Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

Plumber, Steamfitter (Pipefitter)

Work Zones in Preference Order:

Green Bay Area (Yellow)

Relevant Experience Level:

Some. I have worked for a plumber, steamfitter or HVAC/R contractor.

Years of Full-Time Work Experience:

7-9

Welding Experience:

MIG - Some Knowledge, TIG - Some Knowledge, Stick - Some Knowledge

Tell us about any jobs where you've learned pipetrades relevant skills:

I've worked with plumbers such as Dave Steltz and Maritime Plumbing which I have learned so much from in correlation to the pipe trades. I also work with Webuyhouses.com as a general laborer. There I do plumbing related jobs such as, installation of appliances, faucets, toilets and sinks.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I like to work on vehicles and create my own furniture in my free time. I also enjoy helping out my father when he buys a new house to fix up and sell. I help him out by doing carpentry tasks such as pulling carpet/flooring, gutting rooms, faucet installations, appliance installations, etc. This shows the problem solving, creativity, mechanical knowledge and work ethic skills transferrable to the construction trades.

Shift Availability:

Post HS Education:

No

Add'l Edu. Details:

What trades-related courses did you take in school?

Why is an apprenticeship an attractive option to you?

I would like to get an apprenticeship because the union treats its employees outstanding, and it is the start of something I would like to be a part of indefinitely. This apprenticeship to me is just the starting point. Also, it would help me learn and grow in my desired field, so one day I can be the best in my field.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I come from a long line of carpenters, electricians, builders, etc. But no one in my family has any knowledge or experience in the plumbing industry. I want to be the first in my family to have the skills necessary to complete projects related to plumbing and be endowed with the level of mastery I will accomplish throughout my plumbing career.

What construction software or technologies do you have training in?

Inventor

Add'l Edu. Details:**What trades-related courses did you take in school?****What construction software or technologies do you have training in?****Any Safety Certificates:****Add'l Details:****Why is an apprenticeship an attractive option to you?**

The apprenticeship program at the local 400 was attractive to me for the opportunity to grow and learn more as the years go. I like to feel like I'm always improving my life as the years go. I don't like to feel like I'm wasting my life away and with this program I feel like it's a good career path that leads me to where I want to be in life. I can see there is an abundance of opportunity here. What really had me considering this as well was my brother who also works for the local 400. I can see how he is able to live a good life

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've always been a more hands on worker. I have also been looking for something where I can grow more so as soon as my brother told me about the local 400 and how it's a paid to learn program. It intrigued me a whole lot he brought over a folder with more information and from what I've read and seen I feel like the local 400 would be a good fit for me. Pipe trades is something completely new to me but I've always been a fast learner and I like to do things fast and the right way. I feel as long as there is someone willing to teach me the right way I will make a good part of any team. My managers and past foremen would also always say how I was a good worker and pick things up quick. I'm excited and ready to work and learn about the pipe trades.

What construction software or technologies do you have training in?

CNC

Any Safety Certificates:

Add'l Details:

Why is an apprenticeship an attractive option to you?

It appeals to me since I've already gone through and apprenticeship during high school at Fox Valley Tool and Die and I learned a lot of skills and lessons from the let's say old timers at work that I can use anytime

And as an apprentice you can get the most experience working in every field getting skills in every process making yourself more valuable to your company until you get

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I got interested in the pipetrades because I like to work long hours and be able to travel to do work on site. I've always liked to do the work nobody else wants to do. My first job when I was 14 working on a farm also helped steer me in the direction of the trades. I have coworkers at my current apprenticeship that used to be pipefitters and I've heard a lot from them about the job that I said I'd love to do

One thing I like about working in the building trades is you get to learn a lot of skills and lessons from the veteran workers. The most important thing I've learned from being in the trades is to slow down, don't slow down the speed you're getting the work done but slow down your thinking. Make sure everything is done right before you do it so the company doesn't have to spend money that doesn't need to be spent redoing your mistake

Add'l Details:
Why is an apprenticeship an attractive option to you?

The additional education, and career opportunities have a large appeal to me. In industry a journymens license in skilled professionals "Batchelor degree" demonstrating the time and dedication a person has put into to master a craft. I believe it's the highest honor, for someone who prides themselves on working with their hands, can obtain.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

A instructor I had at fox valley tech recommended me to go into the field of pipe welding. I felt this was a good option for me because of my attention to detail, eagerness to learn, and love for personal challenge and growth. Not all welders have what it takes to be pipe welders, but I believe I do. The benefits, opportunity, and education potential was too much for me to ignore, and I wish to explore pipe welding as a career.

I have not had any jobs that were applicable to the pipe trades. I have only done it in college.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

At home, me and my dad do wood working. Whether it is bird houses to arbors, from raised garden beds to small green houses, I've been working with my hands since I was 5 years old. In high school, I did cabinet making, metal fabrication, and welding. In metal fabrication, we built toolboxes and different forms of shelves. In welding, I helped build fire pits and portable grills. Some of the grills were welded together, then some were not. In college, we also did blueprint reading. So, I have skills in reading different forms of blueprints including pipe blueprints.

Any Safety Certificates:
Add'l Details:
Why is an apprenticeship an attractive option to you?

The reason why an apprenticeship is an attractive option to me is because I want to open my mind to learning more on the pipe trades and possibly get a job working in the pipe trades.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I grew up working in a shop learning how to build things with wood. Later on, specifically in high school, I got into welding. I used to do some welding on my family's farm on the side but, got very into welding in high school. I started to do more with stick (SMAW), MIG (GMAW), and TIG (GTAW). As I got more into welding, I decided that I wanted to do it as a job. I started talking to people who came to the trades fair we held at school and came to the conclusion that welding was the way I wanted to go.

In college, I asked my instructor if I could try pipe after I got done with pipe to plate with TIG. He said yes so, I did it and thought, "This is something I could really do for a job." I started to practice more and more as time went on. I really got into it when we went to the Local 400 for a tour.

Why is an apprenticeship an attractive option to you?

I feel that it would help me learn more about the trade I wish to go into. You can read all the books you want to but it can't compare to learning from someone who has already made that mistake or has found a better way of going about solving a problem. Having an experienced mentor gives the student or apprentice a better understanding of that material, they are able to ask more questions with better answers than finding them in a book or online. Personally I see myself as someone who learns better hands on and

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I hadn't had a lot of experience in highschool just a couple of odd ends on the farm. However I went to the tech and took a welding class and had so much fun. I graduated the program and got my certificate. I am now looking forward to the next step in taking classes to get into the position that I feel I'd have the most fulfillment doing.

Plumber, Steamfitter (Pipefitter), HVAC/R Service Tech

Work Zones in Preference Order:

Green Bay Area (Yellow)

Relevant Experience Level:

None. Nothing even close-but I'm a hard worker and willing to learn!

Years of Full-Time Work Experience:

0

Welding Experience:

Tell us about any jobs where you've learned pipetrades relevant skills:

I do not have any

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I try and repair everything in my house when it breaks before I replace it in order to try and gain skills. I particularly enjoy working on toilets and appliances such as refrigerators and washing machines as I feel they are a good challenge.

Shift Availability:

Full-time, Part-time, Overtime, Weekends, 1st Shift (Days), 2nd Shift (Nights)

Post HS Education:

No

Add'l Edu. Details:

What trades-related courses did you take in school?

Math-Algebra, Math-Geometry, Metals, Woodworking / Woodshop

What construction software or technologies do you have training in?

Any Safety Certificates:

Add'l Details:

Why is an apprenticeship an attractive option to you?

An apprenticeship is an attractive option to me because I find school not very interesting, and I also find it much easier to just learn by doing things instead of reading books and studying for tests.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I have seen many videos on YouTube by people such as HVACR Videos, which demonstrate what it is like to work as a refrigeration technician or a plumber. To me the work looks very interesting and fun, and I am looking for a new job that I can take seriously and work hard every day at.

Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

Steamfitter (Pipefitter), Pipe Fabricator

Work Zones in Preference Order:

Green Bay Area (Yellow)

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:

1-3

Welding Experience:

Flux Core- Skilled, MIG - Skilled, TIG - Some Knowledge, Stick - Skilled

Tell us about any jobs where you've learned pipetrades relevant skills:

I learned a lot of skills from marinette marine shipyard that can be considered applicable to pipe trades. Specifically blueprint reading, metal fabrication, using grinders, hot work like welding, prepping and preparing the work-sight for hot work like taping off and using fir blankets.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I have a lotta skills and hobbies that translate to pipe fitting and welding, like building custom go karts/buggies, mini bikes, and pit bikes all with high powered small engines. I do all the pipe notching by hand using an angle grinder, I use a pipe bender a lot for the frames I build. I recently just bought a tig welder and been using that more for the welding instead of mig.

Shift Availability:

Full-time, 2nd Shift (Nights), 1st Shift (Days), Weekends, Overtime

Post HS Education:

No

Add'l Edu. Details:
What trades-related courses did you take in school?

Building Trades / Construction, Math-Algebra, Math-Geometry, Robotics, Welding, Woodworking / Woodshop

What construction software or technologies do you have training in?
Any Safety Certificates:

OSHA 10, OSHA 30, First Aid / CPR

Add'l Details:
Why is an apprenticeship an attractive option to you?

I think the apprenticeship is a great opportunity for me to expand my skills and work towards a job that pays good and can go all across the country, instead of just being dedicated to one place that can slow down and lay people off.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

What first interested in the building trades was my dad, as a child I would always help with his construction projects, and mechanical projects. Which lead me to finding a local contractor and helping out for my first job. What brought me to welding was at home I started building go karts, mini bikes, etc. I currently do have a job at marinette Marine as a welder. I would like to expand my skills on pipe, whether it's pipe fitting or welding I would prefer welding over the two but I like both. I've also done some fitting so I can read a blueprint pretty well. I think I would be a great addition to your crew.

Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

Steamfitter (Pipefitter)

Work Zones in Preference Order:

Green Bay Area (Yellow)

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:

1-3

Welding Experience:

Flux Core - Some Knowledge, MIG - Some Knowledge, TIG - Some Knowledge, Stick - Some Knowledge

Tell us about any jobs where you've learned pipetrades relevant skills:

I am currently working at Marinette Marine I am a structural welder. I am using the Flux core process and just passed my seam test. They are going to be sending me to pipe school April 30th, but after pipe school I would like to take that knowledge and find a job through the 400. Before this I worked at a fab shop in Green Bay making trolley frames and that was mainly MIG and FLUX.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

My main hobby I would say is riding horses. I think this helps me to be responsible. Also all of the hours I pour my heart and soul into making them perform at the level I desire. It makes me feel proud of the outcome of their training. I think this boosts my skills in the construction trade because you put so many hours into a project and feel accomplished and proud of all of the hard work you put into it.

Shift Availability:

Full-time

Post HS Education:

Other Relevant Courses & Certifications

Add'l Edu. Details:

Welding certifications through NWTTC

What trades-related courses did you take in school?

Welding, Math-Algebra, Metals

Why is an apprenticeship an attractive option to you?

I think this would be a great opportunity to advance my knowledge on the career I would like to further in. This gives me the chance to still be able to work and learn more. I am the type of person that loves to learn new things about the career I am in. I have a couple friends that are in the apprenticeship already and tell me that they love it. I would also love to gain more knowledge on TIG as that is the process of welding I would like to do.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I enjoy being being able to see the outcome of products that I put value and pride in. I decided to become a welder because I wanted a hands on job and something to do in the trades. I also love the wide variety of different things that I have the chance to build. For example I work at Marinette Marine currently and I think it is really unique on how everything works on building a navy vessel. I am just a structural welder and I would love to further a career in the pipe trades as I would love to become a great big welder. I would say I am definitely the type of person that loves to learn.

What construction software or technologies do you have training in?**Any Safety Certificates:**

First Aid / CPR

Add'l Details:

Why is an apprenticeship an attractive option to you?

A welding apprenticeship is an attractive option because it offers hands-on experience while earning a paycheck, allowing me to learn the trade without taking on student debt. Apprentices work under the guidance of experienced professionals, gaining practical skills in real-world settings that go beyond what can be taught in a classroom.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Welding is my dream job because it combines precision, creativity, and hands-on work in a way that few other careers can. I've always been drawn to working with my hands and building things from the ground up, and welding allows me to bring metal to life through heat, skill, and focus. It's a skill that's in demand across many industries, and I like the idea of having a trade that offers both stability and flexibility. Welding isn't just a job to me it's a craft I'm passionate about mastering, a career where I can keep learning, improving, and leaving a lasting mark through every weld I make.

The majority of my experience has been in healthcare. So the most applicable skills would be systems based thinking, problem solving, team leading and communication.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I have functioned as a member of high pressure teams in the surgical world as an RN. This would translate to functioning with high standards and professional work ethic as a steamfitter. In my spare time I love working on guitar maintenance including soldering. The ability to read, follow and execute a schematic with the enjoyable result of a well functioning guitar or bass relates to the ability to read blueprints and then execute them when welding.

Shift Availability:

Full-time, Part-time, Weekends, 1st Shift (Days)

Post HS Education:

Bachelor Degree

Add'l Edu. Details:

I have a BSN from Milwaukee School of Engineering. I have a BS in research psychology from University of St. Andrews.

Why is an apprenticeship an attractive option to you?

I am a kinesthetic learner. For me I do not learn in abstraction but by observing and doing. An apprenticeship would be the ideal learning environment where I am immersed in the field and getting hands on experience.

What trades-related courses did you take in school?

Math-Algebra

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I would love to enter a field where I am working on projects that require competency and I can see the finished results of my labor. The level of skill required for steamfitting interests me because I like learning and bettering myself so a field that requires high standards would encourage me to be my best.

What construction software or technologies do you have training in?

Any Safety Certificates:

First Aid / CPR

Add'l Edu. Details:

OSHA 10, OSHA 30, and will have a certificate in Industrial Pipefitting from Lively Technical College in Tallahassee, FL on

Why is an apprenticeship an attractive option to you?

I would like to gain experience with my new skills, and learn to be the best. The UA apprenticeship puts out top tradesmen while maintaining a pro worker mentality. Those are both great reasons to pursue an apprenticeship.

What trades-related courses did you take in school?

Woodworking / Woodshop, Building Trades / Construction

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I grew up in a blue collar household where working with your hands was a prerequisite for adulthood. I was raised to not shy away from, but to value a good days work.

I grew disillusioned with management, and looked for a new trade that I could enjoy while making a good wage. My cousin recommended that I look into Pipefitting or welding as he is out of the Augusta local as a traveler.

I signed up for the Industrial Pipefitting course at the local technical college, and was hooked.

This is a fascinating line of work with so much opportunity. I'm excited to learn more and to possibly be a part of the brotherhood.

What construction software or technologies do you have training in?

Why is an apprenticeship an attractive option to you?

Seems like a good opportunity to get hands on training, that's the best way I learn, showing me what to do is a lot easier than sitting me down and telling me what to do. If you show me how you want it done that's the way I'm going to do it.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I started welding in high school had intentions to go to college for it , but sadly I didn't I took an opportunity to work for a farmer because I needed the money at the time and never looked back at it, I worked there for 6 years before I came to realize that it wasn't a good life decision and they were not going to help me succeed and thrive. moved on and tried otr highway construction pouring concrete for a few months but got a sour taste put on my toung due to non consistent work and having to pay out of pocket for somewhere to sleep. I currently am employed as a media blast technician and I don't for see a good future with the amount of effort I put in , I feel not respected where I'm at. So I started looking at other options I'm looking at ether you or nwtc for a 2 year class.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

enjoy hobbies like woodworking, minimal maintenance work on my car and DIY home improvement projects, which have helped me develop problem-solving skills, attention to detail, and a strong sense of how to work with tools and materials—skills that are directly transferable to the construction trades. I'm a visual and hands on type of learner.

Why is an apprenticeship an attractive option to you?

An apprenticeship is an attractive option to me because it offers the perfect balance of hands-on learning and practical experience. I appreciate the opportunity to learn directly from experienced professionals while earning a living. This approach allows me to build a strong foundation of skills and knowledge in a real-world setting, which is much more valuable than classroom-based learning alone. I'm excited about the chance to develop my expertise over time, learn from mentors, and work on actual projects that contribute

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I'm interested in a career in the pipe trades because it's an industry that is essential to many sectors, from construction to energy, and it's one that is only going to keep growing. As the demand for infrastructure and new construction continues to rise, so do the opportunities within this field. It's a career where I can build valuable skills, contribute to critical projects, and enjoy long-term stability and growth.

Any Safety Certificates:

First Aid / CPR

Add'l Details:

Why is an apprenticeship an attractive option to you?

I've always been a hands on learner because I very much prefer to see the work being done in front of me in order to understand it better. Books only teach you so much when you can't visualize the way their information is applied. Not only is it the way I learn best but I also have a situation in which I need to keep making money as I go to survive. Without a steady income bills would fall through which I can't let happen when my baby girl is being born this March. Developing skills and career while being payed is the best

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I had gone to NWTC after a year of college and joined the carpentry program. Through experience in that I realized I didn't really enjoy doing it for work but while there I was able to visit various other trade programs to get more insight about the work they do. Plumbing and Electrician programs seemed a much better fit to me and I was much more interested. I've been hesitant to start and looking for an apprenticeship in the past due to frequently moving around Wisconsin for the past 3-4 years. Now things have changed and I have a child on the way this March. I won't be traveling as frequently and would like to build my career in pursuit of supporting that family along with my own self interest in the trade. It would mean the world to secure a future in plumbing.

Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

HVAC/R Service Tech, Pipe Fabricator, Plumber, Steamfitter (Pipefitter)

Work Zones in Preference Order:

Appleton Area (Green), Green Bay Area (Yellow)

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:

1-3

Welding Experience:

Flux Core - Some Knowledge, MIG - Skilled, Stick - Some Knowledge

Tell us about any jobs where you've learned pipetrades relevant skills:

I learned how to weld from welding through high school and different opportunities welding after, to better expand my knowledge. Done a couple online courses along with using a booth to practice.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I rebuilt all kinda of cars or motorcycles. Whether it's wiring fabrication or mechanical. I also have a new job opportunity working for a contraction

Shift Availability:

Full-time, 1st Shift (Days), Overtime

Post HS Education:

No

Add'l Edu. Details:**What trades-related courses did you take in school?**

Automotive Technology, Electrical Trades / Electronics, Math-Algebra, Math-Geometry, Metals, Welding, Woodworking / Woodshop, Robotics, Construction Technology

What construction software or technologies do you have training in?

CNC, Revit

Any Safety Certificates:**Add'l Details:**

Veteran

Why is an apprenticeship an attractive option to you?

Because I want to be able to learn and apply a new skill set to a specific task. I also believe this apprenticeship program is a good opportunity to learn about the company and grow along with it.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I'm interested in learning a vast set of skills and techniques to improve on my knowledge of the trades. Also want to be able to grow within the company over time.

Add'l Details:

Why is an apprenticeship an attractive option to you?

So I can learn more about welding, something that I really enjoy doing, and working at a job where skill will really play a part in my job.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

It started to interest me when I was in high school learning about welding. Being apart of the union with all the benefits and the overall good pay. Having a job like this would be great to have, since welding is just fun in general. Working in something that is also skilled based is something that interested me.

Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

Steamfitter (Pipefitter), Plumber, Pipe Fabricator

Work Zones in Preference Order:

Appleton Area (Green)

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:

1-3

Welding Experience:

Stick - Some Knowledge, MIG - Some Knowledge, TIG - Some Knowledge, Flux Core - Some Knowledge

Tell us about any jobs where you've learned pipetrades relevant skills:

My current job I have now is production welding. I have learned many things such as power tool use, blue print reading, and adaptability to different welding methods. These skills I use on a daily basis to be able to do my job and are similar skills needed for pipe trades.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

An activity that would be transferable to construction trades would be time management on production and quality. I do a lot of time management at my current workplace now due to there being a set rate on parts. I also do a lot of reworking on parts that don't meet standards. I would consider these two to be activities at work as I do them on a consist basis, and uphold my own standards that go above company standards for I believe in only giving the best work at all times.

Shift Availability:

Overtime, 2nd Shift (Nights), Weekends

Post HS Education:

Associate Degree, Other Relevant Courses & Certifications

Add'l Edu. Details:

Associates in Arts & Science, Welding Industrial Technical Diploma

What trades-related courses did you take in school?

Welding, Math-Precalculus / Trigonometry, Math-Algebra

Why is an apprenticeship an attractive option to you?

An apprenticeship is a good opportunity to learn from someone who has more knowledge and skills. Their skills and knowledge would be an absolute asset to being a successful welder and being able to problem solve in a different mindset. It gives opportunities to improve my skills and what I may be lacking in and needing more help. With an apprenticeship I will have the skills and knowledge to further my career and one day lend it to another who may follow my steps.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

When I was in high school, I took a class for metal working and we did a bit of welding in the course. I had an interest in welding from that point on and continued to LTC for a Welding Industrial Technical Diploma to gain more exposure to welding. I have always heard about pipe fitting and did not find a job in that field nearby at the time of my graduation. I've always found pipe fitting and iron works to be a unique way learn to be a better welder overall. As these two types of welding are ones that never have exactly the same thing happening day to day. Keeping the workday more enjoyable and challenging.

What construction software or technologies do you have training in?

Any Safety Certificates:

Years of Full-Time Work Experience:

4-6

Welding Experience:

TIG - Some Knowledge, Stick - Some Knowledge, Flux Core - Some Knowledge, MIG - Some Knowledge

Tell us about any jobs where you've learned pipetrades relevant skills:

My current position as a performance technician involves a lot of different hats whether it's on the customer end, understanding the uses and best guiding the customer or going through there wants to best blueprint an entire project. Down to the actual applications of it. From fabrication of intake and exhaust manifolds or charge piping and best blueprinting those systems to get the best flow and be best routed around dozens of obstacles in an engine bay. Daily it challenges me to think outside of the box to meet the demand of the customer or the blueprint assigned

Shift Availability:

Metals, Robotics

What construction software or technologies do you have training in?

Solidworks, AutoCAD

Any Safety Certificates:

Add'l Details:

Tell us about any hobbies that have boosted pipetrade-relevant skills:

Currently I build race cars both as a profession and as a hobby with that you face many obstacles to make sure your vehicle does exactly what you want it to do. It requires a lot of time and thought into planning and blueprinting what you need to achieve different outcomes and to overcome different hurdles and how to move past them in the best most effective way possible

Why is an apprenticeship an attractive option to you?

I feel as though an apprenticeship is the best possible way to really learn what it is to be successful in my career. I've always learned best hands on under the guidance of someone with actual how to and hands on experience vs the typical classroom setting. I feel like it's a much better way to set yourself up for success as often in trades the classroom application is much different than in reality or actual applications.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've always had a drive towards fabrication. I have now spent the last year and a half working for a performance automotive shop and fabrication is one of the more involved and enjoyable tasks I do anything from even preplanning to fit around all sorts of objects in an engine bay to actual pie cutting and fit up all the way to actually burning it all together. It gets your mind going for hours to overcome obstacles.

Relevant Experience Level:

None. Nothing even close-but I'm a hard worker and willing to learn!

Years of Full-Time Work Experience:

7-9

Welding Experience:**Tell us about any jobs where you've learned pipetrades relevant skills:**

As a truck driver for five years, I developed skills that apply to the pipe trades, including attention to detail, problem-solving, and working with tools. I maintained equipment, followed safety protocols, and managed logistics, all of which are essential in pipe work. My DIY projects have also given me hands-on experience with basic plumbing and home maintenance, further building my technical skills. These experiences have prepared me to learn and succeed in the pipe trades.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I enjoy weightlifting, DIY projects, golfing, and deer hunting, all of which have built skills useful in construction. Weightlifting improves my strength and endurance for physical work, while DIY projects sharpen my problem-solving and hands-on skills. Golf teaches patience and precision, and hunting requires discipline and adaptability, both important on a job site. These activities have helped me develop the physical and mental skills needed for construction work.

Shift Availability:

Add'l Edu. Details:**What trades-related courses did you take in school?****What construction software or technologies do you have training in?****Any Safety Certificates:****Add'l Details:****Why is an apprenticeship an attractive option to you?**

An apprenticeship is attractive because it provides hands-on experience while teaching property management and maintenance skills. After five years as a truck driver, I want a structured way to transition into a career with long-term growth. Learning construction and property maintenance will help me build skills for investment real estate while earning as I learn. This opportunity offers the perfect balance of education and real world application to reach my goals.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Looking to get into property management and want to learn all the skills associated with that.

Add'l Details:
Tell us about any hobbies that have boosted pipetrade-relevant skills:

As far as hobbies go I enjoy working on my personal vehicle wether it's small repairs or modifications. Through out my time working on cars I've learned alot of problem solving skills and how to be creative and innovative on the fly. I've also learned mechanical skills from working on my car and from past jobs. I enjoy playing sports and weight lifting. Sports have definitely taught me how to work efficiently with others and especially with people with clashing personality's. Through weight lifting I've definitely learned patients and that some things just can't be rushed

Why is an apprenticeship an attractive option to you?

I like the idea of learning from someone who has been in the field and in the career. I know ide get more out of it if I can learn first hand vs reading how to do a job in a book or just being thrown into something not knowing anything about it

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I enjoy working with my hands, I also like having variety within a job because I'm not a fan of of the same monotonous day to day tasks. I also like problem solving. I am also looking for a career where I can grow my skills and as a person. I also want the possibility to move up and grow within a company. I am also looking for a career that is stable and that teachers my skills of a trade that I can use any where in the world and be successful

Add'l Details:

Why is an apprenticeship an attractive option to you?

I want to learn on the job and achieve my goals through learning my skills. At my current job, I feel in my current position I could be much more valuable. I read blueprints and tell my guys what to do, yet my work has not been well recognized. I know in the Local 400, I will be put in positions that I can be better valued in. I also loved welding in high school. I took a lot of FVTC certified classes in 2D drafting, 3D drafting, welding symbols, and machining that I got tech credits for and I loved every minute of them.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

In high school, I was an apprentice for the Local 400 and now I'm wanting to get back into it because I miss the work. I worked at PSI in Hortanville and I loved the environment and my coworkers. I have friends in the Local 400 and they are very successful. I'm looking for a long-lasting and great career choice outside of concrete.

I don't have any, I enjoy spending time with my dog outside in nature and spending time with my family. I also enjoy reading and cooking different foods and exploring new places.

Why is an apprenticeship an attractive option to you?

I have always struggled in school and have always done better hands on learning.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I take pride in hard work and have always excelled in hands-on learning environments. As I consider my future, I've received many recommendations to pursue trades apprenticeships, specifically in pipe trades. I am drawn to this field because of the essential role piping systems play in various industries, and I am eager to develop the specialized skills required.

I seek a career that offers stability, good benefits, and competitive pay, allowing me to lead a fulfilling life. I believe that pursuing a career in the building trades through Local 400 can provide me with these opportunities while allowing me to feel purposeful and confident in my work.

Why is an apprenticeship an attractive option to you?

I could learn so much from the program and grow as a man at the same time. I feel like an apprenticeship would keep me accountable and out of trouble and give me a purpose because i would have a goal in life to strive towards.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I have always thrived in hands on work environments. Few things I imagine would bore me more than sitting behind a desk and in front of a screen or being the voice behind a telephone. For that reason alone I have always sought out jobs that keep me active mentally and physically. As a diesel mechanic for 6 years of my life I was always pushing myself to do things in an efficient and even more importantly a safe manner. I strived to make each job I was assigned something I would be proud of at the end of the repair or installation. Challenging myself to do whatever I was tasked with the correct way the first time while finding a way if possible to be more time efficient than the last time I'd done that same task. I think this mindset is transferable to any job. I'm interested in being a pipe fitter and I have aspirations to be very good.

I have a diesel tech degree. I completed all possible metal shop classes aswell

What trades-related courses did you take in school?

Automotive Technology, Math-Algebra, Math-Geometry, Metals, Welding, Woodworking / Woodshop

What construction software or technologies do you have training in?

AutoCAD

Any Safety Certificates:
Add'l Details:
Why is an apprenticeship an attractive option to you?

It gives you opportunities. I think working with a company from the start shows your dedication and if you put in the effort they give it back. Apprenticeships are usually great to learn from too.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've liked welding for a long time. It's a skill I have but never perused. I recently became laid off for the winter and realized I need a year round job to keep myself busy and active.

Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

Steamfitter (Pipefitter)

Work Zones in Preference Order:

Green Bay Area (Yellow)

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:

1-3

Welding Experience:

Tell us about any jobs where you've learned pipetrades relevant skills:

Working at MJ Electric taught me a lot of skills. I learned how to read schematics, operate a skid steer, how to use many tools like the burndy press and bandsaw. I learned how to pull wire, lay out ground grids, and put in ground rods. I also got a lot of experience in wiring lights and laying conduits in the ground.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

Well, my hobbies are video games and motorsports. I enjoy working with cars and doing miscellaneous projects around the house. Video games have helped me connect with people and form solid communication. Working on cars has taught me to problem solve. Because usually a small repair turns into a bigger one.

What trades-related courses did you take in school?

Automotive Technology, Math-Algebra

What construction software or technologies do you have training in?

Any Safety Certificates:

OSHA 10, First Aid / CPR

Add'l Details:

Why is an apprenticeship an attractive option to you?

Well, the benefits of working in a union are amazing. Free healthcare, pensions, and other miscellaneous things are perks. But being able to learn a trade that helps my community and teaches me life skills is the main reason. Being able to earn while I learn is huge and it saves me from going into a large amount of debt to college.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Well, I initially went to college to study finance and realized that it wasn't the right move for me. Then I moved back home and started to look into the trades. I worked for MJ Electric as a groundsman for a few months and really enjoyed the hours and the work. I like Steamfitters because it trains me to become good in a wide range of skills so I won't be just a one-trick pony.

Tell us about any jobs where you've learned pipetrades relevant skills:

The foundation of everything I know came from working in residential construction. Using hand tools and machinery every day left me with a solid skill-base and taught me awareness on a job sight.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

Sports have always been a love of mine. After my formal competing ended, I have been coaching where and when I can for the past 5 years. I have coached Pole Vault at both Fond Du Lac High School and UW Oshkosh. Through sports, I learned that accomplishing goals with others is very rewarding and enjoyable. I have also learned that working with others can be challenging at times, but it's important to see the big picture and understand that the goal you are working towards is what's most important. I also learned how to receive instruction and impart my knowledge to others.

Why is an apprenticeship an attractive option to you?

An apprenticeship is what I want because it leads to a lifelong career of learning and becoming a professional in your field. I believe that my aptitudes are best suited for the trades because of the way I was raised and the skills I gathered and as a young man.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

My background is primarily in residential construction. I learned a lot of valuable skills over the years and enjoyed that time greatly. My mid-twenties have been spent trying my hand at sales and seeing where that could take me. While it has been productive, I don't believe that its really who I am and where my aptitudes are best suited. I want to get back to building real trade skills and becoming a professional. I have been working full-time while I completed a Welding and Fabrication Certificate from Gateway Technical College in Racine. I was immediately drawn to working with metals and after discussing with my instructors, we came to the conclusion that the pipe trades are the best place for me to grow.

Why is an apprenticeship an attractive option to you?

It allows me to "earn while you learn," gaining valuable hands-on experience in a chosen field while receiving a salary, essentially providing a pathway to a career.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

It offers a hands-on, problem-solving approach to work, where I could use my mechanical skills to build and maintain essential systems within buildings, while also providing the stability of a high-demand, well-paid trade with opportunities for continuous learning and challenges on different project.

I appreciate the ability to gain experience on the job working alongside professionals who are able to answer my questions., I would be able to learn and engage well with the types of training that goes on in an apprenticeship because of the practical experience as well as the ability to learn a variety of skills.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I want to work in hvac because I am eager to learn hands on skills and problem solving abilities. The unions desire to train and educate people allows me to achieve my goals of being able to help people and businesses in day to day life.

I appreciate the unions focus on quality and efficient work while maintaining safety standards. Joining hvac would not only help me develop my career in hvac but also allow me to work in an environment where I feel vaulted and connected with those around me., I'm looking for a lifelong, essential career with growth opportunities where I can work in a hands on environment while using my problem solving abilities. I want to join an apprenticeship because I would be able to learn from professionals while getting experience in a classroom and on the jobsite.

Add'l Details:**Why is an apprenticeship an attractive option to you?**

It's a wonderful way to get into the trades and learn along the way to build my skill set and quality of work, to learn from someone who's really good at what they do to ensure the best learning experience and skill set improvement

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I love working with my hands and building anything I can, I'm not afraid of dirty work, although I currently do not have any welding or pipe fitting experience. I have some general construction experience, which lead me to a recommendation from my uncle who I believe is going through this program. He loves and enjoys what he does, seeing as I love construction I am adamant that I would enjoy this as well, I'm unsure of what the pipe trades entirely entails, but it is very intriguing.

Why is an apprenticeship an attractive option to you?

Longevity, consistent income, personal growth

The longevity of a job that has a base of starting with an apprenticeship is what's attractive to me. I'm genuinely to a sense looking for a mentor. The consistent income to fund my own living space, and save up for the correct investments. I have a girlfriend with a son that I have been speaking with and have grown incredibly close with that I want to step up to the plate within myself to take care of such a delicate situation. The

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Initially it was the love of building something for someone to live in. Just a living space. And it reached out to longer term goals. I want to educate myself to be able to fix something that's needed and be at a point where I can create myself a business for myself

Why is an apprenticeship an attractive option to you?

It is an easier way for me to learn new skills. It seems a little easier to do an apprenticeship instead of going straight into the workforce and having to learn the new skill very fast.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I am just looking for a new job and I would like to start a new career. I am wanting to get into the trades and I think that this would be a good learning experience for myself. I like to meet new people so that they can teach me how to be a better worker. I am a hard working individual and I think this would suit me best.

What construction software or technologies do you have training in?

Any Safety Certificates:

First Aid / CPR

Add'l Details:

Why is an apprenticeship an attractive option to you?

What attracts me the most is the ability for growth and travel. Becoming an apprentice would quite literally change my life tremendously. I aspire to travel and work outside of the state if applicable. Pipe welding attracts me in itself, but being able to be paid to learn and grow as an employee just speaks in itself. I've always had a hard working mindset, and becoming a Steamfitter (pipe fitter) would be a perfect way to apply my mindset for myself as well as the company I work for.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I am extremely interested in the building trades as it is, first of all, a career job filled with endless learning and opportunity. After graduating from NWTC with a welding certification, I knew before I walked the stage which direction I wanted to take, and that was pipe welding. While being young and having the ability and health to travel and learn excited me immensely. Further more, touring the Local 400 headquarters really solidified my decision and desire to want to become a pipe welder. Taking classes, learning from higher ups and working for company's that truly change the world and assist in helping this world go round electrify this entire opportunity. Having a career job in the pipe trades would be a life changing experience and opportunity.

AutoCAD

Any Safety Certificates:

Add'l Details:

Tell us about any hobbies that have boosted pipetrade-relevant skills:

In my current role in manufacturing, I've gained valuable experience working with various tools and machinery, which has helped me develop a solid foundation in hands-on tasks that are directly transferable to the construction trades. I am accustomed to troubleshooting equipment, following safety protocols, and ensuring precision in all aspects of my work, skills that are essential in any trade. Additionally, my experience in a team-oriented environment has taught me the importance of communication, collaboration, and efficiency—qualities that are critical in construction.

Why is an apprenticeship an attractive option to you?

An apprenticeship is an attractive option to me because it offers the opportunity to learn a skilled trade while gaining hands-on experience in a real-world setting. After several years working in manufacturing, I'm eager to develop technical expertise in the building trades, and an apprenticeship provides the perfect balance of structured learning and practical application. The ability to earn while I learn, along with the chance to work alongside experienced professionals, is a valuable opportunity to build a stable, long-term

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

After spending several years working in manufacturing, I've developed a strong appreciation for the value of hands-on work and the satisfaction of creating something tangible. While my experience in manufacturing has been valuable, I'm now seeking a career that offers both more specialized skill development and the opportunity to work on projects that directly impact the community. The building trades, and particularly the pipe trades, caught my attention because of the combination of technical skill, problem-solving, and the ability to see a project through from start to finish. I'm drawn to the idea of being part of a team that builds and maintains essential infrastructure, providing a tangible service that benefits society.

Add'l Details:

Why is an apprenticeship an attractive option to you?

Because I like the thought of getting paid to learn and there's many different routes in the career you can take after an apprenticeship, Cause I never thought attending a university was ever going to be worth it come the future and see the trades as a way to build a solid career

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

A gentleman from ATS talked to me a and convinced me to look into steam fitting, I have only head good things about about HVAC-R I have been doing electrical work for 2.5 years and have come to a conclusion that it's not the right fit for me.

Add'l Details:
Why is an apprenticeship an attractive option to you?

I like showing up to work and doing different things or being challenged with different tasks. I want to be part of a good trade and have a good work like balance with good benefits., Get paid to learn. Good benefits. And retirement while making good money. More family friendly than other jobs.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Something I've been interested in for a while. I recently started working construction and like it a lot. I'm currently moving to Appleton and want to be in a good permanent career with good benefits. While also being a good investment to an employer., I like to work construction. I've been trying to get into a trade I want to put my time into. I have construction and welding experience but no degrees. And I want to explore this path.

Add'l Details:

Why is an apprenticeship an attractive option to you?

I am interested in pursuing and building a career in welding! My girlfriend suggested I look into an apprenticeship program because her grandfather, dad and brother all started their electrical careers through apprenticeship in the union! I want to build my skill and knowledge and be able to work well doing it!, I want to learn and gain experience.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I worked in Bay Shipping Marina in Sturgeon Bay doing basic welding. I am interested in Pursing a career in welding., I've worked for agency called PDS in Green Bay, WI that gave me work for Fincantieri Bay Shipbuilding (FBS). For the times I've worked for the shipyard I did some steel fitting work like torching and welding parts and I enjoyed. Only thing I didn't like about it was that it's a temporary job since it's through an agency. I'd like to take the next step and to try to make it a career.

I have my high school diploma from Preble High School in Green Bay, WI. If I can have a opportunity to get an apprenticeship I will make the most of it to make a good career as a steamfitter or pipe fabrication. Thank you.

Traditional college wasn't an option for me and I honestly didnt want to continue to go to school when I didn't have to. I take pride in everything that I do and I learn by doing and asking questions while watching other people.

I always say if you want me to dig you a ditch it'll be the best ditch you've ever seen, I have a super strong desire to learn and am very humble and a good listener. Traditional college wasn't the correct option for me and all the jobs Ive had since have been

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

My father was in IBEW my whole life and he was able to provide an amazing life for my siblings and I. He was always so proud of being a part of something bigger than himself. Now that I am a father I want to provide well for my family and also be a part of something bigger. Plumbing is specifically interesting to me because it has a lot of sub sects you can get into giving you options for work and always something new to learn., My wife is from Appleton so our family is moving to the area in from Milwaukee in January 2025. Ive been working in General Services at The Medical College of WI for the last 4 years and while we dabble in all kinds of different maintenance work I know I am capable of more and have the desire to have a career not just a good job. My father was in IBEW my whole life and provided us an awesome life because of it, I want to do the same for my family.

Plumhino has always been an interest of mine while doing maintenance in my own home

Any Safety Certificates:

First Aid / CPR, First Aid / CPR

Add'l Details:**Why is an apprenticeship an attractive option to you?**

I'd like to get right into the work field and possibly go to college later on the further my career, The apprenticeship program is nice for me because, I like the idea that you can be enrolled in both school learning your skills for the job and also be actively working on a job site as well. I also like that you don't have to pay into school much more past books and supplies coming from a lower income family that would help a lot.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I graduated high school and got an insulation job and watched as all the other crews did their part of putting the house together and was always interested in the plumbers, What interests me the most is working with my hands and watching the project build day by day. I enjoy knowing that I am a part of a crew who can work together and become something big.

Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

Plumber, Steamfitter (Pipefitter), HVAC/R Service Tech, HVAC/R Service Tech

Work Zones in Preference Order:

Green Bay Area (Yellow), Appleton Area (Green)

Relevant Experience Level:

None. Nothing even close-but I'm a hard worker and willing to learn. A little. No specific trade experience but I have general skills in construction or welding

Years of Full-Time Work Experience: 4-6, 4-6

Welding Experience:

Tell us about any jobs where you've learned pipetrades relevant skills:

none, I have had many jobs that were related to the trades. However, the only job I have had working in my interested field of HVAC was a full time position at a start up company. The company was called Integrity Heating and Cooling based out of Manitowoc, WI.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

working in cars so I know how to turn a wrench and use my hands, I enjoy fishing, working on cars, spending time with my family and being outside. These skills are transferrable to the trades because being outdoors shows how I am able to work in diverse weather conditions. Working on cars helps me with my hand to eye coordination and boosts my knowledge of tools. Having a one year old and another on the way helps me to learn patience and time management.

Welding Experience:

Flux Core - Some Knowledge, MIG - Some Knowledge, TIG - Some Knowledge, MIG - Some Knowledge, Flux Core - Some Knowledge

Tell us about any jobs where you've learned pipetrades relevant skills:

I have very good problem solving skills from diagnosing fitness equipment. In some cases there will be broken frame pieces that I have to weld to repair., I've worked in a couple of machine shops where I delt with grinding to prep parts or deburring. I also often weld frames of fitness equipment

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I currently travel to multiple homes a day doing house calls to repair fitness equipment. I feel as though the diagnostic, parts ordering and repair would be very similar to the hvac repair process., I weld up damaged frames on fitness equipment and then sell them. I've helped multiple friends open gyms by doing all the renovations ourselves. Including drywall, flooring and paint.

Math-Algebra, Math-Geometry, Math-Precalculus / Trigonometry, Math-Algebra, Math-Geometry, Math-Precalculus / Trigonometry, Math-Algebra, Math-Geometry, Math-Precalculus / Trigonometry, Math-Algebra, Math-Geometry, Math-Precalculus / Trigonometry

What construction software or technologies do you have training in?**Any Safety Certificates:**

First Aid / CPR

Add'l Details:**Why is an apprenticeship an attractive option to you?**

The trades seem to be a very safe and stable option with a good income, benefit package and schedule to my liking., Just the ability to work and go to school, To be able to get an education in the career that I'm extremely interested in., The career advancement and the ability to make my child proud

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I was working in a hvac warehouse and the types of materials used made me extremely interested in the trade. And i did some research on the local union about 30 minutes north of my town., I just want to join a trade and I have experience in the warehouse and materials aspects of hvac and plumbing so I wanna earn more money and learn more., I would say my buddies got me interested in the pipe trades and I've been seeking information on it since., Just the idea of working and learning everyday. I love a career that can challenge me
