Relevant Experience Level:

None. Nothing even close-but I'm a hard worker and willing to learn!

Years of Full-Time Work Experience:

10+

Welding Experience:

Tell us about any jobs where you've learned pipetrades relevant skills:

The only skill I think I have learned that is related is problem solving for a third party company. When I worked at Amazon I use to work with a third party company and help them solve problems so they could continue to be operational for amazon's bussiness.

Problem solving is a huge component to most issues in trades from what I understand and it is something that I have always had an ability of being able to do. Working doing mind numbing labor would be the only other skill.

Shift Availability:

Math-Algebra

What construction software or technologies do you have training in?

Any Safety Certificates:

First Aid / CPR

Add'l Details:

Tell us about any hobbies that have boosted pipetrade-relevant skills:

My hobbies mainly include golfing and picking up skills on the technology side (Video game design, Animation) The ability to learn new skills is something I have always desired. I have always been the type of person that likes to learn.

My goals as far as the hobbies and this job are to learn the skills enough to eventually teach them. I would love to learn enough the pipefitting trade to teach it your classrooms. I also would like to eventually educate people in my hobbies via online

Why is an apprenticeship an attractive option to you?

I already have a 4 year degree that I don't really use, because I prefer to work with my hands rather than behind a desk. This apprenticeship would allow me to invest in myself and still be able to work with my hands.

I have always wanted to try the trades. I just thought I wanted to teach more. When I began teaching I realized that I do love it, but prefer teaching adults rather than kids. In

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I received my degree in education. While working in the school environment I realized I preferred working with my hands and learning new skills. I stayed in the warehouse sector after graduating because of this and the covid-19 pandemic. I regret not trying trades out as I always figured it was good skills to have and know.

I want to be in a union again. Where there is standardized everything. Where there is support in finding work if a lay off happens. Where skills are built from the ground up with a good foundation. A Career in the pipe trades seems to correlate with these goals.

I debated about going back to school, but already have a degree I don't use. Would rather work at this point in my life than take on more debt.

Add'l Details:
Why is an apprenticeship an attractive option to you?

This is an attractive option for me because it provides me an opportunity to earn while I learn and progressively earn more while I grow my knowledge in the field. I like the idea of having somebody with me each step that will take the time to teach me not only how to do something, by why it's done a certain way.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I have always enjoyed working with my hands and I feel that this would be a great opportunity to do so. I also enjoy building things and fixing things as well as meeting new people and helping people. Although I do not have any specific trade experience I do have general mechanical skills.

Why is an apprenticeship an attractive option to you?

Getting hands on experience but still getting schooling to better my knowledge.

What trades-related courses did you take in school?

Math-Algebra, Automotive Technology, Math-Geometry, Metals, Welding, Woodworking / Woodshop, Math-Precalculus / Trigonometry, Building Trades / Construction

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

A lot of my family has been in the trades and seeing them build a career for themselves interested me. Both of my uncles are union members and have encouraged me to work towards finding a fit for myself.

What construction software or technologies do you have training in?

Any Safety Certificates:

First Aid / CPR

What trades-related courses did you take in school?
Why is an apprenticeship an attractive option to you?

Apprenticeships offer hands-on learning which I excel in, as well as making money while learning. I'll stay out of debt while making lots of money and learn the way I'd always enjoyed.

I also take pride in my work. I'm gonna be the best at whatever I do, Working with journeyman workers every day all allows you to learn the tricks of the trade and fast. Being Fast and Consistent adds to a quality career .

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Job security, In my eyes everybody needs plumbers and HVAC technicians. If an HVAC unit goes out, people need you there and quick. Controlled environments are a large part of our society that go unnoticed. Following that idea I also think that Plumbers are a keystone of the everyday life as well. Everybody wants to take a shower when they get home from work. Restrooms are mandatory from big business to the everyday home, Making these workers needed everyday. Job Security is one of those big goals I have in life, that's my favorite idea when I think of a career in HVAC or Plumbing.

Job versatility. Everyday is an adventure, and no two situations are the same keeping my mind busy and hungry for information, I am very eager to hopefully explore that aspect of the HVAC and/or the plumbing world.

What construction software or technologies do you have training in?

AutoCAD, Revit

Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

HVAC/R Service Tech

Work Zones in Preference Order:

Appleton Area (Green)

Relevant Experience Level:

Some. I have worked for a plumber, steamfitter or HVAC/R contractor.

Years of Full-Time Work Experience:

1-3

Welding Experience:

Tell us about any jobs where you've learned pipetrades relevant skills:

I currently work at Black-Haak Heating and Cooling. I've learned a lot in the 6 months I've been here but I know I want to propell myself beyond the residential scene. Here they've had me do Furnace/AC installs, gas piping, ductwork, and service work when needed. Prior to my job at Black-Haak, I worked for a small electrical contractor down in Oshkosh, WI but felt like there was more I could learn elsewhere.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

On the side, I do a lot of mechanic work. I build cars and modify them for fun. I also have experience with building computers which I have found is very similar to most HVAC systems. Working with my hands has always left me with a great feeling of satisfaction being able to stand back after everything is done and see the hard work that has paid off.

Add'l Details:

Why is an apprenticeship an attractive option to you?

The idea of an apprenticeship to me is a chance to prove myself has a working individual. I believe that as long as I put in the work and dedication that the apprenticeship will benefit me greatly. It opens up a large network of people to me and I can choose to stand out by working hard and continually learning.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've always been a hands on learner. I did a bit of electrical work for a small contractor before I tried HVAC/R and fell in love with it. Everything from the low voltage system controls to ductwork it involved had me hooked. I especially love the system controls part of it because it reminded me a lot about building computers which is a hobby of mine. I feel that with my young age and committment to the quickly advancing HVAC field, now is the prime time for me to strengthen my career in it.

Add'l Edu. Details:

What trades-related courses did you take in school?

Math-Algebra, Math-Geometry

Why is an apprenticeship an attractive option to you?

An apprenticeship would be perfect for me. This is because I will be not only learning, but also applying what I learned to actually get a grasp of what's going on. I think an apprenticeship is a great balance between work and learning and that's exactly what I need.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I feel as if a hands on hard working environment is best for me. I feel like I grow the most when I have others around me to correct me and teach me, rather than solo stuff where I'm on my own. I also feel like I'll be surrounded with like minded people who will help me grow a lot in my career and personal life. I also think it would be fun in general to be able to learn something completely new and different compared to other things in my life.

Why is an apprenticeship an attractive option to you?

An apprenticeship is an attractive option to me because I find school not very interesting, and I also find it much easier to just learn by doing things instead of reading books and studying for tests.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I have seen many videos on YouTube by people such as HVACR Videos, which demonstrate what it is like to work as a refrigeration technician or a plumber. To me the work looks very interesting and fun, and I am looking for a new job that I can take seriously and work hard every day at.

Some 2-year college

Add'l Edu. Details:

What trades-related courses did you take in school?

What construction software or technologies do you have training in?

Any Safety Certificates:

Add'l Details:

Tell us about any hobbies that have boosted pipetrade-relevant skills:

Two of my main hobbies are playing soccer and tattooing, both have helped me build skills that I think will transfer well into the construction and pipe trades. Soccer has taught me the importance of teamwork, communication, and staying disciplined—especially when things get tough. It's also helped me stay physically fit and mentally focused, which are important for a hands-on, physically demanding career like this. Tattooing has helped me develop a steady hand, attention to detail, and patience. It's also taught me how to work with precision and take pride with the process.

Why is an apprenticeship an attractive option to you?

An apprenticeship is enhancing to me because it gives me the chance to earn while I learn. I like the idea of getting real hands-on experience while being taught by experienced professionals.

It also gives me a clear path toward a steady career. I'm motivated to start something long-term, and I respect the structure and support that comes with a union apprenticeship. It's a great opportunity to work hard, grow, and eventually become a

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I'm interested in a career in the building trades because I'm ready to start a stable, hands-on career where I can learn, grow, and build something meaningful. I may not have experience yet, but I'm a hard worker who enjoys learning new skills and pushing myself to improve. What really sparked my interest is seeing friends and family succeed in union trades. Hearing about the opportunities they've had and the pride they take in their work made me want to pursue something similar.

Specifically, the pipe trades stood out to me because of how essential and respected the work is. I want to be part of something that keeps communities running—whether it's plumbing, heating, or piping systems. My goal is to build a steady, reliable career I can be proud of and eventually work my way up to becoming a skilled professional in the field.

Why is an apprenticeship an attractive option to you?

I want to pursue an HVAC apprenticeship with a union because it offers the perfect combination of hands-on learning and structured education to help me build a stable and rewarding career. I'm drawn to the opportunity to earn a wage while gaining valuable experience under the guidance of professionals. The chance to acquire industry-recognized certifications, like EPA Section 608.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I enjoy working with my hands as well as my brain. HVAC/R is a trade that requires both. Additionally, there is a high demand, and good pay, and no matter where you are on the planet, there will always be a need for climate control.

Disciplines of Interest:

HVAC/R Service Tech

Work Zones in Preference Order:

Fond du Lac Area (Orange)

Relevant Experience Level:

None. Nothing even close-but I'm a hard worker and willing to learn!

Years of Full-Time Work Experience:

10+

Welding Experience:

Tell us about any jobs where you've learned pipetrades relevant skills:

Working Security and Law Enforcement in the Military, I developed many skills like attention to detail, problem solving, critical thinking, communication, and a strong work ethic. All of these skills were further honed and polished working as a dog trainer since separating in 2022.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I enjoy learning new things. Reading, watching videos, and practicing new skills is something that I would consider a hobby or activity of mine. The last 3 years I have worked primarily as a dog trainer, the growth in knowledge and skillset I've acquired in that time is what drove my passion for the career. I believe that same passion for learning will transfer to the construction trades as well.

What construction software or technologies do you have training in?

Any Safety Certificates:

Add'l Details:

Veteran

Why is an apprenticeship an attractive option to you?

I learned significantly more from my mentor when learning to be a dog trainer than from several years of watching videos and reading books alone. I don't have several years of experience reading books or watching videos on any trade, and so an apprenticeship is very appealing. Being paid to learn rather than paying to learn is also attractive. I want to learn how to do things right, in the right setting, and ensure that I am fully capable of doing the job correctly. An apprenticeship seems to be the best way to go on all counts.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

After leaving the military, I found myself in the same rut that prompted me to join in the first place. Taking entry-level jobs and trying to find side-hustles just to make ends meet. My wife and I had our first child and I decided I needed to do better than my parents did for me. Stability, opportunity for growth, and the opportunity to learn a new skillset that will last me for the rest of my life are what made me become interested in a career in the pipetrades.

Why is an apprenticeship an attractive option to you?

I am 31, married, and have a 5 year old son. For the last decade, I put my education and career on hold to support my wife as she chased her career dreams. Now that she is there, it is my turn to figure things out. I have always been drawn to a hands on career, and I thrive in an environment that constantly challenges my brain. The pipetrades is just that. I am ready to commit to something that is going to provide me with a career rather than a job, and be rewarding in the long run. I am ready to put in the work, and be

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've always been drawn to careers that involve hands-on work, problem-solving, and tangible results. The building trades offer a sense of pride and purpose in creating and maintaining essential infrastructure. I appreciate the teamwork, discipline, and continuous learning that comes with the trades. Specifically, the pipetrades caught my attention because of the critical role they play in both residential and industrial systems. Pipetrades professionals keep buildings safe, functional and efficient. While my work in the past was in a laboring function, I enjoyed learning from my mentors and would like to join a union and pursue the opportunity to become a journeyman myself.

Add'l Details:

Why is an apprenticeship an attractive option to you?

I've always enjoyed learning and working with my hands, I did 4 summers with a small construction company. I like the fact that when you finish your project you can say you did that, there's skills to learn and master., The ability to learn new skills but also being in a job that I'm not necessarily doing the exact same thing every day that has no skill to it. I want to learn new things and be able to apply those new skills to my job and Life.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

My first job was a summer construction job, I love working with my hands and learning new skills., I used to work in construction for my first job, I've always loved working with my hands and learning new skills. My Uncle is also a big inspiration to wanting to work in trade, he works welding now and my brother is an electrician as well. I worked factory for 5 and 1/2 years not really learning any new skills and that's my other biggest push to learn new skills that cannot only be used at work but applied to in real life.

What trades-related courses did you take in school?

Building Trades / Construction, Automotive Technology, Math-Algebra, Math-Geometry, Metals, Welding

What construction software or technologies do you have training in?**Any Safety Certificates:****Add'l Details:****Why is an apprenticeship an attractive option to you?**

I would love to have the opportunity to learn a new trade while being paid to do it. I would also much rather learn from guys with field experience and on the job instead of at a tech school and out of a book. I have come to realize that there is no replacement for real world experience and knowledge.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

After purchasing a house with a 20 year old furnace, I have become friendly with the local HVAC companies. Seeing the guys work to troubleshoot issues left me feeling pretty impressed at all of the knowledge they have of various systems from AC, to electrical to plumbing. I am currently a foreman of a welding, fabrication and machining shop and seeing this has really peaked my interest in the trade. I like to be challenged at work, and diagnosing issues or even doing new installs seems to be right up my alley.

Add'l Details:

Why is an apprenticeship an attractive option to you?

I think the opportunity to become an apprentice is far and away the best option for me at the current point of my life. I just bought a house, and am in search of a new job that I have clear growth in. The fact that I could learn a valuable skill while also getting paid on the job experience, it's a very attractive option.

I was also very eager to learn as a kid in school. I got good grades and asked questions.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

In high school, I took several construction classes & instantly realized it was very rewarding to see a project through start to finish. Specifically, I remember when we built a storage garage for my high school. I got to drive past it almost everyday & I took pride in my work.

The reason I want to get involved in the pipe trades (specifically HVAC/R service technician) is that I am in search of a long term career, and know this is a place I can find it. I recently had to connect a Common wire to my furnaces circuit board to power a new thermostat, and have been very curious about the whole system since. I love the idea of being able to provide a service that helps keep my community safe also.

Metal Fabrication

What trades-related courses did you take in school?

Building Trades / Construction, Math-Algebra, Metals, Welding, Woodworking / Woodshop, Math-Geometry

What construction software or technologies do you have training in?

AutoCAD

Any Safety Certificates:**Add'l Details:****Why is an apprenticeship an attractive option to you?**

I want to learn from the best and feel accomplished when I'm working on something that I can see I'm getting progressively better at doing. I hope to one day be able to teach what I've learned and continue the chain of great working people.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Growing up I've always wanted to work blue collar, started off as a metal fabricator since I was 18 years old and now decided to make a transition to a different trade after a year of debating whether to do it or not.
After countless research and asking around I've decided to join the union and wish to become a valuable member of local 400.

Building Trades / Construction, Math-Algebra, Math-Geometry

What construction software or technologies do you have training in?

Any Safety Certificates:

First Aid / CPR

Add'l Details:

Why is an apprenticeship an attractive option to you?

It's attractive for me because it is a way of learning a skill that is very useful not only for a job but in everyday life. I want to have a career that I can be proud of and also one that I can work in until I retire. I know I'm not overly young but it's something that I want to have for the rest of my career until the day I retire.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I have always done maintenance in the past and plumbing and HVAC have always been something I've wanted to get into as a career and not just something that I do here and there. I have family members that have been plumbers and they've always told me what a great career it was and I've just been trying to look into the right situation and this seems like the perfect situation for me.

Add'l Details:
Why is an apprenticeship an attractive option to you?

I've always been a hands on learner because I very much prefer to see the work being done in front of me in order to understand it better. Books only teach you so much when you can't visualize the way their information is applied. Not only is it the way I learn best but I also have a situation in which I need to keep making money as I go to survive. Without a steady income bills would fall through which I can't let happen when my baby girl is being born this March. Developing skills and career while being payed is the best

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I had gone to NWTC after a year of college and joined the carpentry program. Through experience in that I realized I didn't really enjoy doing it for work but while there I was able to visit various other trade programs to get more insight about the work they do. Plumbing and Electrician programs seemed a much better fit to me and I was much more interested. I've been hesitant to start and looking for an apprenticeship in the past due to frequently moving around Wisconsin for the past 3-4 years. Now things have changed and I have a child on the way this March. I won't be traveling as frequently and would like to build my career in pursuit of supporting that family along with my own self interest in the trade. It would mean the world to secure a future in plumbing.

Associate Degree

Add'l Edu. Details:

Criminal Justice degree (associates)

What trades-related courses did you take in school?

Woodworking / Woodshop, Metals, Welding, Math-Precalculus / Trigonometry, Math-Algebra

Why is an apprenticeship an attractive option to you?

I've never done well in a classroom only environment. In high school my favorite classes were machine tool, welding, and wood working. I learn so much better in a hands-on setting.

I'm also tired of just working "jobs". I want a career. And the "earn as you learn" format of a apprenticeship work perfectly for my family and I. I don't have the knowledge or

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Throughout my years working for Disney I've spoken to many individuals in the Engineering department that work for a variety of trades. My current job can be very monotonous and unfulfilling. I've been interested in pursuing an apprenticeship in the pipetrades because I would prefer to have a more hands-on career. Unfortunately with the low union pay in Florida and extremely high cost of living, I cannot afford to lose my current job.

My wife and I are planning to move to Wisconsin next year. My goal is to start a career journey that allows me to provide a comfortable life for my family.

Woodworking / Woodshop, Metals

What construction software or technologies do you have training in?

Any Safety Certificates:

Add'l Details:

Why is an apprenticeship an attractive option to you?

First and foremost it would give me the ability to use my brain and my body, something I have always strongly valued. An apprenticeship also gives me the ability for hands on learning, which is how I learn best.

I am newly married with my first child on the way, so an apprenticeship is also great because I can earn an income while I get the education I need.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I have a close friend who is currently working a HVAC Service Technician apprenticeship. He loves it, and was telling me what it entails and the benefits of this career. My dad worked construction most of his life, and I helped him growing up a few times. So I have always enjoyed the blue collar mentality and have never been afraid of hard work.

I have a bachelors degree in business administration, and have had a handful of jobs in a few different industries. One thing I've learned about myself is that I want a job that utilizes my mind, but also keeps me active. I am confident I would enjoy a career in this trade.

Add'l Details:

Why is an apprenticeship an attractive option to you?

An apprenticeship is a cool thing to go for because you wont get into a whole lotta debt. I have seen vidoes of people hard at work while learning at the same time and i very much enjoy learning. Learning is what makes the job fun and makes me strive to become better.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

working in customer service jobs has always struggling to learn new things but it was pretty much the same thing at every job ive ever had. Ive talked with my dad who works in carpentry and thats what brought me into it. Its been popping up on my computer and its been intresting to research and watch other people do these things that ive never even thought of doing. Ive always felt like I never knew how to do anything and always having to rely on someone else. I wanted to make a change by researching all of this and finally gained enough courage to start applying.

Business management and marketing

What trades-related courses did you take in school?

Why is an apprenticeship an attractive option to you?

Apprenticeship is an attractive options for me because I like the idea of getting paid to learn the skill. I do not want to sign up for any school loans, so this seems to be the best option for me. I am also a hands on learner. I feel that working with experienced tradespeople is the best way to learn.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I am currently interested in making a career change. I have a background in sales. In particular, selling industrial and construction supplies. I was successful at what I did, however it was unfulfilling.

What interests me in the building trades is working with my hands, building/doing something I can be proud of and learning life longs skills.

There are many reasons I am interested in the pipetrades (particularly HVAC). One of the most important is job security. In the winter people need heat, in the summer people need AC. With the rise of AI and automation, it will never replace skilled labor. Another reason I am particularly interested in HVAC is for the challenge and problem solving. I like the idea of continuous learning and growing a skill set that I can be proud of and have for life.

Welding Experience:**Tell us about any jobs where you've learned pipetrades relevant skills:**

As a truck driver for five years, I developed skills that apply to the pipe trades, including attention to detail, problem-solving, and working with tools. I maintained equipment, followed safety protocols, and managed logistics, all of which are essential in pipe work. My DIY projects have also given me hands-on experience with basic plumbing and home maintenance, further building my technical skills. These experiences have prepared me to learn and succeed in the pipe trades.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I enjoy weightlifting, DIY projects, golfing, and deer hunting, all of which have built skills useful in construction. Weightlifting improves my strength and endurance for physical work, while DIY projects sharpen my problem-solving and hands-on skills. Golf teaches patience and precision, and hunting requires discipline and adaptability, both important on a job site. These activities have helped me develop the physical and mental skills needed for construction work.

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:

4-6

Welding Experience:

Tell us about any jobs where you've learned pipetrades relevant skills:

I haven't had direct experience in the pipe trades, but I have worked on roofing jobs and for a drywall company, gaining hands-on construction experience. Roofing taught me physical endurance, safety awareness, and problem-solving, while drywall work helped me develop measuring, cutting, and installation skills. These jobs reinforced my work ethic, teamwork, and ability to learn on the job, which will help me succeed in a plumbing or HVAC apprenticeship.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

In my free time, I practice Jiu-Jitsu, go to the gym, and participate in various team sports. These activities have helped me develop physical and mental skills that are highly transferrable to the construction trades. Jiu-Jitsu has taught me discipline, patience, and problem-solving under pressure. It requires strategic thinking, adaptability, and attention to detail—just like working in plumbing or HVAC, where you need to assess situations, troubleshoot problems, and apply technical skills effectively.

Human Services Substance Abuse Counselor in Training Certificate

What trades-related courses did you take in school?

What construction software or technologies do you have training in?

Any Safety Certificates:

Add'l Details:

Why is an apprenticeship an attractive option to you?

An apprenticeship is an attractive option for me because it provides hands-on training, allowing me to learn directly from experienced professionals while earning a living. I thrive in environments where I can apply skills in real-world settings rather than just learning in a classroom. The combination of structured education and on-the-job experience makes an apprenticeship the ideal path for gaining the technical knowledge and problem-solving skills needed in the HVAC or plumbing trade.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've always been drawn to hands-on work and problem-solving, which is why I'm interested in a career in the building trades. I enjoy working with my hands, learning new skills, and seeing the direct impact of my work. The trades offer a career path where I can develop specialized skills, work in a high-demand industry, and have opportunities for long-term growth and stability.

Specifically, I'm interested in plumbing and HVAC because they are essential trades that keep homes, businesses, and industries running smoothly. The idea of working on complex systems, troubleshooting issues, and providing solutions excites me. Even though I don't have direct experience, I'm a hard worker, eager to learn, and committed to developing the skills needed to be successful in this field.

Add'l Details:**Why is an apprenticeship an attractive option to you?**

I've been through one before as a butcher and trained my own apprentices. I enjoy the culture of the trades in particular. And I've always been a better hands on learner than a book learner.

I think that working in a butchers union, and with the culture, was essential for acquiring the skills I needed to succeed.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I'm a journeyman butcher and have been for sometime. I've always had friends and family in construction trades and have much respect for them. For a long time now I've wanted to switch trades. In 2017 I attempted to join the local Chicago plumbers union but my math skills at the time were lacking. A few years later, I moved to Appleton and started attending Fox Valley Technical College. I retok pre algebra, college mathematics, a math & logic class for software engineering, and even tutored my girlfriend in business applications of math for her degree. I studied hard and aced those classes and am now much more confident in my skills in mathematics.

Sports have always been a love of mine. After my formal competing ended, I have been coaching where and when I can for the past 5 years. I have coached Pole Vault at both Fond Du Lac High School and UW Oshkosh. Through sports, I learned that accomplishing goals with others is very rewarding and enjoyable. I have also learned that working with others can be challenging at times, but it's important to see the big picture and understand that the goal you are working towards is what's most important. I also learned how to receive instruction and impart my knowledge to others.

Why is an apprenticeship an attractive option to you?

An apprenticeship is what I want because it leads to a lifelong career of learning and becoming a professional in your field. I believe that my aptitudes are best suited for the trades because of the way I was raised and the skills I gathered and as a young man.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

My background is primarily in residential construction. I learned a lot of valuable skills over the years and enjoyed that time greatly. My mid-twenties have been spent trying my hand at sales and seeing where that could take me. While it has been productive, I don't believe that its really who I am and where my aptitudes are best suited. I want to get back to building real trade skills and becoming a professional. I have been working full-time while I completed a Welding and Fabrication Certificate from Gateway Technical College in Racine. I was immediately drawn to working with metals and after discussing with my instructors, we came to the conclusion that the pipe trades are the best place for me to grow.

Add'l Details:

Tell us about any hobbies that have boosted pipetrade-relevant skills:

In my free time, I enjoy hands-on projects like coding and designing software tools, which have strengthened my problem-solving and troubleshooting skills—valuable for the construction trades. I also have experience operating machines and quickly learning new tools, thanks to my curiosity and adaptability.

Outside of technical activities, I enjoy being outdoors and playing team sports, which have taught me the importance of hard work, communication, and collaboration—skills

Why is an apprenticeship an attractive option to you?

An apprenticeship is a great option for me because I learn best by doing. It gives me the chance to work hands-on, learn from experienced professionals, and build real skills while on the job. I also like that I can earn money while I'm learning, which makes it a practical choice as I work toward supporting my family. I'm looking for a rewarding, long-term career, and an apprenticeship is the perfect way to gain the experience and knowledge I need to build a strong foundation in the trades.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've always been drawn to hands-on, problem-solving work, which is why I initially pursued electrical engineering and gained experience in circuit analysis and machine operation. Over time, I've realized that I thrive in environments where I can see the immediate, tangible impact of my work, which is why I've become interested in the building trades.

Specifically, plumbing appeals to me because it combines critical thinking and physical work to solve essential problems that affect people's daily lives. I enjoy the challenge of troubleshooting and finding practical solutions, and plumbing offers a career path where I can continue learning, build expertise, and make a meaningful contribution to communities.

It's a wonderful way to get into the trades and learn along the way to build my skill set and quality of work, to learn from someone who's really good at what they do to ensure the best learning experience and skill set improvement

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I love working with my hands and building anything I can, I'm not afraid of dirty work, although I currently do not have any welding or pipe fitting experience. I have some general construction experience, which lead me to a recommendation from my uncle who I believe is going through this program. He loves and enjoys what he does, seeing as I love construction I am adamant that I would enjoy this as well, I'm unsure of what the pipe trades entirely entails, but it is very intriguing.

Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

Plumber, HVAC/R Service Tech

Work Zones in Preference Order:

Fond du Lac Area (Orange)

Relevant Experience Level:

None. Nothing even close-but I'm a hard worker and willing to learn!

Years of Full-Time Work Experience:

7-9

Welding Experience:

Tell us about any jobs where you've learned pipetrades relevant skills:

My experience as an IT Systems Engineer involves diagnosing and resolving issues with complex systems. This skill is directly applicable to identifying and fixing problems with HVAC or plumbing systems. My technical skills of understanding complex computer systems could also translate into managing and understanding the intricacies in pipe systems.

My experience as a spot welder, even if basic, gives me a foundational understanding of

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I spend a lot of time with my 3D printer for 3D modeling. Skills in 3D printing using CAD software can be applicable in certain construction trades.

I often go on frequent camping trips and large strenuous hikes, so I am accustomed to the outdoors.

I read a lot of books in my free time and my comprehension skills are proficient.

What trades-related courses did you take in school?

Math-Algebra

Why is an apprenticeship an attractive option to you?

I got to where I am in the IT field not through books or classes. I achieved the position through sheer on the job experience. Work experience is the most important aspect of success and an apprenticeship would allow me this opportunity in the trades.

An apprenticeship provides the opportunity to show your worth and motivation. It's your chance to show others that you are driven and ready to learn.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I am currently working in the IT field as an IT Systems Engineer and have worked in IT for 7 years. The thought of spending my career behind a desk and computer monitor does not satisfy me. It bores me. I desire to spend my life being more active and doing stuff with my hands. And so I've turned to the trades in hopes of more fulfillment.

I'd like to do something that makes a tangible difference in society. Plumbers and HVAC/R technicians are integral to modern society. If your heat goes out in the winter, you freeze. Their knowledge has a serious impact on the lives of other people.

What construction software or technologies do you have training in?

Why is an apprenticeship an attractive option to you?

I moved to U.S Sep 2024 to be with my wife (I am with marriage visa) and have a strong interests in trade jobs.

Then I found apprentice program from Local 400, the program seems very professional and it appears to me it can be a life long job if I started with the right company.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I always liked work with my hands get dirty. I spent about 2 years in construction and I was fulfilled with satisfaction that I can visually see my work.

Also I had a degree in Physics (Bachelor of science) which gave me a lot of basic knowledges of science that could easily apply for measuring, calculating math and such.

Directly related to Hvac would be I have a bit of experience of duct work in manufacturing, using mapping program, making parts

The apprenticeship program attracted me because I have many family members and relatives that have done and finished the apprenticeship program and I hear nothing but good things about it. Since freshmen year of high school I knew that I wanted to become a electrician or HVAC and the apprenticeship program has just that, the HVAC program caught my eye because they pay me to learn in what I want to do and something that I will enjoy doing., The apprenticeship program is an attractive option to me because it's

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

What Interested me in the trades was actually my brother and myself at the same time. My brother is currently a welder and I see that he enjoys his job but he also has friends who work for the local 400 currently and they are hvac and they actually recommended me the job. The HVAC Trade was very interesting to me because it caught my eye knowing it does a little bit of everything, now I wanted to become a electrician at first but I did my research and figured that HVAC has better benefits then a electrician and you actually work with electrical work as well. I also worked with a plumber last summer who worked for the school district and he showed me many tips and tricks on pipe fitting and trades and I really enjoyed what he did as a job., What interests me more about building a career in the trades, but more specifically The trade, HVAC is not just the trade but also the union, The union is a great place to start and build your career at a young age, I've been recommended by many people that have started there career here and fast forward 3-4 years later they are doing amazing with their careers. I really want to start

Tell us about any hobbies that have boosted pipetrade-relevant skills:

working in cars so I know how to turn a wrench and use my hands, I enjoy fishing, working on cars, spending time with my family and being outside. These skills are transferrable to the trades because being outdoors shows how I am able to work in diverse weather conditions. Working on cars helps me with my hand to eye coordination and boosts my knowledge of tools. Having a one year old and another on the way helps me to learn patience and time management.

Years of Full-Time Work Experience: 4-6, 7-9**Welding Experience:**

Flux Core - Some Knowledge, MIG - Some Knowledge, TIG - Some Knowledge, MIG - Some Knowledge, Flux Core - Some Knowledge

Tell us about any jobs where you've learned pipetrades relevant skills:

I have very good problem solving skills from diagnosing fitness equipment. In some cases there will be broken frame pieces that I have to weld to repair., I've worked in a couple of machine shops where I delt with grinding to prep parts or deburring. I also often weld frames of fitness equipment

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I currently travel to multiple homes a day doing house calls to repair fitness equipment. I feel as though the diagnostic, parts ordering and repair would be very similar to the hvac repair process., I weld up damaged frames on fitness equipment and then sell them. I've helped multiple friends open gyms by doing all the renovations ourselves. Including drywall, flooring and paint.

Dropped out of UW social work program during covid, 3 years in college for social work

What trades-related courses did you take in school?

Math-Algebra, Math-Geometry, Math-Precalculus / Trigonometry, Math-Algebra, Math-Geometry, Math-Precalculus / Trigonometry, Math-Algebra, Math-Geometry, Math-Precalculus / Trigonometry, Math-Algebra, Math-Geometry, Math-Precalculus / Trigonometry

What construction software or technologies do you have training in?**Any Safety Certificates:**

First Aid / CPR

Add'l Details:**Why is an apprenticeship an attractive option to you?**

The trades seem to be a very safe and stable option with a good income, benefit package and schedule to my liking., Just the ability to work and go to school, To be able to get an education in the career that I'm extremely interested in., The career advancement and the ability to make my child proud

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I was working in a hvac warehouse and the types of materials used made me extremely interested in the trade. And i did some research on the local union about 30 minutes north of my town., I just want to join a trade and I have experience in the warehouse and materials aspects of hvac and plumbing so I wanna earn more money and learn more., I would say my buddies got me interested in the pipe trades and I've been seeking information on it since., Just the idea of working and learning everyday. I love a career that can challenge me
