Why is an apprenticeship an attractive option to you?

Because I am interested in learning about the HVAC career path and being an apprentice would teach me all about this job and help me to lead myself into growth with this career.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

It was always high up on the "What do I want to do" list for me. I started thinking more about it my junior going into senior year of high school. I have decided this because of the very good pay in these job's and the good things I hear about the benefits and the environment in trade job's. Specifically the HVAC trade was recommended to me by a youth apprenticeship coordinator named DJ Kloida. He gave me a ton of info on this and it made me very excited to start my career. Due to set backs and lack of communication it is a little bit late that I am taking initiative on this but I am very interested in starting my career as an HVAC worker as soon as possible!!!

Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

Plumber, HVAC/R Service Tech

Work Zones in Preference Order:

Appleton Area (Green)

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:

7-9

Welding Experience:**Tell us about any jobs where you've learned pipetrades relevant skills:**

As an inventory specialist at Miller Electric, I partnered with manufacturing and warehouse teams to solve material flow issues, improve processes, and ensure accuracy. Building problem-solving, precision, and collaboration skills.

As an operations coordinator at Bay Tek Entertainment I helped launch new processes, planned layouts, optimized workflows, and resolved urgent issues. All of which strengthened my ability to work efficiently, troubleshoot, and coordinate with others.

Shift Availability:

Full-time, 1st Shift (Days), Weekends

Post HS Education:

Bachelor Degree

Add'l Edu. Details:

Degree Major - Supply Chain Management

What trades-related courses did you take in school?

Math-Calculus, Math-Algebra, Math-Geometry, Math-Precalculus / Trigonometry

What construction software or technologies do you have training in?

Business ERP Systems and some exposure to CAD software

Any Safety Certificates:

First Aid / CPR

Add'l Details:**Tell us about any hobbies that have boosted pipetrade-relevant skills:**

In my free time, I enjoy woodworking, lawncare, landscaping, home renovations, and repairing my truck and motorcycle. These hobbies have built my problem-solving skills, attention to detail, and comfort with tools and materials. All directly transferable to the construction trades. Even fishing has helped me develop patience and focus, qualities that support steady, precise work. Together, these activities show my passion for hands-on projects and strengthen the skills needed for a career in the trades.

Why is an apprenticeship an attractive option to you?

An apprenticeship is attractive to me because it lets me learn hands-on while still earning a steady income that can help support my wife and kids. I've realized through past supply chain work and hobbies that I thrive on problem solving and practical work. An apprenticeship provides structured training, mentorship, and stability, while allowing me to build a long-term career I can take pride in.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've worked in supply chain roles for several years, but I realized I'm most fulfilled when I'm problem solving and working with my hands rather than sitting behind a desk. I want a career where I can build, fix, and contribute directly to projects in a practical, hands-on way.

A close friend in UA 400 recommended the pipe trades to me, and after hearing about the training, teamwork, and pride he takes in his work, I thought it could be a great fit. His experience, along with my own desire for hands-on problem solving, motivated me to look into a career in the building trades, specifically in the pipe trades.

The jobs that I've had never had anything related to pipe trades but I have taken some classes related to HVAC at lakeshore technical college

Tell us about any hobbies that have boosted pipetrade-relevant skills:

Some of my hobbies include fishing, being with friends and family, driving, kayaking, and building things. 2-3 of these can kinda relate to construction trades being on you look at it. For instance driving is one because is trades you do need a license to operate a vehicle if trying to get to and leave work but also if asked to drive a work vehicle then one is required. Then we have being with friends and family and when on job sites most guys and girls see everyone as friends or even some as family. Building is the obvious one I do like to build but mainly with wood.

Add'l Details:

Why is an apprenticeship an attractive option to you?

An apprenticeship is the most appropriate option for me because it would still help me get guidance and the learning experience that I will need in the near future.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

What mainly interested me about building trades is the hands on work, I've always been a hands on worker and like working with my hands because then I feel like I can understand what I'm doing rather than just looking and typing something or writing. Another reason I was interested is there's not many people going into trades anymore which honestly surprised me but I've also come from a family of trade workers. I have family members that have worked in construction and roofing but they also do their own projects which sometimes include them doing piping or even electrical at times. The main reason I wanna go into HVAC is because I believe there is a lot of benefits with it such as if a personal heating or ac problem occurs then I would possibly be able to fix it on my own or even help some who is having the same issue.

Post HS Education:

Bachelor Degree

Add'l Edu. Details:

I majored in Communications, with a minor in Advertising from the University of Wisconsin-Whitewater.

What trades-related courses did you take in school?

Math-Algebra, Math-Geometry

What construction software or technologies do you have training in?

Any Safety Certificates:

Add'l Details:

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I love working on house projects, such as building shelves, painting, and installing trim, as well as working on my car and learning how to be self-sufficient.

Doing things with my hands and learning while I try is very motivating for me. I use every opportunity to "get my hands dirty" to learn as much about projects as I can.

Why is an apprenticeship an attractive option to you?

The ability to learn while I earn and be able to start obtaining skills from day one is the largest attractive option for me.

I am also very drawn to learning from a journeyman and having that expert there that I can watch and absorb knowledge from.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I have heard a little about the pipe trades since my uncle is a pipe fitter. I also really enjoy the idea of working with my hands and being able to build something lasting that I can be proud of.

I originally went to college, but have found that I am drawn to be in a field where I can help people and work in a team to accomplish something tangible together.

Why is an apprenticeship an attractive option to you?

An apprenticeship is an attractive option because it offers the opportunity to earn while I learn, gaining real-world, hands on experience under the guidance of skilled professionals. I value structured learning, and combining classroom instruction with practical on-the job training is the ideal way for me to build long term, high demand skills. Coming from the Coast Guard, I'm used to learning by doing and working as part of a team, so the apprenticeship model fits naturally with how I succeed and grow. It's also a

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've always been drawn to hands on work that requires precision, problem-solving, and a strong work ethic, which is why the building trades appeal to me. The pipe trades, in particular, interest me because they combine physical skill with technical knowledge and offer the chance to work on systems essential to daily life. I'm motivated by the opportunity to learn a highly respected craft, take pride in quality work, and be part of a trade that plays a vital role in residential and industrial infrastructure.

Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

Plumber, Steamfitter (Pipefitter), HVAC/R Service Tech, Pipe Fabricator

Work Zones in Preference Order:

Appleton Area (Green), Fond du Lac Area (Orange)

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:

10+

Welding Experience:

Flux Core - Some Knowledge, MIG - Some Knowledge

Tell us about any jobs where you've learned pipetrades relevant skills:

I have helped labor for a few apartment buildings. I have Mason tended and roofed around pipe work. I have done sewer and water.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I like to fish and ride motorcycles. Otherwise I'm working or tinkering on something

Shift Availability:

Full-time, Overtime, Weekends, 1st Shift (Days), 2nd Shift (Nights)

Post HS Education:

No

Add'l Edu. Details:

What trades-related courses did you take in school?

What construction software or technologies do you have training in?

Any Safety Certificates:

First Aid / CPR

Add'l Details:

Why is an apprenticeship an attractive option to you?

The ability to get paid while learning a new trade. I have two kids and my wife is a stay at home mom so taking time off work to go to school is not an option

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

The amount of options for work. Also the high pay scale. I have been in the laborers 330 for about 10 years and feel that I have plateaued in a way and am not getting anything from it besides a wage.

My current hobbies I like to do now are pretty physical. I work as a Service Shop Technician. There is always something new I can learn in my job. I really like to learn and be challenge when I'm doing something new. I also like going to the gym. Keeps me active and healthy.

The biggest thing I've done and something I felt pride about and that can transferrable is how I was able to fix my moms lawn. We have a pretty back yard and it was just full of

Why is an apprenticeship an attractive option to you?

If I'm being honest, I just didn't think college was for me. Thankfully I've been able to experience many jobs. And I realized two things about myself. I like to be problem solver and I like to physically move and work.

Once I learned from the apprenticeship program. I believe it was probably one of the best options I have. And like I stated previously, I will like to use this experience and

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I come from a family that works in the trades. My dad is a plumber and my brother is experienced in property maintenance and construction work. So I wish to follow the same route. I also like working physical jobs better than staying in a cube stuck on a computer. That's the reason why I'm generally interested in the trades.

I'm specifically focus on HVAC because, like any other trade, its going to be needed for as long as this world lives. I think HVAC is very crucial specifically where you have cold winter seasons and hot summer seasons. So if a HVAC system breaks, people will always NEED it to be fixed. And where there is work. There is money. I hope to use the skills and knowledge I learn in the program to create something for myself later on.

Add'l Details:

Why is an apprenticeship an attractive option to you?

You get paid to learn and people are expecting you to not know much instead of going into a job and being expected to do everything a journeyman can. You will get a more hands on training than basic book skills and how much you can remember on paper and I'm a person who is a hands on learner I can retain more information as someone physically shows me how it's done instead of describing it. Another reason is you really get to know the ins and outs of a trade with 5 years of training

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I got interested in the trades at a young age when I started working construction around the age of 15 and when I turned 18, I became a structural welder and I've loved it ever since. I'm very interested in the pipe trades because my lifelong dream is to become a rig welder on the pipeline, so I was looking into possibilities to get my foot in the door and I came across the local 400. I have spoken to a few people in this local and they seem to love it and that what brings me here today interested in applying for the apprenticeship for the steamfitters.

What construction software or technologies do you have training in?
Any Safety Certificates:
Add'l Details:
Why is an apprenticeship an attractive option to you?

An apprenticeship is attractive to me because it lets me learn by doing. I prefer hands-on work over sitting in a classroom all day, and an apprenticeship gives me the chance to earn while I learn a valuable trade. I like that I can build real skills. It's a practical, rewarding path that fits the way I learn and work best.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I'm interested in the pipe trades because I enjoy hands-on work, problem-solving, and using my math skills in real-world situations. I'm drawn to the stability, high earning potential, and the chance to learn a valuable skill that's always in demand.

I want to raise a family and be able to provide for them in a safe area, with a stable and fulfilling career., I want to take advantage of my youth and put time into learning a skill that serves my community. I want to support a family and foster new, strong bonds in a state where living is less expensive.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

My family has many tradesman and during high school I lacked direction. I decided to join a running-start program during my junior year and earned my AA in HVAC at high school graduation. I found HVAC to be a fulfilling and interesting way to serve my community. Now I'm ready to work and move to a state where living is less expensive., My family is made up of many tradesman. In high school I was drawn to the trades, so I decided to join a trade school program and earned my AA in HVAC. I find HVAC is a fulfilling and interesting way to serve my community.

Tell us about any jobs where you've learned pipetrades relevant skills:

Working in security has taught me to stay alert, follow protocols, and handle unexpected situations calmly—all of which are valuable in the pipe trades. Both fields require awareness of safety, strong communication, and the ability to stay focused under pressure.

In security, I've also learned the importance of reliability and showing up ready to work every day. That same mindset applies to the pipe trades, where consistency, discipline,

Tell us about any hobbies that have boosted pipetrade-relevant skills:

In my free time, I enjoy working with laptops and computers—fixing issues, troubleshooting, and learning how systems work. This has helped me develop problem-solving skills, patience, and attention to detail.

I like understanding how things function and finding practical solutions, which applies well to the construction trades. I'm confident those skills will help me quickly learn the technical side of the job and stay focused on quality work.

Why is an apprenticeship an attractive option to you?

An apprenticeship is a great option for me because it allows me to learn hands-on while earning a paycheck. I like the idea of gaining real-world experience from day one instead of only sitting in a classroom. It's a chance to build skills, grow into the trade, and work alongside experienced professionals who can guide me.

I'm also drawn to the structure of an apprenticeship—knowing there's a clear path to

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I'm interested in the pipe trades because I enjoy hands-on, physical work and take pride in building and fixing things that people rely on every day. I'm looking for a career that's stable, in demand, and gives me the chance to learn valuable skills while staying active and engaged.

I'm motivated by the opportunity to grow in a field that rewards hard work and dedication. The idea of starting from the ground up, learning the trade, and building a long-term career really appeals to me. I'm ready to take on the challenge and put in the work to succeed.

Add'l Details:
Tell us about any hobbies that have boosted pipetrade-relevant skills:

In my free time, I enjoy working on hands-on projects like fixing things around the house, assembling furniture, and helping with basic plumbing repairs, which all relate directly to the skills needed in pipefitting. I've always had an interest in figuring out how things work and finding efficient ways to put things together, which has strengthened my attention to detail and mechanical thinking.

Why is an apprenticeship an attractive option to you?

An apprenticeship is important to me as an adult because it gives me the opportunity to learn a skilled trade through real-world experience while earning a paycheck. This practical, on-the-job learning approach is ideal for me because I'm ready to work hard, grow my skills, and move forward in a career that offers long-term stability and advancement.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I want to become a pipefitter because I enjoy working with my hands and solving problems in a way that produces real, visible results. The pipefitting trade offers a unique mix of physical labor, technical skill, and precision, all of which align with my strengths and interests. I'm drawn to the idea of building and installing systems that are essential to the function of buildings, factories, and infrastructure.

Another reason I want to pursue a career as a pipefitter is the opportunity for long-term growth and stability. The trade offers strong job security, excellent wages, and the chance to continue learning through on-the-job experience.

Why is an apprenticeship an attractive option to you?

With living in an apartment with my fiancée i have bills each month including a car loan. Taking time off or working part time is not an option for me. Being an apprentice is my best route for starting a career because then I learn on the job and do not have to worry about missing paychecks or short paychecks.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Since high school I've just been working factory production jobs. I'm turning 27 this year and it is time I invest in a career where I can advance in. I am also getting married and have major life goals I would like to meet as in purchasing my first house with my future wife and live comfortably while doing so. I am a DYler and like to fix things my self, like my car. My main example related to this apprenticeship is the bathroom sink in my apartment was backing up. So I went underling the sink and removed the drain plug and the U Piper I believe it's called and cleaned out the hair and gunk in the sink, ever since it's been draining like normal.

Why is an apprenticeship an attractive option to you?

I am living in my own apartment with my fiancé. So that means bills, and a car loan payment. Apprenticeships is, what I believe, a very good option for someone in my situation. I will be working while being trained and not having to worry about missing paychecks while pursuing my career.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've been working production jobs since high school. As I'm approaching 30 years old in a few years, getting married, and have major life goals as in purchasing a house it is time for me to invest in a career. I've always liked working with my hands. As a kid I'd help my dad work on cars, different carpentry projects around the house, and with my apartment I've taken it up to fixing minor things. Example, our bathroom sink was backing up so I took out the drain stop and U Pipe I believe it's called and unclogged all the hair and other gunk in it, not it runs like new. That is what I believe made me think I'd enjoy plumbing. I also crave an interactive job that challenges me and leaves me satisfied.

Building Trades / Construction, Woodworking / Woodshop, Building Trades /
Construction, Woodworking / Woodshop

What construction software or technologies do you have training in?**Any Safety Certificates:****Add'l Details:****Why is an apprenticeship an attractive option to you?**

an apprenticeship would give me the opportunity to dive headfirst into a brand new opportunity that would bring me, steady work, financial stability, more responsibility, and accountability, and the chance to work really hard, An apprenticeship attracts my interest for many reasons. The main reason being stability, and an opportunity to grow and work hard. I'm very fond of the idea of constantly learning, and in a different environment. Working towards financial stability, in a career path that gives me options.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

My interest in this career comes from the main point of stability. I am a hands-on, personable, confident, young man, looking to place oneself where I can find stability, structure, and hard work. I have always made it a point to work more than one job at a time. But I would love to work in a Career., A career in the trades would allow me an opportunity to dive headfirst into stability, structure, hard work, and financial stability. Made it a point to have more than one job at a time, but it would be amazing to have one solid career.

Add'l Edu. Details:**What trades-related courses did you take in school?**

Welding, Metals, Math-Algebra, Woodworking / Woodshop

Why is an apprenticeship an attractive option to you?

Because for me, it's a chance of starting a career one that I can work in the rest of my life. while providing for my family. And getting the training needed to keep advancing and a great chance for improvement in a hard-working field. Growing up my father always told me to learn things so that we could help others so I've been trying to do that my whole life and now I want to excel at this so that I can always help.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

My uncle has been in the trade for as long as I remember. He's been talking about for so many years and how it could be a good thing for me to help take care of my family and build my own family. I've always enjoyed hands on work and I know it time for me to start a career. This is the place for me.

Add'l Details:**Why is an apprenticeship an attractive option to you?**

I want to continue my education for a better career and don't mind going back to school to further my education for a greater future

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've always been interested in the trades because I grew up around them—my dad worked as a finished carpenter, and from a young age, I was exposed to the satisfaction that comes from working with your hands and seeing a project come together from start to finish. That early exposure sparked a respect for skilled labor and the pride that comes with doing a job well. More recently, I've developed a strong interest in the pipetrades through my work cleaning and servicing storm and sanitary sewers. That hands-on experience opened my eyes to how critical plumbing systems are to public health and infrastructure, and it gave me a real passion for the trade. I enjoy problem-solving, working in a physically active job, and being part of a team that keeps essential systems running safely and efficiently.

Math-Algebra

What construction software or technologies do you have training in?

Any Safety Certificates:

First Aid / CPR

Add'l Details:

Tell us about any hobbies that have boosted pipetrade-relevant skills:

My hobbies mainly include golfing and picking up skills on the technology side (Video game design, Animation) The ability to learn new skills is something I have always desired. I have always been the type of person that likes to learn.

My goals as far as the hobbies and this job are to learn the skills enough to eventually teach them. I would love to learn enough the pipefitting trade to teach it your classrooms. I also would like to eventually educate people in my hobbies via online

Why is an apprenticeship an attractive option to you?

I already have a 4 year degree that I don't really use, because I prefer to work with my hands rather than behind a desk. This apprenticeship would allow me to invest in myself and still be able to work with my hands.

I have always wanted to try the trades. I just thought I wanted to teach more. When I began teaching I realized that I do love it, but prefer teaching adults rather than kids. In

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I received my degree in education. While working in the school environment I realized I preferred working with my hands and learning new skills. I stayed in the warehouse sector after graduating because of this and the covid-19 pandemic. I regret not trying trades out as I always figured it was good skills to have and know.

I want to be in a union again. Where there is standardized everything. Where there is support in finding work if a lay off happens. Where skills are built from the ground up with a good foundation. A Career in the pipe trades seems to correlate with these goals.

I debated about going back to school, but already have a degree I don't use. Would rather work at this point in my life than take on more debt.

Add'l Details:
Why is an apprenticeship an attractive option to you?

This is an attractive option for me because it provides me an opportunity to earn while I learn and progressively earn more while I grow my knowledge in the field. I like the idea of having somebody with me each step that will take the time to teach me not only how to do something, by why it's done a certain way.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I have always enjoyed working with my hands and I feel that this would be a great opportunity to do so. I also enjoy building things and fixing things as well as meeting new people and helping people. Although I do not have any specific trade experience I do have general mechanical skills.

Why is an apprenticeship an attractive option to you?

Work experience while getting paid. I need to be able to afford to live as well as work, but also have a work/life balance for my family. An apprenticeship is perfect. I wish I had thought of it sooner but was never in the right place at the right time.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I like the camaraderie that comes with working in the trades. I like coming in and doing a job and looking back and seeing the work that's been done. The pay is nice too as it seems like a livable wage for the work. Something that's not easy to come by these days.

Why is an apprenticeship an attractive option to you?

The apprenticeship interest me because I'm looking for something more I want a career . I wasn't sure for awhile exactly what I wanted to do but I knew I was good with my hands. After talking with the guys from veterans plumbing and working alongside them, I realized this trade could be something that I would be interested in. So after looking more into it I realized i could see myself doing this. I don't mind working inside outside. I don't mind getting dirty. And im looking for something I can do for a while were I'm

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Been working alongside some of the guys from veterans plumbing. I find it very interesting and really easy to pick up on things. They suggest to me that i should try getting an apprenticeship though the union., I'm looking to a career as a plumber I have worked alongside many in the past two years. I've been at my current job, many of the guys from veterans, plumbing and maritime plumbing. It's a trade that seems to come very easily to me and a trade that sparks my interest. Im looking for something long term and something I see myself for the long run, I'm looking to have a career and something that I truly have a passion in and something that I see myself doing long-term I've worked a long time for a while and I've worked alongside HVAC technicians for a while and it is truly something that interest me

Why is an apprenticeship an attractive option to you?

Apprenticeships offer hands-on learning which I excel in, as well as making money while learning. I'll stay out of debt while making lots of money and learn the way I'd always enjoyed.

I also take pride in my work. I'm gonna be the best at whatever I do, Working with journeyman workers every day all allows you to learn the tricks of the trade and fast. Being Fast and Consistent adds to a quality career .

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Job security, In my eyes everybody needs plumbers and HVAC technicians. If an HVAC unit goes out, people need you there and quick. Controlled environments are a large part of our society that go unnoticed. Following that idea I also think that Plumbers are a keystone of the everyday life as well. Everybody wants to take a shower when they get home from work. Restrooms are mandatory from big business to the everyday home, Making these workers needed everyday. Job Security is one of those big goals I have in life, that's my favorite idea when I think of a career in HVAC or Plumbing.

Job versatility. Everyday is an adventure, and no two situations are the same keeping my mind busy and hungry for information, I am very eager to hopefully explore that aspect of the HVAC and/or the plumbing world.

HVAC/R Service Tech

Work Zones in Preference Order:

Appleton Area (Green)

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:

1-3

Welding Experience:

Tell us about any jobs where you've learned pipetrades relevant skills:

Senior year of high school my construction class remodelled a house inside and out. We didn't do anything with pipes and welding but we were taught how to draw scale to size blueprints. Using the correct scaling tools and making miniature models.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I really enjoyed remodeling. Seeing the before and after of an empty basement being finished gives me the butterflies inside.

Shift Availability:

Full-time, 1st Shift (Days), 2nd Shift (Nights)

Post HS Education:

No, Other Relevant Courses & Certifications

Add'l Edu. Details:

What trades-related courses did you take in school?

Building Trades / Construction, Drafting and Design

What construction software or technologies do you have training in?

Any Safety Certificates:

OSHA 10

Add'l Details:

Why is an apprenticeship an attractive option to you?

I believe that anyone can learn any job with or without a degree as long as they have the right mentors and peers. And an apprenticeship will set you up with everything you need. Mentorship, education, team communication.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Initially I during highschool I wanted to become a carpenter. I felt confident in my skill and was always opened to learning new ways to be efficient. But I didn't want to just end it there. I wanted to learn more trades that potentially will be more rewarding.

Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

HVAC/R Service Tech

Work Zones in Preference Order:

Appleton Area (Green)

Relevant Experience Level:

Some. I have worked for a plumber, steamfitter or HVAC/R contractor.

Years of Full-Time Work Experience:

1-3

Welding Experience:

Tell us about any jobs where you've learned pipetrades relevant skills:

I currently work at Black-Haak Heating and Cooling. I've learned a lot in the 6 months I've been here but I know I want to propel myself beyond the residential scene. Here they've had me do Furnace/AC installs, gas piping, ductwork, and service work when needed. Prior to my job at Black-Haak, I worked for a small electrical contractor down in Oshkosh, WI but felt like there was more I could learn elsewhere.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

On the side, I do a lot of mechanic work. I build cars and modify them for fun. I also have experience with building computers which I have found is very similar to most HVAC systems. Working with my hands has always left me with a great feeling of satisfaction being able to stand back after everything is done and see the hard work that has paid off.

Shift Availability:

Full-time

Post HS Education:

No

Add'l Edu. Details:

What trades-related courses did you take in school?

Math-Precalculus / Trigonometry, Math-Geometry, Math-Algebra, Automotive Technology, Welding, Metals

What construction software or technologies do you have training in?

Any Safety Certificates:

Add'l Details:

Why is an apprenticeship an attractive option to you?

The idea of an apprenticeship to me is a chance to prove myself has a working individual. I believe that as long as I put in the work and dedication that the apprenticeship will benefit me greatly. It opens up a large network of people to me and I can choose to stand out by working hard and continually learning.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've always been a hands on learner. I did a bit of electrical work for a small contractor before I tried HVAC/R and fell in love with it. Everything from the low voltage system controls to ductwork it involved had me hooked. I especially love the system controls part of it because it reminded me a lot about building computers which is a hobby of mine. I feel that with my young age and commitment to the quickly advancing HVAC field, now is the prime time for me to strengthen my career in it.

Disciplines of Interest:

Plumber, HVAC/R Service Tech

Work Zones in Preference Order:

Green Bay Area (Yellow)

Relevant Experience Level:

None. Nothing even close-but I'm a hard worker and willing to learn!

Years of Full-Time Work Experience:

0

Welding Experience:

Tell us about any jobs where you've learned pipetrades relevant skills:

N/A

Tell us about any hobbies that have boosted pipetrade-relevant skills:

My hobbies don't directly correlate to construction trades, but some may be applicable still. I'm very into fitness and weightlifting so endurance on a job site won't be a problem and I should be able to keep up well. Being into fitness has also taught me discipline and dedication and I think that will help with my career.

Shift Availability:

Full-time, 1st Shift (Days)

Post HS Education:

No

Add'l Edu. Details:

What trades-related courses did you take in school?

Math-Algebra, Math-Geometry

Why is an apprenticeship an attractive option to you?

An apprenticeship would be perfect for me. This is because I will be not only learning, but also applying what I learned to actually get a grasp of what's going on. I think an apprenticeship is a great balance between work and learning and that's exactly what I need.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I feel as if a hands on hard working environment is best for me. I feel like I grow the most when I have others around me to correct me and teach me, rather than solo stuff where I'm on my own. I also feel like I'll be surrounded with like minded people who will help me grow a lot in my career and personal life. I also think it would be fun in general to be able to learn something completely new and different compared to other things in my life.

What construction software or technologies do you have training in?

Add'l Details:

Why is an apprenticeship an attractive option to you?

An apprenticeship is an attractive option to me because I find school not very interesting, and I also find it much easier to just learn by doing things instead of reading books and studying for tests.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I have seen many videos on YouTube by people such as HVACR Videos, which demonstrate what it is like to work as a refrigeration technician or a plumber. To me the work looks very interesting and fun, and I am looking for a new job that I can take seriously and work hard every day at.

Add'l Edu. Details:

What trades-related courses did you take in school?

What construction software or technologies do you have training in?

Any Safety Certificates:

Add'l Details:

Tell us about any hobbies that have boosted pipetrade-relevant skills:

Two of my main hobbies are playing soccer and tattooing, both have helped me build skills that I think will transfer well into the construction and pipe trades. Soccer has taught me the importance of teamwork, communication, and staying disciplined—especially when things get tough. It's also helped me stay physically fit and mentally focused, which are important for a hands-on, physically demanding career like this. Tattooing has helped me develop a steady hand, attention to detail, and patience. It's also taught me how to work with precision and take pride with the process.

Why is an apprenticeship an attractive option to you?

An apprenticeship is enhancing to me because it gives me the chance to earn while I learn. I like the idea of getting real hands-on experience while being taught by experienced professionals.

It also gives me a clear path toward a steady career. I'm motivated to start something long-term, and I respect the structure and support that comes with a union apprenticeship. It's a great opportunity to work hard, grow, and eventually become a

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I'm interested in a career in the building trades because I'm ready to start a stable, hands-on career where I can learn, grow, and build something meaningful. I may not have experience yet, but I'm a hard worker who enjoys learning new skills and pushing myself to improve. What really sparked my interest is seeing friends and family succeed in union trades. Hearing about the opportunities they've had and the pride they take in their work made me want to pursue something similar.

Specifically, the pipe trades stood out to me because of how essential and respected the work is. I want to be part of something that keeps communities running—whether it's plumbing, heating, or piping systems. My goal is to build a steady, reliable career I can be proud of and eventually work my way up to becoming a skilled professional in the field.

What construction software or technologies do you have training in?

Any Safety Certificates:

Add'l Details:

Veteran

Why is an apprenticeship an attractive option to you?

I learned significantly more from my mentor when learning to be a dog trainer than from several years of watching videos and reading books alone. I don't have several years of experience reading books or watching videos on any trade, and so an apprenticeship is very appealing. Being paid to learn rather than paying to learn is also attractive. I want to learn how to do things right, in the right setting, and ensure that I am fully capable of doing the job correctly. An apprenticeship seems to be the best way to go on all counts.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

After leaving the military, I found myself in the same rut that prompted me to join in the first place. Taking entry-level jobs and trying to find side-hustles just to make ends meet. My wife and I had our first child and I decided I needed to do better than my parents did for me. Stability, opportunity for growth, and the opportunity to learn a new skillset that will last me for the rest of my life are what made me become interested in a career in the pipetrades.

MIG - Some Knowledge, TIG - Some Knowledge, Stick - Some Knowledge

Tell us about any jobs where you've learned pipetrades relevant skills:

In my job experience, I assisted with setup and prepping job sites, handling tools and materials, assisting with installs and repairing pipes and fixtures, performing basic maintenance tasks, and cleaning up after work. I also transported equipment, followed safety procedures, and gained some hands-on experience from the master plumbers.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I am an avid fisherman and hunter. These hobbies have taught me to be patient, be aware of my surroundings, and to be able to work quickly and safely while under pressure. These skills can easily be transferred to the construction trade due to the nature of the unknown. It is important for workers in the trade to be able to adapt quickly, but also maintain safety. Patience is also important. Sometimes, job tasks may change which will result in downstream delays to the team. Understanding that there are things out of my control is important, and can help impact others.

Some 2-year college

Add'l Edu. Details:

Auto Mechanic Certification

What trades-related courses did you take in school?

Automotive Technology, Welding

Why is an apprenticeship an attractive option to you?

I am 31, married, and have a 5 year old son. For the last decade, I put my education and career on hold to support my wife as she chased her career dreams. Now that she is there, it is my turn to figure things out. I have always been drawn to a hands on career, and I thrive in an environment that constantly challenges my brain. The pipetrades is just that. I am ready to commit to something that is going to provide me with a career rather than a job, and be rewarding in the long run. I am ready to put in the work, and be

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've always been drawn to careers that involve hands-on work, problem-solving, and tangible results. The building trades offer a sense of pride and purpose in creating and maintaining essential infrastructure. I appreciate the teamwork, discipline, and continuous learning that comes with the trades. Specifically, the pipetrades caught my attention because of the critical role they play in both residential and industrial systems. Pipetrades professionals keep buildings safe, functional and efficient. While my work in the past was in a laboring function, I enjoyed learning from my mentors and would like to join a union and pursue the opportunity to become a journeyman myself.

What construction software or technologies do you have training in?**Any Safety Certificates:**

OSHA 10

Years of Full-Time Work Experience:

4-6

Welding Experience:**Tell us about any jobs where you've learned pipetrades relevant skills:**

I have basic power tool skills from Menards but nothing crazy related. Then when I worked with my pops I was in trenches making connections for drain tile but it was very repetitive. That gave me some experience in piping but I'm sure I would need to learn much more.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I lift 5 times a week and play basketball. Im very coordinated which I use in work place and Im physically suitable for most situations. I cut hair on my free time as a little side gig I have good hand eye coordination and steady hands as well which I know will help. At nights I've been posting YouTube videos and editing them myself it's a newer hobby but I am a quick learner on electronics. I enjoy going on hikes which furthers my being physically apical for these positions. I've worked with my pops in fields doing drain tile for a year as well.

What trades-related courses did you take in school?**What construction software or technologies do you have training in?****Any Safety Certificates:****Add'l Details:****Why is an apprenticeship an attractive option to you?**

I've always enjoyed learning and working with my hands, I did 4 summers with a small construction company. I like the fact that when you finish your project you can say you did that, there's skills to learn and master., The ability to learn new skills but also being in a job that I'm not necessarily doing the exact same thing every day that has no skill to it. I want to learn new things and be able to apply those new skills to my job and Life.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

My first job was a summer construction job, I love working with my hands and learning new skills., I used to work in construction for my first job, I've always loved working with my hands and learning new skills. My Uncle is also a big inspiration to wanting to work in trade, he works welding now and my brother is an electrician as well. I worked factory for 5 and 1/2 years not really learning any new skills and that's my other biggest push to learn new skills that cannot only be used at work but applied to in real life.

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:

7-9

Welding Experience:

Flux Core - Some Knowledge, Flux Core- Skilled, MIG - Skilled, TIG - Some Knowledge, Stick - Some Knowledge

Tell us about any jobs where you've learned pipetrades relevant skills:

I started my career as a welder, specifically flux core and hard wire welding with the occasional TIG and Stick as needed. After two years I learned how to fabricate, some pipe but mainly large structural steel. I was a welder/ fitter for about three years before I accepted a production foreman job. Although I did focus heavily on thin wall stainless TIG in welding school, I may be out of practice now.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I am an avid outdoorsman, which keeps me active and healthy. I am also doing some remodeling to my home, which encompasses some electrical work, plumbing and carpentry. I have been learning along the way with the plumbing and electrical, but I would much rather learn on the job instead of YouTube.

Building Trades / Construction, Automotive Technology, Math-Algebra, Math-Geometry, Metals, Welding

What construction software or technologies do you have training in?**Any Safety Certificates:****Add'l Details:****Why is an apprenticeship an attractive option to you?**

I would love to have the opportunity to learn a new trade while being paid to do it. I would also much rather learn from guys with field experience and on the job instead of at a tech school and out of a book. I have come to realize that there is no replacement for real world experience and knowledge.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

After purchasing a house with a 20 year old furnace, I have become friendly with the local HVAC companies. Seeing the guys work to troubleshoot issues left me feeling pretty impressed at all of the knowledge they have of various systems from AC, to electrical to plumbing. I am currently a foreman of a welding, fabrication and machining shop and seeing this has really peaked my interest in the trade. I like to be challenged at work, and diagnosing issues or even doing new installs seems to be right up my alley.

Any Safety Certificates:

OSHA 10

Add'l Details:

Why is an apprenticeship an attractive option to you?

I think the opportunity to become an apprentice is far and away the best option for me at the current point of my life. I just bought a house, and am in search of a new job that I have clear growth in. The fact that I could learn a valuable skill while also getting paid on the job experience, it's a very attractive option.

I was also very eager to learn as a kid in school. I got good grades and asked questions.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

In high school, I took several construction classes & instantly realized it was very rewarding to see a project through start to finish. Specifically, I remember when we built a storage garage for my high school. I got to drive past it almost everyday & I took pride in my work.

The reason I want to get involved in the pipe trades (specifically HVAC/R service technician) is that I am in search of a long term career, and know this is a place I can find it. I recently had to connect a Common wire to my furnaces circuit board to power a new thermostat, and have been very curious about the whole system since. I love the idea of being able to provide a service that helps keep my community safe also.

Add'l Details:

Why is an apprenticeship an attractive option to you?

I am a hands-on learner. I like the idea of somebody walking me through the job. Also I want to have these lifeskills so I can do this for myself and others I am close to.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I currently work for a home remodeling company. Advertising free estimates. I realized that I would like to learn the trades for lifeskills and I know it's an ever growing market.

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:

10+

Welding Experience:

Tell us about any jobs where you've learned pipetrades relevant skills:

I have worked doing maintenance for a senior living community for about 5 years and learned a lot of skills with that job not just for the pipe trades but also in general. The current job that I have we work doing repairs on appliances and also install of appliances specifically dishwashers. We have to make alterations to some of the fittings in order for us to install so that's also giving me some knowledge of the pipe trades.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I try to do all my house repairs myself whether it's watching videos or previous knowledge that I have. I feel like I've gained a lot of knowledge just by doing that and also at previous jobs I learned a lot from the plumbers and HVAC techs that came in to my workplace at that time.

Add'l Edu. Details:

What trades-related courses did you take in school?

Building Trades / Construction, Math-Algebra, Math-Geometry

What construction software or technologies do you have training in?

Any Safety Certificates:

First Aid / CPR

Add'l Details:

Why is an apprenticeship an attractive option to you?

It's attractive for me because it is a way of learning a skill that is very useful not only for a job but in everyday life. I want to have a career that I can be proud of and also one that I can work in until I retire. I know I'm not overly young but it's something that I want to have for the rest of my career until the day I retire.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I have always done maintenance in the past and plumbing and HVAC have always been something I've wanted to get into as a career and not just something that I do here and there. I have family members that have been plumbers and they've always told me what a great career it was and I've just been trying to look into the right situation and this seems like the perfect situation for me.

Why is an apprenticeship an attractive option to you?

I've always been a hands on learner because I very much prefer to see the work being done in front of me in order to understand it better. Books only teach you so much when you can't visualize the way their information is applied. Not only is it the way I learn best but I also have a situation in which I need to keep making money as I go to survive. Without a steady income bills would fall through which I can't let happen when my baby girl is being born this March. Developing skills and career while being payed is the best

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I had gone to NWTC after a year of college and joined the carpentry program. Through experience in that I realized I didn't really enjoy doing it for work but while there I was able to visit various other trade programs to get more insight about the work they do. Plumbing and Electrician programs seemed a much better fit to me and I was much more interested. I've been hesitant to start and looking for an apprenticeship in the past due to frequently moving around Wisconsin for the past 3-4 years. Now things have changed and I have a child on the way this March. I won't be traveling as frequently and would like to build my career in pursuit of supporting that family along with my own self interest in the trade. It would mean the world to secure a future in plumbing.

Woodworking / Woodshop, Metals, Welding, Math-Precalculus / Trigonometry, Math-Algebra

What construction software or technologies do you have training in?**Any Safety Certificates:**

First Aid / CPR

Add'l Details:**Why is an apprenticeship an attractive option to you?**

I've never done well in a classroom only environment. In high school my favorite classes were machine tool, welding, and wood working. I learn so much better in a hands-on setting.

I'm also tired of just working "jobs". I want a career. And the "earn as you learn" format of a apprenticeship work perfectly for my family and I. I don't have the knowledge or

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Throughout my years working for Disney I've spoken to many individuals in the Engineering department that work for a variety of trades. My current job can be very monotonous and unfulfilling. I've been interested in pursuing an apprenticeship in the pipetrades because I would prefer to have a more hands-on career. Unfortunately with the low union pay in Florida and extremely high cost of living, I cannot afford to lose my current job.

My wife and I are planning to move to Wisconsin next year. My goal is to start a career journey that allows me to provide a comfortable life for my family.

Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

Plumber, Steamfitter (Pipefitter), HVAC/R Service Tech, Pipe Fabricator, Steamfitter (Pipefitter), HVAC/R Service Tech, Plumber

Work Zones in Preference Order:

Fond du Lac Area (Orange), Appleton Area (Green), Fond du Lac Area (Orange)

Relevant Experience Level:A little. No specific trade experience, but I have general skills in construction or welding., A little.
No specific trade experience, but I have general skills in construction or welding**Years of Full-Time Work Experience:** 1-3, 1-3**Welding Experience:****Tell us about any jobs where you've learned pipetrades relevant skills:**

Mudjacking it's far fetched from pipe trades, but it was still construction., n/A

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I've worked a construction job before (Mudjacking), & I learned a lot about working with people- customers & co workers. I'm a very good people's person so I know how to get along & get work done. I'm familiar with power tools, hand tools, ladders, etc. AND I AM A SPONGE WITH INFORMATION. But as hobbies, I don't do it as much as I'd like, but building things is fun & seeing things come along is interesting., I like to put together whatever I can. I like brainstorming with a team and getting a task done.

Shift Availability:

Full-time, 1st Shift (Days), Overtime, Full-time, 1st Shift (Days), Overtime

Post HS Education:

No, No

Add'l Edu. Details:**What trades-related courses did you take in school?**

Math-Geometry, Math-Algebra, Metals, Welding, Automotive Technology

Why is an apprenticeship an attractive option to you?

Stability & growth!! Get paid to learn & this is the type of work & knowledge that I can take outside of work.

What construction software or technologies do you have training in?**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

I am currently a correctional officer. The work is stressful as is the schedule & hours. I want something stable & a place I can make good money whilst working & enjoy my work. I come from a family that have been in trades & they were always so eager to get me to get into one. And I wish I would have sooner. I'm looking to build a career & skyrocket from there & the pipe trade, plumbers & steamfitters trade is where'd I'd do it., I need a career & I've always considered doing an apprenticeship.

Laser Scanning

Any Safety Certificates:**Add'l Details:****Why is an apprenticeship an attractive option to you?**

The apprenticeship program attracted me because I have many family members and relatives that have done and finished the apprenticeship program and I hear nothing but good things about it. Since freshmen year of high school I knew that I wanted to become a electrician or HVAC and the apprenticeship program has just that, the HVAC program caught my eye because they pay me to learn in what I want to do and something that I will enjoy doing., The apprenticeship program is an attractive option to me because it's

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

What Interested me in the trades was actually my brother and myself at the same time. My brother is currently a welder and I see that he enjoys his job but he also has friends who work for the local 400 currently and they are hvac and they actually recommended me the job. The HVAC Trade was very interesting to me because it caught my eye knowing it does a little bit of everything, now I wanted to become a electrician at first but I did my research and figured that HVAC has better benefits then a electrician and you actually work with electrical work as well. I also worked with a plumber last summer who worked for the school district and he showed me many tips and tricks on pipe fitting and trades and I really enjoyed what he did as a job., What interests me more about building a career in the trades, but more specifically The trade, HVAC is not just the trade but also the union, The union is a great place to start and build your career at a young age, I've been recommended by many people that have started there career here and fast forward 3-4 years later they are doing amazing with their careers. I really want to start

Why is an apprenticeship an attractive option to you?

Feedback is typically more immediate than written feedback you could receive as a humanities major in college. It's easier to track your progress in developing certain skills. It's more satisfying in that regard. I like to know when I am doing well on a particular task rather than just rationalizing to myself that, for example, my leadership abilities or writing is actually getting better when that may just be my own perception. I like that, as an apprentice, I would get to deal with real things and know that it is not just my own

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I'm interested in the practical nature of the building trades. I also appreciate the opportunities to troubleshoot problems as they arise., I want to work somewhere I have the opportunity to continue to learn on the job.
