

Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

HVAC/R Service Tech, Pipe Fabricator, Steamfitter (Pipefitter), Plumber

Work Zones in Preference Order:

Fond du Lac Area (Orange)

Relevant Experience Level:

None. Nothing even close-but I'm a hard worker and willing to learn!

Years of Full-Time Work Experience:

1-3

Welding Experience:
Tell us about any jobs where you've learned pipetradese relevant skills:

I can't say ive worked a job that holds valuable hands on skills for trades. However,In my past jobs, I've learned to swork hard and stay focused, skills that are essential in the pipe trades. I've worked in fast-paced environments where teamwork and communication were key to getting the job done right.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

In my free time, I enjoy playing chess, staying active through sports and running, and working on basic car maintenance. Chess helps me stay sharp and think critically, planning several steps ahead, which is useful for problem-solving on the job. Sports and running keep me physically fit and teach discipline and teamwork, which are important in construction environments. Working on cars has given me hands-on experience with tools, mechanics, and how systems work, which all happen to be skills related to construction trades.

Shift Availability:

Full-time, 1st Shift (Days)

Post HS Education:

Some 4-year college

Add'l Edu. Details:

So upon my college career I've majored in Geograhpy then switched to a Math Education major. I'm more drawn to classes

What trades-related courses did you take in school?

Math-Algebra, Math-Calculus, Math-Geometry, Math-Precalculus / Trigonometry

What construction software or technologies do you have training in?
Any Safety Certificates:
Add'l Details:
Why is an apprenticeship an attractive option to you?

An apprenticeship is attractive to me because it lets me learn by doing. I prefer hands-on work over sitting in a classroom all day, and an apprenticeship gives me the chance to earn while I learn a valuable trade. I like that I can build real skills. It's a practical, rewarding path that fits the way I learn and work best.

What interested you in a career in the building trades in general, and specifically, a career in the pipetradese?

I'm interested in the pipe trades because I enjoy hands-on work, problem-solving, and using my math skills in real-world situations. I'm drawn to the stability, high earning potential, and the chance to learn a valuable skill that's always in demand.

Plumber, Steamfitter (Pipefitter), HVAC/R Service Tech, Pipe Fabricator

Work Zones in Preference Order:

Fond du Lac Area (Orange)

Relevant Experience Level:

None. Nothing even close-but I'm a hard worker and willing to learn!

Years of Full-Time Work Experience:

1-3

Welding Experience:**Tell us about any jobs where you've learned pipetrades relevant skills:**

I had a job working at a convenience store, where I had to stay focused in a fast-paced environment, work as part of a team, and handle tasks quickly and correctly. I learned the importance of being dependable, staying organized, and communicating clearly with coworkers and customers.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I've worked in a fast-paced convenience store, which helped me build strong communication and teamwork skills. I learned how to stay focused under pressure, manage time well, and work safely in a busy environment, just like you need to do on a construction site.

Shift Availability:

Full-time, Part-time, Overtime, Weekends, 1st Shift (Days), 2nd Shift (Nights)

Post HS Education:

Some 4-year college

Add'l Edu. Details:**What trades-related courses did you take in school?**

Drafting and Design, Math-Algebra, Math-Calculus, Math-Geometry, Math-Precalculus / Trigonometry

What construction software or technologies do you have training in?

AutoCAD

Any Safety Certificates:**Add'l Details:****Why is an apprenticeship an attractive option to you?**

I like the idea of learning by doing, not just sitting in a classroom. With an apprenticeship, I can build real experience on the job while also getting formal training from experienced professionals.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I first became interested in the pipe trades when a friend told me about steamfitting. I looked it up and thought it sounded like a great fit for me. Steamfitters work on important systems that keep buildings running, like heating and cooling. It's a job that takes skill, hard work, and teamwork, and I want to be part of something that makes a difference.

Why is an apprenticeship an attractive option to you?

Although I appreciate classroom learning, I learn best by doing. I think an apprenticeship will keep me excited about learning as I immediately use the skills I am learning. I also need to generate some income for myself as a new high school graduate, and this seems like a good way to both learn and earn!

Also, I have a cousin who is doing a diesel tech apprenticeship and he is enjoying it. They

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

The reason why I am interested in the pipetrades is because I thought that I could learn how pipe systems work and how they are installed. I don't know a lot about how pipe systems work and I would like to learn and grow my knowledge in this trade.

I have taken a few welding classes (Fox Valley Technical College) so I know some things about welding, but I can still learn how it applies in the pipetrades. I am looking for work which will challenge me and that I do most of my life.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

In my free time, I enjoy working on hands-on projects like fixing things around the house, assembling furniture, and helping with basic plumbing repairs, which all relate directly to the skills needed in pipefitting. I've always had an interest in figuring out how things work and finding efficient ways to put things together, which has strengthened my attention to detail and mechanical thinking.

Why is an apprenticeship an attractive option to you?

An apprenticeship is important to me as an adult because it gives me the opportunity to learn a skilled trade through real-world experience while earning a paycheck. This practical, on-the-job learning approach is ideal for me because I'm ready to work hard, grow my skills, and move forward in a career that offers long-term stability and advancement.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I want to become a pipefitter because I enjoy working with my hands and solving problems in a way that produces real, visible results. The pipefitting trade offers a unique mix of physical labor, technical skill, and precision, all of which align with my strengths and interests. I'm drawn to the idea of building and installing systems that are essential to the function of buildings, factories, and infrastructure.

Another reason I want to pursue a career as a pipefitter is the opportunity for long-term growth and stability. The trade offers strong job security, excellent wages, and the chance to continue learning through on-the-job experience.

Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

Plumber

Work Zones in Preference Order:

Appleton Area (Green)

Relevant Experience Level:

None. Nothing even close-but I'm a hard worker and willing to learn!

Years of Full-Time Work Experience:

7-9

Welding Experience:

Tell us about any jobs where you've learned pipetrades relevant skills:

In my manufacturing jobs, I learned how to work with machinery, follow safety procedures, and stay detail-oriented. I also gained experience with teamwork and staying productive under pressure.

While I haven't worked directly in the pipe trades, the hands-on skills and discipline I've built in those roles give me a solid foundation to succeed and grow in this field.

Shift Availability:

Full-time, Overtime, Weekends, 1st Shift (Days), 2nd Shift (Nights)

Post HS Education:

No

Add'l Edu. Details:

What trades-related courses did you take in school?

What construction software or technologies do you have training in?

Any Safety Certificates:

First Aid / CPR

Add'l Details:

Tell us about any hobbies that have boosted pipetrade-relevant skills:

One of my main hobbies is working out. It helps me stay disciplined, focused, and physically ready for demanding work. I've built a strong mindset through training, which translates well to staying consistent and pushing through tough jobs.

I also enjoy hands-on projects like fixing things around the house or helping friends move or build stuff. It's taught me the value of teamwork, being dependable, and paying attention to detail—all key in the construction trades.

Why is an apprenticeship an attractive option to you?

An apprenticeship is attractive to me because it gives me the chance to earn while I learn. I don't just want a job — I want a career, and this path gives me real skills, real pay, and a clear future.

I like learning hands-on from experienced professionals. That kind of knowledge is priceless, and I'm ready to show up, work hard, and grow into someone people can count on.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I'm drawn to the building trades because I like working with my hands and seeing the results of a hard day's work. I take pride in learning skills that actually matter and can be used for life.

The pipe trades interest me because they're essential, challenging, and offer real opportunity. I'm ready to put in the work, learn the craft, and build a solid career doing something that matters.

Disciplines of Interest:

Plumber, HVAC/R Service Tech

Work Zones in Preference Order:

Appleton Area (Green)

Relevant Experience Level:

None. Nothing even close-but I'm a hard worker and willing to learn!

Years of Full-Time Work Experience:

7-9

Welding Experience:

Tell us about any jobs where you've learned pipetrades relevant skills:

I have not worked any jobs that could be related to the apprenticeship. Since High school i worked at a iron castings foundry, food production and a papermill.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

Cars are my big hobbies. I understand it's not related to the apprenticeship. Working on them though taught me how to diagnosis the issue, how to solve it, and execute a plan of action fixing it. Doing my own car work tool I've become familiar and comfortable on how to use handtools, power tools, minor fabrication, and attention to small details. The reason I'm not pursuing an automotive career is that I worry if I work on cars for my job I won't be passionate on working on my own car or my friends and family.

Add'l Details:

Why is an apprenticeship an attractive option to you?

With living in an apartment with my fiancée i have bills each month including a car loan. Taking time off or working part time is not an option for me. Being an apprentice is my best route for starting a career because then I learn on the job and do not have to worry about missing paychecks or short paychecks.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Since high school I've just been working factory production jobs. I'm turning 27 this year and it is time I invest in a career where I can advance in. I am also getting married and have major life goals I would like to meet as in purchasing my first house with my future wife and live comfortably while doing so. I am a DYler and like to fix things my self, like my car. My main example related to this apprenticeship is the bathroom sink in my apartment was backing up. So I went underling the sink and removed the drain plug and the U Piper I believe it's called and cleaned out the hair and gunk in the sink, ever since it's been draining like normal.

Add'l Details:

Why is an apprenticeship an attractive option to you?

I am living in my own apartment with my fiancé. So that means bills, and a car loan payment. Apprenticeships is, what I believe, a very good option for someone in my situation. I will be working while being trained and not having to worry about missing paychecks while pursuing my career.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've been working production jobs since high school. As I'm approaching 30 years old in a few years, getting married, and have major life goals as in purchasing a house it is time for me to invest in a career. I've always liked working with my hands. As a kid I'd help my dad work on cars, different carpentry projects around the house, and with my apartment I've taken it up to fixing minor things. Example, our bathroom sink was backing up so I took out the drain stop and U Pipe I believe it's called and unclogged all the hair and other gunk in it, now it runs like new. That is what I believe made me think I'd enjoy plumbing. I also crave an interactive job that challenges me and leaves me satisfied.

Add'l Details:

Why is an apprenticeship an attractive option to you?

an apprenticeship would give me the opportunity to dive headfirst into a brand new opportunity that would bring me, steady work, financial stability, more responsibility, and accountability, and the chance to work really hard, An apprenticeship attracts my interest for many reasons. The main reason being stability, and an opportunity to grow and work hard. I'm very fond of the idea of constantly learning, and in a different environment. Working towards financial stability, in a career path that gives me options.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

My interest in this career comes from the main point of stability. I am a hands-on, personable, confident, young man, looking to place oneself where I can find stability, structure, and hard work. I have always made it a point to work more than one job at a time. But I would love to work in a Career., A career in the trades would allow me an opportunity to dive headfirst into stability, structure, hard work, and financial stability. Made it a point to have more than one job at a time, but it would be amazing to have one solid career.

Engineering, Electrical Trades / Electronics

What construction software or technologies do you have training in?

Any Safety Certificates:

Add'l Details:

Why is an apprenticeship an attractive option to you?

It is the most direct way to learn the trade. As stated previously, I want to explore my options, and this is something I am highly interested in. I have always been a hands-on learner, so I know that learning from watching videos isn't for me.

The other reason I want to pursue an apprenticeship is that I have ruled out White Collared jobs from what I want in my future. It is much easier to jump from trade to trade

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

After high school, I went to College only to complete one year and realize this wasn't what I wanted to do with my life. I went for the wrong reasons and was influenced to do so by someone I thought was close to me. After some soul searching, I looked back to High School, where I loved shop classes, specifically the idea of working with my hands and welding.

I am only 19 and have a life to live. I want to pursue what I love before I am at an age where it is hard to switch. The only way to truly know if I like the work done in the pipe trades is to do it.

Why is an apprenticeship an attractive option to you?

Not only fits my working style but demands more know-how and is an appreciated skill in which I would like to expand and learn to do. I've always had an interest in the trades and even shadowed some and I feel that working in plumbing would be the best direction for me and continual growth to stay sharp in the trades

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Plumbing is not only a year-round need but also extends beyond that is in every major type of work from industrial, to residential, and commercial the constant need of not only plumbing but the trades in general to keep the demand of infrastructure up and running but modernized and needing skilled laborers to meet the demand for a ever-growing industry and its workers. For me helping in that regard gives me a purpose and helping society so I wouldn't ever need to ask the why but the where and when. While being able to support my dad and my future ambitions is a great opportunity all around

Why is an apprenticeship an attractive option to you?

An apprenticeship is an attractive option to me due to the fact that I've always thought about becoming a trades man. Throughout my whole life I've always wanted to be a welder/plumber but never met the requirements for it. I think I would have a great chance working as one climbing up the ranks throughout my career in the trades

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Honestly the design the well looked environment when it gets down to work. Since I was young I've always liked to work in general. I'm currently 17 and I am a early highschool graduate I would like to work in the trades for my future

I like to work with pipes also plumbing would like to know more about it as well. I believe I have a strong passion in me coming out for trades such as plumbing as well as welding. There's a lot of trades out there but in special these 2 are the ones that interest me the most

CNC

Any Safety Certificates:

First Aid / CPR

Add'l Details:**Why is an apprenticeship an attractive option to you?**

I want to continue my education for a better career and don't mind going back to school to further my education for a greater future

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've always been interested in the trades because I grew up around them—my dad worked as a finished carpenter, and from a young age, I was exposed to the satisfaction that comes from working with your hands and seeing a project come together from start to finish. That early exposure sparked a respect for skilled labor and the pride that comes with doing a job well. More recently, I've developed a strong interest in the pipetrades through my work cleaning and servicing storm and sanitary sewers. That hands-on experience opened my eyes to how critical plumbing systems are to public health and infrastructure, and it gave me a real passion for the trade. I enjoy problem-solving, working in a physically active job, and being part of a team that keeps essential systems running safely and efficiently.

What construction software or technologies do you have training in?

CNC

Any Safety Certificates:

Add'l Details:

Why is an apprenticeship an attractive option to you?

Apprenticing allows me to earn money whilst I learn a valuable skill. Office jobs are coming and going. However all trades are needed constantly. It's a career path I know I'll always have work to be done. Plus it's a stable career. I enjoy math, working with my hands, and exerting my work ethic. An apprenticeship fits all my needs.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I want to be a plumber because I enjoy working with my hands and solving practical problems. Throughout high school, I found that I preferred hands-on tasks over sitting at a desk all day. I've always been interested in how things work, especially around the house, and plumbing seems like a great way to turn that interest into a career. I like the idea of doing work that actually helps people every day, whether it's fixing a leak or installing something new.

I'm also looking for a job that's steady and in demand, and plumbing seems like a smart choice. I know it's hard work, but I'm not afraid to learn and put in the effort. I'm ready to start building a career that gives me real skills and the chance to move up over time. Becoming a plumber feels like the right step for me after high school, and I'm excited to get started.

The apprenticeship program at the local 400 was attractive to me for the opportunity to grow and learn more as the years go. I like to feel like I'm always improving my life as the years go. I don't like to feel like I'm wasting my life away and with this program I feel like it's a good career path that leads me to where I want to be in life. I can see there is an abundance of opportunity here. What really had me considering this as well was my brother who also works for the local 400. I can see how he is able to live a good life

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've always been a more hands on worker. I have also been looking for something where I can grow more so as soon as my brother told me about the local 400 and how it's a paid to learn program. It intrigued me a whole lot he brought over a folder with more information and from what I've read and seen I feel like the local 400 would be a good fit for me. Pipe trades is something completely new to me but I've always been a fast learner and I like to do things fast and the right way. I feel as long as there is someone willing to teach me the right way I will make a good part of any team. My managers and past foremen would also always say how I was a good worker and pick things up quick. I'm excited and ready to work and learn about the pipe trades.

Add'l Details:

Why is an apprenticeship an attractive option to you?

I think I'm attracted to this specific option because I've always enjoyed working hands on and having visual demonstrations is the best way for me to learn. I also am interested in the idea of learning while working and setting up my future career while getting payed rather than going into a four year university. Getting into plumbing interests me because I think I'd really enjoy working with different pipes learning how to replace parts and fit different parts into eachother.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Im really interested in working hands on and being able to learn and farther advance my knowledge while working a hands on job. I enjoy using power tools and want to learn more about using power tools and different ways to use pipes and tools. I enjoy to work on difficult tasks and problem solving and learning how to fix issues. I think joining the trades would be a great path for me to take and I'm motivated to learn hands on and in the classroom about pipe fitting and plumbing.

Why is an apprenticeship an attractive option to you?

An apprenticeship gives me the opportunity to learn and grow in this trade with the supervision of an expert. It would allow me to expand my skillset and knowledge while growing a respectable wage. It is the best fit for my lifestyle and I am dedicated to my work and I am willing to give 100% effort to any project.

I would like to expand my knowledge in the trades to set a steady foundation for my

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

My interest in the world of plumbing didn't start exactly as planned, but grew from everyday observations of projects in my household. I was always fascinated by the skill set of handymen and the intricate network of plumbing. This intrigue led me to research this trade, learn about their problem-solving, and the physical work involved.

As I became older, the demand for plumbers fueled my passion. Jobs in the trades seem to always be at high demand as they are essential for everyday life. This demand turned into an opportunity for me and solidified my need for this trade.

Disciplines of Interest:

Plumber

Work Zones in Preference Order:

Appleton Area (Green)

Relevant Experience Level:

None. Nothing even close-but I'm a hard worker and willing to learn!

Years of Full-Time Work Experience:

7-9

Welding Experience:

Tell us about any jobs where you've learned pipetrades relevant skills:

Being a farm hand and an agroforest landscaper requires physical endurance and manual labor, tool proficiency and spatial/safety awareness.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I am market gardener and amateur mycologist that terraformed a two acre property into food forest using hand tools and laboratory techniques. Laying out forest guilds requires site planning and spatial awareness. Scheduling planting and expansion of fungal cultures for market requires project management. Gardening tools, laboratory and irrigation equipment requires tool proficiency. Being a market gardener prepares myself to handle the hands-on, strategic aspects of plumbing, while enduring manual labor.

Add'l Edu. Details:

Environmental Science major

What trades-related courses did you take in school?

What construction software or technologies do you have training in?

Any Safety Certificates:

Add'l Details:

Why is an apprenticeship an attractive option to you?

An apprenticeship is attractive to me because it provides structured, hands on training while allowing myself to earn an income as I learn. There is a lot of stability and growth in the trade, and an apprenticeship can lead to full time employment. I wish to build on my existing skills while mastering a specialized construction technique.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

The plumbing trade interests me because it combines hands on work while making a difference in people's lives and our environment. I have always enjoyed tactical work; combining hands on problem solving for the sake of clean water and effective waste management is a craft that excites me.

Why is an apprenticeship an attractive option to you?

The apprenticeship interests me because I'm looking for something more. I want a career. I wasn't sure for awhile exactly what I wanted to do but I knew I was good with my hands. After talking with the guys from veterans plumbing and working alongside them, I realized this trade could be something that I would be interested in. So after looking more into it I realized I could see myself doing this. I don't mind working inside outside. I don't mind getting dirty. And I'm looking for something I can do for a while where I'm

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Been working alongside some of the guys from veterans plumbing. I find it very interesting and really easy to pick up on things. They suggest to me that I should try getting an apprenticeship through the union.

Why is an apprenticeship an attractive option to you?

Apprenticeships offer hands-on learning which I excel in, as well as making money while learning. I'll stay out of debt while making lots of money and learn the way I'd always enjoyed.

I also take pride in my work. I'm gonna be the best at whatever I do, Working with journeyman workers every day all allows you to learn the tricks of the trade and fast. Being Fast and Consistent adds to a quality career .

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Job security, In my eyes everybody needs plumbers and HVAC technicians. If an HVAC unit goes out, people need you there and quick. Controlled environments are a large part of our society that go unnoticed. Following that idea I also think that Plumbers are a keystone of the everyday life as well. Everybody wants to take a shower when they get home from work. Restrooms are mandatory from big business to the everyday home, Making these workers needed everyday. Job Security is one of those big goals I have in life, that's my favorite idea when I think of a career in HVAC or Plumbing.

Job versatility. Everyday is an adventure, and no two situations are the same keeping my mind busy and hungry for information, I am very eager to hopefully explore that aspect of the HVAC and/or the plumbing world.

What trades-related courses did you take in school?

What construction software or technologies do you have training in?

Any Safety Certificates:

Add'l Details:

Why is an apprenticeship an attractive option to you?

Because I like construction. I have been doing construction for 5 years and I love it I just wanna do a type of construction that will give me a more rewarding career. And the fact that its paid education is great because I just had my first son and I can't afford college. I'm already a tinkerer and get stuck on go mode easily., Because I can earn money while im learning. I have a son and wife to feed so I can't sit in college while not making money.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I like working construction, I've done landscaping, automotive repair, and painting side jobs. But I've seen tik tok videos of plumbing, electrical, and utility work, and plumbing caught my interest the most. Since I have a new son, I want to build a career in something that will pay very well, and I know I can do that as a plumber. If I'm a landscaper I max out at 30, as well as with painting. But more than 50 an hour for plumbing? I guess that speaks for itself. I need a well paying career to provide for my family and I love working construction. Everyone in my family works construction., I have landscaping experience but want to get into plumbing because it actually pays better and is year round unlike landscaping. I also just had my first son so I'd like a career with good benefits and long term growth.

Why is an apprenticeship an attractive option to you?

An apprenticeship would be perfect for me. This is because I will be not only learning, but also applying what I learned to actually get a grasp of what's going on. I think an apprenticeship is a great balance between work and learning and that's exactly what I need.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I feel as if a hands on hard working environment is best for me. I feel like I grow the most when I have others around me to correct me and teach me, rather than solo stuff where I'm on my own. I also feel like I'll be surrounded with like minded people who will help me grow a lot in my career and personal life. I also think it would be fun in general to be able to learn something completely new and different compared to other things in my life.

Why is an apprenticeship an attractive option to you?

An apprenticeship is an attractive option to me because I find school not very interesting, and I also find it much easier to just learn by doing things instead of reading books and studying for tests.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I have seen many videos on YouTube by people such as HVACR Videos, which demonstrate what it is like to work as a refrigeration technician or a plumber. To me the work looks very interesting and fun, and I am looking for a new job that I can take seriously and work hard every day at.

Apprenticeship is something im interested in because I always wanted to go to school but I also wanted to start working right away after high school and if I can do the two at the same time go to school and work that would be the best thing I can ask for

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I'm interested in trade field because I want to learn new things and skills. Ever since I helped my uncle set up our kitchen sink that's when I found interest in plumbing I just didn't know where to go but now that I found this opportunity it gets me excited to go out there and learn about this trade

Why is an apprenticeship an attractive option to you?

earn while you learn, many apprenticeships offer a salary, which allows individuals to earn money while they gain valuable skills and experience, making it financially viable. An apprenticeship can lead to a clear career path, often with opportunities for advancement and additional qualifications upon completion.

Overall, apprenticeships offer a practical approach to education and career development, making them an appealing choice for me.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I was drawn to a career in the building trades because there's something really satisfying about seeing a project come to life, starting with an idea and watching it turn into something real and useful. That sense of accomplishment is hard to beat. What really pulled me toward the pipe trades specifically is how essential plumbing is to our everyday lives. It's one of those things we often take for granted, but it's absolutely critical—clean water, waste systems, heating—it all depends on skilled professionals behind the scenes.

I like that the work is hands-on and technical, but also really varied. One day, you might be installing a new system, and the next, you're troubleshooting something complicated. I find that variety exciting, and I enjoy the problem-solving side of it. Plumbing is one of those careers where you're always learning.

Why is an apprenticeship an attractive option to you?

Getting paid to learn, in my opinion is a no brainer. Not only do you get to work alongside seasoned journeyman, but this also insures the longevity to keeping the industry in good hands for generations to come. There are many incentives the industry offers that continue to attract my interest.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I started hanging drywall for a family friend owned business, the summer going into my senior year. Very early on did I realize how rewarding and fulfilling completing a job can make one feel. With being fortunate enough to get into a construction trade so early on, I was also able to observe that drywall is not my only option as far as a career path. Along the way I have met some great people and was able to have different conversations with different tradesman. With all that being said I have realized that plumbing has found most of my attention. Similar to drywall, plumbing can also be a very rewarding career with the situations I have encountered. With everything considering I believe I would be a great fit to the plumbing industry as well as a valuable asset in years to come.

Add'l Details:
Tell us about any hobbies that have boosted pipetrade-relevant skills:

Two of my main hobbies are playing soccer and tattooing, both have helped me build skills that I think will transfer well into the construction and pipe trades. Soccer has taught me the importance of teamwork, communication, and staying disciplined—especially when things get tough. It's also helped me stay physically fit and mentally focused, which are important for a hands-on, physically demanding career like this. Tattooing has helped me develop a steady hand, attention to detail, and patience. It's also taught me how to work with precision and take pride with the process.

Why is an apprenticeship an attractive option to you?

An apprenticeship is enhancing to me because it gives me the chance to earn while I learn. I like the idea of getting real hands-on experience while being taught by experienced professionals.

It also gives me a clear path toward a steady career. I'm motivated to start something long-term, and I respect the structure and support that comes with a union apprenticeship. It's a great opportunity to work hard, grow, and eventually become a

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I'm interested in a career in the building trades because I'm ready to start a stable, hands-on career where I can learn, grow, and build something meaningful. I may not have experience yet, but I'm a hard worker who enjoys learning new skills and pushing myself to improve. What really sparked my interest is seeing friends and family succeed in union trades. Hearing about the opportunities they've had and the pride they take in their work made me want to pursue something similar.

Specifically, the pipe trades stood out to me because of how essential and respected the work is. I want to be part of something that keeps communities running—whether it's plumbing, heating, or piping systems. My goal is to build a steady, reliable career I can be proud of and eventually work my way up to becoming a skilled professional in the field.

Why is an apprenticeship an attractive option to you?

I want to find a new career and plumbing was what drew my interest and I know for a fact I want to do it. It's challenging which is what I like. It allows me to be in different jobs and doesn't seem repetitive like a factory job would be. The benefits package that union offers is unmatched. In the economy that we live in, the wage is very attractive.

I'm looking for a long lasting career that will allow me to do my own side gigs and do

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I want to learn a trade where I can work as a builders trade and/or work as an on call plumber. I want to step away from the factory setting because it is too repetitive for me and seems to always be a dead end career for the most part. I am currently a welder and I've been looking to grow away from that full time and challenge myself to learn something new and challenging and at the same time make more money.

I a. Still willing to put into use my welding abilities if it calls for it in plumbing but would also like to learn something that will allow me to do side gigs and do my own projects/repairs on my own property. Plumbers seem to be in demand and make a good amount of money without putting at risk my health like a career in welding would normally do. I want to challenge myself with this new career.

This would be a great opportunity to get familiar with the trade, in a immersive hands on way, and to learn the trade in and out, taking the next step in developing a career, to support my family

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Well, it all started 3 years ago, when I took a dynamic job position working as maintenance. This turned out to be;building maintenance, facilities maintenance, and preventative maintenance all in one.

The company bought a old foundry from the 1920's in Sparta Michigan. Essentially we gutted that whole place, old water lines, and gas pipes, no longer in use, was to be taken out and this is where i found my intrest to become a plumber. I have got my feet wet in different fields, and Plumbing is where I belong.

Why is an apprenticeship an attractive option to you?

I am 31, married, and have a 5 year old son. For the last decade, I put my education and career on hold to support my wife as she chased her career dreams. Now that she is there, it is my turn to figure things out. I have always been drawn to a hands on career, and I thrive in an environment that constantly challenges my brain. The pipetrades is just that. I am ready to commit to something that is going to provide me with a career rather than a job, and be rewarding in the long run. I am ready to put in the work, and be

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've always been drawn to careers that involve hands-on work, problem-solving, and tangible results. The building trades offer a sense of pride and purpose in creating and maintaining essential infrastructure. I appreciate the teamwork, discipline, and continuous learning that comes with the trades. Specifically, the pipetrades caught my attention because of the critical role they play in both residential and industrial systems. Pipetrades professionals keep buildings safe, functional and efficient. While my work in the past was in a laboring function, I enjoyed learning from my mentors and would like to join a union and pursue the opportunity to become a journeyman myself.

Full-time, Overtime, Weekends, 2nd Shift (Nights), 1st Shift (Days)

Post HS Education:

Some 4-year college

Add'l Edu. Details:

It was a year in business at Stevens point I was just taking gen eds and it wasn't much I got to take out of it.

What trades-related courses did you take in school?

Automotive Technology, Electrical Trades / Electronics, Math-Algebra, Math-Geometry, Math-Precalculus / Trigonometry, Woodworking / Woodshop

What construction software or technologies do you have training in?

Any Safety Certificates:

Add'l Details:

Why is an apprenticeship an attractive option to you?

I want to learn and get really good at a useful career such as the ones offered. I wish to buy a fixer uper house in the near future and I want to further my knowledge and skills to help me do that. I enjoy the pathway up in the trades and I am confident in my ability to work my way up.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I meet a lot of people who work in the field and they recommend me to get into it

Add'l Details:

Why is an apprenticeship an attractive option to you?

As someone who is always eager to learn something new an apprenticeship seems like a good alternative to a full four year degree since I can earn while I learn. It is a way to set myself up for future success, developing a useful skill that will always be needed in society. I enjoy helping people in my community and this would be a way of, one day, actively doing just that.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I enjoy working with my hands. I want to develop a useful skill that will take me far in life.

Went to college a bit before I left and worked at a factory, I started going to Rasmussen College before I went for IT. and

What trades-related courses did you take in school?**What construction software or technologies do you have training in?****Any Safety Certificates:****Add'l Details:****Why is an apprenticeship an attractive option to you?**

I've always enjoyed learning and working with my hands, I did 4 summers with a small construction company. I like the fact that when you finish your project you can say you did that, there's skills to learn and master., The ability to learn new skills but also being in a job that I'm not necessarily doing the exact same thing every day that has no skill to it. I want to learn new things and be able to apply those new skills to my job and Life.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

My first job was a summer construction job, I love working with my hands and learning new skills., I used to work in construction for my first job, I've always loved working with my hands and learning new skills. My Uncle is also a big inspiration to wanting to work in trade, he works welding now and my brother is an electrician as well. I worked factory for 5 and 1/2 years not really learning any new skills and that's my other biggest push to learn new skills that cannot only be used at work but applied to in real life.

Why is an apprenticeship an attractive option to you?

I desire something more rewarding than the soulless logistical work I'm currently doing because it pays more. I'm finally in a position to pursue work that has meaning to me again and I want a union backing me because they care about me as a person beyond a valuation on a spreadsheet/P&L report.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've been some form of fabricator since I was in high-school doing wood/metal shop. I even went to the other side of it with drafting classes too. I enlisted as an army engineer and really enjoyed making something worthwhile with my labor ever since. After I got discharged I did a ton of metal fab and welding, but had to move jobs because of wages. I've missed actually doing something ever since. Pipetrades is of interest to me since it combines a lot of my amateur applicable skills like print reading, fabrication knowledge, welding, and troubleshooting.

Shift Availability:

Full-time, 1st Shift (Days)

Post HS Education:

Some 4-year college, Some 2-year college

Add'l Edu. Details:

I started at the Oakland Community College in Michigan to get general education. I transferred to Oakland University and

What trades-related courses did you take in school?

Math-Algebra

Why is an apprenticeship an attractive option to you?

As a former Appraisal Trainee, I understand the value of having my education and experience paid for. One of the reasons I am no longer an appraisal trainee is because I would have to go back to school and get an associates or bachelors degree. The apprenticeship program is a far superior career choice for me because I get most of the education paid for and get paid better from the start. I also would enjoy a more physical job.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

The trades provide a rewarding, stable, and lucrative career. I've always been an active person and I don't enjoy sitting at a desk all day. I have experience in plumbing and I could not imagine choosing any other trade like electrical, roofing, or HVAC.

What construction software or technologies do you have training in?

Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

Plumber, Pipe Fabricator

Work Zones in Preference Order:

Appleton Area (Green), Fond du Lac Area (Orange)

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:

4-6

Welding Experience:

TIG - Some Knowledge, MIG - Some Knowledge

Tell us about any jobs where you've learned pipetrades relevant skills:

Keenline conveyor systems as a welder
Miron construction as a carpenter

Tell us about any hobbies that have boosted pipetrade-relevant skills:

We always have construction projects going on at the house which has taught me a lot about the construction process. I own a small tree service buisness which has taught me leadership skills and what it takes to keep everyone busy and make the customer happy.

Shift Availability:

Full-time, Overtime, Weekends

Post HS Education:

Other Relevant Courses & Certifications

Add'l Edu. Details:

My junior and senior year of highschool I did a youth apprenticeship for welding at keenline conveyor systems And

What trades-related courses did you take in school?

Building Trades / Construction, Welding, Metals, Woodworking / Woodshop

What construction software or technologies do you have training in?

Solidworks

Any Safety Certificates:

OSHA 30, First Aid / CPR

Add'l Details:
Why is an apprenticeship an attractive option to you?

I like the idea of earning money as you learn and being in a more hands on classroom and absorbing the knowledge of the instructors and putting it twords my work on the job site

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've always been interested in construction and being apart of the process. I've always loved working with my hands and feeling accomplished at the end of the day and seeing my work as I drive down the highway. Pipetrades interests me because of my previous experience in the welding field and plumbing really intrigued me while I was working as a carpenter for miron

Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

Plumber

Work Zones in Preference Order:

Fond du Lac Area (Orange)

Relevant Experience Level:

Some. I have worked for a plumber, steamfitter or HVAC/R contractor.

Years of Full-Time Work Experience:

1-3

Welding Experience:

Stick - Some Knowledge, Flux Core - Some Knowledge, TIG - Some Knowledge, MIG - Some Knowledge

Tell us about any jobs where you've learned pipetrades relevant skills:

I am currently working full time as an apprentice plumber in Florida, so I've had many plumbing related experiences, including laying & gluing pvc, venting pipe, installing PEX water lines, installing water heaters, installing toilets, faucets, garbage disposals, dishwasher's, core drilling, digging, doing underground

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I live to work with my hands, fix, & build things.

Shift Availability:

Full-time, Overtime, 1st Shift (Days), Weekends

Post HS Education:

No

Add'l Edu. Details:

What trades-related courses did you take in school?

Building Trades / Construction, Math-Algebra, Welding, Metals, Math-Geometry, Woodworking / Woodshop

What construction software or technologies do you have training in?

Any Safety Certificates:

Add'l Details:

Why is an apprenticeship an attractive option to you?

I'm currently in a plumbing apprenticeship & I enjoy it, but want to be challenged more with a quality Wisconsin based plumbing career because that is where I'd like to work after completing my apprenticeship & becoming a Journeyman (& eventually a Master) plumber.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I graduated from highschool & immediately moved to Florida to be an apprentice plumber, even though I don't have interest in living in Florida long term. I've been doing it for 2 years and would like to continue an apprenticeship in WI where I'd like to work long term

Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

Plumber, Steamfitter (Pipefitter), HVAC/R Service Tech, Pipe Fabricator

Work Zones in Preference Order:

Appleton Area (Green), Green Bay Area (Yellow)

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:

7-9

Welding Experience:

Tell us about any jobs where you've learned pipetrades relevant skills:

I was an industrial maintenance apprentice about 7 years ago that I had finished. It consisted of working with steam pipes. Rebuilding mac valves, replacing and fabricating small braided steel hose. And diagnostic work. Unfortunately this was with a private company so I received no credit towards apprenticeship outside of the company.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I do the maintenance on my vehicles as well as my home. I enjoy building, and fixing things.

Shift Availability:

Full-time, 1st Shift (Days), Weekends, Overtime

Post HS Education:

No

Add'l Edu. Details:

What trades-related courses did you take in school?

What construction software or technologies do you have training in?

Any Safety Certificates:

Add'l Details:

Why is an apprenticeship an attractive option to you?

I would like to get straight to work while learning a trade. I have found I pick up skills the best while active applying them.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I enjoy working with my hands and using my knowledge, to achieve results. I have been a truck driver for the last 5 years and haven't found it as fulfilling as when I had positions where I was working with tools. I have experience as a industrial maintenance technician, and found that the steam work was my favorite part.

Why is an apprenticeship an attractive option to you?

It allows me to learn a job while still providing an income for my wife and son.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Originally I wanted to go into Finance. I am still actively working towards my degree. However, with AI evolving rapidly, I feel like a safe bet would to work in a job that will forever be needed. Technology is advancing rapidly, and I'd like to not have to worry about job security. I have a wife and son I need to actively provide for, and they are my top priority. I like working with my hands and providing a service that will leave my bosses and consumers satisfied.

Building Trades / Construction, Math-Algebra, Math-Geometry

What construction software or technologies do you have training in?

Any Safety Certificates:

First Aid / CPR

Add'l Details:

Why is an apprenticeship an attractive option to you?

It's attractive for me because it is a way of learning a skill that is very useful not only for a job but in everyday life. I want to have a career that I can be proud of and also one that I can work in until I retire. I know I'm not overly young but it's something that I want to have for the rest of my career until the day I retire.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I have always done maintenance in the past and plumbing and HVAC have always been something I've wanted to get into as a career and not just something that I do here and there. I have family members that have been plumbers and they've always told me what a great career it was and I've just been trying to look into the right situation and this seems like the perfect situation for me.

Add'l Details:
Why is an apprenticeship an attractive option to you?

I've always been a hands on learner because I very much prefer to see the work being done in front of me in order to understand it better. Books only teach you so much when you can't visualize the way their information is applied. Not only is it the way I learn best but I also have a situation in which I need to keep making money as I go to survive. Without a steady income bills would fall through which I can't let happen when my baby girl is being born this March. Developing skills and career while being payed is the best

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I had gone to NWTC after a year of college and joined the carpentry program. Through experience in that I realized I didn't really enjoy doing it for work but while there I was able to visit various other trade programs to get more insight about the work they do. Plumbing and Electrician programs seemed a much better fit to me and I was much more interested. I've been hesitant to start and looking for an apprenticeship in the past due to frequently moving around Wisconsin for the past 3-4 years. Now things have changed and I have a child on the way this March. I won't be traveling as frequently and would like to build my career in pursuit of supporting that family along with my own self interest in the trade. It would mean the world to secure a future in plumbing.

None. Nothing even close-but I'm a hard worker and willing to learn!

Years of Full-Time Work Experience: 10+

Welding Experience:

Tell us about any jobs where you've learned pipetrades relevant skills:

Honestly I cannot say my past jobs have had any skills directly related to the pipe trades. Working Security at Disney for the last 8 years has given me a very high level of customer service ability. I assume customer service skills can be beneficial when working with customers on various jobs.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I enjoy doing an assortment of outdoor activities. So working in a variety of environments does not bother me.

I prefer trying to figure out how to fix things myself. Even if I don't know how to do something, I generally know where to look for guidance.

I enjoy working out which keeps me physically capable for the requirements needed

Criminal Justice degree (associates)

What trades-related courses did you take in school?

Woodworking / Woodshop, Metals, Welding, Math-Precalculus / Trigonometry, Math-Algebra

Why is an apprenticeship an attractive option to you?

I've never done well in a classroom only environment. In high school my favorite classes were machine tool, welding, and wood working. I learn so much better in a hands-on setting.

I'm also tired of just working "jobs". I want a career. And the "earn as you learn" format of a apprenticeship work perfectly for my family and I. I don't have the knowledge or

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Throughout my years working for Disney I've spoken to many individuals in the Engineering department that work for a variety of trades. My current job can be very monotonous and unfulfilling. I've been interested in pursuing an apprenticeship in the pipetrades because I would prefer to have a more hands-on career. Unfortunately with the low union pay in Florida and extremely high cost of living, I cannot afford to lose my current job.

My wife and I are planning to move to Wisconsin next year. My goal is to start a career journey that allows me to provide a comfortable life for my family.

What construction software or technologies do you have training in?

Any Safety Certificates:

First Aid / CPR

Add'l Details:

Why is an apprenticeship an attractive option to you?

I think it is a very good option for me because of being able to work hands on while learning instead of just schooling. I believe I learn better with hands on, which is why I believe that an apprenticeship is the best option for me.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I always seemed interested in plumber trades, since I was a kid. Mainly because when I was younger, we would have plumbers come to our house to work on things we'd need done and I was always intrigued by the many different skills they have and the many good things they do for people.

Why is an apprenticeship an attractive option to you?

An apprenticeship is a cool thing to go for because you wont get into a whole lotta debt. I have seen vidoes of people hard at work while learning at the same time and i very much enjoy learning. Learning is what makes the job fun and makes me strive to become better.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

working in customer service jobs has always struggling to learn new things but it was pretty much the same thing at every job ive ever had. Ive talked with my dad who works in carpentry and thats what brought me into it. Its been popping up on my computer and its been intresting to research and watch other people do these things that ive never even thought of doing. Ive always felt like I never knew how to do anything and always having to rely on someone else. I wanted to make a change by researching all of this and finally gained enough courage to start applying.

Associates in Arts & Science, Welding Industrial Technical Diploma

What trades-related courses did you take in school?

Welding, Math-Precalculus / Trigonometry, Math-Algebra

Why is an apprenticeship an attractive option to you?

An apprenticeship is a good opportunity to learn from someone who has more knowledge and skills. Their skills and knowledge would be an absolute asset to being a successful welder and being able to problem solve in a different mindset. It gives opportunities to improve my skills and what I may be lacking in and needing more help. With an apprenticeship I will have the skills and knowledge to further my career and one day lend it to another who may follow my steps.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

When I was in high school, I took a class for metal working and we did a bit of welding in the course. I had an interest in welding from that point on and continued to LTC for a Welding Industrial Technical Diploma to gain more exposure to welding. I have always heard about pipe fitting and did not find a job in that field nearby at the time of my graduation. I've always found pipe fitting and iron works to be a unique way learn to be a better welder overall. As these two types of welding are ones that never have exactly the same thing happening day to day. Keeping the workday more enjoyable and challenging.

Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

HVAC/R Service Tech, Plumber, Pipe Fabricator, Steamfitter (Pipefitter)

Work Zones in Preference Order:

Green Bay Area (Yellow), Appleton Area (Green), Fond du Lac Area (Orange)

Relevant Experience Level:

None. Nothing even close-but I'm a hard worker and willing to learn!

Years of Full-Time Work Experience:

7-9

Welding Experience:**Tell us about any jobs where you've learned pipetrades relevant skills:**

As a truck driver for five years, I developed skills that apply to the pipe trades, including attention to detail, problem-solving, and working with tools. I maintained equipment, followed safety protocols, and managed logistics, all of which are essential in pipe work. My DIY projects have also given me hands-on experience with basic plumbing and home maintenance, further building my technical skills. These experiences have prepared me to learn and succeed in the pipe trades.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I enjoy weightlifting, DIY projects, golfing, and deer hunting, all of which have built skills useful in construction. Weightlifting improves my strength and endurance for physical work, while DIY projects sharpen my problem-solving and hands-on skills. Golf teaches patience and precision, and hunting requires discipline and adaptability, both important on a job site. These activities have helped me develop the physical and mental skills needed for construction work.

Shift Availability:

Full-time, Overtime

Post HS Education:

No

Add'l Edu. Details:**What trades-related courses did you take in school?****What construction software or technologies do you have training in?****Any Safety Certificates:****Add'l Details:****Why is an apprenticeship an attractive option to you?**

An apprenticeship is attractive because it provides hands-on experience while teaching property management and maintenance skills. After five years as a truck driver, I want a structured way to transition into a career with long-term growth. Learning construction and property maintenance will help me build skills for investment real estate while earning as I learn. This opportunity offers the perfect balance of education and real world application to reach my goals.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Looking to get into property management and want to learn all the skills associated with that.

Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

Plumber, Steamfitter (Pipefitter)

Work Zones in Preference Order:

Appleton Area (Green)

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:

1-3

Welding Experience:

Stick - Some Knowledge, TIG - Some Knowledge, MIG - Some Knowledge

Tell us about any jobs where you've learned pipetrades relevant skills:

I worked for a general contractor for 2 years as a carpenter. I learned a lot about meeting dead lines. I also got used to working in changing environments. I also had alot of experience with working with my hands and using tools.

I am currently working at a company the supply's, installs and repairs mobility equipment. Some of the things we work on include metal wheel chair ramps, stair lifts, pool lifts and vertical platform lifts. Working on and installing these and other pieces of equipment has taught me problem solving and people skills dealing with customers

Shift Availability:

Post HS Education:

No

Add'l Edu. Details:

What trades-related courses did you take in school?

Welding

What construction software or technologies do you have training in?

None

Any Safety Certificates:

First Aid / CPR

Add'l Details:

Tell us about any hobbies that have boosted pipetrade-relevant skills:

As far as hobbies go I enjoy working on my personal vehicle wether it's small repairs or modifications. Through out my time working on cars I've learned alot of problem solving skills and how to be creative and innovative on the fly. I've also learned mechanical skills from working on my car and from past jobs. I enjoy playing sports and weight lifting. Sports have definitely taught me how to work efficiently with others and especially with people with clashing personality's. Through weight lifting I've definitely learned patients and that some things just can't be rushed

Why is an apprenticeship an attractive option to you?

I like the idea of learning from someone who has been in the field and in the career. I know ide get more out of it if I can learn first hand vs reading how to do a job in a book or just being thrown into something not knowing anything about it

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I enjoy working with my hands, I also like having variety within a job because I'm not a fan of of the same monotonous day to day tasks. I also like problem solving. I am also looking for a career where I can grow my skills and as a person. I also want the possibility to move up and grow within a company. I am also looking for a career that is stable and that teachers my skills of a trade that I can use any where in the world and be successful

Add'l Details:

Why is an apprenticeship an attractive option to you?

I am a hands on learner. It makes me learn a little faster than watching someone else do it.
Being at a job for years and not being able to advance was depressing. I am ready to learn new things everyday and advance my career to better my family.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I like to learn hands on stuff. I was actually going to go for heavy equipment operating but decided i may like plumbing.

I would be interested in any apprenticeship. Learning things while getting paid for it is better than not being able to advance in a company. It's more rewarding and motivates me to wanna go to work everyday instead of being miserable at a job you can't advance in.

Why is an apprenticeship an attractive option to you?

An apprenticeship is an ideal option for me because of a few reasons. I am a hands on learner and learning on the job is the best way for me to become skilled. The job security is also a big positive because leaving a secure career like the military and going back to civilian work where company's can downsize is a stress I would like not to have. Providing for my family is the most important thing to me and getting an apprenticeship and being able to join a union is an amazing privilege. I also would like to grow with a company and

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I prefer jobs that are hands on. I want to provide for my family as best as I can and this looks like one of the best ways for me to do that. I found out about UA through Transition Readiness Seminar as I am getting out of the Marine Corps soon and once I looked into UA and the pipe trades and the apprenticeships it seemed perfect for me.

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:

4-6

Welding Experience:**Tell us about any jobs where you've learned pipetrades relevant skills:**

I haven't had direct experience in the pipe trades, but I have worked on roofing jobs and for a drywall company, gaining hands-on construction experience. Roofing taught me physical endurance, safety awareness, and problem-solving, while drywall work helped me develop measuring, cutting, and installation skills. These jobs reinforced my work ethic, teamwork, and ability to learn on the job, which will help me succeed in a plumbing or HVAC apprenticeship.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

In my free time, I practice Jiu-Jitsu, go to the gym, and participate in various team sports. These activities have helped me develop physical and mental skills that are highly transferrable to the construction trades. Jiu-Jitsu has taught me discipline, patience, and problem-solving under pressure. It requires strategic thinking, adaptability, and attention to detail—just like working in plumbing or HVAC, where you need to assess situations, troubleshoot problems, and apply technical skills effectively.

Human Services Substance Abuse Counselor in Training Certificate

What trades-related courses did you take in school?**What construction software or technologies do you have training in?****Any Safety Certificates:****Add'l Details:****Why is an apprenticeship an attractive option to you?**

An apprenticeship is an attractive option for me because it provides hands-on training, allowing me to learn directly from experienced professionals while earning a living. I thrive in environments where I can apply skills in real-world settings rather than just learning in a classroom. The combination of structured education and on-the-job experience makes an apprenticeship the ideal path for gaining the technical knowledge and problem-solving skills needed in the HVAC or plumbing trade.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've always been drawn to hands-on work and problem-solving, which is why I'm interested in a career in the building trades. I enjoy working with my hands, learning new skills, and seeing the direct impact of my work. The trades offer a career path where I can develop specialized skills, work in a high-demand industry, and have opportunities for long-term growth and stability.

Specifically, I'm interested in plumbing and HVAC because they are essential trades that keep homes, businesses, and industries running smoothly. The idea of working on complex systems, troubleshooting issues, and providing solutions excites me. Even though I don't have direct experience, I'm a hard worker, eager to learn, and committed to developing the skills needed to be successful in this field.

C++, C#, HTML, SQL, JSON, CSS, a little Python and a little JAVA

Any Safety Certificates:

First Aid / CPR

Add'l Details:**Why is an apprenticeship an attractive option to you?**

I've been through one before as a butcher and trained my own apprentices. I enjoy the culture of the trades in particular. And I've always been a better hands on learner than a book learner.

I think that working in a butchers union, and with the culture, was essential for acquiring the skills I needed to succeed.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I'm a journeyman butcher and have been for sometime. I've always had friends and family in construction trades and have much respect for them. For a long time now I've wanted to switch trades. In 2017 I attempted to join the local Chicago plumbers union but my math skills at the time were lacking. A few years later, I moved to Appleton and started attending Fox Valley Technical College. I retok pre algebra, college mathematics, a math & logic class for software engineering, and even tutored my girlfriend in business applications of math for her degree. I studied hard and aced those classes and am now much more confident in my skills in mathematics.

Plumber, HVAC/R Service Tech

Work Zones in Preference Order:

Appleton Area (Green)

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:

4-6

Welding Experience:

Tell us about any jobs where you've learned pipetrades relevant skills:

I've worked as an Operator Assembler at Sub-Zero Group, Inc. since March 2022, gaining hands-on experience in manufacturing, machine operation, and troubleshooting—skills directly applicable to the pipe trades.

Previously, as a Maintenance and Utility Assistant at Ahlstrom-Munksjö (Thilmany Mill), I assisted with equipment maintenance and repairs, building a strong foundation in problem-solving and industrial work.

Shift Availability:

Full-time, 1st Shift (Days)

Post HS Education:

Some 4-year college

Add'l Edu. Details:

Certifications: Machine operation training, including experience with various assembly equipment, safety protocols, and

What trades-related courses did you take in school?

Math-Algebra, Math-Calculus, Math-Geometry, Woodworking / Woodshop, Math-Precalculus / Trigonometry, Engineering, Electrical Trades / Electronics, Drafting and Design, Robotics

What construction software or technologies do you have training in?

AutoCAD, Solidworks

Any Safety Certificates:

First Aid / CPR

Add'l Details:

Tell us about any hobbies that have boosted pipetrade-relevant skills:

In my free time, I enjoy hands-on projects like coding and designing software tools, which have strengthened my problem-solving and troubleshooting skills—valuable for the construction trades. I also have experience operating machines and quickly learning new tools, thanks to my curiosity and adaptability.

Outside of technical activities, I enjoy being outdoors and playing team sports, which have taught me the importance of hard work, communication, and collaboration—skills

Why is an apprenticeship an attractive option to you?

An apprenticeship is a great option for me because I learn best by doing. It gives me the chance to work hands-on, learn from experienced professionals, and build real skills while on the job. I also like that I can earn money while I'm learning, which makes it a practical choice as I work toward supporting my family. I'm looking for a rewarding, long-term career, and an apprenticeship is the perfect way to gain the experience and knowledge I need to build a strong foundation in the trades.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've always been drawn to hands-on, problem-solving work, which is why I initially pursued electrical engineering and gained experience in circuit analysis and machine operation. Over time, I've realized that I thrive in environments where I can see the immediate, tangible impact of my work, which is why I've become interested in the building trades.

Specifically, plumbing appeals to me because it combines critical thinking and physical work to solve essential problems that affect people's daily lives. I enjoy the challenge of troubleshooting and finding practical solutions, and plumbing offers a career path where I can continue learning, build expertise, and make a meaningful contribution to communities.

Add'l Details:**Why is an apprenticeship an attractive option to you?**

I appreciate the ability to gain experience on the job working alongside professionals who are able to answer my questions., I would be able to learn and engage well with the types of training that goes on in an apprenticeship because of the practical experience as well as the ability to learn a variety of skills.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I want to work in hvac because I am eager to learn hands on skills and problem solving abilities. The unions desire to train and educate people allows me to achieve my goals of being able to help people and businesses in day to day life.

I appreciate the unions focus on quality and efficient work while maintaining safety standards. Joining hvac would not only help me develop my career in hvac but also allow me to work in an environment where I feel vaulted and connected with those around me., I'm looking for a lifelong, essential career with growth opportunities where I can work in a hands on environment while using my problem solving abilities. I want to join an apprenticeship because I would be able to learn from professionals while getting experience in a classroom and on the jobsite.

Mudjacking it's far fetched from pipe trades, but it was still construction., n/A

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I've worked a construction job before (Mudjacking), & I learned a lot about working with people- customers & co workers. I'm a very good people's person so I know how to get along & get work done. I'm familiar with power tools, hand tools, ladders, etc. AND I AM A SPONGE WITH INFORMATION. But as hobbies, I don't do it as much as I'd like, but building things is fun & seeing things come along is interesting., I like to put together whatever I can. I like brainstorming with a team and getting a task done.

Add'l Edu. Details:**Why is an apprenticeship an attractive option to you?**

Stability & growth!! Get paid to learn & this is the type of work & knowledge that I can take outside of work.

What trades-related courses did you take in school?

Math-Geometry, Math-Algebra, Metals, Welding, Automotive Technology

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I am currently a correctional officer. The work is stressful as is the schedule & hours. I want something stable & a place I can make good money whilst working & enjoy my work. I come from a family that have been in trades & they were always so eager to get me to get into one. And I wish I would have sooner. I'm looking to build a career & skyrocket from there & the pipe trade, plumbers & steamfitters trade is where'd I'd do it., I need a career & I've always considered doing an apprenticeship.

What construction software or technologies do you have training in?**Any Safety Certificates:****Add'l Details:****Contact Information:**To speak with candidate #2258958, access your Candidate Request Tool at <https://pipetradecareers.com/contractors/candidates/WI400>**Additional Information:**If you have questions on candidates or the Pipefolio process, please contact:

Tell us about any jobs where you've learned pipetrades relevant skills:

I've only ever been around plumbers, hvac, welders and electricians while doing my work as an insulator I haven't had much hands on experience with the pipe trades yet, I haven't done any jobs where I've had to do anything with pipes. Just when doing insulation on job sites I've had to insulate around pipe and watch them be installed and that has always been interesting to me making it neat and look good.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

More so looking to get into it more I have always been a hands on person wanting to learn with my hands, Right after I graduated high school I went out and got a job doing insulation. I've always looked at the other crews on the job sites and thought to myself I'd like to be more of a part more building the house than insulating. Plumbing work has been interesting me more.

CNC, CNC

Any Safety Certificates:

First Aid / CPR, First Aid / CPR

Add'l Details:**Why is an apprenticeship an attractive option to you?**

I'd like to get right into the work field and possibly go to college later on the further my career, The apprenticeship program is nice for me because, I like the idea that you can be enrolled in both school learning your skills for the job and also be actively working on a job site as well. I also like that you don't have to pay into school much more past books and supplies coming from a lower income family that would help a lot.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I graduated high school and got an insulation job and watched as all the other crews did their part of putting the house together and was always interested in the plumbers, What interests me the most is working with my hands and watching the project build day by day. I enjoy knowing that I am a part of a crew who can work together and become something big.

Disciplines of Interest:

Plumber, Steamfitter (Pipefitter), HVAC/R Service Tech, HVAC/R Service Tech

Work Zones in Preference Order:

Green Bay Area (Yellow), Appleton Area (Green)

Relevant Experience Level:

None. Nothing even close-but I'm a hard worker and willing to learn. A little. No specific trade experience but I have general skills in construction or welding

Years of Full-Time Work Experience: 4-6, 4-6

Welding Experience:

Tell us about any jobs where you've learned pipetrades relevant skills:

none, I have had many jobs that were related to the trades. However, the only job I have had working in my interested field of HVAC was a full time position at a start up company. The company was called Integrity Heating and Cooling based out of Manitowoc, WI.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

working in cars so I know how to turn a wrench and use my hands, I enjoy fishing, working on cars, spending time with my family and being outside. These skills are transferrable to the trades because being outdoors shows how I am able to work in diverse weather conditions. Working on cars helps me with my hand to eye coordination and boosts my knowledge of tools. Having a one year old and another on the way helps me to learn patience and time management.

Closest I have had is lowes but I would say even that would be very minimum and rare in what times I have had. I mostly dealt with in terms of building displays in some of the areas in the stores. Making sure they were properly displayed and presentable but beyond that not much., The closest job I have had would likely be Lowe's because we would often go to different stores in the state and build whatever they would like us too. We would also handle certain things on site like repairing certain product like grills. We would lift heavy steel beams to build shelving/aisles for product as well as

Tell us about any hobbies that have boosted pipetrade-relevant skills:

Mostly have experience in heavy labor work and equipment like fork lift working with planograms. I have worked at target, ups, lowes and assembly linework at qps. Target I worked any time for any need. Mostly for store setup early in the morning or late at night. I used planograms to setup the store. Any new product would need proper setup. Similar to lowes but at lowes i would travel with a team and setup multiple areas within the store using fork lifts and various other machines. Putting together displays or product. Putting together aisles and more. Using various tools to put together said product or steel beams

What trades-related courses did you take in school?**What construction software or technologies do you have training in?****Any Safety Certificates:****Add'l Details:****Why is an apprenticeship an attractive option to you?**

Real world experience and skills that I wish to obtain. I struggled with direction in terms what I want early in my life but I have learned what gives me the most sense of accomplishment is physical work that gives important skills that I can use even outside of work. I went through multiple careers that I thought would suit me and this one came to mind as something I could do for the rest of my life. Although I am not the smartest or fastest or experienced I am very dedicated tend to not give up. I always want to learn

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

The skills involved are something i find very important i want to useful and needed, I have always struggled in school when it comes to higher learning. Always been good with my hands, strong loyalty and ability to work with and work hard with others. I enjoy physical labor. My previous efforts in other jobs like retail, warehouse, assembly line work I have always enjoyed. But it never felt like meaningful work career for a future to me. It wasn't until I started going to church for a couple of years that I have been recommended to by fellow church members that are current or former plumbers/welders. To look into getting into this job. That it would match my hunger for more and want to provide and have a job that i can be proud of. Work I could be proud of. To me the trades feel like being a productive member of society. I aspire to have a career like my fellow church member in which I can be proud of just like they are.
