

Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

HVAC/R Service Tech

Work Zones in Preference Order:

Appleton Area (Green), Green Bay Area (Yellow), Fond du Lac Area (Orange)

Relevant Experience Level:

None. Nothing even close-but I'm a hard worker and willing to learn!

Years of Full-Time Work Experience:

4-6

Welding Experience:

Tell us about any jobs where you've learned pipetrades relevant skills:

In my previous jobs, I've built skills that connect well to the pipe trades. As a Case Manager, I learned how to solve problems under pressure, communicate clearly, and coordinate multiple tasks all essential on a job site. Working in accounts payable strengthened my attention to detail and ability to follow strict processes, which translates to working accurately and safely with technical systems. Managing daily operations also taught me leadership, time management, and how to stay focused under pressure. These experiences prepared me to work effectively in

Add'l Details:

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I've always enjoyed working with technology building things, troubleshooting, and figuring out how different parts work together. It's taught me to be patient, detail-oriented, and good at solving problems, which are all useful in the trades.

I also like doing hands-on projects and small repairs at home. It's helped me get comfortable using tools, thinking through steps, and staying focused until the job's done skills I know will carry over well into construction work.

Why is an apprenticeship an attractive option to you?

An apprenticeship interests me because it's a practical way to learn I get real, hands-on experience while earning a paycheck, instead of only studying in a classroom. Learning directly from experienced people in the field feels like the best way to build skills that actually matter on the job.

It also gives me a clear path toward a stable, long-term career. I want to develop skills that are always in demand and give me opportunities to grow over time, and an

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Coming from an IT background, I've spent years solving problems in a digital space, but I realized I want a career where my work is more hands-on and has a visible impact. The building trades offer that balance problem-solving, technical thinking, and real results I can take pride in.

The pipe trades interest me because they combine precision and planning with practical skills, and the work directly supports how people live and work every day. It's still challenging and technical, but in a way that feels more tangible and rewarding.

Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

HVAC/R Service Tech, Pipe Fabricator

Work Zones in Preference Order:

Appleton Area (Green)

Relevant Experience Level:

None. Nothing even close-but I'm a hard worker and willing to learn!

Years of Full-Time Work Experience:

7-9

Welding Experience:

Tell us about any jobs where you've learned pipetrades relevant skills:

I worked at Cornerstone Woodworking Co building and installing cabinetry.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

My favorite way to spend my free time is playing strategically deep board and card games with family and friends. I would say this has helped me to develop good critical thinking and teamwork skills which would help me with problem solving and collaboration on the job. I regularly get a group of friends together to play round-net (similar to volleyball) which has helped me to develop good social and leadership skills. Lately I've been doing a lot of projects around the house as well which requires a lot of learning and research to get things done right.

Associates in Marketing

What trades-related courses did you take in school?

Math-Algebra

Why is an apprenticeship an attractive option to you?

The ability to learn and improve my skills on the job, while getting feedback and advice from people who are in the field sounds right up my alley. I learn better by doing.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

There are a few reasons I'm interested in this career. The most important reason would be the ability to provide for my family. My grandfather Don Hermesen was in the trades, and speaks very highly of the opportunity. After talking with him I've realized that my willingness to learn and ability to work hard would take me far in this field. It's rewarding to work with my hands, and to see the results of my work right in front of me.

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:

1-3

Welding Experience:

Tell us about any jobs where you've learned pipetrades relevant skills:

One of the ways I can explain is that my automotive skills could be applied to solving real world problems in the pipe trade. How I see this is that you might have to diagnose issues. Just like on a vehicle that has a problem or something that may be wrong when it comes to piping. Overall, this could show that there is a strong desire for working on challenging issues. I think that my ability to adapt and maintain a high standard of work could make me a valuable asset in the pipe trades.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

One of the hobbies I have are working on vehicles. I have also had the opportunity and interest to do my own vehicle work. It mainly stems from loving to do stuff hands on. Anytime I have an opportunity like this I always try to take advantage of it. I think that hands on stuff like this is always inspiring to other trades.

What construction software or technologies do you have training in?

Any Safety Certificates:

Add'l Details:

Why is an apprenticeship an attractive option to you?

One of the reasonings is because it offers a financially stable way of handling the learning and hand on process. If this option were not available, it would be a struggle for me to get into any kind of trade. Also, going off what I was saying before, I think learning hands on also helps to retain more information about the trade. There has always been more of a spark for me having to do the activity hands on. An apprenticeship is the friendliest option for me.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

My interest mainly comes from enjoying hands on work. I absolutely love doing problem solving. I also like the fact that not every job is the same. It is a mental and physical aspect that is needed for every job. I like to use skills that I can attain through this kind of work to see a good result from it. It has always just been satisfying to me which is why I like it.

I am also looking at this to greatly advance my career path. I am looking for a very good and stable job. I am looking for a job that offers good benefits and securities. This is why I am willing to go above and beyond expectations to obtain this. I am willing to take as much time as needed to get into this career path.

Add'l Edu. Details:

Technical diploma for Auto collision repair and refinishing technician - Fox Valley Technical College I-car MIG welding

What trades-related courses did you take in school?

Automotive Technology, Building Trades / Construction, Electrical Trades / Electronics, Drafting and Design, Construction Technology, Math-Algebra, Math-Geometry, Math-Precalculus / Trigonometry, Metals, Welding, Woodworking / Woodshop

What construction software or technologies do you have training in?

AutoCAD, CNC, Inventor

Any Safety Certificates:

Add'l Details:

Tell us about any hobbies that have boosted pipetrade-relevant skills:

One hobby is show water skiing, for the last 9 years I've skied on a team. This includes solo and team acts. Skiing is very physical and requires a lot of attention to detail and patience both on water and off. It also gives me a high safety awareness due to the equipment and sites that need to be maintained and checked over every time I go out on the water.

I also enjoy working on my cars, using tools, knowing what I need. It also helps me troubleshoot problems and understand how things fit together and work with or without

Why is an apprenticeship an attractive option to you?

An apprenticeship program is a good option for me because I am a very hands on learner and it allows me to gradually improve my skills. My previous job allowed me to start as a youth apprentice and also work through a 2 year degree with a co-op. This worked well for me to be able to understand the skills I was learning while being able to use them which is a way that I personally am able to progress very easily.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Since High School I've known that I want to be able to work with my hands, being able to see the results of my work when I'm done. I have a background in auto body collision repair which gave me a lot of experience with welding, using hand and power tools and working with precision measuring to make panels fit. I really enjoyed the hands on and detailed side of the work. With the building trades I get the opportunity to use the same skills I have but in a different scenario. Joining the pipe trades rather than sticking with auto body would allow me to keep the aspect of craftsmanship that I love but using it for something bigger.

Job most related would be home remodeling while living in Florida. My current job at McCain foods there's lots of working with tools and repairing equipment. As a soldier I also had some time with tools and maintenance that could transfer over.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

Right now my hobbies are mechanical and sports based. E scooters are my favorite hobby as I get to ride and enjoy the riding and mechanical side to it. I love taking it apart and seeing how the battery compartment is packed or how difficult it was engineered to change a tire. I enjoy cars as well, although a much more expensive hobby to mod my Mustang. I enjoy more of the mechanical side to cars and learning how things work. I also enjoy exercising as it takes discipline. Trick scooters and bikes I enjoy as well. When I'm not outside or working I enjoy educational videos.

Shift Availability:

Post HS Education:

Some 2-year college, Other Relevant Courses & Certifications

Add'l Edu. Details:

I have some certificates for Fire fighting. Hazmat and building inspector.

Why is an apprenticeship an attractive option to you?

As much as I love to learn, I'm more interested to learn while being able to work with my hands. I love working and nothing brings me greater joy than a hard day of work. I just didn't find that from school alone.

What trades-related courses did you take in school?

Math-Algebra, Math-Precalculus / Trigonometry

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I grew up remodeling houses with my parents, I joined the army and enjoyed the discipline and order from being an Infantryman, but wished for a skilled trade. I enjoy being handy now and working with tools. I believe I would benefit a team greatly by learning along side them and putting that discipline and desire to work.

What construction software or technologies do you have training in?

Any Safety Certificates:

First Aid / CPR

Why is an apprenticeship an attractive option to you?

I love a job that provides me with something new every day. I am humble to admit the things I don't know and will work hard to apply myself when presented a new challenge on the job. I enjoy a team atmosphere with a common goal. I believe tradesman are the backbone to our country and I will proudly work to provide the best for American industries

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I want to learn to be self-sufficient with residential construction. I enjoy a job that I can learn something new every day and there are avenues to grow within a company. I am pleased about the benefits of long-term union workers as they are compensated very well. I came from a career change being a firefighter EMT and I enjoy that the trades offer consistent scheduling compared to previous work. As somebody willing to work OT, the trades provide good opportunities and compensation for workers

Why is an apprenticeship an attractive option to you?

Because I am interested in learning about the HVAC career path and being an apprentice would teach me all about this job and help me to lead myself into growth with this career.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

It was always high up on the "What do I want to do" list for me. I started thinking more about it my junior going into senior year of high school. I have decided this because of the very good pay in these job's and the good things I hear about the benefits and the environment in trade job's. Specifically the HVAC trade was recommended to me by a youth apprenticeship coordinator named DJ Kloida. He gave me a ton of info on this and it made me very excited to start my career. Due to set backs and lack of communication it is a little bit late that I am taking initiative on this but I am very interested in starting my career as an HVAC worker as soon as possible!!!

Post HS Education:

Bachelor Degree

Add'l Edu. Details:

Degree Major - Supply Chain Management

What trades-related courses did you take in school?

Math-Calculus, Math-Algebra, Math-Geometry, Math-Precalculus / Trigonometry

What construction software or technologies do you have training in?

Business ERP Systems and some exposure to CAD software

Any Safety Certificates:

First Aid / CPR

Add'l Details:

Tell us about any hobbies that have boosted pipetrade-relevant skills:

In my free time, I enjoy woodworking, lawncare, landscaping, home renovations, and repairing my truck and motorcycle. These hobbies have built my problem-solving skills, attention to detail, and comfort with tools and materials. All directly transferable to the construction trades. Even fishing has helped me develop patience and focus, qualities that support steady, precise work. Together, these activities show my passion for hands-on projects and strengthen the skills needed for a career in the trades.

Why is an apprenticeship an attractive option to you?

An apprenticeship is attractive to me because it lets me learn hands-on while still earning a steady income that can help support my wife and kids. I've realized through past supply chain work and hobbies that I thrive on problem solving and practical work. An apprenticeship provides structured training, mentorship, and stability, while allowing me to build a long-term career I can take pride in.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've worked in supply chain roles for several years, but I realized I'm most fulfilled when I'm problem solving and working with my hands rather than sitting behind a desk. I want a career where I can build, fix, and contribute directly to projects in a practical, hands-on way.

A close friend in UA 400 recommended the pipe trades to me, and after hearing about the training, teamwork, and pride he takes in his work, I thought it could be a great fit. His experience, along with my own desire for hands-on problem solving, motivated me to look into a career in the building trades, specifically in the pipe trades.

Tell us about any jobs where you've learned pipetrades relevant skills:

The jobs that I've had never had anything related to pipe trades but I have taken some classes related to HVAC at lakeshore technical college

Tell us about any hobbies that have boosted pipetrade-relevant skills:

Some of my hobbies include fishing, being with friends and family, driving, kayaking, and building things. 2-3 of these can kinda relate to construction trades being on you look at it. For instance driving is one because is trades you do need a license to operate a vehicle if trying to get to and leave work but also if asked to drive a work vehicle then one is required. Then we have being with friends and family and when on job sites most guys and girls see everyone as friends or even some as family. Building is the obvious one I do like to build but mainly with wood.

Add'l Details:

Why is an apprenticeship an attractive option to you?

An apprenticeship is the most appropriate option for me because it would still help me get guidance and the learning experience that I will need in the near future.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

What mainly interested me about building trades is the hands on work, I've always been a hands on worker and like working with my hands because then I feel like I can understand what I'm doing rather than just looking and typing something or writing. Another reason I was interested is there's not many people going into trades anymore which honestly surprised me but I've also come from a family of trade workers. I have family members that have worked in construction and roofing but they also do their own projects which sometimes include them doing piping or even electrical at times. The main reason I wanna go into HVAC is because I believe there is a lot of benefits with it such as if a personal heating or ac problem occurs then I would possibly be able to fix it on my own or even help some who is having the same issue.

Any Safety Certificates:

Add'l Details:

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I love working on house projects, such as building shelves, painting, and installing trim, as well as working on my car and learning how to be self-sufficient.

Doing things with my hands and learning while I try is very motivating for me. I use every opportunity to "get my hands dirty" to learn as much about projects as I can.

Why is an apprenticeship an attractive option to you?

The ability to learn while I earn and be able to start obtaining skills from day one is the largest attractive option for me.

I am also very drawn to learning from a journeyman and having that expert there that I can watch and absorb knowledge from.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I have heard a little about the pipe trades since my uncle is a pipe fitter. I also really enjoy the idea of working with my hands and being able to build something lasting that I can be proud of.

I originally went to college, but have found that I am drawn to be in a field where I can help people and work in a team to accomplish something tangible together.

Business administration - Supply chain management emphasis.

What trades-related courses did you take in school?**What construction software or technologies do you have training in?****Any Safety Certificates:****Add'l Details:****Why is an apprenticeship an attractive option to you?**

I feel that I learn best when working beside someone experienced. I've worked with a lot of people who have done apprenticeships and most have had positive things to say about the experience. I would also hope that one day I would be able to mentor someone who was starting out in the trade.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I have always enjoyed working with my hands, building things, and repairing things. There is nothing more satisfying to me than repairing something, turning it on and seeing it work. I have done a little bit of work with HVAC systems in the past. Currently I'm looking to go full time into HVAC work.

Years of Full-Time Work Experience: 10+**Welding Experience:**

Stick - Some Knowledge, MIG - Some Knowledge

Tell us about any jobs where you've learned pipetrades relevant skills:

While in the U.S. Coast Guard as a Damage Controlman, I gained extensive experience in areas directly related to the pipe trades. I regularly installed, maintained, and repaired water, fuel, and fire suppression piping systems. I worked with various materials, including steel and copper, and became skilled in welding, cutting, and brazing. My job also required me to read blueprints, follow safety protocols, and perform emergency repairs in high pressure situations.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

One of my main hobbies is working on mechanical projects and repairs, which has helped me develop strong problem solving skills, attention to detail, and confidence using hand and power tools. I also enjoy staying physically active through fitness and outdoor activities, which keep me in good shape for the physical demands of construction work. These hobbies have taught me discipline, patience, and how to work safely and efficiently, skills that directly transfer to the construction trades.

Why is an apprenticeship an attractive option to you?

An apprenticeship is an attractive option because it offers the opportunity to earn while I learn, gaining real-world, hands on experience under the guidance of skilled professionals. I value structured learning, and combining classroom instruction with practical on-the job training is the ideal way for me to build long term, high demand skills. Coming from the Coast Guard, I'm used to learning by doing and working as part of a team, so the apprenticeship model fits naturally with how I succeed and grow. It's also a

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've always been drawn to hands on work that requires precision, problem-solving, and a strong work ethic, which is why the building trades appeal to me. The pipe trades, in particular, interest me because they combine physical skill with technical knowledge and offer the chance to work on systems essential to daily life. I'm motivated by the opportunity to learn a highly respected craft, take pride in quality work, and be part of a trade that plays a vital role in residential and industrial infrastructure.

My current hobbies I like to do now are pretty physical. I work as a Service Shop Technician. There is always something new I can learn in my job. I really like to learn and be challenge when I'm doing something new. I also like going to the gym. Keeps me active and healthy.

The biggest thing I've done and something I felt pride about and that can transferrable is how I was able to fix my moms lawn. We have a pretty back yard and it was just full of

Why is an apprenticeship an attractive option to you?

If I'm being honest, I just didn't think college was for me. Thankfully I've been able to experience many jobs. And I realized two things about myself. I like to be problem solver and I like to physically move and work.

Once I learned from the apprenticeship program. I believe it was probably one of the best options I have. And like I stated previously, I will like to use this experience and

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I come from a family that works in the trades. My dad is a plumber and my brother is experienced in property maintenance and construction work. So I wish to follow the same route. I also like working physical jobs better than staying in a cube stuck on a computer. That's the reason why I'm generally interested in the trades.

I'm specifically focus on HVAC because, like any other trade, its going to be needed for as long as this world lives. I think HVAC is very crucial specifically where you have cold winter seasons and hot summer seasons. So if a HVAC system breaks, people will always NEED it to be fixed. And where there is work. There is money. I hope to use the skills and knowledge I learn in the program to create something for myself later on.

Add'l Details:

Why is an apprenticeship an attractive option to you?

You get paid to learn and people are expecting you to not know much instead of going into a job and being expected to do everything a journeyman can. You will get a more hands on training than basic book skills and how much you can remember on paper and I'm a person who is a hands on learner I can retain more information as someone physically shows me how it's done instead of describing it. Another reason is you really get to know the ins and outs of a trade with 5 years of training

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I got interested in the trades at a young age when I started working construction around the age of 15 and when I turned 18, I became a structural welder and I've loved it ever since. I'm very interested in the pipe trades because my lifelong dream is to become a rig welder on the pipeline, so I was looking into possibilities to get my foot in the door and I came across the local 400. I have spoken to a few people in this local and they seem to love it and that what brings me here today interested in applying for the apprenticeship for the steamfitters.

What construction software or technologies do you have training in?

AutoCAD

Any Safety Certificates:**Add'l Details:****Why is an apprenticeship an attractive option to you?**

I like the idea of learning by doing, not just sitting in a classroom. With an apprenticeship, I can build real experience on the job while also getting formal training from experienced professionals.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I first became interested in the pipe trades when a friend told me about steamfitting. I looked it up and thought it sounded like a great fit for me. Steamfitters work on important systems that keep buildings running, like heating and cooling. It's a job that takes skill, hard work, and teamwork, and I want to be part of something that makes a difference.

I want to take advantage of my youth, to develop a skill and be earning a considerable amount by my mid-20s. I want to raise a family and be able to provide for them in a safe area, with a stable and fulfilling career., I want to take advantage of my youth and put time into learning a skill that serves my community. I want to support a family and foster new, strong bonds in a state where living is less expensive.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

My family has many tradesman and during high school I lacked direction. I decided to join a running-start program during my junior year and earned my AA in HVAC at high school graduation. I found HVAC to be a fulfilling and interesting way to serve my community. Now I'm ready to work and move to a state where living is less expensive., My family is made up of many tradesman. In high school I was drawn to the trades, so I decided to join a trade school program and earned my AA in HVAC. I find HVAC is a fulfilling and interesting way to serve my community.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

In my free time, I enjoy working on hands-on projects like fixing things around the house, assembling furniture, and helping with basic plumbing repairs, which all relate directly to the skills needed in pipefitting. I've always had an interest in figuring out how things work and finding efficient ways to put things together, which has strengthened my attention to detail and mechanical thinking.

Why is an apprenticeship an attractive option to you?

An apprenticeship is important to me as an adult because it gives me the opportunity to learn a skilled trade through real-world experience while earning a paycheck. This practical, on-the-job learning approach is ideal for me because I'm ready to work hard, grow my skills, and move forward in a career that offers long-term stability and advancement.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I want to become a pipefitter because I enjoy working with my hands and solving problems in a way that produces real, visible results. The pipefitting trade offers a unique mix of physical labor, technical skill, and precision, all of which align with my strengths and interests. I'm drawn to the idea of building and installing systems that are essential to the function of buildings, factories, and infrastructure.

Another reason I want to pursue a career as a pipefitter is the opportunity for long-term growth and stability. The trade offers strong job security, excellent wages, and the chance to continue learning through on-the-job experience.

Why is an apprenticeship an attractive option to you?

With living in an apartment with my fiancée i have bills each month including a car loan. Taking time off or working part time is not an option for me. Being an apprentice is my best route for starting a career because then I learn on the job and do not have to worry about missing paychecks or short paychecks.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Since high school I've just been working factory production jobs. I'm turning 27 this year and it is time I invest in a career where I can advance in. I am also getting married and have major life goals I would like to meet as in purchasing my first house with my future wife and live comfortably while doing so. I am a DYler and like to fix things my self, like my car. My main example related to this apprenticeship is the bathroom sink in my apartment was backing up. So I went underling the sink and removed the drain plug and the U Piper I believe it's called and cleaned out the hair and gunk in the sink, ever since it's been draining like normal.

Appleton Area (Green)

Relevant Experience Level:

None. Nothing even close-but I'm a hard worker and willing to learn!

Years of Full-Time Work Experience:

7-9

Welding Experience:

Tell us about any jobs where you've learned pipetrades relevant skills:

I have not worked any jobs that would be related to the apprenticeship. Since high school I worked in a iron castings foundry, food production and a paper mill.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

My main hobby is my car. It's where I learned how to use a variety of hand tools and Power Tools. I've pulled engines, done turbo work, exhaust work and general maintenance. The reason that I'm not pursuing an automotive degree is I don't want to dislike working on cars since it's something I like to do with my friends and family and I worry if it was my full time job I'd lose the passion of doing my own work on my car

Add'l Details:

Why is an apprenticeship an attractive option to you?

I am living in my own apartment with my fiancé. So that means bills, and a car loan payment. Apprenticeships is, what I believe, a very good option for someone in my situation. I will be working while being trained and not having to worry about missing paychecks while pursuing my career.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've been working production jobs since high school. As I'm approaching 30 years old in a few years, getting married, and have major life goals as in purchasing a house it is time for me to invest in a career. I've always liked working with my hands. As a kid I'd help my dad work on cars, different carpentry projects around the house, and with my apartment I've taken it up to fixing minor things. Example, our bathroom sink was backing up so I took out the drain stop and U Pipe I believe it's called and unclogged all the hair and other gunk in it, not it runs like new. That is what I believe made me think I'd enjoy plumbing. I also crave an interactive job that challenges me and leaves me satisfied.

Add'l Details:

Why is an apprenticeship an attractive option to you?

an apprenticeship would give me the opportunity to dive headfirst into a brand new opportunity that would bring me, steady work, financial stability, more responsibility, and accountability, and the chance to work really hard, An apprenticeship attracts my interest for many reasons. The main reason being stability, and an opportunity to grow and work hard. I'm very fond of the idea of constantly learning, and in a different environment. Working towards financial stability, in a career path that gives me options.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

My interest in this career comes from the main point of stability. I am a hands-on, personable, confident, young man, looking to place oneself where I can find stability, structure, and hard work. I have always made it a point to work more than one job at a time. But I would love to work in a Career., A career in the trades would allow me an opportunity to dive headfirst into stability, structure, hard work, and financial stability. Made it a point to have more than one job at a time, but it would be amazing to have one solid career.

Add'l Details:**Why is an apprenticeship an attractive option to you?**

I want to continue my education for a better career and don't mind going back to school to further my education for a greater future

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've always been interested in the trades because I grew up around them—my dad worked as a finished carpenter, and from a young age, I was exposed to the satisfaction that comes from working with your hands and seeing a project come together from start to finish. That early exposure sparked a respect for skilled labor and the pride that comes with doing a job well. More recently, I've developed a strong interest in the pipetrades through my work cleaning and servicing storm and sanitary sewers. That hands-on experience opened my eyes to how critical plumbing systems are to public health and infrastructure, and it gave me a real passion for the trade. I enjoy problem-solving, working in a physically active job, and being part of a team that keeps essential systems running safely and efficiently.

HVAC/R Service Tech

Work Zones in Preference Order:

Appleton Area (Green), Fond du Lac Area (Orange)

Relevant Experience Level:

None. Nothing even close-but I'm a hard worker and willing to learn!

Years of Full-Time Work Experience:

10+

Welding Experience:

Tell us about any jobs where you've learned pipetrades relevant skills:

The only skill I think I have learned that is related is problem solving for a third party company. When I worked at Amazon I use to work with a third party company and help them solve problems so they could continue to be operational for amazon's bussiness.

Problem solving is a huge component to most issues in trades from what I understand and it is something that I have always had an ability of being able to do. Working doing mind numbing labor would be the only other skill.

Shift Availability:

Post HS Education:

Bachelor Degree

Add'l Edu. Details:

Social Science Education major

What trades-related courses did you take in school?

Math-Algebra

What construction software or technologies do you have training in?

Any Safety Certificates:

First Aid / CPR

Add'l Details:

Tell us about any hobbies that have boosted pipetrade-relevant skills:

My hobbies mainly include golfing and picking up skills on the technology side (Video game design, Animation) The ability to learn new skills is something I have always desired. I have always been the type of person that likes to learn.

My goals as far as the hobbies and this job are to learn the skills enough to eventually teach them. I would love to learn enough the pipefitting trade to teach it your classrooms. I also would like to eventually educate people in my hobbies via online

Why is an apprenticeship an attractive option to you?

I already have a 4 year degree that I don't really use, because I prefer to work with my hands rather than behind a desk. This apprenticeship would allow me to invest in myself and still be able to work with my hands.

I have always wanted to try the trades. I just thought I wanted to teach more. When I began teaching I realized that I do love it, but prefer teaching adults rather than kids. In

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I received my degree in education. While working in the school environment I realized I preferred working with my hands and learning new skills. I stayed in the warehouse sector after graduating because of this and the covid-19 pandemic. I regret not trying trades out as I always figured it was good skills to have and know.

I want to be in a union again. Where there is standardized everything. Where there is support in finding work if a lay off happens. Where skills are built from the ground up with a good foundation. A Career in the pipe trades seems to correlate with these goals.

I debated about going back to school, but already have a degree I don't use. Would rather work at this point in my life than take on more debt.

The apprenticeship interest me because I'm looking for something more I want a career . I wasn't sure for awhile exactly what I wanted to do but I knew I was good with my hands. After talking with the guys from veterans plumbing and working alongside them, I realized this trade could be something that I would be interested in. So after looking more into it I realized i could see myself doing this. I don't mind working inside outside. I don't mind getting dirty. And im looking for something I can do for a while were I'm

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Been working alongside some of the guys from veterans plumbing. I find it very interesting and really easy to pick up on things. They suggest to me that i should try getting an apprenticeship though the union., I'm looking to a career as a plumber I have worked alongside many in the past two years. I've been at my current job, many of the guys from veterans, plumbing and maritime plumbing. It's a trade that seems to come very easily to me and a trade that sparks my interest. Im looking for something long term and something i see myself for the long run, I'm looking to have a career and something that I truly have a passion in and something that I see myself doing long-term I've worked a long time for a while and I've worked alongside HVAC technicians for a while and it is truly something that interest me

Add'l Edu. Details:
What trades-related courses did you take in school?
Why is an apprenticeship an attractive option to you?

Apprenticeships offer hands-on learning which I excel in, as well as making money while learning. I'll stay out of debt while making lots of money and learn the way I'd always enjoyed.

I also take pride in my work. I'm gonna be the best at whatever I do, Working with journeyman workers every day all allows you to learn the tricks of the trade and fast. Being Fast and Consistent adds to a quality career .

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Job security, In my eyes everybody needs plumbers and HVAC technicians. If an HVAC unit goes out, people need you there and quick. Controlled environments are a large part of our society that go unnoticed. Following that idea I also think that Plumbers are a keystone of the everyday life as well. Everybody wants to take a shower when they get home from work. Restrooms are mandatory from big business to the everyday home, Making these workers needed everyday. Job Security is one of those big goals I have in life, that's my favorite idea when I think of a career in HVAC or Plumbing.

Job versatility. Everyday is an adventure, and no two situations are the same keeping my mind busy and hungry for information, I am very eager to hopefully explore that aspect of the HVAC and/or the plumbing world.

What construction software or technologies do you have training in?

AutoCAD, Revit

Any Safety Certificates:

On the side, I do a lot of mechanic work. I build cars and modify them for fun. I also have experience with building computers which I have found is very similar to most HVAC systems. Working with my hands has always left me with a great feeling of satisfaction being able to stand back after everything is done and see the hard work that has paid off., Outside of work, I do a lot of handy work for friends and family ranging from simple electrical, HVAC, and plumbing. I also like to work on my own personal truck as well as on trucks belonging to buddies. I've learned a lot of problem solving and critical thinking

Why is an apprenticeship an attractive option to you?

The idea of an apprenticeship to me is a chance to prove myself has a working individual. I believe that as long as I put in the work and dedication that the apprenticeship will benefit me greatly. It opens up a large network of people to me and I can choose to stand out by working hard and continually learning., The idea of an apprenticeship is more beyond just working and learning for me. I believe that having an apprenticeship within the union will open doors to new opportunities when or wherever it may be. The

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've always been a hands on learner. I did a bit of electrical work for a small contractor before I tried HVAC/R and fell in love with it. Everything from the low voltage system controls to ductwork it involved had me hooked. I especially love the system controls part of it because it reminded me a lot about building computers which is a hobby of mine. I feel that with my young age and commitment to the quickly advancing HVAC field, now is the prime time for me to strengthen my career in it., I originally started out in electrical but found myself in an HVAC Install position and have fallen in love with it ever since. I've found a deep passion for HVACR since then and now yearn to increase my knowledge in the field as much as possible. I started and am still at a non union shop as I thought it'd be a great starting point, however, I've quickly realized through experience and friends within the union that joining the union would be the next step in my career.

Why is an apprenticeship an attractive option to you?

An apprenticeship would be perfect for me. This is because I will be not only learning, but also applying what I learned to actually get a grasp of what's going on. I think an apprenticeship is a great balance between work and learning and that's exactly what I need.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I feel as if a hands on hard working environment is best for me. I feel like I grow the most when I have others around me to correct me and teach me, rather than solo stuff where I'm on my own. I also feel like I'll be surrounded with like minded people who will help me grow a lot in my career and personal life. I also think it would be fun in general to be able to learn something completely new and different compared to other things in my life.

Why is an apprenticeship an attractive option to you?

An apprenticeship is an attractive option to me because I find school not very interesting, and I also find it much easier to just learn by doing things instead of reading books and studying for tests.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I have seen many videos on YouTube by people such as HVACR Videos, which demonstrate what it is like to work as a refrigeration technician or a plumber. To me the work looks very interesting and fun, and I am looking for a new job that I can take seriously and work hard every day at.

What trades-related courses did you take in school?**What construction software or technologies do you have training in?****Any Safety Certificates:****Add'l Details:****Why is an apprenticeship an attractive option to you?**

I've always enjoyed learning and working with my hands, I did 4 summers with a small construction company. I like the fact that when you finish your project you can say you did that, there's skills to learn and master., The ability to learn new skills but also being in a job that I'm not necessarily doing the exact same thing every day that has no skill to it. I want to learn new things and be able to apply those new skills to my job and Life.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

My first job was a summer construction job, I love working with my hands and learning new skills., I used to work in construction for my first job, I've always loved working with my hands and learning new skills. My Uncle is also a big inspiration to wanting to work in trade, he works welding now and my brother is an electrician as well. I worked factory for 5 and 1/2 years not really learning any new skills and that's my other biggest push to learn new skills that cannot only be used at work but applied to in real life.

Why is an apprenticeship an attractive option to you?

I appreciate the ability to gain experience on the job working alongside professionals who are able to answer my questions., I would be able to learn and engage well with the types of training that goes on in an apprenticeship because of the practical experience as well as the ability to learn a variety of skills., Because it would provide a fulfilling career without the expenses that college would have. I also enjoy a hands on environment where I can be challenged daily and problem solve

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I want to work in hvac because I am eager to learn hands on skills and problem solving abilities. The unions desire to train and educate people allows me to achieve my goals of being able to help people and businesses in day to day life.

I appreciate the unions focus on quality and efficient work while maintaining safety standards. Joining hvac would not only help me develop my career in hvac but also allow me to work in an environment where I feel vaulted and connected with those around me., I'm looking for a lifelong, essential career with growth opportunities where I can work in a hands on environment while using my problem solving abilities. I want to join an apprenticeship because I would be able to learn from professionals while getting experience in a classroom and on the jobsite., I'm interested in getting into a fulfilling career where I learn and grow in a hands on environment involving problem solving and challenging work. Pipe trades interest me because I believe the work will always be in demand while also offering meaningful work

Why is an apprenticeship an attractive option to you?

Wanting to get into the trades and build a career for my future, love working hands on and learning new things and feel like an apprenticeship is the best way to start, its a great start to working towards a career and not a job, ive heard many good things about apprenticeships and a good way to get your foot in the door at union places

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Learning new skills and building a future with a career, im very interested in getting into the trades for an apprenticeship, im still young and strive to work for my future to support a family one day. i talked with my pastor who went through local 400 and said its a great opportunity when your young and im a very hard worker.

Welding Experience:

Tell us about any jobs where you've learned pipetrades relevant skills:

I have not had any jobs in my past that correlates to pipe trades but I am eager to learn, I do not have any jobs in the past that would portray myself into the pipefitting career. I honestly don't have any idea what trade I want to do, all I do know is that I have had many full time jobs, year after year, never been fired but leaving jobs because they were careers they were just jobs.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I have a strong appreciation for the outdoors, whether it's hiking, hunting, or simply exploring nature. While this may not directly relate to the construction trades, I believe it has helped me develop resilience and a positive mindset, particularly when faced with challenging conditions. Having experienced various outdoor environments, including cold and difficult weather, I am confident that I can maintain a strong work ethic and stay motivated during tough days on the job., Landscaping

What construction software or technologies do you have training in?

Any Safety Certificates:

First Aid / CPR, First Aid / CPR

Add'l Details:

Why is an apprenticeship an attractive option to you?

I am particularly drawn to an apprenticeship because it offers the opportunity to engage in hands-on learning, allowing me to acquire practical skills rather than being confined to a desk. The prospect of gaining valuable, real-world experience through this path is highly appealing. Additionally, I find reassurance in knowing that upon completing my apprenticeship, I will enter a field where I have built a solid foundation of knowledge and skills, and where my hard work and dedication will be recognized and rewarded., Knowing

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I am particularly drawn to the trades because they offer a unique opportunity to build a solid career foundation while gaining a deep understanding of how buildings and interiors are constructed and function. After several years of exploring different job opportunities, I believe that acquiring skills in the trades will not only provide me with valuable, hands-on experience but also serve as a strong asset when it comes time to buy and maintain my own home in the future., Sense Of knowing what I want to do for the rest of my life

Fond du Lac Area (Orange), Appleton Area (Green), Fond du Lac Area (Orange)

Relevant Experience Level:A little. No specific trade experience, but I have general skills in construction or welding., A little.
No specific trade experience, but I have general skills in construction or welding**Years of Full-Time Work Experience:** 1-3, 1-3**Welding Experience:****Tell us about any jobs where you've learned pipetrades relevant skills:**

Mudjacking it's far fetched from pipe trades, but it was still construction., n/A

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I've worked a construction job before(Mudjacking), & I learned a lot about working with people- customers & co workers. I'm a very good people's person so I know how to get along & get work done. I'm familiar with power tools, hand tools, ladders, etc. AND I AM A SPONGE WITH INFORMATION. But as hobbies, I don't do it as much as I'd like, but building things is fun & seeing things come along is interesting., I like to put together whatever I can. I like brainstorming with a team and getting a task done.

Stability & growth!! Get paid to learn & this is the type of work & knowledge that I can take outside of work.

What trades-related courses did you take in school?

Math-Geometry, Math-Algebra, Metals, Welding, Automotive Technology

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I am currently a correctional officer. The work is stressful as is the schedule & hours. I want something stable & a place I can make good money whilst working & enjoy my work. I come from a family that have been in trades & they were always so eager to get me to get into one. And I wish I would have sooner. I'm looking to build a career & skyrocket from there & the pipe trade, plumbers & steamfitters trade is where'd I'd do it., I need a career & I've always considered doing an apprenticeship.

Add'l Edu. Details:

BA in English, BA in English

What trades-related courses did you take in school?

Math-Calculus, Math-Algebra, Math-Geometry, Math-Precalculus / Trigonometry

Why is an apprenticeship an attractive option to you?

Feedback is typically more immediate than written feedback you could receive as a humanities major in college. It's easier to track your progress in developing certain skills. It's more satisfying in that regard. I like to know when I am doing well on a particular task rather than just rationalizing to myself that, for example, my leadership abilities or writing is actually getting better when that may just be my own perception. I like that, as an apprentice, I would get to deal with real things and know that it is not just my own

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I'm interested in the practical nature of the building trades. I also appreciate the opportunities to troubleshoot problems as they arise., I want to work somewhere I have the opportunity to continue to learn on the job.
