

Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

Pipe Fabricator, Steamfitter (Pipefitter)

Work Zones in Preference Order:

Appleton Area (Green)

Relevant Experience Level:

None. Nothing even close-but I'm a hard worker and willing to learn!

Years of Full-Time Work Experience:

4-6

Welding Experience:
Tell us about any jobs where you've learned pipetrades relevant skills:

In my past jobs, I've developed skills that will help me succeed in the pipe trades. Working as a cashier taught me accuracy, attention to detail, and how to stay organized under pressure, while delivery work gave me experience with time management, problem-solving, and handling physically demanding tasks safely. Both roles also strengthened my communication skills, teamwork, and reliability.

Outside of work, I also practice tattooing, which requires patience, steady hands, attention to detail, and precision—all qualities that carry over into working with tools

Tell us about any hobbies that have boosted pipetrade-relevant skills:

One of my favorite hobbies includes tattooing, I believe this to be very helpful with my hand eye coordination and strength with a steady straight hand

Shift Availability:

Full-time, Overtime, Weekends, 1st Shift (Days), 2nd Shift (Nights)

Post HS Education:

Some 2-year college

Add'l Edu. Details:

Add'l Details:
Why is an apprenticeship an attractive option to you?

An apprenticeship is attractive to me because it allows me to learn a skilled trade while earning a living at the same time. I like the idea of gaining hands-on experience under trained professionals instead of just sitting in a classroom. It provides a clear path to a steady career, opportunities for advancement, and the chance to build skills that will always be in demand. I also value the mentorship and union support that come with an apprenticeship, because it means I'll be guided, challenged, and set up for long-term

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I'm interested in a career in the building trades because I value hard work, hands-on learning, and being part of projects that create something lasting and useful. The trades provide stability, good wages, and the opportunity to constantly grow my skills while contributing to work that supports communities.

Specifically, I'm drawn to the pipe trades because they combine problem-solving with physical skill, precision, and teamwork. Pipe systems are essential for safety, comfort, and efficiency in buildings, so I like the idea of playing a key role in work that people rely on every day. The trade also offers opportunities for steady employment, advancement, and eventually building a lifelong career I can take pride in

Why is an apprenticeship an attractive option to you?

Having a skill/trade would not only give me job security but I feel like it would renew my purpose as a person.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've always been interested in building and working with my hands. I've worked a lot of dead end jobs and I'd like to have more for myself. Wisconsin is growing and this would be great job security to secure my future.

Math-Algebra, Math-Geometry, Welding, Woodworking / Woodshop, Metals, Automotive Technology

What construction software or technologies do you have training in?

AutoCAD, CNC

Any Safety Certificates:

Add'l Details:

Why is an apprenticeship an attractive option to you?

An apprenticeship appeals to me because I'm starting fresh in a new trade, and am looking for a place that will be able to provide training and patience as I start a new path in my life. I believe on-the-job training can be more valuable than school, especially in the trades.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I took an interest in the trades young because of my dad, who is a diesel mechanic. This interest continued in highschool, where I took any and all shop classes available to me. I also was able to get a job as a diesel mechanic at the same shop as my dad. After almost two years and taking diesel courses at NWTC, I realized it wasn't for me, and started looking for other trades to work in.

My first job outside of diesel mechanics was at a metal fabrication shop, where I was hired and put as an assembler. I had originally joined to weld so this was initially disappointing. However, while assembling, I was introduced to pipe fitting, where I was given a plan and the parts, and told to figure it out from there. I found it incredibly satisfying when it all came together, and I quickly excelled at it.

Add'l Edu. Details:

I majored in Communications, with a minor in Advertising from the University of Wisconsin-Whitewater.

What trades-related courses did you take in school?

Math-Algebra, Math-Geometry

What construction software or technologies do you have training in?

Any Safety Certificates:

Add'l Details:

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I love working on house projects, such as building shelves, painting, and installing trim, as well as working on my car and learning how to be self-sufficient.

Doing things with my hands and learning while I try is very motivating for me. I use every opportunity to "get my hands dirty" to learn as much about projects as I can.

Why is an apprenticeship an attractive option to you?

The ability to learn while I earn and be able to start obtaining skills from day one is the largest attractive option for me.

I am also very drawn to learning from a journeyman and having that expert there that I can watch and absorb knowledge from.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I have heard a little about the pipe trades since my uncle is a pipe fitter. I also really enjoy the idea of working with my hands and being able to build something lasting that I can be proud of.

I originally went to college, but have found that I am drawn to be in a field where I can help people and work in a team to accomplish something tangible together.

What trades-related courses did you take in school?

Drafting and Design, Math-Algebra, Math-Geometry, Robotics, Metals, Welding, Woodworking / Woodshop

What construction software or technologies do you have training in?

AutoCAD, Solidworks

Any Safety Certificates:

First Aid / CPR

Add'l Details:

Why is an apprenticeship an attractive option to you?

Im interested in being trained and taught by someone with experience. I always enjoyed learning, and that's what I'm hoping to get out of this. Then, to be able to obtain my journey card and teach the next generation.

I have a youth apprenticeship certificate. Yet havent been able to expand because of layoffs. I was talking to a 600 union welder the other day and he really talked me into it

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Im looking for a change of pace. Ive been a structural shop welder for the past 5 years. Being a union welder has always been something I was curious about.

Id like to do a little traveling, working from jobsite to jobsite. Being stuck in the same shop doing the same thing day in and day out is getting really old.

Tell us about any jobs where you've learned pipetrades relevant skills:

Although I have not worked directly with pipes, I have had jobs where I developed skills applicable to the pipe trades, such as using hand tools, reading technical instructions, teamwork, and a strong focus on safety. I also have experience in welding, which has taught me precision, patience, and attention to detail qualities I believe are very valuable for success in the pipe trades.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

One of my main hobbies is working on personal welding and metalworking projects in my spare time. This not only helps me sharpen my technical skills but also improves my attention to detail and problem-solving abilities—both of which are essential in the construction trades. I also enjoy fixing things around the house, which has taught me to think creatively and stay patient when facing unexpected challenges.

Why is an apprenticeship an attractive option to you?

An apprenticeship is an attractive option to me because it allows me to learn hands-on while earning a living. I value the opportunity to gain real-world experience under the guidance of skilled professionals, rather than just learning in a classroom. It also offers a clear path for growth, with the potential to become a licensed journeyman and build a stable, long-term career. For someone like me, who enjoys practical work and wants to continue developing technical skills, an apprenticeship is the perfect way to start a

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I became interested in a career in the building trades because I have been working in the field of welding for some time, and during that time, I've realized how much I enjoy the hands-on and technical nature of this kind of work. Specifically, I'm drawn to the pipe trades because it offers an opportunity to continue expanding my knowledge and skills, learn new techniques, and grow professionally in a field that is constantly in demand and evolving.

Why is an apprenticeship an attractive option to you?

It will help educate me more to further my career path even more. I would like to learn all of the knowledge I can to help better my skills and create more experience for me. This will help me out on creating this industry as my permanent career path!

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Since 2020 I started out as a mechanic, then got introduced to welding in the shop on vehicles. It made me feel powerful, and it turned out to be something that I love to do.

Ever since then I haven't quit on metal fabrication, and for the past 2 years I got out of the automotive business all together and started directing all of my focus to metal fabrication.

I have worked in multiple fabrication shops, and loved every bit of it, still do to this day! I am very ambitious with metal fabrication, I am very passionate about it and ENJOY doing it every day!

Any Safety Certificates:**Add'l Details:****Why is an apprenticeship an attractive option to you?**

An apprenticeship sounds like a great fit for me because I'd rather learn by doing than sitting in a classroom all day. I like working with my hands and being active, so getting real on-the-job experience while learning the trade makes a lot of sense. It's also a solid way to build a career — you're earning while learning, and there's a clear path to move up.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I am interested in joining the pipefitter workforce because of my strong background in metal work and general welding. Over the years, I have gained hands-on experience with various welding techniques and working with different types of metals, which has given me a solid foundation in fabrication, precision work, and safety protocols. I believe these skills directly align with the demands of pipefitting, and I'm confident that my experience will allow me to contribute effectively while continuing to grow and learn within the trade.

don't have any hobbies directly related to the trades, but I've worked hands-on jobs that have taught me a lot of useful skills. Right now, I work at a metal finishing company doing racking and unranking, which takes focus, physical effort, and attention to detail. It's also helped me get used to working in a fast-paced, industrial environment where safety and consistency matter every day.

Before that, I spent several years working in construction doing drywall finishing. That

Why is an apprenticeship an attractive option to you?

An apprenticeship is a great way to learn a trade while earning a paycheck. I'm a fast learner and do best with hands-on training, so this kind of program fits me well.

It's also a clear path to a steady, good-paying career. I want to build something long-term, and an apprenticeship helps me grow my skills the right way from day one.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've always liked working with my hands and figuring out how things work, so the building trades really caught my attention. I'm looking for a career that's hands-on, stable, and pays well—but also something I can enjoy doing every day. I like the idea of building and fixing things that people rely on, and being part of something that actually matters in the real world.

The pipe trades stood out to me because welding looks like something I'd really enjoy learning. It takes skill, focus, and a good work ethic—qualities I know I have or am ready to develop. I want to get trained the right way so I can build a solid career for myself doing something I'm actually interested in. I'm ready to put in the work and grow in this field.

Disciplines of Interest:

Plumber, Steamfitter (Pipefitter), HVAC/R Service Tech, Pipe Fabricator

Work Zones in Preference Order:

Green Bay Area (Yellow)

Relevant Experience Level:

Some. I have worked for a plumber, steamfitter or HVAC/R contractor.

Years of Full-Time Work Experience: 10+

Welding Experience:

Stick - Some Knowledge, TIG - Some Knowledge, MIG - Some Knowledge

Tell us about any jobs where you've learned pipetrades relevant skills:

As an adult seeking a new career path, I am highly motivated to learn the field of pipefitting and committed to making a successful transition. I bring a strong work ethic, reliability, and the maturity that comes with life experience, all of which I believe are valuable assets in a hands-on, detail-oriented trade like pipefitting. I'm eager to develop the technical skills required, from reading blueprints to installing and maintaining piping systems, and I'm not afraid to start at the ground level to build a solid foundation.

Shift Availability:

Full-time, 1st Shift (Days), 2nd Shift (Nights)

Post HS Education:

No

Add'l Edu. Details:

What trades-related courses did you take in school?

Welding, Woodworking / Woodshop, Metals, Building Trades / Construction

What construction software or technologies do you have training in?

Any Safety Certificates:

Add'l Details:

Tell us about any hobbies that have boosted pipetrade-relevant skills:

In my free time, I enjoy working on hands-on projects like fixing things around the house, assembling furniture, and helping with basic plumbing repairs, which all relate directly to the skills needed in pipefitting. I've always had an interest in figuring out how things work and finding efficient ways to put things together, which has strengthened my attention to detail and mechanical thinking.

Why is an apprenticeship an attractive option to you?

An apprenticeship is important to me as an adult because it gives me the opportunity to learn a skilled trade through real-world experience while earning a paycheck. This practical, on-the-job learning approach is ideal for me because I'm ready to work hard, grow my skills, and move forward in a career that offers long-term stability and advancement.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I want to become a pipefitter because I enjoy working with my hands and solving problems in a way that produces real, visible results. The pipefitting trade offers a unique mix of physical labor, technical skill, and precision, all of which align with my strengths and interests. I'm drawn to the idea of building and installing systems that are essential to the function of buildings, factories, and infrastructure.

Another reason I want to pursue a career as a pipefitter is the opportunity for long-term growth and stability. The trade offers strong job security, excellent wages, and the chance to continue learning through on-the-job experience.

Welding, Metals

What construction software or technologies do you have training in?

Any Safety Certificates:

Add'l Details:

Tell us about any hobbies that have boosted pipetrade-relevant skills:

One of my main hobbies is woodworking, which I got into at a young age thanks to my dad. I grew up spending time in his shop, helping him with different projects and learning how to use tools safely and effectively. That experience taught me the importance of precision, patience, and attention to detail

Why is an apprenticeship an attractive option to you?

An apprenticeship is attractive to me because it allows me to learn the trade hands-on while earning a paycheck. I like the idea of gaining real-world experience under the guidance of skilled professionals instead of sitting in a classroom all day.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've always been drawn to hands-on work where I can see the real-world results of what I do. The building trades appealed to me because they offer a chance to work on essential projects that have a lasting impact. Specifically, the pipe trades stood out to me because of the combination of technical skill, problem-solving, and the critical role they play in making systems function safely and efficiently.

Add'l Details:**Why is an apprenticeship an attractive option to you?**

I've had a high school meeting with local 400 and the benefits sounds really good.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I started catching on more about welding during my high school years. I've always liked the idea of building or creating something tangible and lasting through hands-on work. I'm drawn to the physical nature of the work, the problem solving on the job site and doing it with a team.

Additionally, I feel as if the building trades offer a strong sense of purpose and stability. These careers are essential to every community, providing structure we depend on daily. Roads, homes, and lots more. Hands on work is something I've love doing because it shows personal pride in craftsmen, and the ability to make a meaningful contribution to society.

Why is an apprenticeship an attractive option to you?

I thought it was something that could help me get started and learning more about welding since I really dont know much and this was the best place to start

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I like just working with my hands and I doing it the first time I tried welding, I liked it said I wanted to do this for a career and just wanted to do it

The apprenticeship program at the local 400 was attractive to me for the opportunity to grow and learn more as the years go. I like to feel like I'm always improving my life as the years go. I don't like to feel like I'm wasting my life away and with this program I feel like it's a good career path that leads me to where I want to be in life. I can see there is an abundance of opportunity here. What really had me considering this as well was my brother who also works for the local 400. I can see how he is able to live a good life

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've always been a more hands on worker. I have also been looking for something where I can grow more so as soon as my brother told me about the local 400 and how it's a paid to learn program. It intrigued me a whole lot he brought over a folder with more information and from what I've read and seen I feel like the local 400 would be a good fit for me. Pipe trades is something completely new to me but I've always been a fast learner and I like to do things fast and the right way. I feel as long as there is someone willing to teach me the right way I will make a good part of any team. My managers and past foremen would also always say how I was a good worker and pick things up quick. I'm excited and ready to work and learn about the pipe trades.

Add'l Details:

Why is an apprenticeship an attractive option to you?

I find this the route too go because I'll be learning on the job and not be going into debt. Instead I'll be working and communicating with coworkers and getting to know them. It also allows me to work full time and have a livable wage while learning. Instead of going into debt at college I'll be able to learn real hands on experience while on the job. I'll be able to communicate and work with fellow coworkers and build bonds with them while making a livable wage. It will also allow me to continue my education and learn new skills

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I found out how expensive college was and started working for with my dad's company who've recently taught me how to read blue prints and do MIG welding. I am a fabricator building conveyors and enjoy welding and want to pursue a career in it. My grandpa was an electrician for many years and motivated me to go out and become an apprentice because of the valuable experience you learn from it. I wanted to go to college until I found out how much it cost for me. I recently started welding MIG at my job and found a passion for it, which made me want to learn more and gain knowledge. My grandpa was an electrician and motivated me to pursue pipe trades if I had a passion for welding.

What construction software or technologies do you have training in?

CNC

Any Safety Certificates:

Add'l Details:

Why is an apprenticeship an attractive option to you?

It appeals to me since I've already gone through and apprenticeship during high school at Fox Valley Tool and Die and I learned a lot of skills and lessons from the let's say old timers at work that I can use anytime

And as an apprentice you can get the most experience working in every field getting skills in every process making yourself more valuable to your company until you get

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I got interested in the pipetrades because I like to work long hours and be able to travel to do work on site. I've always liked to do the work nobody else wants to do. My first job when I was 14 working on a farm also helped steer me in the direction of the trades. I have coworkers at my current apprenticeship that used to be pipefitters and I've heard a lot from them about the job that I said I'd love to do

One thing I like about working in the building trades is you get to learn a lot of skills and lessons from the veteran workers. The most important thing I've learned from being in the trades is to slow down, don't slow down the speed you're getting the work done but slow down your thinking. Make sure everything is done right before you do it so the company doesn't have to spend money that doesn't need to be spent redoing your mistake

Add'l Details:

Why is an apprenticeship an attractive option to you?

I have been struggling to find a place for myself in this world and being at a spot welding job, I feel like I could offer up more to my community. I've also been searching for a place that offers amazing on the job training and benefits and I've found a clear choice. This program seems to offer the perfect training experience for what I am looking for, I want to be able to do hands on learning most of the time, it helps me experience the world and figure out my footing.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I am currently working as a spot welder and I would absolutely love to continue my experience and career and bring it further into the welding and fabrication industry.

Add'l Details:
Why is an apprenticeship an attractive option to you?

The additional education, and career opportunities have a large appeal to me. In industry a journymens license in skilled professionals "Batchelor degree" demonstrating the time and dedication a person has put into to master a craft. I believe it's the highest honor, for someone who prides themselves on working with their hands, can obtain.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

A instructor I had at fox valley tech recommended me to go into the field of pipe welding. I felt this was a good option for me because of my attention to detail, eagerness to learn, and love for personal challenge and growth. Not all welders have what it takes to be pipe welders, but I believe I do. The benefits, opportunity, and education potential was too much for me to ignore, and I wish to explore pipe welding as a career.

Add'l Details:
Why is an apprenticeship an attractive option to you?

The reason why an apprenticeship is an attractive option to me is because I want to open my mind to learning more on the pipe trades and possibly get a job working in the pipe trades.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I grew up working in a shop learning how to build things with wood. Later on, specifically in high school, I got into welding. I used to do some welding on my family's farm on the side but, got very into welding in high school. I started to do more with stick (SMAW), MIG (GMAW), and TIG (GTAW). As I got more into welding, I decided that I wanted to do it as a job. I started talking to people who came to the trades fair we held at school and came to the conclusion that welding was the way I wanted to go.

In college, I asked my instructor if I could try pipe after I got done with pipe to plate with TIG. He said yes so, I did it and thought, "This is something I could really do for a job." I started to practice more and more as time went on. I really got into it when we went to the Local 400 for a tour.

Apprenticeships weren't very possible for me in TN. I would've had to basically move to another part of TN just to make it somewhat affordable. Here I will be able to give it me all. I love to learn new skills being able to get paid while I learn is a blessing. Not to mention, all the great people I'll be able to meet along the way. The way the unions are set up here in Wisconsin is an amazing opportunity and I will take full advantage of it if yall will let me., In TN I would've had to drive a couple hours each day to be able to get a

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

When I first got out of high-school I was going to go to college for engineering, however, my parents urged me to give the trades a try. I found that working with my hands and back was what made me happy. And like granddaddy always said, "if you can find a job you enjoy, you'll never work a day in your life.", When I first graduated high school, I was going to go into engineering and computer science. However, my parents urged me to go into the trades. I started working at HatPonics and found that building, working with my hands and back, is what made me happy. As granddaddy always said, "Son, if you can find something you enjoy and get paid for it, you'll never work a day in your life." I felt like it was time to move on from HatPonics and get started working in more traditional trades like welding. I know that if I put my back into welding like I did as an erector or as I did in school I will be able to achieve all my goals.

I feel that it would help me learn more about the trade I wish to go into. You can read all the books you want to but it can't compare to learning from someone who has already made that mistake or has found a better way of going about solving a problem. Having an experienced mentor gives the student or apprentice a better understanding of that material, they are able to ask more questions with better answers than finding them in a book or online. Personally I see myself as someone who learns better hands on and

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I hadn't had a lot of experience in highschool just a couple of odd ends on the farm. However I went to the tech and took a welding class and had so much fun. I graduated the program and got my certificate. I am now looking forward to the next step in taking classes to get into the position that I feel I'd have the most fulfillment doing.

What construction software or technologies do you have training in?
Any Safety Certificates:

First Aid / CPR

Disciplines of Interest:

Steamfitter (Pipefitter), Pipe Fabricator

Work Zones in Preference Order:

Green Bay Area (Yellow)

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:

1-3

Welding Experience:

Flux Core- Skilled, MIG - Skilled, TIG - Some Knowledge, Stick - Skilled

Tell us about any jobs where you've learned pipetrades relevant skills:

I learned a lot of skills from marinette marine shipyard that can be considered applicable to pipe trades. Specifically blueprint reading, metal fabrication, using grinders, hot work like welding, prepping and preparing the work-sight for hot work like taping off and using fir blankets.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I have a lotta skills and hobbies that translate to pipe fitting and welding, like building custom go karts/buggies, mini bikes, and pit bikes all with high powered small engines. I do all the pipe notching by hand using an angle grinder, I use a pipe bender a lot for the frames I build. I recently just bought a tig welder and been using that more for the welding instead of mig.

Add'l Edu. Details:**What trades-related courses did you take in school?**

Building Trades / Construction, Math-Algebra, Math-Geometry, Robotics, Welding, Woodworking / Woodshop

What construction software or technologies do you have training in?**Any Safety Certificates:**

OSHA 10, OSHA 30, First Aid / CPR

Add'l Details:**Why is an apprenticeship an attractive option to you?**

I think the apprenticeship is a great opportunity for me to expand my skills and work towards a job that pays good and can go all across the country, instead of just being dedicated to one place that can slow down and lay people off.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

What first interested in the building trades was my dad, as a child I would always help with his construction projects, and mechanical projects. Which lead me to finding a local contractor and helping out for my first job. What brought me to welding was at home I started building go karts, mini bikes, etc. I currently do have a job at marinette Marine as a welder. I would like to expand my skills on pipe, whether it's pipe fitting or welding I would prefer welding over the two but I like both. I've also done some fitting so I can read a blueprint pretty well. I think I would be a great addition to your crew.

Years of Full-Time Work Experience:

4-6

Welding Experience:

Tell us about any jobs where you've learned pipetrades relevant skills:

While I haven't worked in the pipe trades yet, I've had jobs where I developed skills that I know will be useful. In past work, I've learned the importance of showing up on time, working hard, and staying focused until the job is done. I've also had to follow directions closely, work as part of a team, and adapt to different tasks throughout the day.

Those experiences taught me to be reliable, take pride in my work, and keep learning—qualities I know are important in the pipe trades.

Post HS Education:

Some 2-year college

Add'l Edu. Details:

What trades-related courses did you take in school?

What construction software or technologies do you have training in?

Any Safety Certificates:

Add'l Details:

Tell us about any hobbies that have boosted pipetrade-relevant skills:

Two of my main hobbies are playing soccer and tattooing, both have helped me build skills that I think will transfer well into the construction and pipe trades. Soccer has taught me the importance of teamwork, communication, and staying disciplined—especially when things get tough. It's also helped me stay physically fit and mentally focused, which are important for a hands-on, physically demanding career like this. Tattooing has helped me develop a steady hand, attention to detail, and patience. It's also taught me how to work with precision and take pride with the process.

Why is an apprenticeship an attractive option to you?

An apprenticeship is enhancing to me because it gives me the chance to earn while I learn. I like the idea of getting real hands-on experience while being taught by experienced professionals.

It also gives me a clear path toward a steady career. I'm motivated to start something long-term, and I respect the structure and support that comes with a union apprenticeship. It's a great opportunity to work hard, grow, and eventually become a

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I'm interested in a career in the building trades because I'm ready to start a stable, hands-on career where I can learn, grow, and build something meaningful. I may not have experience yet, but I'm a hard worker who enjoys learning new skills and pushing myself to improve. What really sparked my interest is seeing friends and family succeed in union trades. Hearing about the opportunities they've had and the pride they take in their work made me want to pursue something similar.

Specifically, the pipe trades stood out to me because of how essential and respected the work is. I want to be part of something that keeps communities running—whether it's plumbing, heating, or piping systems. My goal is to build a steady, reliable career I can be proud of and eventually work my way up to becoming a skilled professional in the field.

Why is an apprenticeship an attractive option to you?

I would like to gain experience with my new skills, and learn to be the best. The UA apprenticeship puts out top tradesmen while maintaining a pro worker mentality. Those are both great reasons to pursue an apprenticeship.

What trades-related courses did you take in school?

Woodworking / Woodshop, Building Trades / Construction

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I grew up in a blue collar household where working with your hands was a prerequisite for adulthood. I was raised to not shy away from, but to value a good days work.

I grew disillusioned with management, and looked for a new trade that I could enjoy while making a good wage. My cousin recommended that I look into Pipefitting or welding as he is out of the Augusta local as a traveler.

I signed up for the Industrial Pipefitting course at the local technical college, and was hooked.

This is a fascinating line of work with so much opportunity. I'm excited to learn more and to possibly be a part of the brotherhood.

Why is an apprenticeship an attractive option to you?

I've never been a part of any union or apprenticeship but I've always thought that it would be a great thing to be a part of. I've heard that being in a union is a great thing and an awesome experience. I think that the experience from the apprenticeship that I could gain is amazing and the people I could meet is really cool.

What construction software or technologies do you have training in?

CNC

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I'm currently a welder and have been a welder for about 5 years now. I'd like to expand on my professional experience and have a wider variety of fabrication experience. I think pipe welding/fabrication is the most sought after welding role that there is, I think it looks super cool and fun to be a huge part of that industry. I've welding some pipe already but I want to learn everything I can about it. I got interested in the trades from just wanting to know the ins and outs of how stuff is made and wanting to be a part of that whole process.

Add'l Details:
Why is an apprenticeship an attractive option to you?

Seems like a good opportunity to get hands on training, that's the best way I learn, showing me what to do is a lot easier than sitting me down and telling me what to do. If you show me how you want it done that's the way I'm going to do it.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I started welding in high school had intentions to go to college for it , but sadly I didn't I took an opportunity to work for a farmer because I needed the money at the time and never looked back at it, I worked there for 6 years before I came to realize that it wasn't a good life decision and they were not going to help me succeed and thrive. moved on and tried otr highway construction pouring concrete for a few months but got a sour taste put on my toung due to non consistent work and having to pay out of pocket for somewhere to sleep. I currently am employed as a media blast technician and I don't for see a good future with the amount of effort I put in , I feel not respected where I'm at. So I started looking at other options I'm looking at ether you or nwtc for a 2 year class.

Add'l Details:

Why is an apprenticeship an attractive option to you?

I like the idea of getting into the trade hands on instead of just learning in a class room. Talking to people who are in the feild and knowing what I'm in for., I can learn a skill while getting paid and i won't just be stuck in a classroom the whole time. I like hands on learning.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I have been driving semi for 17 years and would like to change career field. I took welding and metal shop in high school and always enjoy it. I want a career where I have to think and get to work with other people., I have worked construction before and I took 2 years of metal shop in high school. I want to make a career change and get out of driving semi and i think this feaild would be a good fit for me.

Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

Steamfitter (Pipefitter), Pipe Fabricator

Work Zones in Preference Order:

Green Bay Area (Yellow)

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:

0

Welding Experience:

Stick - Some Knowledge

Tell us about any jobs where you've learned pipetrades relevant skills:

I worked at Merrill steel for about 2 months before going to school. During my time there I learned how to weld using mig and also learned how to read a blueprints and fit. I went to school for 6 months at Advanced Welding Institute where I learned how to stick, mig, flux, tig weld. I also learned how to weld pipe in the 2g position and have a cert and was working on getting my 6g pipe stick cert but ran out of time.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

One of my hobbies is lifting weights and running. This could help me lift up materials and not injury my self. Also running could help out with my stamina and be able to work more efficiently.

I also like to train mixed martial arts. This could also help me with my health and be in shape for work.

Also being able to get different positions with my body could help different positions in

Add'l Edu. Details:

Completed Combination Structural and Pipe Welding program at Advanced Welding Institute

Why is an apprenticeship an attractive option to you?

A apprenticeship is an attractive option for me because I wanna learn more about pipe welding and pipe fitting. I also like it because you can learn and still earn money. I also wanna get more experience in this workforce.

What trades-related courses did you take in school?

Welding

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

My interest in the career is because I want to learn, and be able to achieve further knowledge in this field. Wanting to learn how to build stuff, and read blueprints, and be in different work environments. Also was very interested in building stuff at a young age.

I want to learn more about the pipe trades and was very interested in it. I also want to have a career that is always going to be needed.

What construction software or technologies do you have training in?

CNC

Add'l Details:
Why is an apprenticeship an attractive option to you?

The apprenticeship route is an attractive option for me because I now have a family of my own and being able to learn and provide for them at the same time and be able to spend time with them is important to me.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

In high school I heard about beginner welding classes that were offered at my school byway of some of my friends and tried it out. After a few weeks of classes it turned out that I had a knack for welding and took an interest in it immediately. Although I didn't have formal training, I would help my novice welder-slash-handyman grandfather and his neighbors with small welding projects and repairs to his tractor and trailers. I knew I loved working with my hands but I didn't know what I wanted to do for a career until these experiences led me to the conclusion that welding was a good fit for me.

Any Safety Certificates:

First Aid / CPR

Add'l Details:
Why is an apprenticeship an attractive option to you?

I've always been a hands on learner because I very much prefer to see the work being done in front of me in order to understand it better. Books only teach you so much when you can't visualize the way their information is applied. Not only is it the way I learn best but I also have a situation in which I need to keep making money as I go to survive. Without a steady income bills would fall through which I can't let happen when my baby girl is being born this March. Developing skills and career while being payed is the best

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I had gone to NWTC after a year of college and joined the carpentry program. Through experience in that I realized I didn't really enjoy doing it for work but while there I was able to visit various other trade programs to get more insight about the work they do. Plumbing and Electrician programs seemed a much better fit to me and I was much more interested. I've been hesitant to start and looking for an apprenticeship in the past due to frequently moving around Wisconsin for the past 3-4 years. Now things have changed and I have a child on the way this March. I won't be traveling as frequently and would like to build my career in pursuit of supporting that family along with my own self interest in the trade. It would mean the world to secure a future in plumbing.

Why is an apprenticeship an attractive option to you?

I am interested in pursuing and building a career in welding! My girlfriend suggested I look into an apprenticeship program because her grandfather, dad and brother all started their electrical careers through apprenticeship in the union! I want to build my skill and knowledge and be able to work well doing it!, I want to learn and gain experience.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I worked in Bay Shipping Marina in Sturgeon Bay doing basic welding. I am interested in Pursing a career in welding., I've worked for agency called PDS in Green Bay, WI that gave me work for Fincantieri Bay Shipbuilding (FBS). For the times I've worked for the shipyard I did some steel fitting work like torching and welding parts and I enjoyed. Only thing I didn't like about it was that it's a temporary job since it's through an agency. I'd like to take the next step and to try to make it a career.

I have my high school diploma from Preble High School in Green Bay, WI. If I can have a opportunity to get an apprenticeship I will make the most of it to make a good career as a steamfitter or pipe fabrication. Thank you.

Why is an apprenticeship an attractive option to you?

I would like to learn and make money at the same time given the fact I live on my own.

I also have a friend who is an apprentice through you guys and likes it., I'm a hands on learner, never did like learning everything straight from a textbook or online, so learning hands on and making money while doing so is the right thing for me

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Have been a painter, and did masonry since high school, and have seen many trades online that I would like to learn/ work, and wanted to find a career that I enjoy and can work in for many years to come.

I have a friend that has gone through this company and has an apprenticeship and talked highly of it as well., I've done, masonry, painting, worked in paper mills, always been interested in finding a career that I can rely on and find stability in with always having work.

Math-Geometry, Math-Algebra, Metals, Welding, Automotive Technology

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I am currently a correctional officer. The work is stressful as is the schedule & hours. I want something stable & a place I can make good money whilst working & enjoy my work. I come from a family that have been in trades & they were always so eager to get me to get into one. And I wish I would have sooner. I'm looking to build a career & skyrocket from there & the pipe trade, plumbers & steamfitters trade is where'd I'd do it., I need a career & I've always considered doing an apprenticeship.

Tell us about any jobs where you've learned pipetrades relevant skills:

I've only ever been around plumbers, hvac, welders and electricians while doing my work as an insulator I haven't had much hands on experience with the pipe trades yet, I haven't done any jobs where I've had to do anything with pipes. Just when doing insulation on job sites I've had to insulate around pipe and watch them be installed and that has always been interesting to me making it neat and look good., I currently do insulation, so I'm always working around pipes and watching them be installed. I think it's cool how the pipes are all routed and set in place to make them be as efficient as

Tell us about any hobbies that have boosted pipetrade-relevant skills:

More so looking to get into it more I have always been a hands on person wanting to learn with my hands, Right after I graduated high school I went out and got a job doing insulation. I've always looked at the other crews on the job sites and thought to myself I'd like to be more of a part more building the house than insulating. Plumbing work has been interesting me more., I do side work every other day if not every day after work, working doing a variety of things: drywall, insulation, siding, pulling wires, and other things like that.

Add'l Details:**Why is an apprenticeship an attractive option to you?**

I'd like to get right into the work field and possibly go to college later on the further my career, The apprenticeship program is nice for me because, I like the idea that you can be enrolled in both school learning your skills for the job and also be actively working on a job site as well. I also like that you don't have to pay into school much more past books and supplies coming from a lower income family that would help a lot., I like the idea of being able to work on the job while at the same time being able to go to school and learn

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I graduated high school and got an insulation job and watched as all the other crews did their part of putting the house together and was always interested in the plumbers, What interests me the most is working with my hands and watching the project build day by day. I enjoy knowing that I am a part of a crew who can work together and become something big., What interests me the most is working with my hands, and being a part of a group where we can all work together and be efficient. A career in the pipe trades has always been my thing ever since high school!

Why is an apprenticeship an attractive option to you?

I think it would be a good way for me to get in to welding, I find the Apprenticeship attractive to me because I like to weld and this will be a good way for me to gain experience and knowledge

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I like to weld and want to make a career out of it, I am interested in getting in to the pipe trades and becoming a welder
