Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

HVAC/R Service Tech, Steamfitter (Pipefitter)

Work Zones in Preference Order:

Fond du Lac Area (Orange), Appleton Area (Green), Green Bay Area (Yellow)

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:

10+

Welding Experience:

TIG - Some Knowledge, Stick - Some Knowledge

Tell us about any jobs where you've learned pipetrades relevant skills:

Assembly (some welding)

Tell us about any hobbies that have boosted pipetrade-relevant skills:

Car maintenance involves troubleshooting, working with mechanical systems, and understanding fluid dynamics. home improvement projects can build mechanical aptitude, problem-solving skills, and familiarity with tools. Working with circuits, sensors, and programming electronics and robotics can enhance your understanding of electrical systems and automation.

Shift Availability:

Full-time, 2nd Shift (Nights), 1st Shift (Days), Weekends, Overtime, Part-time

Post HS Education:

No

Add'l Edu. Details:

What trades-related courses did you take in school?

What construction software or technologies do you have training in?

Any Safety Certificates:

First Aid / CPR

Add'l Details:

Why is an apprenticeship an attractive option to you?

I want to pursue an HVAC apprenticeship with a union because it offers the perfect combination of hands-on learning and structured education to help me build a stable and rewarding career. I'm drawn to the opportunity to earn a wage while gaining valuable experience under the guidance of professionals. The chance to acquire industry-recognized certifications, like EPA Section 608.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I enjoy working with my hands as well as my brain. HVAC/R is a trade that requires both. Additionally, there is a high demand, and good pay, and no matter where you are on the planet, there will always be a need for climate control.

Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

HVAC/R Service Tech

Work Zones in Preference Order:

Fond du Lac Area (Orange)

Relevant Experience Level:

None. Nothing even close-but I'm a hard worker and willing to learn!

Years of Full-Time Work Experience:

10+

Welding Experience:

Tell us about any jobs where you've learned pipetrades relevant skills:

Working Security and Law Enforcement in the Military, I developed many skills like attention to detail, problem solving, critical thinking, communication, and a strong work ethic. All of these skills were further honed and polished working as a dog trainer since separating in 2022.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I enjoy learning new things. Reading, watching videos, and practicing new skills is something that I would consider a hobby or activity of mine. The last 3 years I have worked primarily as a dog trainer, the growth in knowledge and skillset I've acquired in that time is what drove my passion for the career. I believe that same passion for learning will transfer to the construction trades as well.

Shift Availability:

Full-time, 1st Shift (Days), 2nd Shift (Nights), Weekends, Overtime

Post HS Education:

Some 4-year college

Add'l Edu. Details:

I am currently 3 years in to a Bachelors Degree majoring in Business Administration.

What trades-related courses did you take in school?

What construction software or technologies do you have training in?

Any Safety Certificates:

Add'l Details:

Veteran

Why is an apprenticeship an attractive option to you?

I learned significantly more from my mentor when learning to be a dog trainer than from several years of watching videos and reading books alone. I don't have several years of experience reading books or watching videos on any trade, and so an apprenticeship is very appealing. Being paid to learn rather than paying to learn is also attractive. I want to learn how to do things right, in the right setting, and ensure that I am fully capable of doing the job correctly. An apprenticeship seems to be the best way to go on all counts.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

After leaving the military, I found myself in the same rut that prompted me to join in the first place. Taking entry-level jobs and trying to find side-hustles just to make ends meet. My wife and I had our first child and I decided I needed to do better than my parents did for me. Stability, opportunity for growth, and the opportunity to learn a new skillset that will last me for the rest of my life are what made me become interested in a career in the pipetrades.

Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

Plumber, HVAC/R Service Tech

Work Zones in Preference Order:

Appleton Area (Green), Green Bay Area (Yellow)

Relevant Experience Level:

Some. I have worked for a plumber, steamfitter or HVAC/R contractor.

Years of Full-Time Work Experience:

10+

Welding Experience:

MIG - Some Knowledge, TIG - Some Knowledge, Stick - Some Knowledge

Tell us about any jobs where you've learned pipetrades relevant skills:

In my job experience, I assisted with setup and prepping job sites, handling tools and materials, assisting with installs and repairing pipes and fixtures, performing basic maintenance tasks, and cleaning up after work. I also transported equipment, followed safety procedures, and gained some hands-on experience from the master plumbers.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I am an avid fisherman and hunter. These hobbies have taught me to be patient, be aware of my surroundings, and to be able to work quickly and safely while under pressure. These skills can easily be transferred to the construction trade due to the nature of the unknown. It is important for workers in the trade to be able to adapt quickly, but also maintain safety. Patience is also important. Sometimes, job tasks may change which will result in downstream delays to the team. Understanding that there are things out of my control is important, and can help impact others.

Some 2-year college

Add'l Edu. Details:

Auto Mechanic Certification

What trades-related courses did you take in school?

Automotive Technology, Welding

Why is an apprenticeship an attractive option to you?

I am 31, married, and have a 5 year old son. For the last decade, I put my education and career on hold to support my wife as she chased her career dreams. Now that she is there, it is my turn to figure things out. I have always been drawn to a hands on career, and I thrive in an environment that constantly challenges my brain. The pipetrades is just that. I am ready to commit to something that is going to provide me with a career rather than a job, and be rewarding in the long run. I am ready to put in the work, and be

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've always been drawn to careers that involve hands-on work, problem-solving, and tangible results. The building trades offer a sense of pride and purpose in creating and maintaining essential infrastructure. I appreciate the teamwork, discipline, and continuous learning that comes with the trades. Specifically, the pipetrades caught my attention because of the critical role they play in both residential and industrial systems. Pipetrades professionals keep buildings safe, functional and efficient. While my work in the past was in a laboring function, I enjoyed learning from my mentors and would like to join a union and pursue the opportunity to become a journeyman myself.

What construction software or technologies do you have training in?**Any Safety Certificates:**

OSHA 10

What construction software or technologies do you have training in?

Any Safety Certificates:

Add'l Details:

Why is an apprenticeship an attractive option to you?

I would love to have the opportunity to learn a new trade while being paid to do it. I would also much rather learn from guys with field experience and on the job instead of at a tech school and out of a book. I have come to realize that there is no replacement for real world experience and knowledge.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

After purchasing a house with a 20 year old furnace, I have become friendly with the local HVAC companies. Seeing the guys work to troubleshoot issues left me feeling pretty impressed at all of the knowledge they have of various systems from AC, to electrical to plumbing. I am currently a foreman of a welding, fabrication and machining shop and seeing this has really peaked my interest in the trade. I like to be challenged at work, and diagnosing issues or even doing new installs seems to be right up my alley.

Add'l Details:

Why is an apprenticeship an attractive option to you?

I think the opportunity to become an apprentice is far and away the best option for me at the current point of my life. I just bought a house, and am in search of a new job that I have clear growth in. The fact that I could learn a valuable skill while also getting paid on the job experience, it's a very attractive option.

I was also very eager to learn as a kid in school. I got good grades and asked questions.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

In high school, I took several construction classes & instantly realized it was very rewarding to see a project through start to finish. Specifically, I remember when we built a storage garage for my high school. I got to drive past it almost everyday & I took pride in my work.

The reason I want to get involved in the pipe trades (specifically HVAC/R service technician) is that I am in search of a long term career, and know this a place I can find it. I recently had to connect a Common wire to my furnaces circuit board to power a new thermostat, and have been very curious about the whole system since. I love the idea of being able to provide a service that helps keep my community safe also.

I want to learn from the best and feel accomplished when I'm working on something that I can see I'm getting progressively better at doing. I hope to one day be able to teach what I've learned and continue the chain of great working people.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Growing up I've always wanted to work blue collar, started off as a metal fabricator since I was 18 years old and now decided to make a transition to a different trade after a year of debating whether to do it or not.
After countless research and asking around I've decided to join the union and wish to become a valuable member of local 400.

Building Trades / Construction, Math-Algebra, Math-Geometry

What construction software or technologies do you have training in?

Any Safety Certificates:

First Aid / CPR

Add'l Details:

Why is an apprenticeship an attractive option to you?

It's attractive for me because it is a way of learning a skill that is very useful not only for a job but in everyday life. I want to have a career that I can be proud of and also one that I can work in until I retire. I know I'm not overly young but it's something that I want to have for the rest of my career until the day I retire.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I have always done maintenance in the past and plumbing and HVAC have always been something I've wanted to get into as a career and not just something that I do here and there. I have family members that have been plumbers and they've always told me what a great career it was and I've just been trying to look into the right situation and this seems like the perfect situation for me.

Add'l Details:
Why is an apprenticeship an attractive option to you?

I've always been a hands on learner because I very much prefer to see the work being done in front of me in order to understand it better. Books only teach you so much when you can't visualize the way their information is applied. Not only is it the way I learn best but I also have a situation in which I need to keep making money as I go to survive. Without a steady income bills would fall through which I can't let happen when my baby girl is being born this March. Developing skills and career while being payed is the best

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I had gone to NWTC after a year of college and joined the carpentry program. Through experience in that I realized I didn't really enjoy doing it for work but while there I was able to visit various other trade programs to get more insight about the work they do. Plumbing and Electrician programs seemed a much better fit to me and I was much more interested. I've been hesitant to start and looking for an apprenticeship in the past due to frequently moving around Wisconsin for the past 3-4 years. Now things have changed and I have a child on the way this March. I won't be traveling as frequently and would like to build my career in pursuit of supporting that family along with my own self interest in the trade. It would mean the world to secure a future in plumbing.

Woodworking / Woodshop, Metals, Welding, Math-Precalculus / Trigonometry, Math-Algebra

What construction software or technologies do you have training in?**Any Safety Certificates:**

First Aid / CPR

Add'l Details:**Why is an apprenticeship an attractive option to you?**

I've never done well in a classroom only environment. In high school my favorite classes were machine tool, welding, and wood working. I learn so much better in a hands-on setting.

I'm also tired of just working "jobs". I want a career. And the "earn as you learn" format of a apprenticeship work perfectly for my family and I. I don't have the knowledge or

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Throughout my years working for Disney I've spoken to many individuals in the Engineering department that work for a variety of trades. My current job can be very monotonous and unfulfilling. I've been interested in pursuing an apprenticeship in the pipetrades because I would prefer to have a more hands-on career. Unfortunately with the low union pay in Florida and extremely high cost of living, I cannot afford to lose my current job.

My wife and I are planning to move to Wisconsin next year. My goal is to start a career journey that allows me to provide a comfortable life for my family.

Add'l Details:

Why is an apprenticeship an attractive option to you?

First and foremost it would give me the ability to use my brain and my body, something I have always strongly valued. An apprenticeship also gives me the ability for hands on learning, which is how I learn best.

I am newly married with my first child on the way, so an apprenticeship is also great because I can earn an income while I get the education I need.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I have a close friend who is currently working a HVAC Service Technician apprenticeship. He loves it, and was telling me what it entails and the benefits of this career. My dad worked construction most of his life, and I helped him growing up a few times. So I have always enjoyed the blue collar mentality and have never been afraid of hard work.

I have a bachelors degree in business administration, and have had a handful of jobs in a few different industries. One thing I've learned about myself is that I want a job that utilizes my mind, but also keeps me active. I am confident I would enjoy a career in this trade.

Why is an apprenticeship an attractive option to you?

An apprenticeship is a cool thing to go for because you wont get into a whole lotta debt. I have seen vidoes of people hard at work while learning at the same time and i very much enjoy learning. Learning is what makes the job fun and makes me strive to become better.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

working in customer service jobs has always struggling to learn new things but it was pretty much the same thing at every job ive ever had. Ive talked with my dad who works in carpentry and thats what brought me into it. Its been popping up on my computer and its been intresting to research and watch other people do these things that ive never even thought of doing. Ive always felt like I never knew how to do anything and always having to rely on someone else. I wanted to make a change by researching all of this and finally gained enough courage to start applying.

Business management and marketing

What trades-related courses did you take in school?

Why is an apprenticeship an attractive option to you?

Apprenticeship is an attractive options for me because I like the idea of getting paid to learn the skill. I do not want to sign up for any school loans, so this seems to be the best option for me. I am also a hands on learner. I feel that working with experienced tradespeople is the best way to learn.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I am currently interested in making a career change. I have a background in sales. In particular, selling industrial and construction supplies. I was successful at what I did, however it was unfulfilling.

What interests me in the building trades is working with my hands, building/doing something I can be proud of and learning life longs skills.

There are many reasons I am interested in the pipetrades (particularly HVAC). One of the most important is job security. In the winter people need heat, in the summer people need AC. With the rise of AI and automation, it will never replace skilled labor. Another reason I am particularly interested in HVAC is for the challenge and problem solving. I like the idea of continuous learning and growing a skill set that I can be proud of and have for life.

Welding Experience:**Tell us about any jobs where you've learned pipetrades relevant skills:**

As a truck driver for five years, I developed skills that apply to the pipe trades, including attention to detail, problem-solving, and working with tools. I maintained equipment, followed safety protocols, and managed logistics, all of which are essential in pipe work. My DIY projects have also given me hands-on experience with basic plumbing and home maintenance, further building my technical skills. These experiences have prepared me to learn and succeed in the pipe trades.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I enjoy weightlifting, DIY projects, golfing, and deer hunting, all of which have built skills useful in construction. Weightlifting improves my strength and endurance for physical work, while DIY projects sharpen my problem-solving and hands-on skills. Golf teaches patience and precision, and hunting requires discipline and adaptability, both important on a job site. These activities have helped me develop the physical and mental skills needed for construction work.

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:

4-6

Welding Experience:

Tell us about any jobs where you've learned pipetrades relevant skills:

I haven't had direct experience in the pipe trades, but I have worked on roofing jobs and for a drywall company, gaining hands-on construction experience. Roofing taught me physical endurance, safety awareness, and problem-solving, while drywall work helped me develop measuring, cutting, and installation skills. These jobs reinforced my work ethic, teamwork, and ability to learn on the job, which will help me succeed in a plumbing or HVAC apprenticeship.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

In my free time, I practice Jiu-Jitsu, go to the gym, and participate in various team sports. These activities have helped me develop physical and mental skills that are highly transferrable to the construction trades. Jiu-Jitsu has taught me discipline, patience, and problem-solving under pressure. It requires strategic thinking, adaptability, and attention to detail—just like working in plumbing or HVAC, where you need to assess situations, troubleshoot problems, and apply technical skills effectively.

Human Services Substance Abuse Counselor in Training Certificate

What trades-related courses did you take in school?

What construction software or technologies do you have training in?

Any Safety Certificates:

Add'l Details:

Why is an apprenticeship an attractive option to you?

An apprenticeship is an attractive option for me because it provides hands-on training, allowing me to learn directly from experienced professionals while earning a living. I thrive in environments where I can apply skills in real-world settings rather than just learning in a classroom. The combination of structured education and on-the-job experience makes an apprenticeship the ideal path for gaining the technical knowledge and problem-solving skills needed in the HVAC or plumbing trade.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've always been drawn to hands-on work and problem-solving, which is why I'm interested in a career in the building trades. I enjoy working with my hands, learning new skills, and seeing the direct impact of my work. The trades offer a career path where I can develop specialized skills, work in a high-demand industry, and have opportunities for long-term growth and stability.

Specifically, I'm interested in plumbing and HVAC because they are essential trades that keep homes, businesses, and industries running smoothly. The idea of working on complex systems, troubleshooting issues, and providing solutions excites me. Even though I don't have direct experience, I'm a hard worker, eager to learn, and committed to developing the skills needed to be successful in this field.

I'm currently enrolled in the Software Development program at FVTC in Appleton. The courses I've taken so far are Pre algebra,

Why is an apprenticeship an attractive option to you?

I've been through one before as a butcher and trained my own apprentices. I enjoy the culture of the trades in particular. And I've always been a better hands on learner than a book learner.

I think that working in a butchers union, and with the culture, was essential for acquiring the skills I needed to succeed.

What trades-related courses did you take in school?

Math-Algebra, Math-Geometry

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I'm a journeyman butcher and have been for sometime. I've always had friends and family in construction trades and have much respect for them. For a long time now I've wanted to switch trades. In 2017 I attempted to join the local Chicago plumbers union but my math skills at the time were lacking. A few years later, I moved to Appleton and started attending Fox Valley Technical College. I retok pre algebra, college mathematics, a math & logic class for software engineering, and even tutored my girlfriend in business applications of math for her degree. I studied hard and aced those classes and am now much more confident in my skills in mathematics.

What construction software or technologies do you have training in?

C++, C#, HTML, SQL, JSON, CSS, a little Python and a little JAVA

Any Safety Certificates:

First Aid / CPR

Why is an apprenticeship an attractive option to you?

An apprenticeship is what I want because it leads to a lifelong career of learning and becoming a professional in your field. I believe that my aptitudes are best suited for the trades because of the way I was raised and the skills I gathered and as a young man.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

My background is primarily in residential construction. I learned a lot of valuable skills over the years and enjoyed that time greatly. My mid-twenties have been spent trying my hand at sales and seeing where that could take me. While it has been productive, I don't believe that its really who I am and where my aptitudes are best suited. I want to get back to building real trade skills and becoming a professional. I have been working full-time while I completed a Welding and Fabrication Certificate from Gateway Technical College in Racine. I was immediately drawn to working with metals and after discussing with my instructors, we came to the conclusion that the pipe trades are the best place for me to grow.

Certifications: Machine operation training, including experience with various assembly equipment, safety protocols, and

What trades-related courses did you take in school?

Math-Algebra, Math-Calculus, Math-Geometry, Woodworking / Woodshop, Math-Precalculus / Trigonometry, Engineering, Electrical Trades / Electronics, Drafting and Design, Robotics

What construction software or technologies do you have training in?

AutoCAD, Solidworks

Any Safety Certificates:

First Aid / CPR

Add'l Details:

Tell us about any hobbies that have boosted pipetrade-relevant skills:

In my free time, I enjoy hands-on projects like coding and designing software tools, which have strengthened my problem-solving and troubleshooting skills—valuable for the construction trades. I also have experience operating machines and quickly learning new tools, thanks to my curiosity and adaptability.

Outside of technical activities, I enjoy being outdoors and playing team sports, which have taught me the importance of hard work, communication, and collaboration—skills

Why is an apprenticeship an attractive option to you?

An apprenticeship is a great option for me because I learn best by doing. It gives me the chance to work hands-on, learn from experienced professionals, and build real skills while on the job. I also like that I can earn money while I'm learning, which makes it a practical choice as I work toward supporting my family. I'm looking for a rewarding, long-term career, and an apprenticeship is the perfect way to gain the experience and knowledge I need to build a strong foundation in the trades.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've always been drawn to hands-on, problem-solving work, which is why I initially pursued electrical engineering and gained experience in circuit analysis and machine operation. Over time, I've realized that I thrive in environments where I can see the immediate, tangible impact of my work, which is why I've become interested in the building trades.

Specifically, plumbing appeals to me because it combines critical thinking and physical work to solve essential problems that affect people's daily lives. I enjoy the challenge of troubleshooting and finding practical solutions, and plumbing offers a career path where I can continue learning, build expertise, and make a meaningful contribution to communities.

It's a wonderful way to get into the trades and learn along the way to build my skill set and quality of work, to learn from someone who's really good at what they do to ensure the best learning experience and skill set improvement

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I love working with my hands and building anything I can, I'm not afraid of dirty work, although I currently do not have any welding or pipe fitting experience. I have some general construction experience, which lead me to a recommendation from my uncle who I believe is going through this program. He loves and enjoys what he does, seeing as I love construction I am adamant that I would enjoy this as well, I'm unsure of what the pipe trades entirely entails, but it is very intriguing.

Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

Plumber, HVAC/R Service Tech

Work Zones in Preference Order:

Fond du Lac Area (Orange)

Relevant Experience Level:

None. Nothing even close-but I'm a hard worker and willing to learn!

Years of Full-Time Work Experience:

7-9

Welding Experience:

Tell us about any jobs where you've learned pipetrades relevant skills:

My experience as an IT Systems Engineer involves diagnosing and resolving issues with complex systems. This skill is directly applicable to identifying and fixing problems with HVAC or plumbing systems. My technical skills of understanding complex computer systems could also translate into managing and understanding the intricacies in pipe systems.

My experience as a spot welder, even if basic, gives me a foundational understanding of

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I spend a lot of time with my 3D printer for 3D modeling. Skills in 3D printing using CAD software can be applicable in certain construction trades.

I often go on frequent camping trips and large strenuous hikes, so I am accustomed to the outdoors.

I read a lot of books in my free time and my comprehension skills are proficient.

Some 2-year college

Add'l Edu. Details:

In Fall of 2022 I started at Moraine Park Technical College for a dual degree program as a Network Support Specialist and a

What trades-related courses did you take in school?

Math-Algebra

Why is an apprenticeship an attractive option to you?

I got to where I am in the IT field not through books or classes. I achieved the position through sheer on the job experience. Work experience is the most important aspect of success and an apprenticeship would allow me this opportunity in the trades.

An apprenticeship provides the opportunity to show your worth and motivation. It's your chance to show others that you are driven and ready to learn.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I am currently working in the IT field as an IT Systems Engineer and have worked in IT for 7 years. The thought of spending my career behind a desk and computer monitor does not satisfy me. It bores me. I desire to spend my life being more active and doing stuff with my hands. And so I've turned to the trades in hopes of more fulfillment.

I'd like to do something that makes a tangible difference in society. Plumbers and HVAC/R technicians are integral to modern society. If your heat goes out in the winter, you freeze. Their knowledge has a serious impact on the lives of other people.

Why is an apprenticeship an attractive option to you?

I moved to U.S Sep 2024 to be with my wife (I am with marriage visa) and have a strong interests in trade jobs.

Then I found apprentice program from Local 400, the program seems very professional and it appears to me it can be a life long job if I started with the right company.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I always liked work with my hands get dirty. I spent about 2 years in construction and I was fulfilled with satisfaction that I can visually see my work.

Also I had a degree in Physics (Bachelor of science) which gave me a lot of basic knowledges of science that could easily apply for measuring, calculating math and such.

Directly related to Hvac would be I have a bit of experience of duct work in manufacturing, using mapping program, making parts

Post HS Education:

No

Add'l Edu. Details:

What trades-related courses did you take in school?

Engineering

Why is an apprenticeship an attractive option to you?

I really like the idea of an apprenticeship because I tried college but it just wasn't for me, I can do sit down learning but really prefer to learn hands on. It's really nice to be payed to learn and not accumulate debt as well as have a secure job at the end of it. I also have a lot of family members in the trades who really recommend it including my uncle John Davidson who is a Local 400 pipe fitter, which is how i was introduced to the opportunity.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

The building trades interested me because Im someone who likes working with their hands and not just sitting behind a desk. On top of that i like a job where I can see progress being made over the course of the day and take pride in the work I've done. Pipe trades specifically interested me because I also enjoy problem solving and with different pipe systems theres a more clear path to finding those problems by following the pipes. Another reason I am interested in the pipe trades is because my previous job was working at Galloway which is a dairy product plant so there is piping all around the building and I had to follow the flow of product as well as diagnose any problems that occurred.

Why is an apprenticeship an attractive option to you?

I am particularly drawn to an apprenticeship because it offers the opportunity to engage in hands-on learning, allowing me to acquire practical skills rather than being confined to a desk. The prospect of gaining valuable, real-world experience through this path is highly appealing. Additionally, I find reassurance in knowing that upon completing my apprenticeship, I will enter a field where I have built a solid foundation of knowledge and skills, and where my hard work and dedication will be recognized and rewarded.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I am particularly drawn to the trades because they offer a unique opportunity to build a solid career foundation while gaining a deep understanding of how buildings and interiors are constructed and function. After several years of exploring different job opportunities, I believe that acquiring skills in the trades will not only provide me with valuable, hands-on experience but also serve as a strong asset when it comes time to buy and maintain my own home in the future.

Why is an apprenticeship an attractive option to you?

An apprenticeship is an attractive option to me because it offers a hands-on learning experience where I can gain practical skills and knowledge in a specific trade or industry. I value the opportunity to learn from experienced professionals in a real-world setting and to receive guidance and mentorship throughout the training process. Additionally, apprenticeships often provide the potential for long-term employment and career advancement, making it a valuable investment in my future., An apprenticeship is an

Add'l Details:

Why is an apprenticeship an attractive option to you?

I very curious in knowing how things work and to understand more in the trades. I have a good work ethic and I enjoy putting in long hours during the week. I think an apprenticeship would be nice because I can work full-time, go to school, and get paid at the same time.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I grew up wrenching on trucks, four wheelers, and tractors. My dad was a maintenance technician and he taught me how to work on things and fix them. I have helped a couple people demo homes while I was in high school. I also have built many projects working with wood. I have a lot of interest in learning more in the trades.

The most pertinent would be blacksmithing. I make anything but knives. I specialize in 17th, 18th, and 19th century recreations...purely hand forged items such as: hinges, hasps, door/drawer pulls, shelf brackets, cooking utensils, jewelry, tables, shelving, war hammers, etc. My wife and I own a 124 year old farm house that I have completely remodeled myself including, the entire kitchen, cabinets, plumbing and electrical, two bathrooms, etc.

Why is an apprenticeship an attractive option to you?

An apprenticeship locks me into a learning path with guidelines and benchmarks with measurable results and/or failures from which to grow. It also helps to ensure a structured path of improvement, promotion, monetary compensation, benefits and predictable future.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

It began when I took every "industrial Arts" class my high school offered. I love to work with my hands and solve problems and see challenges from an unconventional perspective. As an adult I continued my quest for knowledge, working briefly as an electrician in my early twenties. Fast forward to several years ago I worked two years working in residential HVAC and currently manage Festival Foods internal equipment warehousing and logistics in the support of our eleven maintenance teams.

What currently returns my interest to a more hands on trade is a job that challenges me in using my knowledge in the realms physics and the multitude of building and fabricating skills I've acquired on my own throughout the years.

The apprenticeship program attracted me because I have many family members and relatives that have done and finished the apprenticeship program and I hear nothing but good things about it. Since freshmen year of high school I knew that I wanted to become a electrician or HVAC and the apprenticeship program has just that, the HVAC program caught my eye because they pay me to learn in what I want to do and something that I will enjoy doing., The apprenticeship program is an attractive option to me because it's

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

What Interested me in the trades was actually my brother and myself at the same time. My brother is currently a welder and I see that he enjoys his job but he also has friends who work for the local 400 currently and they are hvac and they actually recommended me the job. The HVAC Trade was very interesting to me because it caught my eye knowing it does a little bit of everything, now I wanted to become a electrician at first but I did my research and figured that HVAC has better benefits then a electrician and you actually work with electrical work as well. I also worked with a plumber last summer who worked for the school district and he showed me many tips and tricks on pipe fitting and trades and I really enjoyed what he did as a job., What interests me more about building a career in the trades, but more specifically The trade, HVAC is not just the trade but also the union, The union is a great place to start and build your career at a young age, I've been recommended by many people that have started there career here and fast forward 3-4 years later they are doing amazing with their careers. I really want to start

Tell us about any jobs where you've learned pipetrades relevant skills:

My only 2 jobs I have had were, working a summer job doing asphalt as a general laborer, and I am currently working at Green Bay Packaging as a general laborer/machine operator. I have learned numerous skills in these two places. One of the most important ones is learning on the go and figuring things out as they pop up. It makes you think quick and you learn to do things as they happen and figure it out. I think these skills can translate to any job really., I currently work for a local plumber in peshtigo. I have worked asphalt and worked in a pallet shop along with the local feed

Add'l Details:

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I enjoy hunting, fishing, and all types of outdoor sports and activities. I think this transfers over because I learn a lot of responsibility and dedication to them things while doing them all the time., I love hunting, fishing, and lots of sports. I think these things boost my skills because I learn teamwork in sports and hunting and fishing helps me to try and think of things to do that i normally wouldn't, I enjoy hunting, fishing, and any outdoor activities. I played multiple sports in high school and was captain of my football and baseball team both junior and senior year so that I feel gives me some good

Why is an apprenticeship an attractive option to you?

To start it off I thought long and hard about my decision after highschool . I knew first that a 4 year was not for me. So that was out of the question right away. I knew I loved being outside and learning hands on, so I looked into a paid apprenticeship. I think it attracts me because you get to learn a lot in school but mostly in the work field. I think that is the best way for me to learn so that is why it attracted me., Because I would love to learn more about the trade other than just the on job things. I love learning new things

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

To start off I enjoy working hands on and doing manual labor rather than sitting at a desk or in a factory/foundry. I've always loved working hands on since I was young I would always help my dad with certain projects around the house and other places. What interested me in this specific trade is that I just want to learn new things and plumbing happens to be one of them. I have a couple of friends that are in the plumbing trade and I've only heard good things. These reasons are why I am interested in this trade., I've always loved working hands on and working in the trades no matter which one it was. I currently work for a local plumber in peshtigo and I love it., I've always loved working hands on and learning on the job. I enjoyed taking shop classes and other woodworking and hands on things in school. I enjoy the pipe trades because I have worked for a local plumber for the last 9 months and just am looking to build a better future for myself., I enjoy working hands on and would love to further my knowledge in this trade

What construction software or technologies do you have training in?**Any Safety Certificates:****Add'l Details:**

Veteran, Veteran

Why is an apprenticeship an attractive option to you?

I would really like to earn my way to learn a useful trade and overall make a great career out of it., I have always had a draw to trades and I think this trade would work the best because I already have a slight knowledge on the type of work.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

My father is a union millwright and I have been welding throughout high school and even worked on brazing and tig welding for smaller pipes. I have always wanted to pursue a career within that field I am currently getting ready for CDL school in march. It is only a 3 week course I am wanting to start in the union as a steam fitter directly after I get my cdL. Thank you., My Father is a millwright for the local 2337 and has always pushed me towards the trades and then I found this trade where I would get to use my welding and brazing knowledge.

Why is an apprenticeship an attractive option to you?

I am currently 28 years old and looking to change work industries. An apprenticeship is attractive because it would allow me to continue to earn while I learn and not put as much of a stress on my family., I have a full time job/mortgage currently and would need income to pursue this exciting opportunity to learn and earn.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Problem solving, always being able to learn something new, working as a team to accomplish a specific goal. I want something that is fulfilling and always making me think about the best solution to a problem., I am interested in seeing new things everyday. Continuously learning new skills and information and then applying that information on new problems I discover. I enjoy working with my hands and doing meaningful work that ends with a finished product.

Overall, I am interested in the pipetrades because of the life long learning that is available. There is always something to learn and implement in the field.

Add'l Details:**Why is an apprenticeship an attractive option to you?**

The trades seem to be a very safe and stable option with a good income, benefit package and schedule to my liking., Just the ability to work and go to school, To be able to get an education in the career that I'm extremely interested in., The career advancement and the ability to make my child proud

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I was working in a hvac warehouse and the types of materials used made me extremely interested in the trade. And i did some research on the local union about 30 minutes north of my town., I just want to join a trade and I have experience in the warehouse and materials aspects of hvac and plumbing so I wanna earn more money and learn more., I would say my buddies got me interested in the pipe trades and I've been seeking information on it since., Just the idea of working and learning everyday. I love a career that can challenge me
