. It gives opportunities to improve my skills and what I may be lacking in and needing more help. With an apprenticeship I will have the skills and knowledge to further my career and one day lend it to another who may follow my steps.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

When I was in high school, I took a class for metal working and we did a bit of welding in the course. I had an interest in welding from that point on and continued to LTC for a Welding Industrial Technical Diploma to gain more exposure to welding. I have always heard about pipe fitting and did not find a job in that field nearby at the time of my graduation. I've always found pipe fitting and iron works to be a unique way learn to be a better welder overall. As these two types of welding are ones that never have exactly the same thing happening day to day. Keeping the workday more enjoyable and challenging.

Metals, Robotics

What construction software or technologies do you have training in?

Solidworks, AutoCAD

Any Safety Certificates:**Add'l Details:****Why is an apprenticeship an attractive option to you?**

I feel as though an apprenticeship is the best possible way to really learn what it is to be successful in my career. I've always learned best hands on under the guidance of someone with actual how to and hands on experience vs the typical classroom setting. I feel like it's a much better way to set yourself up for success as often in trades the classroom application is much different than in reality or actual applications.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've always had a drive towards fabrication. I have now spent the last year and a half working for a performance automotive shop and fabrication is one of the more involved and enjoyable tasks I do anything from even preplanning to fit around all sorts of objects in an engine bay to actual pie cutting and fit up all the way to actually burning it all together it gets your mind going for hours to overcome obstacles.

None. Nothing even close-but I'm a hard worker and willing to learn!

Years of Full-Time Work Experience:

7-9

Welding Experience:**Tell us about any jobs where you've learned pipetrades relevant skills:**

As a truck driver for five years, I developed skills that apply to the pipe trades, including attention to detail, problem-solving, and working with tools. I maintained equipment, followed safety protocols, and managed logistics, all of which are essential in pipe work. My DIY projects have also given me hands-on experience with basic plumbing and home maintenance, further building my technical skills. These experiences have prepared me to learn and succeed in the pipe trades.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I enjoy weightlifting, DIY projects, golfing, and deer hunting, all of which have built skills useful in construction. Weightlifting improves my strength and endurance for physical work, while DIY projects sharpen my problem-solving and hands-on skills. Golf teaches patience and precision, and hunting requires discipline and adaptability, both important on a job site. These activities have helped me develop the physical and mental skills needed for construction work.

Tell us about any jobs where you've learned pipetrades relevant skills:

I was an operator/ laborer for Kinnard Farms. In that job I encountered a lot of making things work for right now. As we would break the chisel plows I welded them back together until it could be fixed the right way. I've also welded in headlocks in a few cattle barns.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

In my free time I like working on vehicles. I've had trucks pulled down to the frame to repaint them. welded in patches on the frame. You get a little bit of it all.

Add'l Edu. Details:

I have a diesel tech degree. I completed all possible metal shop classes aswell

What trades-related courses did you take in school?

Automotive Technology, Math-Algebra, Math-Geometry, Metals, Welding, Woodworking / Woodshop

What construction software or technologies do you have training in?

AutoCAD

Any Safety Certificates:**Add'l Details:****Why is an apprenticeship an attractive option to you?**

It gives you opportunities. I think working with a company from the start shows your dedication and if you put in the effort they give it back. Apprenticeships are usually great to learn from too.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've liked welding for a long time. It's a skill I have but never perused. I recently became laid off for the winter and realized I need a year round job to keep myself busy and active.

Tell us about any jobs where you've learned pipetrades relevant skills:

The foundation of everything I know came from working in residential construction. Using hand tools and machinery every day left me with a solid skill-base and taught me awareness on a job sight.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

Sports have always been a love of mine. After my formal competing ended, I have been coaching where and when I can for the past 5 years. I have coached Pole Vault at both Fond Du Lac High School and UW Oshkosh. Through sports, I learned that accomplishing goals with others is very rewarding and enjoyable. I have also learned that working with others can be challenging at times, but it's important to see the big picture and understand that the goal you are working towards is what's most important. I also learned how to receive instruction and impart my knowledge to others.

Why is an apprenticeship an attractive option to you?

An apprenticeship is what I want because it leads to a lifelong career of learning and becoming a professional in your field. I believe that my aptitudes are best suited for the trades because of the way I was raised and the skills I gathered and as a young man.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

My background is primarily in residential construction. I learned a lot of valuable skills over the years and enjoyed that time greatly. My mid-twenties have been spent trying my hand at sales and seeing where that could take me. While it has been productive, I don't believe that its really who I am and where my aptitudes are best suited. I want to get back to building real trade skills and becoming a professional. I have been working full-time while I completed a Welding and Fabrication Certificate from Gateway Technical College in Racine. I was immediately drawn to working with metals and after discussing with my instructors, we came to the conclusion that the pipe trades are the best place for me to grow.

Why is an apprenticeship an attractive option to you?

It allows me to "earn while you learn," gaining valuable hands-on experience in a chosen field while receiving a salary, essentially providing a pathway to a career.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

It offers a hands-on, problem-solving approach to work, where I could use my mechanical skills to build and maintain essential systems within buildings, while also providing the stability of a high-demand, well-paid trade with opportunities for continuous learning and challenges on different project.

It's a wonderful way to get into the trades and learn along the way to build my skill set and quality of work, to learn from someone who's really good at what they do to ensure the best learning experience and skill set improvement

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I love working with my hands and building anything I can, I'm not afraid of dirty work, although I currently do not have any welding or pipe fitting experience. I have some general construction experience, which lead me to a recommendation from my uncle who I believe is going through this program. He loves and enjoys what he does, seeing as I love construction I am adamant that I would enjoy this as well, I'm unsure of what the pipe trades entirely entails, but it is very intriguing.

Welding Experience:

Flux Core - Some Knowledge, MIG - Skilled, TIG - Some Knowledge, Stick - Skilled

Tell us about any jobs where you've learned pipetrades relevant skills:

After I graduated from welding school I worked at a place that welded on Industrial silos. We worked with a lot of wire feeding and stick welding processes. I was able to learn and get some valuable real world experience in the trades. There we worked on a lot of massive projects as well as some small projects here and there. We made sure to keep our work areas clean and safe to prevent injuries. And I was able to learn a lot from my coworkers who had been in the trades for many years and I took all the lessons and advice I could so I could efficiently problem solve.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

One of my hobbies that I have is drawing and I think having a creative background and learning a trade has been valuable for me because it has allowed me to come up with creative ideas for projects and plan out how those ideas can come together. It also allows me to think critically about the projects and come up with more than one draft of an idea to see the pros and cons of each idea before fully committing to one idea.

Add'l Details:**Why is an apprenticeship an attractive option to you?**

I think an apprenticeship would be the best idea for me because it would allow me to work and go to school and learn my trade without the pressure of taking out more loans for my schooling. It will also help me gain the experience towards my future and learn things the way I do best, hands on.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

A career in the trades has always interested me because it has given me a lot of confidence in myself that I am capable of much more than what I truly think. I think it is a very rewarding career path and I love learning new things and making mistakes and learning from those mistakes to do better next time. I also love seeing how much I can improve on my skills the more I push myself and the more I learn from others. I love being able to work independently and with others.

I would like to be able to provide a better life for me and my children. I feel with this new opportunity I would finally be able to give them better health coverage and no longer worry about living paycheck to paycheck.

As I mentioned earlier I have been in the restaurant business last 22yrs and it's time I move up in a career than be stuck with no future.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I'm at the point in my life where it's time for a career change. I have been working at restaurants the last 22yrs, with no 401k, no benefits, no pto, no insurance, im tired of living pay check to pay check. Last year I graduated NWTC for my Mig welding certificate. For my new yr resolution I told myself I need to start my new journey and career away from the food industry. So I'm looking to start brand new and fresh for the yr.

Appleton Area (Green)

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:

4-6

Welding Experience:

MIG - Skilled

Tell us about any jobs where you've learned pipetrades relevant skills:

Currently working as a welder at fincantieri in sturgeon bay.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I enjoy working on home projects and that I can build or things I can fix. Also like to work on welding item to better my skill on it.

Shift Availability:

Full-time, Overtime, Weekends, 1st Shift (Days), 2nd Shift (Nights)

Post HS Education:

No

Add'l Edu. Details:

What trades-related courses did you take in school?

Welding

What construction software or technologies do you have training in?

Any Safety Certificates:

Add'l Details:

Why is an apprenticeship an attractive option to you?

I believe this apprenticeship is great way to start on something I am interested in. Learning as I go while getting paid. I have also heard great things about apprenticeships. I will be building on my skills. An apprenticeship also gives many more opportunities. I'm interested in gaining experience hands on.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I have heard great thing about the company. Welding is something that I find very interesting. I enjoy hand on work and problem solving. The variety of projects in pipe trades is what interested me.

Add'l Details:

Why is an apprenticeship an attractive option to you?

I am particularly drawn to an apprenticeship because it offers the opportunity to engage in hands-on learning, allowing me to acquire practical skills rather than being confined to a desk. The prospect of gaining valuable, real-world experience through this path is highly appealing. Additionally, I find reassurance in knowing that upon completing my apprenticeship, I will enter a field where I have built a solid foundation of knowledge and skills, and where my hard work and dedication will be recognized and rewarded.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I am particularly drawn to the trades because they offer a unique opportunity to build a solid career foundation while gaining a deep understanding of how buildings and interiors are constructed and function. After several years of exploring different job opportunities, I believe that acquiring skills in the trades will not only provide me with valuable, hands-on experience but also serve as a strong asset when it comes time to buy and maintain my own home in the future.

An apprenticeship is an attractive option for me because hands-on, on the job learning is how I learn best.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I come from a family of tradesmen and have always enjoyed working with my hands. I want to pursue a career where I can see the product of my work at the end of each day. The thing that interests me about pipetrades is how vital it is to so many different industries. I think mastering a craft that would enable me to produce such a critical product would be very rewarding.

What construction software or technologies do you have training in?**Any Safety Certificates:****Add'l Details:****Why is an apprenticeship an attractive option to you?**

IT market has all but dried up for entry level. Have applied to hundreds of positions since being laid off in February 2024. All employers seem to want significant experience, even for entry level. Nobody wants to OJT anymore.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Graduated with a degree in IT two years ago but have been unable to find related work (currently employed in an unrelated position with no growth opportunities) after being laid off from AWS earlier this year. Dad and uncle have worked in insulation their entire careers so I feel a trade would be a worthwhile option to pursue. I have always enjoyed working with my hands and prefer to not be sitting in a quiet office all day.

Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

Steamfitter (Pipefitter), Pipe Fabricator

Work Zones in Preference Order:

Green Bay Area (Yellow), Appleton Area (Green)

Relevant Experience Level: None. Nothing even close-but I'm a hard worker and willing to learn!

Years of Full-Time Work Experience: 1-3

Welding Experience:

Tell us about any jobs where you've learned pipetrades relevant skills:

Performance Firestop, my job there was either duct wrap or pipe cover. I feel as if i learned a lot of the pipe trades because of how much of the pipes i would go over and cover. I would see the kinds of cuppings, or their angles and the slight process of testing before confirming that it's good. All around being apart of the pipe cover team helped me understand the visual and definitely how to read the tape measure better.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

Current hobbies are working with a lot of hand & power tools. Constantly working on motorcycles, tearing them apart and fixing them. Being able to look at a harness diagram and track down the plug in point im looking for. Also have some carpentry knowledge, being able to read some blueprints to understand measurements of certain things & what ways everything needs to be built.

Shift Availability: Full-time

Post HS Education: No

Add'l Edu. Details:

What trades-related courses did you take in school?

Woodworking / Woodshop, Automotive Technology

Why is an apprenticeship an attractive option to you?

I would truly like to start a career & i think i would truly enjoy the pipe fitting/fabricating as a career for myself. I'm eager to learn new things and not afraid to step out of my comfort zone. Going with an apprenticeship over a job is something i've been looking into for awhile i just didn't know where to look or how to find them, a friend of mine told me to look for local unions and try to get in. I want to start a long term career that will help me start setting life goals and times for those life goals.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I used to do pipe cover insulation in my previous job & seemed to always be interesting in the way the pipe was set up before it was our job to get it insulated. I have always liked the idea/thought of welding just never proceeded to getting into it. My personal "dream" career would be a Welder/Fabricator. Being able to look at something and pretty much say "I can build out a skeleton and make it work."

What construction software or technologies do you have training in?

I wanna learn more and expand my knowledge and skills to the next level. Another reason is I love welding always have and this opportunity gives me the chance to weld more in the future., This gives me the chance to experience more welding and expand my knowledge in the skill.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I'm interested in pipe trades because it offers a unique blend of practical skills and problem-solving opportunities. Working in this field allows me to engage in hands-on tasks, ensuring that systems are running efficiently and safely. The sense of accomplishment that comes from fixing a complex issue or installing a new system is incredibly rewarding. Additionally, the pipe trades are essential to various industries, from residential plumbing to large-scale industrial projects, providing a diverse range of experiences and challenges.

Another reason for my interest is the stability and demand for skilled tradespeople in this field. With the constant need for maintenance and new installations, there is a steady demand for professionals with expertise in pipe trades. This career path is what I have dreamed about since I was a kid., I'm interested in pipe trades because it offers hands-on work and problem-solving opportunities, which are both rewarding and essential to

Tell us about any hobbies that have boosted pipetrade-relevant skills:

The most pertinent would be blacksmithing. I make anything but knives. I specialize in 17th, 18th, and 19th century recreations...purely hand forged items such as: hinges, hasps, door/drawer pulls, shelf brackets, cooking utensils, jewelry, tables, shelving, war hammers, etc. My wife and I own a 124 year old farm house that I have completely remodeled myself including, the entire kitchen, cabinets, plumbing and electrical, two bathrooms, etc.

Why is an apprenticeship an attractive option to you?

An apprenticeship locks me into a learning path with guidelines and benchmarks with measurable results and/or failures from which to grow. It also helps to ensure a structured path of improvement, promotion, monetary compensation, benefits and predictable future.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

It began when I took every "industrial Arts" class my high school offered. I love to work with my hands and solve problems and see challenges from an unconventional perspective. As an adult I continued my quest for knowledge, working briefly as an electrician in my early twenties. Fast forward to several years ago I worked two years working in residential HVAC and currently manage Festival Foods internal equipment warehousing and logistics in the support of our eleven maintenance teams.

What currently returns my interest to a more hands on trade is a job that challenges me in using my knowledge in the realms physics and the multitude of building and fabricating skills I've acquired on my own throughout the years.

What trades-related courses did you take in school?

Welding, Woodworking / Woodshop, Metals, Math-Geometry

What construction software or technologies do you have training in?

CNC

Any Safety Certificates:**Add'l Details:****Why is an apprenticeship an attractive option to you?**

the apprentice path was brought to my attention when I was a freshman in high school and I knew I wanted to be a welder but I wasn't sure how I wanted to do it and the apprentice position makes the most sense, with the on the job training and top of the line classroom work which will get you prepared for the field work that may come ahead of you.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

mainly what interests me is how I can create a career through the union and how it will not only better me as a person but also how it will make me a more outstanding employee for any company that I work for. Also I want to be able to have experience to bring to the union that will better the company.

Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

Plumber, HVAC/R Service Tech, Steamfitter (Pipefitter), Pipe Fabricator

Work Zones in Preference Order:

Fond du Lac Area (Orange), Appleton Area (Green)

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience: 10+**Welding Experience:**

Flux Core - Some Knowledge, MIG - Some Knowledge, Stick - Some Knowledge

Tell us about any jobs where you've learned pipetrades relevant skills:

I worked as a machinist for about ten years. This is applicable in the sense that I learned a number of technical skills such as blueprint reading and precision measurement. I also worked at Bassett, which allowed me to understand the mechanical contracting world, even if it was in a different capacity. Finally, I've been both a new hire in a new field, as well as a supervisor so I understand how to see the big picture and ask pertinent questions.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I enjoy woodworking, building speakers, working on vintage garden tractors, and home improvements.

Shift Availability:

Full-time, Overtime, 1st Shift (Days), Weekends

Post HS Education:

Some 4-year college, Other Relevant Courses & Certifications

Add'l Edu. Details:

IPC-620 (wiring standards)

What trades-related courses did you take in school?

Math-Algebra, Math-Geometry, Math-Precalculus / Trigonometry

What construction software or technologies do you have training in?

CNC, Solidworks, AutoCAD

Any Safety Certificates:

First Aid / CPR, OSHA 10

Add'l Details:**Why is an apprenticeship an attractive option to you?**

As mentioned previously, I have been researching options that get me back into an active career that also rewards hard work, dedication, and loyalty. Learning more practical skills is also very tempting for me.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I am currently a Supplier Quality Engineer that started as a machinist. During my career, I worked for Basset Mechanical for a time and saw a little of what the trades have to offer. I'm interested in a new career that doesn't have me sitting behind a desk and that allows me to create tangible work.

Add'l Edu. Details:

I graduated from McPherson College with a bachelors in Automotive Restoration Technology with a minor in writing.

What trades-related courses did you take in school?

Automotive Technology, Welding, Woodworking / Woodshop

What construction software or technologies do you have training in?**Any Safety Certificates:**

First Aid / CPR

Add'l Details:**Why is an apprenticeship an attractive option to you?**

I appreciate that the apprenticeship gives not only classroom time to learn the understanding, but also the field work to apply those skills to real world situations.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I'm currently working in the automotive industry and looking for a change in pace. While working on cars I learned I enjoy working with my hands and welding. Plus I enjoy learning new things and growing. I believe learning never stops and I feel a trade job gives me the opportunity to grow and always improve.

Why the pipe trade interest me is because it will bring a new challenge to my welding skills and tap into my fascination of learning how things work.

Why is an apprenticeship an attractive option to you?

I would really like to earn my way to learn a useful trade and overall make a great career out of it., I have always had a draw to trades and I think this trade would work the best because I already have a slight knowledge on the type of work.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

My father is a union millwright and I have been welding throughout high school and even worked on brazing and tig welding for smaller pipes. I have always wanted to persue a career within that field I am currently getting ready for CDL school in march. It is only a 3 week course I am wanting to start in the union as a steam fitter directly after I get my cdl. Thank you., My Father is a millwright for the local 2337 and has always pushed me towards the trades and then I found this trade where I would get to use my welding and brazing knowledge.

Tell us about any jobs where you've learned pipetrades relevant skills:

I worked over a summer in junior year with a master plumber., I worked for a plumber a few months in high school, but it ended up not working out. I am 20 years old so unfortunately I don't have much experience, I have worked the same job for a couple years now and it definitely requires mechanical knowledge. I think the most important aspect is I am willing to learn and work hard.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I like to weld and do work on my own vehicles. I was in metals and autos classes at school and was typically the best in my class at mig welding. I took woods classes and pretty much all the tech classes they had to offer as that was actually what I found interesting over anything else. I always took pride in the things I would make because I know it's a very important skill to have., I do all my own work on my vehicle, I love to build mechanical contraptions. I like to work with my hands as I dislike sitting behind a desk. I have been lifting weights for the past 5 or 6 years and was the strongest in my high

Why is an apprenticeship an attractive option to you?

It offers an opportunity to learn and create a career without having the worry of student loans and it provides experience in a career that will never die out., I believe that going to a university is a waste of time and money in my eyes because I know that there are far better opportunities elsewhere, my uncle was a pipe-fitter and he was further ahead than a lot of people. I know many people that have apprenticeships and they are definitely better off so far. I know the education is payed for which is very attractive, and I love to

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I have always been interested in welding and fabricating for my whole life. I know these careers pay very well and it would be something I would enjoy doing instead of working behind a computer. I have been interested in this for a while but did not know how to apply, in my opinion college is not worth it as young people my age rack up student loans that they pay their whole life. So I am very interested in the opportunity., I have come to not like the work I do currently as it is factory work and very repetitive and I want to be useful. I think being useful is very important as it benefits society and increases confidence. I'm looking into pipefitting as I know it's a valuable skill that will last a lifetime, and it is always needed. I know it pays well once journeyman is achieved.
