Add'l Edu. Details:**What trades-related courses did you take in school?**

Metals, Welding, Math-Geometry, Math-Algebra, Woodworking / Woodshop

What construction software or technologies do you have training in?**Any Safety Certificates:**

OSHA 30

Add'l Details:**Why is an apprenticeship an attractive option to you?**

The main reason an apprenticeship is an attractive option to me is an apprenticeship provides a clear path for career growth, certifications, and long-term job security. Knowing that I'll be gaining skills that are in high demand and can't easily be outsourced gives me confidence in my future. I'm also intrigued by the structured learning environment, where classroom instruction supports the hands-on work, helping me grow both technically and professionally in a way that's immediately applicable on the job site.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I had done trade work prior to this, and it interests me because tradesmen are the true backbone of everything, without them there is quite literally nothing. Specifically, I was drawn to the pipe trades because of the precision, challenge, and importance of the work. Whether it's plumbing, steamfitting, or welding, the pipe trades require a high level of skill and attention to detail, which I find rewarding. I also appreciate the variety of work environments and the chance to be part of essential systems that keep buildings and infrastructure running safely and efficiently.

Bachelor Degree

Add'l Edu. Details:

Degree Major - Supply Chain Management

What trades-related courses did you take in school?

Math-Calculus, Math-Algebra, Math-Geometry, Math-Precalculus / Trigonometry

What construction software or technologies do you have training in?

Business ERP Systems and some exposure to CAD software

Any Safety Certificates:

First Aid / CPR

Add'l Details:**Tell us about any hobbies that have boosted pipetrade-relevant skills:**

In my free time, I enjoy woodworking, lawncare, landscaping, home renovations, and repairing my truck and motorcycle. These hobbies have built my problem-solving skills, attention to detail, and comfort with tools and materials. All directly transferable to the construction trades. Even fishing has helped me develop patience and focus, qualities that support steady, precise work. Together, these activities show my passion for hands-on projects and strengthen the skills needed for a career in the trades.

Why is an apprenticeship an attractive option to you?

An apprenticeship is attractive to me because it lets me learn hands-on while still earning a steady income that can help support my wife and kids. I've realized through past supply chain work and hobbies that I thrive on problem solving and practical work. An apprenticeship provides structured training, mentorship, and stability, while allowing me to build a long-term career I can take pride in.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've worked in supply chain roles for several years, but I realized I'm most fulfilled when I'm problem solving and working with my hands rather than sitting behind a desk. I want a career where I can build, fix, and contribute directly to projects in a practical, hands-on way.

A close friend in UA 400 recommended the pipe trades to me, and after hearing about the training, teamwork, and pride he takes in his work, I thought it could be a great fit. His experience, along with my own desire for hands-on problem solving, motivated me to look into a career in the building trades, specifically in the pipe trades.

Welding, Woodworking / Woodshop, Math-Algebra, Math-Geometry

What construction software or technologies do you have training in?

Any Safety Certificates:

First Aid / CPR

Add'l Details:

Why is an apprenticeship an attractive option to you?

An apprenticeship is attractive to me because it allows me to earn while I learn, gain hands on experience from professionals, and build a solid career without having to take the route of traditional schooling.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I was drawn to the building trades because I enjoy hands-on work and creating something lasting. Plumbing and the pipetrades interest me specifically because they're essential to every project, require problem solving and precision, and offer a career where I can keep learning while making a real impact.

Add'l Details:

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I love working on house projects, such as building shelves, painting, and installing trim, as well as working on my car and learning how to be self-sufficient.

Doing things with my hands and learning while I try is very motivating for me. I use every opportunity to "get my hands dirty" to learn as much about projects as I can.

Why is an apprenticeship an attractive option to you?

The ability to learn while I earn and be able to start obtaining skills from day one is the largest attractive option for me.

I am also very drawn to learning from a journeyman and having that expert there that I can watch and absorb knowledge from.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I have heard a little about the pipe trades since my uncle is a pipe fitter. I also really enjoy the idea of working with my hands and being able to build something lasting that I can be proud of.

I originally went to college, but have found that I am drawn to be in a field where I can help people and work in a team to accomplish something tangible together.

What construction software or technologies do you have training in?

Any Safety Certificates:

Add'l Details:

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I enjoy hands-on projects like small repairs, building, and organizing spaces. These hobbies have taught me precision, attention to detail, and how to work safely with tools. I also like troubleshooting and finding solutions when things don't go as planned, which has built my patience and problem-solving skills, both essential in the pipetrades.

Why is an apprenticeship an attractive option to you?

An apprenticeship stands out to me because I don't just want to learn about a trade, I want to live it, every single day. I like the idea of being out in the field, learning from experienced professionals, and applying new skills as I go. For me, the best way to truly master something is by doing it, and an apprenticeship gives me that hands-on experience from the very start.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've always loved the idea of building something real, something people can see, use, and depend on every single day. The building trades caught my attention because they're not just jobs, they're careers that create lasting impact. I like knowing that the work I do could be part of a home, a school, or a business for decades.

The pipetrades, in particular, feel like the perfect fit for me because they mix hands-on skill with problem-solving. It's not just about putting pipe together, it's about understanding systems, making them safe, and keeping things running smoothly for entire communities. I like the challenge of learning precise techniques and the responsibility that comes with doing work that truly matters. For me, it's more than a career path, it's a way to take pride in my work every single day.

MIG - Some Knowledge, Stick - Some Knowledge

Tell us about any jobs where you've learned pipetrades relevant skills:

3 Handyman jobs where I worked on residential plumbing. Mainly installing/ replacing toilets, sinks, and their corresponding plumbing.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I have worked many jobs as a handy man and have replaced toilets, sinks and their corresponding plumbing. I have basic understanding of plumbing and would like to be proficient enough to become a Journeyman or a Master Plumber.

Shift Availability:

Full-time, 1st Shift (Days)

Post HS Education:

Some 2-year college

Add'l Edu. Details:

What trades-related courses did you take in school?

What construction software or technologies do you have training in?

Any Safety Certificates:

Add'l Details:

Why is an apprenticeship an attractive option to you?

I get to work and learn from the classroom and from experienced coworkers in the field. I also did not want to go to college for a time while not getting paid and have college debt on top of providing for my family. With the apprenticeship I get both pay and schooling, while working toward a Journeyman license.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I am looking to get into the trades and did not want to go to college then work. I like to work with my hands and see the fruits of my labor. I believe that I can do that with the proper training and learning from the experience of others.

Welding Experience:

Stick - Some Knowledge, MIG - Some Knowledge

Tell us about any jobs where you've learned pipetrades relevant skills:

While in the U.S. Coast Guard as a Damage Controlman, I gained extensive experience in areas directly related to the pipe trades. I regularly installed, maintained, and repaired water, fuel, and fire suppression piping systems. I worked with various materials, including steel and copper, and became skilled in welding, cutting, and brazing. My job also required me to read blueprints, follow safety protocols, and perform emergency repairs in high pressure situations.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

One of my main hobbies is working on mechanical projects and repairs, which has helped me develop strong problem solving skills, attention to detail, and confidence using hand and power tools. I also enjoy staying physically active through fitness and outdoor activities, which keep me in good shape for the physical demands of construction work. These hobbies have taught me discipline, patience, and how to work safely and efficiently, skills that directly transfer to the construction trades.

Why is an apprenticeship an attractive option to you?

An apprenticeship is an attractive option because it offers the opportunity to earn while I learn, gaining real-world, hands on experience under the guidance of skilled professionals. I value structured learning, and combining classroom instruction with practical on-the job training is the ideal way for me to build long term, high demand skills. Coming from the Coast Guard, I'm used to learning by doing and working as part of a team, so the apprenticeship model fits naturally with how I succeed and grow. It's also a

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've always been drawn to hands on work that requires precision, problem-solving, and a strong work ethic, which is why the building trades appeal to me. The pipe trades, in particular, interest me because they combine physical skill with technical knowledge and offer the chance to work on systems essential to daily life. I'm motivated by the opportunity to learn a highly respected craft, take pride in quality work, and be part of a trade that plays a vital role in residential and industrial infrastructure.

Add'l Details:

Why is an apprenticeship an attractive option to you?

In my opinion it is the best way a person can learn something and especially for myself because I am a hands on learning individual and prefer to work with someone in person teaching me skills. The apprenticeship program also provides education taught by experts in the profession. You also have opportunities of getting licensed and becoming a journeyman.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

The trades have always interested me in many ways since I was a kid, I have always been a hands on person, not caring if i get my hands dirty. Plumbing specifically interests me because it is one of the most useful skills you can have owning a household and it comes with many benefits such as working side jobs and creating your own business. Another aspect of why plumbing interests me is that you are helping people in need when their home or business has a problem and you are the one to fix it. I am a hard working individual with a very good work ethic, I am always looking forward to learning new things every day and doing the best job that I can.

My current hobbies I like to do now are pretty physical. I work as a Service Shop Technician. There is always something new I can learn in my job. I really like to learn and be challenge when I'm doing something new. I also like going to the gym. Keeps me active and healthy.

The biggest thing I've done and something I felt pride about and that can transferrable is how I was able to fix my moms lawn. We have a pretty back yard and it was just full of

Why is an apprenticeship an attractive option to you?

If I'm being honest, I just didn't think college was for me. Thankfully I've been able to experience many jobs. And I realized two things about myself. I like to be problem solver and I like to physically move and work.

Once I learned from the apprenticeship program. I believe it was probably one of the best options I have. And like I stated previously, I will like to use this experience and

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I come from a family that works in the trades. My dad is a plumber and my brother is experienced in property maintenance and construction work. So I wish to follow the same route. I also like working physical jobs better than staying in a cube stuck on a computer. That's the reason why I'm generally interested in the trades.

I'm specifically focus on HVAC because, like any other trade, its going to be needed for as long as this world lives. I think HVAC is very crucial specifically where you have cold winter seasons and hot summer seasons. So if a HVAC system breaks, people will always NEED it to be fixed. And where there is work. There is money. I hope to use the skills and knowledge I learn in the program to create something for myself later on.

I've been living with my fiancée for a few years and so I want to take the next steps into moving into a true career however I need to make sure I'm making enough to take care of the bills & my other obligations.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I go to a local lounge on Saturdays & had a conversation with a owner of a plumbing company in the madison area. He told me about the opportunities and what the job truly involves, specifically he mentioned the often negative association with "filth" and how that is a exaggeration which was something originally holding me back im not afraid to work hard & get dirty but I was aware of the stigma and wasn't sure if this is the path I wanted to take. Im looking for a career where I can earn my keep provide for my fiancé & hopefully future family.

Why is an apprenticeship an attractive option to you?

You get paid to learn and people are expecting you to not know much instead of going into a job and being expected to do everything a journeyman can. You will get a more hands on training than basic book skills and how much you can remember on paper and I'm a person who is a hands on learner I can retain more information as someone physically shows me how it's done instead of describing it. Another reason is you really get to know the ins and outs of a trade with 5 years of training

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I got interested in the trades at a young age when I started working construction around the age of 15 and when I turned 18, I became a structural welder and I've loved it ever since. I'm very interested in the pipe trades because my lifelong dream is to become a rig welder on the pipeline, so I was looking into possibilities to get my foot in the door and I came across the local 400. I have spoken to a few people in this local and they seem to love it and that what brings me here today interested in applying for the apprenticeship for the steamfitters.

Work Zones in Preference Order:

Fond du Lac Area (Orange)

Relevant Experience Level:

None. Nothing even close-but I'm a hard worker and willing to learn!

Years of Full-Time Work Experience:

1-3

Welding Experience:
Tell us about any jobs where you've learned pipetradese relevant skills:

I can't say ive worked a job that holds valuable hands on skills for trades. However,In my past jobs, I've learned to swork hard and stay focused, skills that are essential in the pipe trades. I've worked in fast-paced environments where teamwork and communication were key to getting the job done right.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

In my free time, I enjoy playing chess, staying active through sports and running, and working on basic car maintenance. Chess helps me stay sharp and think critically, planning several steps ahead, which is useful for problem-solving on the job. Sports and running keep me physically fit and teach discipline and teamwork, which are important in construction environments. Working on cars has given me hands-on experience with tools, mechanics, and how systems work, which all happen to be skills related to construction trades.

What trades-related courses did you take in school?

Math-Algebra, Math-Calculus, Math-Geometry, Math-Precalculus / Trigonometry

What construction software or technologies do you have training in?
Any Safety Certificates:
Add'l Details:
Why is an apprenticeship an attractive option to you?

An apprenticeship is attractive to me because it lets me learn by doing. I prefer hands-on work over sitting in a classroom all day, and an apprenticeship gives me the chance to earn while I learn a valuable trade. I like that I can build real skills. It's a practical, rewarding path that fits the way I learn and work best.

What interested you in a career in the building trades in general, and specifically, a career in the pipetradese?

I'm interested in the pipe trades because I enjoy hands-on work, problem-solving, and using my math skills in real-world situations. I'm drawn to the stability, high earning potential, and the chance to learn a valuable skill that's always in demand.

Post HS Education:

Some 4-year college

Add'l Edu. Details:**What trades-related courses did you take in school?**

Drafting and Design, Math-Algebra, Math-Calculus, Math-Geometry, Math-Precalculus / Trigonometry

What construction software or technologies do you have training in?

AutoCAD

Any Safety Certificates:**Add'l Details:****Why is an apprenticeship an attractive option to you?**

I like the idea of learning by doing, not just sitting in a classroom. With an apprenticeship, I can build real experience on the job while also getting formal training from experienced professionals.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I first became interested in the pipe trades when a friend told me about steamfitting. I looked it up and thought it sounded like a great fit for me. Steamfitters work on important systems that keep buildings running, like heating and cooling. It's a job that takes skill, hard work, and teamwork, and I want to be part of something that makes a difference.

Although I appreciate classroom learning, I learn best by doing. I think an apprenticeship will keep me excited about learning as I immediately use the skills I am learning. I also need to generate some income for myself as a new high school graduate, and this seems like a good way to both learn and earn!

Also, I have a cousin who is doing a diesel tech apprenticeship and he is enjoying it. They

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

The reason why I am interested in the pipetrades is because I thought that I could learn how pipe systems work and how they are installed. I don't know a lot about how pipe systems work and I would like to learn and grow my knowledge in this trade.

I have taken a few welding classes (Fox Valley Technical College) so I know some things about welding, but I can still learn how it applies in the pipetrades. I am looking for work which will challenge me and that I do most of my life.

Add'l Details:
Tell us about any hobbies that have boosted pipetrade-relevant skills:

In my free time, I enjoy working on hands-on projects like fixing things around the house, assembling furniture, and helping with basic plumbing repairs, which all relate directly to the skills needed in pipefitting. I've always had an interest in figuring out how things work and finding efficient ways to put things together, which has strengthened my attention to detail and mechanical thinking.

Why is an apprenticeship an attractive option to you?

An apprenticeship is important to me as an adult because it gives me the opportunity to learn a skilled trade through real-world experience while earning a paycheck. This practical, on-the-job learning approach is ideal for me because I'm ready to work hard, grow my skills, and move forward in a career that offers long-term stability and advancement.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I want to become a pipefitter because I enjoy working with my hands and solving problems in a way that produces real, visible results. The pipefitting trade offers a unique mix of physical labor, technical skill, and precision, all of which align with my strengths and interests. I'm drawn to the idea of building and installing systems that are essential to the function of buildings, factories, and infrastructure.

Another reason I want to pursue a career as a pipefitter is the opportunity for long-term growth and stability. The trade offers strong job security, excellent wages, and the chance to continue learning through on-the-job experience.

Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

Plumber

Work Zones in Preference Order:

Appleton Area (Green)

Relevant Experience Level:

None. Nothing even close-but I'm a hard worker and willing to learn!

Years of Full-Time Work Experience:

7-9

Welding Experience:

Tell us about any jobs where you've learned pipetrades relevant skills:

In my manufacturing jobs, I learned how to work with machinery, follow safety procedures, and stay detail-oriented. I also gained experience with teamwork and staying productive under pressure.

While I haven't worked directly in the pipe trades, the hands-on skills and discipline I've built in those roles give me a solid foundation to succeed and grow in this field.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

One of my main hobbies is working out. It helps me stay disciplined, focused, and physically ready for demanding work. I've built a strong mindset through training, which translates well to staying consistent and pushing through tough jobs.

I also enjoy hands-on projects like fixing things around the house or helping friends move or build stuff. It's taught me the value of teamwork, being dependable, and paying attention to detail—all key in the construction trades.

Shift Availability:

Full-time, Overtime, Weekends, 1st Shift (Days), 2nd Shift (Nights)

Post HS Education:

No

Add'l Edu. Details:

What trades-related courses did you take in school?

What construction software or technologies do you have training in?

Any Safety Certificates:

First Aid / CPR

Add'l Details:

Why is an apprenticeship an attractive option to you?

An apprenticeship is attractive to me because it gives me the chance to earn while I learn. I don't just want a job — I want a career, and this path gives me real skills, real pay, and a clear future.

I like learning hands-on from experienced professionals. That kind of knowledge is priceless, and I'm ready to show up, work hard, and grow into someone people can count on.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I'm drawn to the building trades because I like working with my hands and seeing the results of a hard day's work. I take pride in learning skills that actually matter and can be used for life.

The pipe trades interest me because they're essential, challenging, and offer real opportunity. I'm ready to put in the work, learn the craft, and build a solid career doing something that matters.

Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

Plumber, HVAC/R Service Tech

Work Zones in Preference Order:

Appleton Area (Green)

Relevant Experience Level:

None. Nothing even close-but I'm a hard worker and willing to learn!

Years of Full-Time Work Experience:

7-9

Welding Experience:

Tell us about any jobs where you've learned pipetrades relevant skills:

I have not worked any jobs that could be related to the apprenticeship. Since High school i worked at a iron castings foundry, food production and a papermill.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

Cars are my big hobbies. I understand it's not related to the apprenticeship. Working on them though taught me how to diagnosis the issue, how to solve it, and execute a plan of action fixing it. Doing my own car work tool I've become familiar and comfortable on how to use handtools, power tools, minor fabrication, and attention to small details. The reason I'm not pursuing an automotive career is that I worry if I work on cars for my job I won't be passionate on working on my own car or my friends and family.

Add'l Details:

Why is an apprenticeship an attractive option to you?

With living in an apartment with my fiancée i have bills each month including a car loan. Taking time off or working part time is not an option for me. Being an apprentice is my best route for starting a career because then I learn on the job and do not have to worry about missing paychecks or short paychecks.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Since high school I've just been working factory production jobs. I'm turning 27 this year and it is time I invest in a career where I can advance in. I am also getting married and have major life goals I would like to meet as in purchasing my first house with my future wife and live comfortably while doing so. I am a DYler and like to fix things my self, like my car. My main example related to this apprenticeship is the bathroom sink in my apartment was backing up. So I went underling the sink and removed the drain plug and the U Piper I believe it's called and cleaned out the hair and gunk in the sink, ever since it's been draining like normal.

Why is an apprenticeship an attractive option to you?

I am living in my own apartment with my fiancé. So that means bills, and a car loan payment. Apprenticeships is, what I believe, a very good option for someone in my situation. I will be working while being trained and not having to worry about missing paychecks while pursuing my career.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've been working production jobs since high school. As I'm approaching 30 years old in a few years, getting married, and have major life goals as in purchasing a house it is time for me to invest in a career. I've always liked working with my hands. As a kid I'd help my dad work on cars, different carpentry projects around the house, and with my apartment I've taken it up to fixing minor things. Example, our bathroom sink was backing up so I took out the drain stop and U Pipe I believe it's called and unclogged all the hair and other gunk in it, now it runs like new. That is what I believe made me think I'd enjoy plumbing. I also crave an interactive job that challenges me and leaves me satisfied.

Construction, Woodworking / Woodshop

What construction software or technologies do you have training in?**Any Safety Certificates:****Add'l Details:****Why is an apprenticeship an attractive option to you?**

an apprenticeship would give me the opportunity to dive headfirst into a brand new opportunity that would bring me, steady work, financial stability, more responsibility, and accountability, and the chance to work really hard, An apprenticeship attracts my interest for many reasons. The main reason being stability, and an opportunity to grow and work hard. I'm very fond of the idea of constantly learning, and in a different environment. Working towards financial stability, in a career path that gives me options.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

My interest in this career comes from the main point of stability. I am a hands-on, personable, confident, young man, looking to place oneself where I can find stability, structure, and hard work. I have always made it a point to work more than one job at a time. But I would love to work in a Career., A career in the trades would allow me an opportunity to dive headfirst into stability, structure, hard work, and financial stability. Made it a point to have more than one job at a time, but it would be amazing to have one solid career.

What trades-related courses did you take in school?

Engineering, Electrical Trades / Electronics

What construction software or technologies do you have training in?

Any Safety Certificates:

Add'l Details:

Why is an apprenticeship an attractive option to you?

It is the most direct way to learn the trade. As stated previously, I want to explore my options, and this is something I am highly interested in. I have always been a hands-on learner, so I know that learning from watching videos isn't for me.

The other reason I want to pursue an apprenticeship is that I have ruled out White Collared jobs from what I want in my future. It is much easier to jump from trade to trade

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

After high school, I went to College only to complete one year and realize this wasn't what I wanted to do with my life. I went for the wrong reasons and was influenced to do so by someone I thought was close to me. After some soul searching, I looked back to High School, where I loved shop classes, specifically the idea of working with my hands and welding.

I am only 19 and have a life to live. I want to pursue what I love before I am at an age where it is hard to switch. The only way to truly know if I like the work done in the pipe trades is to do it.

Why is an apprenticeship an attractive option to you?

Not only fits my working style but demands more know-how and is an appreciated skill in which I would like to expand and learn to do. I've always had an interest in the trades and even shadowed some and I feel that working in plumbing would be the best direction for me and continual growth to stay sharp in the trades

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Plumbing is not only a year-round need but also extends beyond that is in every major type of work from industrial, to residential, and commercial the constant need of not only plumbing but the trades in general to keep the demand of infrastructure up and running but modernized and needing skilled laborers to meet the demand for a ever-growing industry and its workers. For me helping in that regard gives me a purpose and helping society so I wouldn't ever need to ask the why but the where and when. While being able to support my dad and my future ambitions is a great opportunity all around

Why is an apprenticeship an attractive option to you?

An apprenticeship is an attractive option to me due to the fact that I've always thought about becoming a trades man. Throughout my whole life I've always wanted to be a welder/plumber but never met the requirements for it. I think I would have a great chance working as one climbing up the ranks throughout my career in the trades

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Honestly the design the well looked environment when it gets down to work. Since I was young I've always liked to work in general. I'm currently 17 and I am a early highschool graduate I would like to work in the trades for my future

I like to work with pipes also plumbing would like to know more about it as well. I believe I have a strong passion in me coming out for trades such as plumbing as well as welding. There's a lot of trades out there but in special these 2 are the ones that interest me the most

Add'l Details:**Why is an apprenticeship an attractive option to you?**

I want to continue my education for a better career and don't mind going back to school to further my education for a greater future

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've always been interested in the trades because I grew up around them—my dad worked as a finished carpenter, and from a young age, I was exposed to the satisfaction that comes from working with your hands and seeing a project come together from start to finish. That early exposure sparked a respect for skilled labor and the pride that comes with doing a job well. More recently, I've developed a strong interest in the pipetrades through my work cleaning and servicing storm and sanitary sewers. That hands-on experience opened my eyes to how critical plumbing systems are to public health and infrastructure, and it gave me a real passion for the trade. I enjoy problem-solving, working in a physically active job, and being part of a team that keeps essential systems running safely and efficiently.

CNC

Any Safety Certificates:

Add'l Details:

Why is an apprenticeship an attractive option to you?

Apprenticing allows me to earn money whilst I learn a valuable skill. Office jobs are coming and going. However all trades are needed constantly. It's a career path I know I'll always have work to be done. Plus it's a stable career. I enjoy math, working with my hands, and exerting my work ethic. An apprenticeship fits all my needs.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I want to be a plumber because I enjoy working with my hands and solving practical problems. Throughout high school, I found that I preferred hands-on tasks over sitting at a desk all day. I've always been interested in how things work, especially around the house, and plumbing seems like a great way to turn that interest into a career. I like the idea of doing work that actually helps people every day, whether it's fixing a leak or installing something new.

I'm also looking for a job that's steady and in demand, and plumbing seems like a smart choice. I know it's hard work, but I'm not afraid to learn and put in the effort. I'm ready to start building a career that gives me real skills and the chance to move up over time. Becoming a plumber feels like the right step for me after high school, and I'm excited to get started.

The apprenticeship program at the local 400 was attractive to me for the opportunity to grow and learn more as the years go. I like to feel like I'm always improving my life as the years go. I don't like to feel like I'm wasting my life away and with this program I feel like it's a good career path that leads me to where I want to be in life. I can see there is an abundance of opportunity here. What really had me considering this as well was my brother who also works for the local 400. I can see how he is able to live a good life

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've always been a more hands on worker. I have also been looking for something where I can grow more so as soon as my brother told me about the local 400 and how it's a paid to learn program. It intrigued me a whole lot he brought over a folder with more information and from what I've read and seen I feel like the local 400 would be a good fit for me. Pipe trades is something completely new to me but I've always been a fast learner and I like to do things fast and the right way. I feel as long as there is someone willing to teach me the right way I will make a good part of any team. My managers and past foremen would also always say how I was a good worker and pick things up quick. I'm excited and ready to work and learn about the pipe trades.

Add'l Details:

Why is an apprenticeship an attractive option to you?

I think I'm attracted to this specific option because I've always enjoyed working hands on and having visual demonstrations is the best way for me to learn. I also am interested in the idea of learning while working and setting up my future career while getting payed rather than going into a four year university. Getting into plumbing interests me because I think I'd really enjoy working with different pipes learning how to replace parts and fit different parts into eachother.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Im really interested in working hands on and being able to learn and farther advance my knowledge while working a hands on job. I enjoy using power tools and want to learn more about using power tools and different ways to use pipes and tools. I enjoy to work on difficult tasks and problem solving and learning how to fix issues. I think joining the trades would be a great path for me to take and I'm motivated to learn hands on and in the classroom about pipe fitting and plumbing.

Automotive Technology, Drafting and Design, Math-Precalculus / Trigonometry

What construction software or technologies do you have training in?

Inventor

Creo Parametric

Any Safety Certificates:
Add'l Details:
Why is an apprenticeship an attractive option to you?

I enjoy the concept of learning and getting compensated for it. I enjoy proving to employers that I can perform for them.

I was a youth apprentice when in high school, and although I didn't enjoy what company I worked for, I realized the value of an apprenticeship. I knew at some point in the future I would explore other apprenticeship opportunities.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I began my trade career working for an independent contractor doing home remodeling. I found satisfaction in the finer details, and looking back to see a job well done.

I do car exhaust work as a hobby, and enjoy welding. I believe a career in the pipe trades would be something I find rewarding and enjoyable.

Why is an apprenticeship an attractive option to you?

An apprenticeship gives me the opportunity to learn and grow in this trade with the supervision of an expert. It would allow me to expand my skillset and knowledge while growing a respectable wage. It is the best fit for my lifestyle and I am dedicated to my work and I am willing to give 100% effort to any project.

I would like to expand my knowledge in the trades to set a steady foundation for my

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

My interest in the world of plumbing didn't start exactly as planned, but grew from everyday observations of projects in my household. I was always fascinated by the skill set of handymen and the intricate network of plumbing. This intrigue led me to research this trade, learn about their problem-solving, and the physical work involved.

As I became older, the demand for plumbers fueled my passion. Jobs in the trades seem to always be at high demand as they are essential for everyday life. This demand turned into an opportunity for me and solidified my need for this trade.

Appleton Area (Green)

Relevant Experience Level:

None. Nothing even close-but I'm a hard worker and willing to learn!

Years of Full-Time Work Experience:

7-9

Welding Experience:

Tell us about any jobs where you've learned pipetrades relevant skills:

Being a farm hand and an agroforest landscaper requires physical endurance and manual labor, tool proficiency and spatial/safety awareness.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I am market gardener and amateur mycologist that terraformed a two acre property into food forest using hand tools and laboratory techniques. Laying out forest guilds requires site planning and spatial awareness. Scheduling planting and expansion of fungal cultures for market requires project management. Gardening tools, laboratory and irrigation equipment requires tool proficiency. Being a market gardener prepares myself to handle the hands-on, strategic aspects of plumbing, while enduring manual labor.

Environmental Science major

What trades-related courses did you take in school?

Why is an apprenticeship an attractive option to you?

An apprenticeship is attractive to me because it provides structured, hands on training while allowing myself to earn an income as I learn. There is a lot of stability and growth in the trade, and an apprenticeship can lead to full time employment. I wish to build on my existing skills while mastering a specialized construction technique.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

The plumbing trade interests me because it combines hands on work while making a difference in people's lives and our environment. I have always enjoyed tactical work; combining hands on problem solving for the sake of clean water and effective waste management is a craft that excites me.

Why is an apprenticeship an attractive option to you?

The apprenticeship interest me because I'm looking for something more I want a career . I wasn't sure for awhile exactly what I wanted to do but I knew I was good with my hands. After talking with the guys from veterans plumbing and working alongside them, I realized this trade could be something that I would be interested in. So after looking more into it I realized i could see myself doing this. I don't mind working inside outside. I don't mind getting dirty. And im looking for something I can do for a while were I'm

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Been working alongside some of the guys from veterans plumbing. I find it very interesting and really easy to pick up on things. They suggest to me that i should try getting an apprenticeship though the union., I'm looking to a career as a plumber I have worked alongside many in the past two years. I've been at my current job, many of the guys from veterans, plumbing and maritime plumbing. It's a trade that seems to come very easily to me and a trade that sparks my interest. Im looking for something long term and something I see myself for the long run, I'm looking to have a career and something that I truly have a passion in and something that I see myself doing long-term I've worked a long time for a while and I've worked alongside HVAC technicians for a while and it is truly something that interest me

Why is an apprenticeship an attractive option to you?

Apprenticeships offer hands-on learning which I excel in, as well as making money while learning. I'll stay out of debt while making lots of money and learn the way I'd always enjoyed.

I also take pride in my work. I'm gonna be the best at whatever I do, Working with journeyman workers every day all allows you to learn the tricks of the trade and fast. Being Fast and Consistent adds to a quality career .

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Job security, In my eyes everybody needs plumbers and HVAC technicians. If an HVAC unit goes out, people need you there and quick. Controlled environments are a large part of our society that go unnoticed. Following that idea I also think that Plumbers are a keystone of the everyday life as well. Everybody wants to take a shower when they get home from work. Restrooms are mandatory from big business to the everyday home, Making these workers needed everyday. Job Security is one of those big goals I have in life, that's my favorite idea when I think of a career in HVAC or Plumbing.

Job versatility. Everyday is an adventure, and no two situations are the same keeping my mind busy and hungry for information, I am very eager to hopefully explore that aspect of the HVAC and/or the plumbing world.

Add'l Edu. Details:

Small business and entrepreneurship certificate, GED., Business certificate from fox valley technical college

What trades-related courses did you take in school?

Why is an apprenticeship an attractive option to you?

Because I like construction. I have been doing construction for 5 years and I love it I just wanna do a type of construction that will give me a more rewarding career. And the fact that its paid education is great because I just had my first son and I can't afford college. I'm already a tinkerer and get stuck on go mode easily., Because I can earn money while im learning. I have a son and wife to feed so I can't sit in college while not making money.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I like working construction, I've done landscaping, automotive repair, and painting side jobs. But I've seen tik tok videos of plumbing, electrical, and utility work, and plumbing caught my interest the most. Since I have a new son, I want to build a career in something that will pay very well, and I know I can do that as a plumber. If I'm a landscaper I max out at 30, as well as with painting. But more than 50 an hour for plumbing? I guess that speaks for itself. I need a well paying career to provide for my family and I love working construction. Everyone in my family works construction., I have landscaping experience but want to get into plumbing because it actually pays better and is year round unlike landscaping. I also just had my first son so I'd like a career with good benefits and long term growth.

Why is an apprenticeship an attractive option to you?

An apprenticeship is an attractive option to me because I find school not very interesting, and I also find it much easier to just learn by doing things instead of reading books and studying for tests.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I have seen many videos on YouTube by people such as HVACR Videos, which demonstrate what it is like to work as a refrigeration technician or a plumber. To me the work looks very interesting and fun, and I am looking for a new job that I can take seriously and work hard every day at.

Why is an apprenticeship an attractive option to you?

Apprenticeship is something im interested in because I always wanted to go to school but I also wanted to start working right away after high school and if I can do the two at the same time go to school and work that would be the best thing I can ask for

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I'm interested in trade field because I want to learn new things and skills. Ever since I helped my uncle set up our kitchen sink that's when I found interest in plumbing I just didn't know where to go but now that I found this opportunity it gets me excited to go out there and learn about this trade

earn while you learn, many apprenticeships offer a salary, which allows individuals to earn money while they gain valuable skills and experience, making it financially viable. An apprenticeship can lead to a clear career path, often with opportunities for advancement and additional qualifications upon completion.

Overall, apprenticeships offer a practical approach to education and career development, making them an appealing choice for me.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I was drawn to a career in the building trades because there's something really satisfying about seeing a project come to life, starting with an idea and watching it turn into something real and useful. That sense of accomplishment is hard to beat. What really pulled me toward the pipe trades specifically is how essential plumbing is to our everyday lives. It's one of those things we often take for granted, but it's absolutely critical—clean water, waste systems, heating—it all depends on skilled professionals behind the scenes.

I like that the work is hands-on and technical, but also really varied. One day, you might be installing a new system, and the next, you're troubleshooting something complicated. I find that variety exciting, and I enjoy the problem-solving side of it. Plumbing is one of those careers where you're always learning.

Why is an apprenticeship an attractive option to you?

Getting paid to learn, in my opinion is a no brainer. Not only do you get to work alongside seasoned journeyman, but this also insures the longevity to keeping the industry in good hands for generations to come. There are many incentives the industry offers that continue to attract my interest.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I started hanging drywall for a family friend owned business, the summer going into my senior year. Very early on did I realize how rewarding and fulfilling completing a job can make one feel. With being fortunate enough to get into a construction trade so early on, I was also able to observe that drywall is not my only option as far as a career path. Along the way I have met some great people and was able to have different conversations with different tradesman. With all that being said I have realized that plumbing has found most of my attention. Similar to drywall, plumbing can also be a very rewarding career with the situations I have encountered. With everything considering I believe I would be a great fit to the plumbing industry as well as a valuable asset in years to come.

Add'l Edu. Details:

What trades-related courses did you take in school?

What construction software or technologies do you have training in?

Any Safety Certificates:

Add'l Details:

Tell us about any hobbies that have boosted pipetrade-relevant skills:

Two of my main hobbies are playing soccer and tattooing, both have helped me build skills that I think will transfer well into the construction and pipe trades. Soccer has taught me the importance of teamwork, communication, and staying disciplined—especially when things get tough. It's also helped me stay physically fit and mentally focused, which are important for a hands-on, physically demanding career like this. Tattooing has helped me develop a steady hand, attention to detail, and patience. It's also taught me how to work with precision and take pride with the process.

Why is an apprenticeship an attractive option to you?

An apprenticeship is enhancing to me because it gives me the chance to earn while I learn. I like the idea of getting real hands-on experience while being taught by experienced professionals.

It also gives me a clear path toward a steady career. I'm motivated to start something long-term, and I respect the structure and support that comes with a union apprenticeship. It's a great opportunity to work hard, grow, and eventually become a

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I'm interested in a career in the building trades because I'm ready to start a stable, hands-on career where I can learn, grow, and build something meaningful. I may not have experience yet, but I'm a hard worker who enjoys learning new skills and pushing myself to improve. What really sparked my interest is seeing friends and family succeed in union trades. Hearing about the opportunities they've had and the pride they take in their work made me want to pursue something similar.

Specifically, the pipe trades stood out to me because of how essential and respected the work is. I want to be part of something that keeps communities running—whether it's plumbing, heating, or piping systems. My goal is to build a steady, reliable career I can be proud of and eventually work my way up to becoming a skilled professional in the field.

Why is an apprenticeship an attractive option to you?

I want to find a new career and plumbing was what drew my interest and I know for a fact I want to do it. It's challenging which is what I like. It allows me to be in different jobs and doesn't seem repetitive like a factory job would be. The benefits package that union offers is unmatched. In the economy that we live in, the wage is very attractive.

I'm looking for a long lasting career that will allow me to do my own side gigs and do

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I want to learn a trade where I can work as a builders trade and/or work as an on call plumber. I want to step away from the factory setting because it is too repetitive for me and seems to always be a dead end career for the most part. I am currently a welder and I've been looking to grow away from that full time and challenge myself to learn something new and challenging and at the same time make more money.

I a. Still willing to put into use my welding abilities if it calls for it in plumbing but would also like to learn something that will allow me to do side gigs and do my own projects/repairs on my own property. Plumbers seem to be in demand and make a good amount of money without putting at risk my health like a career in welding would normally do. I want to challenge myself with this new career.

Why is an apprenticeship an attractive option to you?

This would be a great opportunity to get familiar with the trade, in a immersive hands on way, and to learn the trade in and out, taking the next step in developing a career, to support my family

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Well, it all started 3 years ago, when I took a dynamic job position working as maintenance. This turned out to be;building maintenance, facilities maintenance, and preventative maintenance all in one.

The company bought a old foundry from the 1920's in Sparta Michigan. Essentially we gutted that whole place, old water lines, and gas pipes, no longer in use, was to be taken out and this is where i found my intrest to become a plumber. I have got my feet wet in different fields, and Plumbing is where I belong.

Automotive Technology, Welding

Why is an apprenticeship an attractive option to you?

I am 31, married, and have a 5 year old son. For the last decade, I put my education and career on hold to support my wife as she chased her career dreams. Now that she is there, it is my turn to figure things out. I have always been drawn to a hands on career, and I thrive in an environment that constantly challenges my brain. The pipetrades is just that. I am ready to commit to something that is going to provide me with a career rather than a job, and be rewarding in the long run. I am ready to put in the work, and be

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've always been drawn to careers that involve hands-on work, problem-solving, and tangible results. The building trades offer a sense of pride and purpose in creating and maintaining essential infrastructure. I appreciate the teamwork, discipline, and continuous learning that comes with the trades. Specifically, the pipetrades caught my attention because of the critical role they play in both residential and industrial systems. Pipetrades professionals keep buildings safe, functional and efficient. While my work in the past was in a laboring function, I enjoyed learning from my mentors and would like to join a union and pursue the opportunity to become a journeyman myself.

What construction software or technologies do you have training in?**Any Safety Certificates:**

OSHA 10

Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

HVAC/R Service Tech, Steamfitter (Pipefitter), Plumber

Work Zones in Preference Order:

Appleton Area (Green), Fond du Lac Area (Orange), Green Bay Area (Yellow)

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:

4-6

Welding Experience:**Tell us about any jobs where you've learned pipetrades relevant skills:**

I have basic power tool skills from Menards but nothing crazy related. Then when I worked with my pops I was in trenches making connections for drain tile but it was very repetitive. That gave me some experience in piping but I'm sure I would need to learn much more.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I lift 5 times a week and play basketball. I'm very coordinated which I use in work place and I'm physically suitable for most situations. I cut hair on my free time as a little side gig I have good hand eye coordination and steady hands as well which I know will help. At nights I've been posting YouTube videos and editing them myself it's a newer hobby but I am a quick learner on electronics. I enjoy going on hikes which furthers my being physically apical for these positions. I've worked with my pops in fields doing drain tile for a year as well.

Shift Availability:

Full-time, Overtime, Weekends, 2nd Shift (Nights), 1st Shift (Days)

Post HS Education:

Some 4-year college

Add'l Edu. Details:

It was a year in business at Stevens Point I was just taking gen eds and it wasn't much I got to take out of it.

What trades-related courses did you take in school?

Automotive Technology, Electrical Trades / Electronics, Math-Algebra, Math-Geometry, Math-Precalculus / Trigonometry, Woodworking / Woodshop

What construction software or technologies do you have training in?**Any Safety Certificates:****Add'l Details:****Why is an apprenticeship an attractive option to you?**

I want to learn and get really good at a useful career such as the ones offered. I wish to buy a fixer upper house in the near future and I want to further my knowledge and skills to help me do that. I enjoy the pathway up in the trades and I am confident in my ability to work my way up.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I meet a lot of people who work in the field and they recommend me to get into it

Add'l Details:

Why is an apprenticeship an attractive option to you?

As someone who is always eager to learn something new an apprenticeship seems like a good alternative to a full four year degree since I can earn while I learn. It is a way to set myself up for future success, developing a useful skill that will always be needed in society. I enjoy helping people in my community and this would be a way of, one day, actively doing just that.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I enjoy working with my hands. I want to develop a useful skill that will take me far in life.

What trades-related courses did you take in school?**What construction software or technologies do you have training in?****Any Safety Certificates:****Add'l Details:****Why is an apprenticeship an attractive option to you?**

I've always enjoyed learning and working with my hands, I did 4 summers with a small construction company. I like the fact that when you finish your project you can say you did that, there's skills to learn and master., The ability to learn new skills but also being in a job that I'm not necessarily doing the exact same thing every day that has no skill to it. I want to learn new things and be able to apply those new skills to my job and Life.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

My first job was a summer construction job, I love working with my hands and learning new skills., I used to work in construction for my first job, I've always loved working with my hands and learning new skills. My Uncle is also a big inspiration to wanting to work in trade, he works welding now and my brother is an electrician as well. I worked factory for 5 and 1/2 years not really learning any new skills and that's my other biggest push to learn new skills that cannot only be used at work but applied to in real life.

Why is an apprenticeship an attractive option to you?

I desire something more rewarding than the soulless logistical work I'm currently doing because it pays more. I'm finally in a position to pursue work that has meaning to me again and I want a union backing me because they care about me as a person beyond a valuation on a spreadsheet/P&L report.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've been some form of fabricator since I was in high-school doing wood/metal shop. I even went to the other side of it with drafting classes too. I enlisted as an army engineer and really enjoyed making something worthwhile with my labor ever since. After I got discharged I did a ton of metal fab and welding, but had to move jobs because of wages. I've missed actually doing something ever since. Pipetrades is of interest to me since it combines a lot of my amateur applicable skills like print reading, fabrication knowledge, welding, and troubleshooting.

Why is an apprenticeship an attractive option to you?

As a former Appraisal Trainee, I understand the value of having my education and experience paid for. One of the reasons I am no longer an appraisal trainee is because I would have to go back to school and get an associates or bachelors degree. The apprenticeship program is a far superior career choice for me because I get most of the education paid for and get paid better from the start. I also would enjoy a more physical job.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

The trades provide a rewarding, stable, and lucrative career. I've always been an active person and I don't enjoy sitting at a desk all day. I have experience in plumbing and I could not imagine choosing any other trade like electrical, roofing, or HVAC.

What construction software or technologies do you have training in?

Any Safety Certificates:

First Aid / CPR

What trades-related courses did you take in school?

Building Trades / Construction, Welding, Metals, Woodworking / Woodshop

What construction software or technologies do you have training in?

Solidworks

Any Safety Certificates:

OSHA 30, First Aid / CPR

Add'l Details:**Why is an apprenticeship an attractive option to you?**

I like the idea of earning money as you learn and being in a more hands on classroom and absorbing the knowledge of the instructors and putting it twords my work on the job site

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've always been interested in construction and being apart of the process. I've always loved working with my hands and feeling accomplished at the end of the day and seeing my work as I drive down the highway. Pipetrades interests me because of my previous experience in the welding field and plumbing really intrigued me while I was working as a carpenter for miron

Add'l Details:

Why is an apprenticeship an attractive option to you?

I'm currently in a plumbing apprenticeship & I enjoy it, but want to be challenged more with a quality Wisconsin based plumbing career because that is where I'd like to work after completing my apprenticeship & becoming a Journeyman (& eventually a Master) plumber.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I graduated from highschool & immediately moved to Florida to be an apprentice plumber, even though I don't have interest in living in Florida long term. I've been doing it for 2 years and would like to continue an apprenticeship in WI where I'd like to work long term

Add'l Details:

Why is an apprenticeship an attractive option to you?

I would like to get straight to work while learning a trade. I have found I pick up skills the best while active applying them.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I enjoy working with my hands and using my knowledge, to achieve results. I have been a truck driver for the last 5 years and haven't found it as fulfilling as when I had positions where I was working with tools. I have experience as a industrial maintenance technician, and found that the steam work was my favorite part.

Why is an apprenticeship an attractive option to you?

It allows me to learn a job while still providing an income for my wife and son.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Originally I wanted to go into Finance. I am still actively working towards my degree. However, with AI evolving rapidly, I feel like a safe bet would to work in a job that will forever be needed. Technology is advancing rapidly, and I'd like to not have to worry about job security. I have a wife and son I need to actively provide for, and they are my top priority. I like working with my hands and providing a service that will leave my bosses and consumers satisfied.

Building Trades / Construction, Math-Algebra, Math-Geometry

What construction software or technologies do you have training in?

Any Safety Certificates:

First Aid / CPR

Add'l Details:

Why is an apprenticeship an attractive option to you?

It's attractive for me because it is a way of learning a skill that is very useful not only for a job but in everyday life. I want to have a career that I can be proud of and also one that I can work in until I retire. I know I'm not overly young but it's something that I want to have for the rest of my career until the day I retire.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I have always done maintenance in the past and plumbing and HVAC have always been something I've wanted to get into as a career and not just something that I do here and there. I have family members that have been plumbers and they've always told me what a great career it was and I've just been trying to look into the right situation and this seems like the perfect situation for me.

Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

Plumber, Steamfitter (Pipefitter), HVAC/R Service Tech, Pipe Fabricator

Work Zones in Preference Order:

Green Bay Area (Yellow), Appleton Area (Green)

Relevant Experience Level:

None. Nothing even close-but I'm a hard worker and willing to learn!

Years of Full-Time Work Experience:

7-9

Welding Experience:
Tell us about any jobs where you've learned pipetrades relevant skills:

I haven't worked in the construction field outside of attending the carpentry program at NWTC. I'd have a lot to learn but through my work experience I have a good track record of being responsible and punctual.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I frequently help family with home renovation projects so I'm no stranger around some power tools. I've been through the carpentry program at NWTC but didn't pursue it out of the classroom. My work experience is primarily in restaurant industry so that could transfer to the skills of needing to be attentive and organized in a fast pace environment. Through that I've also become very attentive to detail to make sure service is up to standard. I believe these are qualities important in any job I take on to ensure all work is done to the best and fullest of my abilities.

Full-time, Overtime, Weekends, Part-time, 1st Shift (Days), 2nd Shift (Nights)

Post HS Education:

Other Relevant Courses & Certifications, Some 2-year college

Add'l Edu. Details:

NWTC Carpentry course, One year of college (basic credits)

What trades-related courses did you take in school?
What construction software or technologies do you have training in?
Any Safety Certificates:

First Aid / CPR

Add'l Details:
Why is an apprenticeship an attractive option to you?

I've always been a hands on learner because I very much prefer to see the work being done in front of me in order to understand it better. Books only teach you so much when you can't visualize the way their information is applied. Not only is it the way I learn best but I also have a situation in which I need to keep making money as I go to survive. Without a steady income bills would fall through which I can't let happen when my baby girl is being born this March. Developing skills and career while being payed is the best

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I had gone to NWTC after a year of college and joined the carpentry program. Through experience in that I realized I didn't really enjoy doing it for work but while there I was able to visit various other trade programs to get more insight about the work they do. Plumbing and Electrician programs seemed a much better fit to me and I was much more interested. I've been hesitant to start and looking for an apprenticeship in the past due to frequently moving around Wisconsin for the past 3-4 years. Now things have changed and I have a child on the way this March. I won't be traveling as frequently and would like to build my career in pursuit of supporting that family along with my own self interest in the trade. It would mean the world to secure a future in plumbing.

Woodworking / Woodshop, Metals, Welding, Math-Precalculus / Trigonometry, Math-Algebra

What construction software or technologies do you have training in?
Any Safety Certificates:

First Aid / CPR

Add'l Details:
Why is an apprenticeship an attractive option to you?

I've never done well in a classroom only environment. In high school my favorite classes were machine tool, welding, and wood working. I learn so much better in a hands-on setting.

I'm also tired of just working "jobs". I want a career. And the "earn as you learn" format of a apprenticeship work perfectly for my family and I. I don't have the knowledge or

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Throughout my years working for Disney I've spoken to many individuals in the Engineering department that work for a variety of trades. My current job can be very monotonous and unfulfilling. I've been interested in pursuing an apprenticeship in the pipetrades because I would prefer to have a more hands-on career. Unfortunately with the low union pay in Florida and extremely high cost of living, I cannot afford to lose my current job.

My wife and I are planning to move to Wisconsin next year. My goal is to start a career journey that allows me to provide a comfortable life for my family.

I currently work at a company called BrandSafWay building industrial grade scaffolding. The only job I have had that is applicable to the pipe trades would be scaffolding. It's most applicable to the pipe trades because I work early and long hours daily, which includes a lot of physical labor. As well as being on call and having to be responsible and prepared to work at almost anytime.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I work for a company called BrandSafWay building industrial scaffolding. Throughout my career building scaffolding I have learned the importance of hard work, reliability, and safety. Which I believe will help me jumpstart a career as a plumber. Outside of work I like to be a handy man at home with house projects and car projects. I would say these skills are transferable to construction because I'm working with my hands, tools, and I'm required to test my current skills while learning new skills. Working my way through new projects creates a sense of self progression which is very relatable to skills I will acquire

Add'l Details:**Why is an apprenticeship an attractive option to you?**

An apprenticeship in plumbing is an attractive option for me because I believe it's a hard skill to acquire. Which in return makes for a very respectable, honest career choice. An apprenticeship is an attractive career option for me because of how stable it is. Not only financially but I feel it mentally sets you up for the long run as well. With having time spent in a school setting as well as a day to day learning experience on the job. I truly believe having the knowledge of an experienced tradesmen is important and will be a key

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I come from a large family tree of tradesmen. Most importantly I want to pursue a respectable career. A career that takes hard work and dedication. What interests me the most about getting into the pipe trades. Is knowing I will obtain knowledge I can carry with me for the rest of my life. With the hopes of I can pass my skills down to my children. My family is heavily involved in the construction industry which also is a major influence for me. I have been working construction since 2023 building and demolishing industrial grade scaffolding. As well as gaining some years of experience driving forklifts, and telehandlers.

Add'l Details:**Why is an apprenticeship an attractive option to you?**

I like showing up to work and doing different things or being challenged with different tasks. I want to be part of a good trade and have a good work like balance with good benefits., Get paid to learn. Good benefits. And retirement while making good money. More family friendly than other jobs.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Something I've been interested in for a while. I recently started working construction and like it a lot. I'm currently moving to Appleton and want to be in a good permanent career with good benefits. While also being a good investment to an employer., I like to work construction. I've been trying to get into a trade I want to put my time into. I have construction and welding experience but no degrees. And I want to explore this path.

Add'l Details:

Tell us about any hobbies that have boosted pipetrade-relevant skills:

One of my hobbies is fishing, when going fishing it helps with my patience. When you are out on the lake you can not rush and you have to stay calm and under control. With this hobbie I have transferred this to my daily life.

Another hobbies I have to weight lifting. With this hobby it works on my mental strength and physical strength. I have to have the mental power to do more and push my limits to get better. With pushing myself it helps me physically, I have been able to get stronger and be able to lift more than I thought I ever would., I enjoy doing small home projects

Why is an apprenticeship an attractive option to you?

I want a good way to jump start my career. This is a great way start and advance my opportunity. I have heard great things from people I know about this program. It is a great way to improve my skills and learn new things. I am willing to push my self to get better., An apprenticeship is a good choice for me because I can learn the trade while working and earning money. I like that I can get real hands-on experience instead of just learning in a classroom.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

When I was in high school I took a welding class. I enjoyed the class and excelled in lots of the skills. After that class I always thought about it and how I would love to have a career in this industry. I have tried different jobs and I have always came back to this. I know this is something I would enjoy and stay with long term., I have always been drawn to hands-on work that combines problem-solving, technical skill, and tangible results. The building trades, in particular, offer the satisfaction of creating something lasting and essential for communities. I admire the teamwork, precision, and pride that go into every project, and I value the opportunity to develop specialized skills while contributing to infrastructure that people rely on every day.

Specifically, the pipetrades interest me because of their critical role in keeping buildings functional and safe. From installing complex systems to ensuring they operate efficiently, the work requires both technical knowledge and attention to detail. I'm motivated by the idea of working in a field where my efforts directly impact public health safety and

Add'l Details:**Why is an apprenticeship an attractive option to you?**

I'd like to get right into the work field and possibly go to college later on the further my career, The apprenticeship program is nice for me because, I like the idea that you can be enrolled in both school learning your skills for the job and also be actively working on a job site as well. I also like that you don't have to pay into school much more past books and supplies coming from a lower income family that would help a lot., I like the idea of being able to work on the job while at the same time being able to go to school and learn

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I graduated high school and got an insulation job and watched as all the other crews did their part of putting the house together and was always interested in the plumbers, What interests me the most is working with my hands and watching the project build day by day. I enjoy knowing that I am a part of a crew who can work together and become something big., What interests me the most is working with my hands, and being a part of a group where we can all work together and be efficient. A career in the pipe trades has always been my thing ever since high school!

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I am currently an under water welder. I have experience welding both top side and under water. I also have experience burning top side with oxy acetylene and burning underwater in zero visibility., Use to be an underwater welder so I love to dive and have down a lot of underwater construction., Always have liked to tinker and fix things. From my teenage years construction always peeked my interest. Especially looking at the beginning product then seeing the results of the finished product.

Why is an apprenticeship an attractive option to you?

To be able to learn on the job by an experienced tradesman. I have always learned better hands on., The reason is because I need to learn a new job but also be able to provide for my family at the same time!, I'm a hands on kind of learner versus learning from a PowerPoint.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I'm currently an underwater welder. I am looking into becoming a plumber because I recently had to get a sewer line replaced on my house and I was intrigued by the whole process after watching the plumber., Have always been interested in learning plumbing! Had a plumber come redo a sewer line in my house and wanted to help him put it in but was not able to ever since then have been curious about plumbing., In my second house I owned I had to have the whole sewer line ripped up and replaced to the city connection. I sat at the window and watched them lay pipe. I was really intrigued watching the plumber.

Why is an apprenticeship an attractive option to you?

Real world experience and skills that I wish to obtain. I struggled with direction in terms what I want early in my life but I have learned what gives me the most sense of accomplishment is physical work that gives important skills that I can use even outside of work. I went through multiple careers that I thought would suit me and this one came to mind as something I could do for the rest of my life. Although I am not the smartest or fastest or experienced I am very dedicated tend to not give up. I always want to learn

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

The skills involved are something i find very important i want to useful and needed, I have always struggled in school when it comes to higher learning. Always been good with my hands, strong loyalty and ability to work with and work hard with others. I enjoy physical labor. My previous efforts in other jobs like retail, warehouse, assembly line work I have always enjoyed. But it never felt like meaningful work career for a future to me. It wasn't until I started going to church for a couple of years that I have been recommended to by fellow church members that are current or former plumbers/welders. To look into getting into this job. That it would match my hunger for more and want to provide and have a job that i can be proud of. Work I could be proud of. To me the trades feel like being a productive member of society. I aspire to have a career like my fellow church member in which I can be proud of just like they are.

I haven't really done much I've watched a lot of videos so I have some what of a understanding but the only experience I have is fixing my toilet at home and underneath the sink, Wisconsin builders supply I did lots of framing there it was mostly trusses. I read a lot of blueprints there and did a lot of measuring. I also am currently with Holtger Bros Inc where I do fiber optic cable. I work underneath the power lines so we hang fiber on strand and then lash them both together so it sits tight on the pole.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I exercise a lot and I lift weights about 5 times a week I also like to hangout with friends and relax and watch football and UFC and other sporting events., One of my hobby's I like to build tables and signs for my buddy's or even to keep for myself. I can relate that to construction because I use a tape measure and using a level to make sure everything fits well and looks good.

Shift Availability:

Full-time, Full-time

Post HS Education:

No, No

Add'l Edu. Details:**What trades-related courses did you take in school?**

Woodworking / Woodshop, Math-Algebra, Math-Geometry, Welding, Woodworking / Woodshop

What construction software or technologies do you have training in?

CNC, CNC

Any Safety Certificates:

OSHA 10, OSHA 10

Add'l Details:**Why is an apprenticeship an attractive option to you?**

I work really hard and I love to learn and I'm always eager to learn more, Because I get too learn hands on and have someone teaching me something I'm actually very interested in and wanting to get good at. And not only it's something that's hands on it's a good way to make good money and be able to support my family and create a life.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I have family that are in the trades and as a kid I've always had a big interest in plumbing and I'm really eager to learn this trade, I'm very interested in welding I like to read blueprints and I did a lot of research on pipe fitting and I wanna get started as soon as possible.

Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

HVAC/R Service Tech, Plumber

Work Zones in Preference Order:

Appleton Area (Green), Green Bay Area (Yellow), Green Bay Area (Yellow)

Relevant Experience Level:

None. Nothing even close-but I'm a hard worker and willing to learn!, None. Nothing even close-but I'm a hard worker and willing to learn!

Years of Full-Time Work Experience: 4-6, 7-9

Welding Experience:

Tell us about any jobs where you've learned pipetrades relevant skills:

None., None.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I'm a runner. I like moving around quite a bit and would appreciate a physical job. I also like to read books and write stories for fun. That no doubt has helped me improve my communication skills over the years, something I'm sure would help in the construction trades., I enjoy running and reading. Running allows me to use my body well on the job, and reading, of course, makes it easier for me to learn on the job.

Post HS Education:

Bachelor Degree, Bachelor Degree

Add'l Edu. Details:

BA in English, BA in English

What trades-related courses did you take in school?

Math-Calculus, Math-Algebra, Math-Geometry, Math-Precalculus / Trigonometry

Why is an apprenticeship an attractive option to you?

Feedback is typically more immediate than written feedback you could receive as a humanities major in college. It's easier to track your progress in developing certain skills. It's more satisfying in that regard. I like to know when I am doing well on a particular task rather than just rationalizing to myself that, for example, my leadership abilities or writing is actually getting better when that may just be my own perception. I like that, as an apprentice, I would get to deal with real things and know that it is not just my own

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I'm interested in the practical nature of the building trades. I also appreciate the opportunities to troubleshoot problems as they arise., I want to work somewhere I have the opportunity to continue to learn on the job.

What construction software or technologies do you have training in?

Any Safety Certificates:
