

Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

Plumber, Steamfitter (Pipefitter), HVAC/R Service Tech, Pipe Fabricator

Work Zones in Preference Order:

Appleton Area (Green), Green Bay Area (Yellow)

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:

7-9

Welding Experience:**Tell us about any jobs where you've learned pipetrades relevant skills:**

I was an industrial maintenance apprentice about 7 years ago that I had finished. It consisted of working with steam pipes. Rebuilding mac valves, replacing and fabricating small braided steel hose. And diagnostic work. Unfortunately this was with a private company so I received no credit towards apprenticeship outside of the company.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I do the maintenance on my vehicles as well as my home. I enjoy building, and fixing things.

Shift Availability:

Full-time, 1st Shift (Days), Weekends, Overtime

Post HS Education:

No

Add'l Edu. Details:**What trades-related courses did you take in school?****What construction software or technologies do you have training in?****Any Safety Certificates:****Add'l Details:****Why is an apprenticeship an attractive option to you?**

I would like to get straight to work while learning a trade. I have found I pick up skills the best while active applying them.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I enjoy working with my hands and using my knowledge, to achieve results. I have been a truck driver for the last 5 years and haven't found it as fulfilling as when I had positions where I was working with tools. I have experience as a industrial maintenance technician, and found that the steam work was my favorite part.

Why is an apprenticeship an attractive option to you?

i just feel its a new way for me to learn something in a different way that would apply to me better. hands on or someone right with me explaining the tasks fits me better.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I enjoy working with my hands while creating and making things look good in the process. this time in my life i would like a challenge that will keep me focused and passion going in the things i do. really trying to find out who i'am and what i could be.

The ability to learn and grow as I progress through a career I have interest in and still make money doing so.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've looked up to my father for years and he has been welding since I was 3. I've showed interest for welding in a class in highschool and wanted to do more of the sort. I currently work as a daycare assistant teacher only making \$11 an hour. As an 18 year old woman, just out of highschool, \$11 dollars an hour cannot afford living on my own.

Math-Algebra, Math-Geometry, Welding

Why is an apprenticeship an attractive option to you?

An apprenticeship is an attractive option to me because it offers the perfect balance of hands-on learning and practical experience. I appreciate the opportunity to learn directly from experienced professionals while earning a living. This approach allows me to build a strong foundation of skills and knowledge in a real-world setting, which is much more valuable than classroom-based learning alone. I'm excited about the chance to develop my expertise over time, learn from mentors, and work on actual projects that contribute

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I'm interested in a career in the pipe trades because it's an industry that is essential to many sectors, from construction to energy, and it's one that is only going to keep growing. As the demand for infrastructure and new construction continues to rise, so do the opportunities within this field. It's a career where I can build valuable skills, contribute to critical projects, and enjoy long-term stability and growth.

Welding

What construction software or technologies do you have training in?**Any Safety Certificates:****Add'l Details:****Why is an apprenticeship an attractive option to you?**

On the job training would be perfect for learning a hands-on trade for me. Working with skilled journeymen in the same trade would also be a very important step in learning the trade.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Currently in the Welding Technology program at Kishwaukee College

Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

Plumber, Steamfitter (Pipefitter), HVAC/R Service Tech, Pipe Fabricator

Work Zones in Preference Order:

Green Bay Area (Yellow), Appleton Area (Green)

Relevant Experience Level:

None. Nothing even close-but I'm a hard worker and willing to learn!

Years of Full-Time Work Experience:

7-9

Welding Experience:**Tell us about any jobs where you've learned pipetrades relevant skills:**

I haven't worked in the construction field outside of attending the carpentry program at NWTC. I'd have a lot to learn but through my work experience I have a good track record of being responsible and punctual.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I frequently help family with home renovation projects so I'm no stranger around some power tools. I've been through the carpentry program at NWTC but didn't pursue it out of the classroom. My work experience is primarily in restaurant industry so that could transfer to the skills of needing to be attentive and organized in a fast pace environment. Through that I've also become very attentive to detail to make sure service is up to standard. I believe these are qualities important in any job I take on to ensure all work is done to the best and fullest of my abilities.

Shift Availability:

Full-time, Overtime, Weekends, Part-time, 1st Shift (Days), 2nd Shift (Nights)

Post HS Education:

Other Relevant Courses & Certifications, Some 2-year college

Add'l Edu. Details:

NWTC Carpentry course, One year of college (basic credits)

What trades-related courses did you take in school?**Why is an apprenticeship an attractive option to you?**

I've always been a hands on learner because I very much prefer to see the work being done in front of me in order to understand it better. Books only teach you so much when you can't visualize the way their information is applied. Not only is it the way I learn best but I also have a situation in which I need to keep making money as I go to survive. Without a steady income bills would fall through which I can't let happen when my baby girl is being born this March. Developing skills and career while being payed is the best

What construction software or technologies do you have training in?**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

I had gone to NWTC after a year of college and joined the carpentry program. Through experience in that I realized I didn't really enjoy doing it for work but while there I was able to visit various other trade programs to get more insight about the work they do. Plumbing and Electrician programs seemed a much better fit to me and I was much more interested. I've been hesitant to start and looking for an apprenticeship in the past due to frequently moving around Wisconsin for the past 3-4 years. Now things have changed and I have a child on the way this March. I won't be traveling as frequently and would like to build my career in pursuit of supporting that family along with my own self interest in the trade. It would mean the world to secure a future in plumbing.

Any Safety Certificates:

First Aid / CPR

Add'l Details:**Contact Information:**To speak with candidate #1024481, access your Candidate Request Tool at <https://pipetradecareers.com/contractors/candidates/WI400>**Additional Information:**If you have questions on candidates or the Pipefolio process, please contact: Career@UA400.org**Contractor Notes:**

Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

HVAC/R Service Tech, Pipe Fabricator, Plumber, Steamfitter (Pipefitter)

Work Zones in Preference Order:

Appleton Area (Green), Green Bay Area (Yellow)

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience: 1-3

Welding Experience:

Flux Core - Some Knowledge, MIG - Skilled, Stick - Some Knowledge

Tell us about any jobs where you've learned pipetrades relevant skills:

I learned how to weld from welding through high school and different opportunities welding after, to better expand my knowledge. Done a couple online courses along with using a booth to practice.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I rebuilt all kinds of cars or motorcycles. Whether it's wiring fabrication or mechanical. I also have a new job opportunity working for a contractor.

Shift Availability:

Full-time, 1st Shift (Days), Overtime

Post HS Education: No

Add'l Edu. Details:

What trades-related courses did you take in school?

Automotive Technology, Electrical Trades / Electronics, Math-Algebra, Math-Geometry, Metals, Welding, Woodworking / Woodshop, Robotics, Construction Technology

What construction software or technologies do you have training in?

CNC, Revit

Any Safety Certificates:

Add'l Details: Veteran

Why is an apprenticeship an attractive option to you?

Because I want to be able to learn and apply a new skill set to a specific task. I also believe this apprenticeship program is a good opportunity to learn about the company and grow along with it.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I'm interested in learning a vast set of skills and techniques to improve on my knowledge of the trades. Also want to be able to grow within the company over time.

Add'l Edu. Details:

I did 1 year at the tech for welding which included gmaw techniques 2 robotic welding auto cad class a fabrication class

What trades-related courses did you take in school?

Engineering, Welding, Woodworking / Woodshop

What construction software or technologies do you have training in?

AutoCAD, Solidworks

Any Safety Certificates:**Add'l Details:****Why is an apprenticeship an attractive option to you?**

So I can learn more about welding, something that I really enjoy doing, and working at a job where skill will really play a part in my job.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

It started to interest me when I was in high school learning about welding. Being apart of the union with all the benefits and the overall good pay. Having a job like this would be great to have, since welding is just fun in general. Working in something that is also skilled based is something that interested me.

Disciplines of Interest:

Steamfitter (Pipefitter), Plumber, Pipe Fabricator

Work Zones in Preference Order:

Appleton Area (Green)

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:

1-3

Welding Experience:

Stick - Some Knowledge, MIG - Some Knowledge, TIG - Some Knowledge, Flux Core - Some Knowledge

Tell us about any jobs where you've learned pipetrades relevant skills:

My current job I have now is production welding. I have learned many things such as power tool use, blue print reading, and adaptability to different welding methods. These skills I use on a daily basis to be able to do my job and are similar skills needed for pipe trades.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

An activity that would be transferable to construction trades would be time management on production and quality. I do a lot of time management at my current workplace now due to there being a set rate on parts. I also do a lot of reworking on parts that don't meet standards. I would consider these two to be activities at work as I do them on a consist basis, and uphold my own standards that go above company standards for I believe in only giving the best work at all times.

Post HS Education:

Associate Degree, Other Relevant Courses & Certifications

Add'l Edu. Details:

Associates in Arts & Science, Welding Industrial Technical Diploma

What trades-related courses did you take in school?

Welding, Math-Precalculus / Trigonometry, Math-Algebra

Why is an apprenticeship an attractive option to you?

An apprenticeship is a good opportunity to learn from someone who has more knowledge and skills. Their skills and knowledge would be an absolute asset to being a successful welder and being able to problem solve in a different mindset. It gives opportunities to improve my skills and what I may be lacking in and needing more help. With an apprenticeship I will have the skills and knowledge to further my career and one day lend it to another who may follow my steps.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

When I was in high school, I took a class for metal working and we did a bit of welding in the course. I had an interest in welding from that point on and continued to LTC for a Welding Industrial Technical Diploma to gain more exposure to welding. I have always heard about pipe fitting and did not find a job in that field nearby at the time of my graduation. I've always found pipe fitting and iron works to be a unique way learn to be a better welder overall. As these two types of welding are ones that never have exactly the same thing happening day to day. Keeping the workday more enjoyable and challenging.

What construction software or technologies do you have training in?

Metals, Robotics

What construction software or technologies do you have training in?

Solidworks, AutoCAD

Any Safety Certificates:**Add'l Details:****Why is an apprenticeship an attractive option to you?**

I feel as though an apprenticeship is the best possible way to really learn what it is to be successful in my career. I've always learned best hands on under the guidance of someone with actual how to and hands on experience vs the typical classroom setting. I feel like it's a much better way to set yourself up for success as often in trades the classroom application is much different than in reality or actual applications.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've always had a drive towards fabrication. I have now spent the last year and a half working for a performance automotive shop and fabrication is one of the more involved and enjoyable tasks I do anything from even preplanning to fit around all sorts of objects in an engine bay to actual pie cutting and fit up all the way to actually burning it all together. It gets your mind going for hours to overcome obstacles.

Years of Full-Time Work Experience:

7-9

Welding Experience:**Tell us about any jobs where you've learned pipetrades relevant skills:**

As a truck driver for five years, I developed skills that apply to the pipe trades, including attention to detail, problem-solving, and working with tools. I maintained equipment, followed safety protocols, and managed logistics, all of which are essential in pipe work. My DIY projects have also given me hands-on experience with basic plumbing and home maintenance, further building my technical skills. These experiences have prepared me to learn and succeed in the pipe trades.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I enjoy weightlifting, DIY projects, golfing, and deer hunting, all of which have built skills useful in construction. Weightlifting improves my strength and endurance for physical work, while DIY projects sharpen my problem-solving and hands-on skills. Golf teaches patience and precision, and hunting requires discipline and adaptability, both important on a job site. These activities have helped me develop the physical and mental skills needed for construction work.

I don't have any, I enjoy spending time with my dog outside in nature and spending time with my family. I also enjoy reading and cooking different foods and exploring new places.

Why is an apprenticeship an attractive option to you?

I have always struggled in school and have always done better hands on learning.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I take pride in hard work and have always excelled in hands-on learning environments. As I consider my future, I've received many recommendations to pursue trades apprenticeships, specifically in pipe trades. I am drawn to this field because of the essential role piping systems play in various industries, and I am eager to develop the specialized skills required.

I seek a career that offers stability, good benefits, and competitive pay, allowing me to lead a fulfilling life. I believe that pursuing a career in the building trades through Local 400 can provide me with these opportunities while allowing me to feel purposeful and confident in my work.

I could learn so much from the program and grow as a man at the same time. I feel like an apprenticeship would keep me accountable and out of trouble and give me a purpose because i would have a goal in life to strive towards.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I have always thrived in hands on work environments. Few things I imagine would bore me more than sitting behind a desk and in front of a screen or being the voice behind a telephone. For that reason alone I have always sought out jobs that keep me active mentally and physically. As a diesel mechanic for 6 years of my life I was always pushing myself to do things in an efficient and even more importantly a safe manner. I strived to make each job I was assigned something I would be proud of at the end of the repair or installation. Challenging myself to do whatever I was tasked with the correct way the first time while finding a way if possible to be more time efficient than the last time I'd done that same task. I think this mindset is transferable to any job. I'm interested in being a pipe fitter and I have aspirations to be very good.

1-3

Welding Experience:**Tell us about any jobs where you've learned pipetrades relevant skills:**

Working at MJ Electric taught me a lot of skills. I learned how to read schematics, operate a skid steer, how to use many tools like the burndy press and bandsaw. I learned how to pull wire, lay out ground grids, and put in ground rods. I also got a lot of experience in wiring lights and laying conduits in the ground.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

Well, my hobbies are video games and motorsports. I enjoy working with cars and doing miscellaneous projects around the house. Video games have helped me connect with people and form solid communication. Working on cars has taught me to problem solve. Because usually a small repair turns into a bigger one.

Shift Availability: Full-time**Post HS Education:** Some 2-year college, Other Relevant Courses & Certifications**Add'l Edu. Details:** osha 10, and cdl a permit**What trades-related courses did you take in school?**

Automotive Technology, Math-Algebra

What construction software or technologies do you have training in?**Any Safety Certificates:** OSHA 10, First Aid / CPR**Add'l Details:****Why is an apprenticeship an attractive option to you?**

Well, the benefits of working in a union are amazing. Free healthcare, pensions, and other miscellaneous things are perks. But being able to learn a trade that helps my community and teaches me life skills is the main reason. Being able to earn while I learn is huge and it saves me from going into a large amount of debt to college.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Well, I initially went to college to study finance and realized that it wasn't the right move for me. Then I moved back home and started to look into the trades. I worked for MJ Electric as a groundsman for a few months and really enjoyed the hours and the work. I like Steamfitters because it trains me to become good in a wide range of skills so I won't be just a one-trick pony.

Welding Experience: MIG - Some Knowledge, Stick - Some Knowledge

Tell us about any jobs where you've learned pipetrades relevant skills:

The foundation of everything I know came from working in residential construction. Using hand tools and machinery every day left me with a solid skill-base and taught me awareness on a job sight.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

Sports have always been a love of mine. After my formal competing ended, I have been coaching where and when I can for the past 5 years. I have coached Pole Vault at both Fond Du Lac High School and UW Oshkosh. Through sports, I learned that accomplishing goals with others is very rewarding and enjoyable. I have also learned that working with others can be challenging at times, but it's important to see the big picture and understand that the goal you are working towards is what's most important. I also learned how to receive instruction and impart my knowledge to others.

What construction software or technologies do you have training in?

AutoCAD, Inventor

Fuzion 360, Cura, SketchUp

Any Safety Certificates:

Add'l Details: Veteran

Why is an apprenticeship an attractive option to you?

An apprenticeship is what I want because it leads to a lifelong career of learning and becoming a professional in your field. I believe that my aptitudes are best suited for the trades because of the way I was raised and the skills I gathered and as a young man.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

My background is primarily in residential construction. I learned a lot of valuable skills over the years and enjoyed that time greatly. My mid-twenties have been spent trying my hand at sales and seeing where that could take me. While it has been productive, I don't believe that its really who I am and where my aptitudes are best suited. I want to get back to building real trade skills and becoming a professional. I have been working full-time while I completed a Welding and Fabrication Certificate from Gateway Technical College in Racine. I was immediately drawn to working with metals and after discussing with my instructors, we came to the conclusion that the pipe trades are the best place for me to grow.

Add'l Details:**Why is an apprenticeship an attractive option to you?**

It's a wonderful way to get into the trades and learn along the way to build my skill set and quality of work, to learn from someone who's really good at what they do to ensure the best learning experience and skill set improvement

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I love working with my hands and building anything I can, I'm not afraid of dirty work, although I currently do not have any welding or pipe fitting experience. I have some general construction experience, which lead me to a recommendation from my uncle who I believe is going through this program. He loves and enjoys what he does, seeing as I love construction I am adamant that I would enjoy this as well, I'm unsure of what the pipe trades entirely entails, but it is very intriguing.

It is an easier way for me to learn new skills. It seems a little easier to do an apprenticeship instead of going straight into the workforce and having to learn the new skill very fast.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I am just looking for a new job and I would like to start a new career. I am wanting to get into the trades and I think that this would be a good learning experience for myself. I like to meet new people so that they can teach me how to be a better worker. I am a hard working individual and I think this would suit me best.

Tell us about any jobs where you've learned pipetrades relevant skills:

Since I graduated from NWTC in May of 2023 I have worked at 5 Point Fabrication as a fabricator full time. I've only ever welded piped during school. Never in the field.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

My current hobbies at the age of 22 include mainly just lifting and skiing. I try to keep my health in excellent condition by attending the gym everyday. I enjoy being able to move around without having worry about aches and pains. I started lifting in 2022 and have stay very consistent since. On the other hand, I have a love for skiing which also aids in keeping me in shape and agile. Related to the pipe trades, both of my hobbies help in ways keeping my health in check. Being a healthy human is very important and what I strive for.

What construction software or technologies do you have training in?**Any Safety Certificates:**

First Aid / CPR

Add'l Details:**Why is an apprenticeship an attractive option to you?**

What attracts me the most is the ability for growth and travel. Becoming an apprentice would quite literally change my life tremendously. I aspire to travel and work outside of the state if applicable. Pipe welding attracts me in itself, but being able to be paid to learn and grow as an employee just speaks in itself. I've always had a hard working mindset, and becoming a Steamfitter (pipe fitter) would be a perfect way to apply my mindset for myself as well as the company I work for.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I am extremely interested in the building trades as it is, first of all, a career job filled with endless learning and opportunity. After graduating from NWTC with a welding certification, I knew before I walked the stage which direction I wanted to take, and that was pipe welding. While being young and having the ability and health to travel and learn excited me immensely. Further more, touring the Local 400 headquarters really solidified my decision and desire to want to become a pipe welder. Taking classes, learning from higher ups and working for company's that truly change the world and assist in helping this world go round electrify this entire opportunity. Having a career job in the pipe trades would be a life changing experience and opportunity.

Welding Experience:**Tell us about any jobs where you've learned pipetrades relevant skills:**

In my current role at a small manufacturing shop, I work with tooling and die, where I've developed several skills that are directly applicable to the pipe trades. While the work may not directly overlap, many of the core skills are transferable. I regularly use a variety of tools and work with metals, which has given me hands-on experience that is crucial in the pipe trades. Additionally, creating parts within very tight tolerances has honed my attention to detail and precision, qualities that are essential when working with piping systems.

Shift Availability: Full-time, Overtime, 1st Shift (Days), 2nd Shift (Nights), Weekends**Post HS Education:** Some 4-year college**Add'l Edu. Details:** I attended the University of Wisconsin-Platteville for one year, studying Agronomy and completing two full semesters.**What trades-related courses did you take in school?**

Math-Algebra, Drafting and Design, Automotive Technology, Math-Geometry

What construction software or technologies do you have training in?

AutoCAD

Any Safety Certificates:**Add'l Details:****Tell us about any hobbies that have boosted pipetrade-relevant skills:**

In my current role in manufacturing, I've gained valuable experience working with various tools and machinery, which has helped me develop a solid foundation in hands-on tasks that are directly transferable to the construction trades. I am accustomed to troubleshooting equipment, following safety protocols, and ensuring precision in all aspects of my work, skills that are essential in any trade. Additionally, my experience in a team-oriented environment has taught me the importance of communication, collaboration, and efficiency—qualities that are critical in construction.

Why is an apprenticeship an attractive option to you?

An apprenticeship is an attractive option to me because it offers the opportunity to learn a skilled trade while gaining hands-on experience in a real-world setting. After several years working in manufacturing, I'm eager to develop technical expertise in the building trades, and an apprenticeship provides the perfect balance of structured learning and practical application. The ability to earn while I learn, along with the chance to work alongside experienced professionals, is a valuable opportunity to build a stable, long-term

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

After spending several years working in manufacturing, I've developed a strong appreciation for the value of hands-on work and the satisfaction of creating something tangible. While my experience in manufacturing has been valuable, I'm now seeking a career that offers both more specialized skill development and the opportunity to work on projects that directly impact the community. The building trades, and particularly the pipe trades, caught my attention because of the combination of technical skill, problem-solving, and the ability to see a project through from start to finish. I'm drawn to the idea of being part of a team that builds and maintains essential infrastructure, providing a tangible service that benefits society.

AutoCAD, Solidworks

Any Safety Certificates: First Aid / CPR**Add'l Details:****Why is an apprenticeship an attractive option to you?**

It gives me the opportunity to learn hands on which is the best way I learn combined with classroom time in which I also excel at that teaches me the technical things that hands on learning does not. It also allows me to earn money while learning as opposed to spending money going to college. It also allows me to meet new people and make connections for years before I even finish my training.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

A career in building trades is an appealing route because of the pay, benefits, and the almost indefinite job security. I am also interested in the trade because I enjoy doing hands on work and I like to stay busy. I also enjoy the constant physical and mental challenges that inevitably come with. The trades also provide me with almost unlimited growth opportunities. I can work my way from an apprentice up to being an entrepreneur and starting apprentices for others.

Building Trades / Construction, Electrical Trades / Electronics, Math-Algebra, Math-Geometry, Metals, Welding, Woodworking / Woodshop, Electrical Trades / Electronics, Math-Algebra, Math-Geometry, Woodworking / Woodshop, Welding, Metals

What construction software or technologies do you have training in?

AutoCAD, Solidworks, Solidworks

Any Safety Certificates:

OSHA 30, First Aid / CPR, OSHA 30, First Aid / CPR

Add'l Details:**Why is an apprenticeship an attractive option to you?**

Because I like the thought of getting paid to learn and there's many different routes in the career you can take after an apprenticeship, Cause I never thought attending a university was ever going to be worth it come the future and see the trades as a way to build a solid career

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

A gentleman from ATS talked to me a and convinced me to look into steam fitting, I have only head good things about about HVAC-R I have been doing electrical work for 2.5 years and have come to a conclusion that it's not the right fit for me.

What trades-related courses did you take in school?

Drafting and Design, Math-Geometry, Math-Algebra, Welding

What construction software or technologies do you have training in?

CNC

Any Safety Certificates:

First Aid / CPR, OSHA 10

Add'l Details:

Why is an apprenticeship an attractive option to you?

To further develop my skill set in the trades and get paid to do so is a remarkable opportunity.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've been welding most of my life. I like creating and working with my hands. There's money to be made in the trades, it's a skill set that's transferable pretty much anywhere in the world and I enjoy the challenge of working on large scale intricate projects.

Contractor Notes:

Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

Plumber, Steamfitter (Pipefitter)

Work Zones in Preference Order:

Fond du Lac Area (Orange), Appleton Area (Green)

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:

10+

Welding Experience:

TIG - Some Knowledge, Stick - Some Knowledge

Tell us about any jobs where you've learned pipetrades relevant skills:

As a Process Controls Technician III at Kohler Company, I had to constantly monitor pressures and flow through numerous pneumatic and hydraulic systems to ensure steady production. As we moved corrosive materials along pneumatic transport lines, the material was continually degrading our piping, and we had to be on constant look out for line leaks and ruptures around our transport lines and be familiar with how to patch and replace them.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I am a do it yourselfer and have always found it to be rewarding to work with my hands and fix up my century+ old home and to make some of my own furniture. I also enjoy assisting others with their projects and am currently volunteering my time to help build the set pieces for my daughter's theater production. Finally, I enjoy learning new things and love assisting others in my family who practice trades just hoping to gain some knowledge and have that pride in knowing that you can do a thing yourself.

Shift Availability:

Full-time, Overtime, Weekends, 1st Shift (Days), 2nd Shift (Nights)

Post HS Education:

Some 2-year college

Add'l Edu. Details:

I was enrolled in the Electro-Mechanical Automation program at LTC.

What trades-related courses did you take in school?

Math-Algebra, Robotics, Electrical Trades / Electronics

What construction software or technologies do you have training in?

Acorn, CNC, AutoCAD, Bluebeam

Any Safety Certificates:

First Aid / CPR, OSHA 10

Add'l Details:**Why is an apprenticeship an attractive option to you?**

Just the option to be exposed directly to the things you're learning about in the classroom and being immediately able to apply those concepts to what you're doing every day. It also exposed you to multiple tradesmen and how they do things giving you the opportunity to efficiently tinker with how you do things making it quicker and easier to come into your own with the skills you're being shown. Lastly, there's just something special about knowing you did the time to earn something, and journey and master cards

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've been working in skilled labor positions in an industrial setting for most of my career, I'm looking to transition my skills and work ethic out of manufacturing and into construction. As I've progressed in my career, I find myself wanting to do more with my skillset other than practicing it inside the same four walls. What specifically attracts me to the pipetrades is my past experience having worked with pneumatic and hydraulic systems and the complexity of them. I have always enjoyed and found it to be more demanding/rewarding to work on those systems as opposed to purely electrical ones. There's also a sort of grittiness to the position that I find personally attractive as the work can be hard and dirty and there's a certain allure to your body telling you that you earned your paycheck.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I like doing DIY projects at home, like building furniture or fixing things. These hobbies help me get better at using tools, paying attention to details, and solving problems, which are all useful in construction. I also enjoy working on cars, which teaches me how to fix things and understand how different parts work together, similar to how things work in construction.

Why is an apprenticeship an attractive option to you?

An apprenticeship is a great option for me because I can learn on the job and get paid at the same time. I like the idea of getting real experience while working with skilled professionals who can teach me. This way, I can learn the right skills without going into debt for school.

Also, apprenticeships can lead to steady jobs and future opportunities, which is a great

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I'm interested in a career in the building trades because I like working with my hands and solving problems. The pipe trades, in particular, caught my attention because pipes are essential for things like water, gas, and heating in every building. I find it rewarding to know that the work I do helps keep everything running smoothly for people.

I also like that the pipe trades offer good pay and job security, and there's always something new to learn. It's a hands-on job that keeps me busy and challenges me to think and figure things out. Overall, it seems like a great career with lots of opportunities to grow.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I have always been drawn to careers in the building trades because they provide the opportunity to create tangible, lasting results through hard work and skill. The satisfaction of constructing something valuable and functional for communities is deeply fulfilling. Working with my hands and solving complex problems in a collaborative environment excites me, and the building trades provide the perfect balance of technical expertise and teamwork.

Opportunity for growth as a metal worker

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

During my time spent in the military; one of the additional roles I accrued was to be the platoon master breacher. Alot of the adopted breaching techniques used for either explosively breaching or mechanically breaching a metal structure fascinated me. Over the years of constructing and engineering charges to either cut through bend or push metal i always had the thought that I would enjoy welding and fabrication as a secondary career. After I moved home I attended and graduated the welding and fabrication course at NWTG, and have been welding for a job. I'm interested in learning more about the trade and continuing my education as a metal worker.

Contractor Notes:

Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

Steamfitter (Pipefitter), Plumber

Work Zones in Preference Order:

Appleton Area (Green)

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:

7-9

Welding Experience:

MIG - Some Knowledge, TIG - Skilled

Tell us about any jobs where you've learned pipetrades relevant skills:

When I was working at pro smokers we had some shower pipes I'd have to weld and fit spray nozzles. Some exhaust work on the smokers as well.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

Equipment operation. Power tools. Welding. Riding and building motorcycles.

Shift Availability:

Full-time, Overtime, Weekends, 1st Shift (Days)

Post HS Education:

Other Relevant Courses & Certifications

Add'l Edu. Details:

Electrical power distribution technical diploma

What trades-related courses did you take in school?

Math-Algebra, Electrical Trades / Electronics

What construction software or technologies do you have training in?

Solidworks

Any Safety Certificates:

First Aid / CPR, OSHA 30

Add'l Details:

Why is an apprenticeship an attractive option to you?

I like showing up to work and doing different things or being challenged with different tasks. I want to be part of a good trade and have a good work like balance with good benefits.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Something I've been interested in for a while. I recently started working construction and like it a lot. I'm currently moving to Appleton and want to be in a good permanent career with good benefits. While also being a good investment to an employer.

Welding Experience:**Tell us about any jobs where you've learned pipetrades relevant skills:**

My most recent job renovating a warehouse involved working with pipes/conduit. I would modify and install pipes. Part of the job involved pulling heavy pipes from the ceiling and walls. I learned a bit about rigging to safely move heavy pipes.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I am an operator, engineer and technician at heart. I've spent my life riding dirtbikes, and more recently wrenching on cars and motorcycles, as well as bicycles. All of my hobbies rely on my precise motor functions and quick thinking - qualities I believe transfer smoothly into the trades. Other hobbies of mine that don't involve machines include running, climbing and boxing to keep in shape so that I can have a long, healthy life. This mindset may help me be a safer tradesman over the long-term.

Shift Availability:

Full-time, Overtime, Weekends

Post HS Education:

Associate Degree

Add'l Edu. Details:

I majored in mechanical engineering

What trades-related courses did you take in school?

Drafting and Design, Math-Algebra, Math-Calculus, Math-Geometry, Woodworking / Woodshop, Engineering

What construction software or technologies do you have training in?

Revit, AutoCAD

Any Safety Certificates:**Add'l Details:****Why is an apprenticeship an attractive option to you?**

An apprenticeship is attractive to me because it allows me to immerse myself in a safe learning environment while simultaneously getting paid. As a plus, the instructors/curriculum in such an environment are likely more structured than solely on-the-job knowledge gained from starting at an entry-level position in any construction job.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I have always had an interest in building - my dad was a stonemason his whole life and many others in my family have made careers out of building. After 4 years in college, I finally couldn't resist any longer and moved out of town to pursue a career in the trades. After a short stint in Michigan working on a warehouse, my desire to work with my hands was solidified.

Here in Michigan, I have been presented a career in the pipetrades as a good option and am excited to learn more about them! I hope to gain skills that will serve me and my family for generations to come.

Woodworking / Woodshop, Automotive Technology

What construction software or technologies do you have training in?**Any Safety Certificates:****Add'l Details:****Why is an apprenticeship an attractive option to you?**

I would truly like to start a career & I think I would truly enjoy the pipe fitting/fabricating as a career for myself. I'm eager to learn new things and not afraid to step out of my comfort zone. Going with an apprenticeship over a job is something I've been looking into for awhile I just didn't know where to look or how to find them, a friend of mine told me to look for local unions and try to get in. I want to start a long term career that will help me start setting life goals and times for those life goals.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I used to do pipe cover insulation in my previous job & seemed to always be interesting in the way the pipe was set up before it was our job to get it insulated. I have always liked the idea/thought of welding just never proceeded to getting into it. My personal "dream" career would be a Welder/Fabricator. Being able to look at something and pretty much say "I can build out a skeleton and make it work."

Years of Full-Time Work Experience: 4-6

Welding Experience:

Tell us about any jobs where you've learned pipetrades relevant skills:

I've done roofing for about 2 years and carpentry for less than one year. I'd say those taught me how to be a part of a crew, how to work on my own when needed, and how to meet the expectations that are put upon me.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I like to work out often and play basketball at my local YMCA. Think that helps with the strength and endurance needed to get through a work day. I also enjoy reading and learning about traditional techniques in construction or in life. Which I also think would help develop a skill set in whatever kind of work I do.

Shift Availability: Full-time, Overtime, Weekends, 1st Shift (Days)

Post HS Education: No

Add'l Edu. Details:

What trades-related courses did you take in school?

Woodworking / Woodshop, Math-Algebra, Math-Geometry, Building Trades / Construction

What construction software or technologies do you have training in?

Any Safety Certificates:

Add'l Details:

Why is an apprenticeship an attractive option to you?

I have a family that I am the main provider for, so it's very important to me to be able to do so. I think a union apprenticeship is a perfect opportunity to do that. I also would like to pick a career that I think I'd enjoy doing and continue throughout my lifetime.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've worked multiple different trades, such as roofing and carpentry. I love to work with my hands and that's how learn the best as well is hands on. I like to build things and find a great enjoyment in the satisfaction of seeing what I've made.

Why is an apprenticeship an attractive option to you?

Apprenticeship's an attractive option to me. Because I would be making a little bit more than what I make at aluminline, which I'm only making there 18 bucks an hour. And it's hard to find a place to stay, I don't. I have the experience, and I'm not getting taught by a professional how to weld. It's all kind of learn it on your own Sort of thing. The biggest thing I don't want to do is learn the wrong way to weld., An apprenticeship is an attractive option. Because I have an opportunity to learn how to weld properly and gain the

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I grew up learning the trades electrical, plumbing, carpentry, and welding. Back when I was 13 years old I had to remodel my parents house which took me two years to do then we sold our house and moved to Minnesota to five acres where I wired a new construction church which passed code. I worked for a custom haying farmer for about 4 months total in the mean time I was welding as a side job at my parents place until I went to work for Alum Line in Cresco, Iowa as a fabricator trying to get in to welding which I love to do., I grew up building when I was young. My dad was a project manager for a homebuilding company, actually called perry homes. What sparked my interest was we had to remodel our house in Houston, Texas, before we moved up to Minnesota and that took 2 years and all of the learning experience and stuff that I had with construction was helpful.

What spark my interest in welding was doing? Small metalwork repairs on trailers and frames on trucks and that sort of thing

The most pertinent would be blacksmithing. I make anything but knives. I specialize in 17th, 18th, and 19th century recreations...purely hand forged items such as: hinges, hasps, door/drawer pulls, shelf brackets, cooking utensils, jewelry, tables, shelving, war hammers, etc. My wife and I own a 124 year old farm house that I have completely remodeled myself including, the entire kitchen, cabinets, plumbing and electrical, two bathrooms, etc.

Why is an apprenticeship an attractive option to you?

An apprenticeship locks me into a learning path with guidelines and benchmarks with measurable results and/or failures from which to grow. It also helps to ensure a structured path of improvement, promotion, monetary compensation, benefits and predictable future.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

It began when I took every "industrial Arts" class my high school offered. I love to work with my hands and solve problems and see challenges from an unconventional perspective. As an adult I continued my quest for knowledge, working briefly as an electrician in my early twenties. Fast forward to several years ago I worked two years working in residential HVAC and currently manage Festival Foods internal equipment warehousing and logistics in the support of our eleven maintenance teams.

What currently returns my interest to a more hands on trade is a job that challenges me in using my knowledge in the realms physics and the multitude of building and fabricating skills I've acquired on my own throughout the years.

Tell us about any jobs where you've learned pipetrades relevant skills:

some of the jobs that Ive heard of in the pipe trades are pipeline welding, pipefitter, boilermaker, and steamfitter

Tell us about any hobbies that have boosted pipetrade-relevant skills:

My main hobbies are hunting and fishing. I believe that these hobbies relate to the construction trades because of the skills needed to become the best outdoors man can relate to the different skills needed to work in the construction industry. when striving to become the best outdoors man you need to take in the minor details and work towards the bigger picture, as same in the construction industry, you will start at the bottom take in the minor details to eventually work towards the top and be the best of the best. But as in outdoors activities it takes time and effort.

Why is an apprenticeship an attractive option to you?

An apprenticeship is an attractive option to me because not only am I choosing this job option, but it gives my employer the opportunity to choose me as well. Rather than me solely putting in the work, my employer will be putting work into me.
I am a growth orientated person. An apprenticeship gives me the chance to learn as I go and grow in this area of work., An apprenticeship is an attractive option to me because I am eager to learn and develop my skills along side others who are experienced in the

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I am interested in a career in the trades because there is always ample opportunity to grow and further my career to better myself and my family. Having family members that have work experience in the trades, specifically in the pipetrades, I have been encouraged to explore this option more as I have time to develop my career.
I look forward to the personal growth and experience the trades has to offer.

Being bilingual has also opened more doors for more relationships in my community and showed me that I have the ability to work with and communicate with a group of people that others are not able to. I have always enjoyed serving others. The trades provide me with the opportunity to serve others, have personal growth, and grow in a career for myself as well as be able to support my family the best I can., I have been interested in the trades, specifically a career in the pipe trades ever since my wife's cousin peaked my interest

Why is an apprenticeship an attractive option to you?

I would really like to earn my way to learn a useful trade and overall make a great career out of it., I have always had a draw to trades and I think this trade would work the best because I already have a slight knowledge on the type of work.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

My father is a union millwright and I have been welding throughout high school and even worked on brazing and tig welding for smaller pipes. I have always wanted to persue a career within that field I am currently getting ready for CDL school in march. It is only a 3 week course I am wanting to start in the union as a steam fitter directly after I get my cdl. Thank you., My Father is a millwright for the local 2337 and has always pushed me towards the trades and then I found this trade where I would get to use my welding and brazing knowledge.

Why is an apprenticeship an attractive option to you?

It offers an opportunity to learn and create a career without having the worry of student loans and it provides experience in a career that will never die out., I believe that going to a university is a waste of time and money in my eyes because I know that there are far better opportunities elsewhere, my uncle was a pipe-fitter and he was further ahead than a lot of people. I know many people that have apprenticeships and they are definitely better off so far. I know the education is payed for which is very attractive, and I love to

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I have always been interested in welding and fabricating for my whole life. I know these careers pay very well and it would be something I would enjoy doing instead of working behind a computer. I have been interested in this for a while but did not know how to apply, in my opinion college is not worth it as young people my age rack up student loans that they pay their whole life. So I am very interested in the opportunity., I have come to not like the work I do currently as it is factory work and very repetitive and I want to be useful. I think being useful is very important as it benefits society and increases confidence. I'm looking into pipefitting as I know it's a valuable skill that will last a lifetime, and it is always needed. I know it pays well once journeyman is achieved.
