Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

Plumber, Steamfitter (Pipefitter), Pipe Fabricator

Work Zones in Preference Order:

Green Bay Area (Yellow), Appleton Area (Green)

Relevant Experience Level:

None. Nothing even close-but I'm a hard worker and willing to learn!

Years of Full-Time Work Experience:

0

Welding Experience:**Tell us about any jobs where you've learned pipetrades relevant skills:**

My experience working in healthcare has given me experience with working with a variety of different people. When I worked as a cook my coworkers had to have good communication to ensure food reached the clients on time.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I enjoy working with my daughter on crafts and little building projects. We go to Home Depot once a month they have a building project for kids. I have to read the directions and we work together to build the project. Sometimes we need to ask others for help. This can relate to constructions since you need to look at plans and understand them. Also knowing when to ask for help.

Shift Availability:

1st Shift (Days), Part-time, Weekends

Post HS Education:

Associate Degree

Add'l Edu. Details:

Healthcare Business Degree and a Culinary certificate from Northeast Wisconsin Technical College

What trades-related courses did you take in school?

Math-Algebra

Why is an apprenticeship an attractive option to you?

I want to have a career where I can use my hands and use my mind. I don't like to sit still and like to stay busy.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I am interested in finding a career where I can work with my hands and feel like I am making something. I have the most satisfaction when I can see wanted I created or completed. Most of my past jobs have involved helping people and I see this as another way to help people. I like to stay busy and have each day be different. I want to learn new things each day and face a challenge.

What construction software or technologies do you have training in?**Any Safety Certificates:****Add'l Details:****Contact Information:**To speak with candidate #5223504, access your Candidate Request Tool at <https://pipetradecareers.com/contractors/candidates/WI400>**Additional Information:**If you have questions on candidates or the Pipefolio process, please contact: Career@UA400.org

Add'l Details:
Why is an apprenticeship an attractive option to you?

I always love to learn more about welding a better my skills and apprenticeships are just the thing to help with that

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I love welding recently completed welding course at Blackwell Job Corps started working at a company to get more hands on experience with welding haven't had the opportunity to weld they only let me insulate and the pipe trades have always interested me due to it being a bit more precise and challenging compared to basic welding and I love to try to beat a challenge and push my self to be better and learn more

What trades-related courses did you take in school?

Math-Algebra

Why is an apprenticeship an attractive option to you?

The ability to learn and improve my skills on the job, while getting feedback and advice from people who are in the field sounds right up my alley. I learn better by doing.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

There are a few reasons I'm interested in this career. The most important reason would be the ability to provide for my family. My grandfather Don Hermesen was in the trades, and speaks very highly of the opportunity. After talking with him I've realized that my willingness to learn and ability to work hard would take me far in this field. It's rewarding to work with my hands, and to see the results of my work right in front of me.

Add'l Edu. Details:

I went to American international college for a little under a year. Then I went to Advanced welding academy in Eagle river

What trades-related courses did you take in school?

Math-Algebra

Why is an apprenticeship an attractive option to you?

I tired collage which was not a fit for me and then I also went to welding school which was a fit but the jobs after were not what I was looking for as a pipe fitter or fabricator and I believe that having on site training and night school will help me fully understand everything I need and want and need to know about pipe fabrication.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I'm in local 601 as a welder helper on pipelines but the work is not consistent and I do not enjoy not having classroom work to learn about my profession as well. I am love and enjoy the various welding processes as well as I am starting to do pipe trade math which is very interesting and enjoyable I love the pipe trades and enjoy everything about it so far.

Welding Experience:

Stick - Some Knowledge, TIG - Some Knowledge, MIG - Some Knowledge

Tell us about any jobs where you've learned pipetrades relevant skills:

I have not had any job where I was actively learning skills that are applicable to the pipe trade.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I've always enjoyed hands-on work, from fixing cars to building fences and installing pools. In high school, I was head fabricator for the robotics team, which taught me precision, teamwork, and problem-solving.

Welding comes naturally to me, and I've even taught others, though I know there's more to learn. Completing some OSHA requirements also gave me early safety training, building a solid foundation for a career in the trades.

Shift Availability:

Full-time

Post HS Education:

Some 2-year college

Add'l Edu. Details:**What trades-related courses did you take in school?**

Math-Algebra, Robotics, Welding, Woodworking / Woodshop, Metals, Math-Geometry, Electrical Trades / Electronics

What construction software or technologies do you have training in?

AutoCAD

Any Safety Certificates:

First Aid / CPR, OSHA 10

Add'l Details:**Why is an apprenticeship an attractive option to you?**

An apprenticeship is attractive because it lets me earn while I learn, gain hands-on experience, and grow under the guidance of skilled mentors, setting me up for long-term success in the trades.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I come from a family that has always worked in the trades, and I've seen firsthand the pride, skill, and hard work it takes to build something lasting. Growing up around that environment gave me an appreciation for hands-on work and the stability it can provide. At the same time, I want to take that foundation and create an even stronger legacy for my future family. Switching into the trades allows me to honor where I come from while also building a career that offers growth, financial stability, and the chance to pass on not just skills, but opportunities for the next generation.

Automotive Technology, Building Trades / Construction, Electrical Trades / Electronics, Drafting and Design, Construction Technology, Math-Algebra, Math-Geometry, Math-Precalculus / Trigonometry, Metals, Welding, Woodworking / Woodshop

What construction software or technologies do you have training in?

AutoCAD, CNC, Inventor

Any Safety Certificates:

Add'l Details:

Tell us about any hobbies that have boosted pipetrade-relevant skills:

One hobby is show water skiing, for the last 9 years I've skied on a team. This includes solo and team acts. Skiing is very physical and requires a lot of attention to detail and patience both on water and off. It also gives me a high safety awareness due to the equipment and sites that need to be maintained and checked over every time I go out on the water.

I also enjoy working on my cars, using tools, knowing what I need. It also helps me troubleshoot problems and understand how things fit together and work with or without

Why is an apprenticeship an attractive option to you?

An apprenticeship program is a good option for me because I am a very hands on learner and it allows me to gradually improve my skills. My previous job allowed me to start as a youth apprentice and also work through a 2 year degree with a co-op. This worked well for me to be able to understand the skills I was learning while being able to use them which is a way that I personally am able to progress very easily.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Since High School I've known that I want to be able to work with my hands, being able to see the results of my work when I'm done. I have a background in auto body collision repair which gave me a lot of experience with welding, using hand and power tools and working with precision measuring to make panels fit. I really enjoyed the hands on and detailed side of the work. With the building trades I get the opportunity to use the same skills I have but in a different scenario. Joining the pipe trades rather than sticking with auto body would allow me to keep the aspect of craftsmanship that I love but using it for something bigger.

Add'l Details:

Why is an apprenticeship an attractive option to you?

As someone who is always striving to improve, this apprenticeship program would be an invaluable resource for me. The opportunity to do what I love every day while having additional schooling built into my schedule from experienced professionals would give me the chance to bring my skills to the next level and build a lifelong successful career to support myself and a family. The extensive learning opportunities provided by the union would give me the chance to further invest in myself and my future.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I gained an appreciation for working with my hands working under a general contractor at which time I was able to gain experience with a variety of construction trades including but not limited to plumbing, HVAC, electrical, carpentry, and painting. During my time here I was encouraged by one of my coworkers (a hobbyist welder) to give welding a try. I decided to take stick welding night classes at a local technical college and fell in love; I knew this was something I wanted to make a career out of. I am now currently a welder at a shipyard in door county and I love what I do. I believe by gaining an apprenticeship at local 400 I would not only be setting myself up for a successful career but also gaining an opportunity to take my skills to the next level due to the excellent learning/schooling opportunities provided by the union.

Why is an apprenticeship an attractive option to you?

I would love to get an apprenticeship because I love the idea of learning by working hands-on instead of studying. Apprenticeships also attract me by being able to get a job after the apprenticeship is over with the same company.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Some things that bring me to make a career in trades are the hard work ethic, the need for the trades, the benefits they have to offer, and saving money not going to a university. I want to create a career in the trades because I value the hands-on work that is offered. I am particularly interested in the pipe trades because they require physical skill and understanding complex systems. I also admire the variety in daily work that the pipe trades have to offer.

Work Zones in Preference Order:

Appleton Area (Green), Fond du Lac Area (Orange)

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:

7-9

Welding Experience:

TIG - Skilled, MIG - Skilled, Flux Core - Some Knowledge, Stick - Some Knowledge

Tell us about any jobs where you've learned pipetrades relevant skills:

I've been a customer metal fabricator for 7 years. I can weld all process, on carbon, stainless, and aluminum. I have minor experience in pipe fabrication both from my career and from schooling.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I love to do anything outside and/or with my hands. I spend most of my free time hunting, fishing, tinkering in the garage and spending time with family. I've always had a high mechanical aptitude love to figure out how something works. If it is complicated and gets my hands dirty, I will enjoy doing it without a doubt!

Shift Availability:

Full-time, 1st Shift (Days)

Post HS Education:

Some 2-year college

Add'l Edu. Details:

1 year technical diploma in Industrial Welding from FVTC

Why is an apprenticeship an attractive option to you?

The apprenticeship interests me because I see it as an opportunity for growth in a field I already enjoy. I love welding and feel the Local 400 is the best opportunity for me to make the most out of my career.

What trades-related courses did you take in school?

Welding

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Have always had a love for working with my hands and creating things in 3d space, in real time. I've been a custom metal fabricator for 7 years and am looking into the union for better opportunities in compensation and benefits.

What construction software or technologies do you have training in?

AutoCAD, Solidworks

Any Safety Certificates:

Being able to make a living while learning my trade., Being able to make a living, while learning my trade.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I took welding classes in high school and it was the most fun I've ever had. I finished all of the courses that my school had to offer and then moved onto college level welding classes at Fox Valley Technical College, while still in high school.

Since I graduated high school, I've been working as a Department Manager at McDonald's, but I know that I'm meant to be a welder or steamfitter, I'm just not entirely sure where to start. One of my friends is in the 400 and recommended this opportunity to me., I took welding classes in high school and they were the most fun, informative classes I've ever taken. I completed all of the courses that my school had to offer, before moving onto college-level courses at Fox Valley Technical College, while still in high school.

Since I graduated, I've been working as a Department Manager at McDonald's, but I always knew that I was meant for more. I'm not the best welder but I know it's what I'm

Welding, Metals, Drafting and Design, Construction Technology, Math-Precalculus / Trigonometry, Math-Geometry

What construction software or technologies do you have training in?**Any Safety Certificates:**

OSHA 30

Add'l Details:**Why is an apprenticeship an attractive option to you?**

It's the starting position I'm looking for after my associates of welding from Northern Michigan University, my friend also started his apprenticeship through the 400 and has enjoyed it so far.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I see the practical use in welding in being able to fix and build a lot of cool and purposeful stuff. I went through NMU's welding program and really enjoy all aspects of tig welding, the satisfaction is building a pipe spool or piping system correctly is like no other and is the kind of job I'm looking for.

Why is an apprenticeship an attractive option to you?

I am looking for a career and I enjoy learning new things. I also want to challenge myself to be the best that I can be and have the opportunity to provide for myself and my future family.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I really enjoy working in the trades because I like to see the work that I've completed at the end of the day and I take a great sense of pride in visibly accomplishing something. Specifically in the pipe trades I have enjoyed my time working as a plumber helper for a non union company but am looking for a different challenge and I have found welding to be intriguing since taking a class in high school but now I'd like to pursue it as a career.

First Aid / CPR

Add'l Details:

Tell us about any hobbies that have boosted pipetrade-relevant skills:

My current hobby is motorcycles. Not only do I work on my own little 500, but I ride and help new riders become comfortable.

Why is an apprenticeship an attractive option to you?

College was once a choice and could still be, but I prefer the option of learning on the job. Actively being able to ask and answer questions in real time, while dealing and handling real life situations and problems that this opportunity would allow me. Working with real trades workers, ones who have dealt with said problems, all with their own solutions and trick shots. Every instructor would be different with different knowledge, all while knowing there is job security.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I am looking for a career, not a job that can be replaced by increasing technology, one that is consistent, one that provides, one that involves not only my brain but hands on. I learn and excel best when I am able to express myself and ask questions. This career choice has been in the works since graduating but had never taken the plunge toward it. Working as a team, or singularly, or even leading a team through metrics and standards, I look forward to all of the opportunities.

Years of Full-Time Work Experience:

0

Welding Experience:

MIG - Some Knowledge, TIG - Some Knowledge

Tell us about any jobs where you've learned pipetrades relevant skills:

I'm a mechanic at a bowling alley called Rolling Thunder Lanes where I have been working there for about 3 years. I have worked on machines and welded up parts to fix them as the machines are from the 1950's and are very mechanical.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

One hobby I enjoy doing is working on cars since it allows me to build a better understanding on the car I drive. It also allows me to become self sufficient so I don't have to bring my car to a mechanic. This skill would helpful in a construction trade as it has allowed me to become more mechanically inclined while also building confidence and thinking outside the box to help troubleshoot problems I may face.

Another hobby is playing the bass guitar as it has shown me that there are many ways to learn and many techniques to practice.

Add'l Details:

Why is an apprenticeship an attractive option to you?

The apprenticeship attracted me as I have grown an enjoyment towards welding and working on jobs that have me doing hands on work. After talking with family members and teachers, the apprenticeship seems like a great fit as it would be something I would find enjoyable.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I am interested in becoming a steamfitter because I have always had people in my life that inspired hands on activities and work. My grandpa was a machinist for many years, along with my cousin who steam fits for the local 400. They have impacted me to enjoy hands on jobs like working on cars and welding.

Another reason why I want to become a steamfitter is because I went to Neenah Highschool and they offered welding class at the school. I took as many of the welding classes as I could because I enjoyed the classes themselves but also it the fact that I grew a liking towards welding. It opened my eyes that even though something can be hard, it can also be fun to work around problem and difficulties you might face.

Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

Steamfitter (Pipefitter), Pipe Fabricator

Work Zones in Preference Order:

Appleton Area (Green), Green Bay Area (Yellow)

Relevant Experience Level:

None. Nothing even close-but I'm a hard worker and willing to learn!

Years of Full-Time Work Experience:

0

Welding Experience:

MIG - Some Knowledge, Stick - Skilled, Flux Core - Some Knowledge

Tell us about any jobs where you've learned pipetrades relevant skills:

I haven't had a formal job yet, but I gained hands-on experience through welding classes in high school. I learned how to work safely, use tools properly, and follow instructions—skills that apply directly to the pipe trades.

I've also done small projects at home, which helped me build problem-solving skills and a strong work ethic. I'm confident I can apply these experiences to succeed in an apprenticeship.

Shift Availability:

Full-time, 1st Shift (Days), Weekends, Overtime

Post HS Education:

No

Add'l Edu. Details:

What trades-related courses did you take in school?

Welding, Woodworking / Woodshop, Math-Algebra, Math-Geometry

What construction software or technologies do you have training in?

Any Safety Certificates:

Add'l Details:

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I've been interested in welding since high school, where I learned patience, attention to detail, and safety—all important skills for the trades. I also enjoy DIY projects, which have helped me get comfortable with tools and reading technical instructions.

Outside of that, I stay active through sports, which build my stamina and teamwork skills. These hobbies give me a strong foundation for the physical and collaborative nature of construction work.

Why is an apprenticeship an attractive option to you?

An apprenticeship appeals to me because it combines hands-on work with classroom learning, allowing me to earn while I learn. I appreciate gaining real-world skills from experienced professionals without the burden of student debt.

It also offers a clear path for career growth and stability in the trades. Being part of a union apprenticeship means quality training, benefits, and a strong support network.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I am interested in a career in the building trades because I enjoy working with my hands and being part of creating something lasting. In high school, I took welding classes, which gave me a solid foundation and sparked my passion for working with metal and tools. I appreciate that the trades offer stable, well-paying careers with opportunities for growth, continual learning, and craftsmanship.

Specifically, I am drawn to a career in the pipe trades because of the challenge and skill involved in working with complex piping systems that are vital to heating, cooling, and industrial processes. My welding experience in high school has made me excited to develop stronger pipe welding and fitting skills, and I look forward to hands-on work that combines technical knowledge with teamwork and problem-solving.

Welding Experience:
Tell us about any jobs where you've learned pipetrades relevant skills:

In my past jobs, I've developed skills that will help me succeed in the pipe trades. Working as a cashier taught me accuracy, attention to detail, and how to stay organized under pressure, while delivery work gave me experience with time management, problem-solving, and handling physically demanding tasks safely. Both roles also strengthened my communication skills, teamwork, and reliability.

Outside of work, I also practice tattooing, which requires patience, steady hands, attention to detail, and precision—all qualities that carry over into working with tools

Tell us about any hobbies that have boosted pipetrade-relevant skills:

One of my favorite hobbies includes tattooing, I believe this to be very helpful with my hand eye coordination and strength with a steady straight hand

Add'l Details:
Why is an apprenticeship an attractive option to you?

An apprenticeship is attractive to me because it allows me to learn a skilled trade while earning a living at the same time. I like the idea of gaining hands-on experience under trained professionals instead of just sitting in a classroom. It provides a clear path to a steady career, opportunities for advancement, and the chance to build skills that will always be in demand. I also value the mentorship and union support that come with an apprenticeship, because it means I'll be guided, challenged, and set up for long-term

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I'm interested in a career in the building trades because I value hard work, hands-on learning, and being part of projects that create something lasting and useful. The trades provide stability, good wages, and the opportunity to constantly grow my skills while contributing to work that supports communities.

Specifically, I'm drawn to the pipe trades because they combine problem-solving with physical skill, precision, and teamwork. Pipe systems are essential for safety, comfort, and efficiency in buildings, so I like the idea of playing a key role in work that people rely on every day. The trade also offers opportunities for steady employment, advancement, and eventually building a lifelong career I can take pride in

What construction software or technologies do you have training in?

AutoCAD, CNC

Any Safety Certificates:

Add'l Details:

Why is an apprenticeship an attractive option to you?

An apprenticeship appeals to me because I'm starting fresh in a new trade, and am looking for a place that will be able to provide training and patience as I start a new path in my life. I believe on-the-job training can be more valuable than school, especially in the trades.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I took an interest in the trades young because of my dad, who is a diesel mechanic. This interest continued in highschool, where I took any and all shop classes available to me. I also was able to get a job as a diesel mechanic at the same shop as my dad. After almost two years and taking diesel courses at NWTC, I realized it wasn't for me, and started looking for other trades to work in.

My first job outside of diesel mechanics was at a metal fabrication shop, where I was hired and put as an assembler. I had originally joined to weld so this was initially disappointing. However, while assembling, I was introduced to pipe fitting, where I was given a plan and the parts, and told to figure it out from there. I found it incredibly satisfying when it all came together, and I quickly excelled at it.

What trades-related courses did you take in school?

Math-Algebra, Math-Geometry

What construction software or technologies do you have training in?**Any Safety Certificates:****Add'l Details:****Tell us about any hobbies that have boosted pipetrade-relevant skills:**

I love working on house projects, such as building shelves, painting, and installing trim, as well as working on my car and learning how to be self-sufficient.

Doing things with my hands and learning while I try is very motivating for me. I use every opportunity to "get my hands dirty" to learn as much about projects as I can.

Why is an apprenticeship an attractive option to you?

The ability to learn while I earn and be able to start obtaining skills from day one is the largest attractive option for me.

I am also very drawn to learning from a journeyman and having that expert there that I can watch and absorb knowledge from.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I have heard a little about the pipe trades since my uncle is a pipe fitter. I also really enjoy the idea of working with my hands and being able to build something lasting that I can be proud of.

I originally went to college, but have found that I am drawn to be in a field where I can help people and work in a team to accomplish something tangible together.

Pipe Fabricator, Steamfitter (Pipefitter)

Work Zones in Preference Order:

Appleton Area (Green), Fond du Lac Area (Orange)

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:

4-6

Welding Experience:

MIG - Skilled, TIG - Skilled, Stick - Skilled, Flux Core - Some Knowledge

Tell us about any jobs where you've learned pipetrades relevant skills:

In my current job I am a tub cell weld operator. We use hydraulic automated welders to weld seams on sheets of metal that make the exhaust ducts and cylinders for drying machines (specifically speed queens). It also taught me manufacturing, quality control, consistency, safety, machine repair and critical thinking to fix issues with the machines.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I have my TIG, MIG, and SMAW certifications through moraine park technical college, I used to do electrical and plc wiring for jail's and prisons from the local to federal level so I'm used to reading schematics and working under pressure. I work in a factory currently so I also understand consistency in results and following a specific process.

Shift Availability:

Full-time, Overtime, 1st Shift (Days), 2nd Shift (Nights)

Post HS Education:

Some 2-year college

Add'l Edu. Details:

GTAW, GMAW, SMAW, and robotics welding certification through MPTC in fond du lac

What trades-related courses did you take in school?

Metals, Welding, Robotics, Math-Algebra, Math-Geometry

What construction software or technologies do you have training in?

CNC, Solidworks

Any Safety Certificates:

OSHA 10

Add'l Details:

Why is an apprenticeship an attractive option to you?

I want an apprenticeship because I want to start my career in welding. I want to be able to be paid to learn, to be in a union, to have job stability and a life long career that also allows me to work with my hands. I have a passion for welding and want to make a living doing it but I'm not going to have all the tools right away and feel like my career would get off to a great start in the 400 with what you all can teach me.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

What interested me is welding but also seeing the job stability, the satisfaction of seeing the work being used and playing such a big role in society today.

Disciplines of Interest:

Steamfitter (Pipefitter), Pipe Fabricator

Work Zones in Preference Order:

Appleton Area (Green), Fond du Lac Area (Orange), Green Bay Area (Yellow)

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:

4-6

Welding Experience:

Flux Core- Skilled, MIG - Skilled, TIG - Some Knowledge, Stick - Some Knowledge

Tell us about any jobs where you've learned pipetrades relevant skills:

Most of my pipe experience is from schooling and self taught experiences. I am currently practicing for chromoly 6 g tig.

I did weld pressure vessels without a single leak during my youth apprenticeship. Mostly out of position flux core weldments.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

Im already a welder by trade. I also like to wrench and tinker with anything that has wheels or an engine. Im constantly doing some kind of project to my house, from electrical to plumbing.

I feel this would be a good opportunity to showcase my skills and knowledge. On top of that I'm always willing to learn new things from anyone willing to teach.

Shift Availability:

Full-time, 1st Shift (Days), 2nd Shift (Nights), Overtime, Weekends

Post HS Education:

Some 2-year college, Other Relevant Courses & Certifications

Add'l Edu. Details:

Welding/fabrication course. Youth apprentice certificate I have starrett certifications for micrometer, dial caliper, tape

What trades-related courses did you take in school?

Drafting and Design, Math-Algebra, Math-Geometry, Robotics, Metals, Welding, Woodworking / Woodshop

What construction software or technologies do you have training in?

AutoCAD, Solidworks

Any Safety Certificates:

First Aid / CPR

Add'l Details:

Why is an apprenticeship an attractive option to you?

Im interested in being trained and taught by someone with experience. I always enjoyed learning, and that's what I'm hoping to get out of this. Then, to be able to obtain my journey card and teach the next generation.

I have a youth apprenticeship certificate. Yet havent been able to expand because of layoffs. I was talking to a 600 union welder the other day and he really talked me into it

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Im looking for a change of pace. Ive been a structural shop welder for the past 5 years. Being a union welder has always been something I was curious about.

Id like to do a little traveling, working from jobsite to jobsite. Being stuck in the same shop doing the same thing day in and day out is getting really old.

Why is an apprenticeship an attractive option to you?

An apprenticeship is an attractive option to me because it allows me to learn hands-on while earning a living. I value the opportunity to gain real-world experience under the guidance of skilled professionals, rather than just learning in a classroom. It also offers a clear path for growth, with the potential to become a licensed journeyman and build a stable, long-term career. For someone like me, who enjoys practical work and wants to continue developing technical skills, an apprenticeship is the perfect way to start a

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I became interested in a career in the building trades because I have been working in the field of welding for some time, and during that time, I've realized how much I enjoy the hands-on and technical nature of this kind of work. Specifically, I'm drawn to the pipe trades because it offers an opportunity to continue expanding my knowledge and skills, learn new techniques, and grow professionally in a field that is constantly in demand and evolving.

Why is an apprenticeship an attractive option to you?

It will help educate me more to further my career path even more. I would like to learn all of the knowledge I can to help better my skills and create more experience for me. This will help me out on creating this industry as my permanent career path!

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Since 2020 I started out as a mechanic, then got introduced to welding in the shop on vehicles. It made me feel powerful, and it turned out to be something that I love to do.

Ever since then I haven't quit on metal fabrication, and for the past 2 years I got out of the automotive business all together and started directing all of my focus to metal fabrication.

I have worked in multiple fabrication shops, and loved every bit of it, still do to this day! I am very ambitious with metal fabrication, I am very passionate about it and ENJOY doing it every day!

Add'l Details:

Why is an apprenticeship an attractive option to you?

An apprenticeship sounds like a great fit for me because I'd rather learn by doing than sitting in a classroom all day. I like working with my hands and being active, so getting real on-the-job experience while learning the trade makes a lot of sense. It's also a solid way to build a career — you're earning while learning, and there's a clear path to move up.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I am interested in joining the pipefitter workforce because of my strong background in metal work and general welding. Over the years, I have gained hands-on experience with various welding techniques and working with different types of metals, which has given me a solid foundation in fabrication, precision work, and safety protocols. I believe these skills directly align with the demands of pipefitting, and I'm confident that my experience will allow me to contribute effectively while continuing to grow and learn within the trade.

I like the idea of learning by doing, not just sitting in a classroom. With an apprenticeship, I can build real experience on the job while also getting formal training from experienced professionals.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I first became interested in the pipe trades when a friend told me about steamfitting. I looked it up and thought it sounded like a great fit for me. Steamfitters work on important systems that keep buildings running, like heating and cooling. It's a job that takes skill, hard work, and teamwork, and I want to be part of something that makes a difference.

don't have any hobbies directly related to the trades, but I've worked hands-on jobs that have taught me a lot of useful skills. Right now, I work at a metal finishing company doing racking and unranking, which takes focus, physical effort, and attention to detail. It's also helped me get used to working in a fast-paced, industrial environment where safety and consistency matter every day.

Before that, I spent several years working in construction doing drywall finishing. That

Why is an apprenticeship an attractive option to you?

An apprenticeship is a great way to learn a trade while earning a paycheck. I'm a fast learner and do best with hands-on training, so this kind of program fits me well.

It's also a clear path to a steady, good-paying career. I want to build something long-term, and an apprenticeship helps me grow my skills the right way from day one.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've always liked working with my hands and figuring out how things work, so the building trades really caught my attention. I'm looking for a career that's hands-on, stable, and pays well—but also something I can enjoy doing every day. I like the idea of building and fixing things that people rely on, and being part of something that actually matters in the real world.

The pipe trades stood out to me because welding looks like something I'd really enjoy learning. It takes skill, focus, and a good work ethic—qualities I know I have or am ready to develop. I want to get trained the right way so I can build a solid career for myself doing something I'm actually interested in. I'm ready to put in the work and grow in this field.

Add'l Details:

Why is an apprenticeship an attractive option to you?

My desire for learning any new trade is to be hands on. To learn from the best of the best, with real life experiences, and the proper training to be skillful.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I thoroughly enjoy working with my hands and seeing the development progress in those projects. While in high-school my desired career was to be a welder. Life took me on another path and now I am in position to chase that dream.

Green Bay Area (Yellow)

Relevant Experience Level:

Some. I have worked for a plumber, steamfitter or HVAC/R contractor.

Years of Full-Time Work Experience: 10+**Welding Experience:**

Stick - Some Knowledge, TIG - Some Knowledge, MIG - Some Knowledge

Tell us about any jobs where you've learned pipetrades relevant skills:

As an adult seeking a new career path, I am highly motivated to learn the field of pipefitting and committed to making a successful transition. I bring a strong work ethic, reliability, and the maturity that comes with life experience, all of which I believe are valuable assets in a hands-on, detail-oriented trade like pipefitting. I'm eager to develop the technical skills required, from reading blueprints to installing and maintaining piping systems, and I'm not afraid to start at the ground level to build a solid foundation.

Shift Availability:

Full-time, 1st Shift (Days), 2nd Shift (Nights)

Post HS Education:

No

Add'l Edu. Details:**What trades-related courses did you take in school?**

Welding, Woodworking / Woodshop, Metals, Building Trades / Construction

What construction software or technologies do you have training in?**Any Safety Certificates:****Add'l Details:****Tell us about any hobbies that have boosted pipetrade-relevant skills:**

In my free time, I enjoy working on hands-on projects like fixing things around the house, assembling furniture, and helping with basic plumbing repairs, which all relate directly to the skills needed in pipefitting. I've always had an interest in figuring out how things work and finding efficient ways to put things together, which has strengthened my attention to detail and mechanical thinking.

Why is an apprenticeship an attractive option to you?

An apprenticeship is important to me as an adult because it gives me the opportunity to learn a skilled trade through real-world experience while earning a paycheck. This practical, on-the-job learning approach is ideal for me because I'm ready to work hard, grow my skills, and move forward in a career that offers long-term stability and advancement.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I want to become a pipefitter because I enjoy working with my hands and solving problems in a way that produces real, visible results. The pipefitting trade offers a unique mix of physical labor, technical skill, and precision, all of which align with my strengths and interests. I'm drawn to the idea of building and installing systems that are essential to the function of buildings, factories, and infrastructure.

Another reason I want to pursue a career as a pipefitter is the opportunity for long-term growth and stability. The trade offers strong job security, excellent wages, and the chance to continue learning through on-the-job experience.

Work Zones in Preference Order:

Green Bay Area (Yellow)

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:

0

Welding Experience:

Flux Core - Some Knowledge

Tell us about any jobs where you've learned pipetrades relevant skills:

I have not had any jobs related to pip trades just maybe maintenance (outside work) (repairing)

Tell us about any hobbies that have boosted pipetrade-relevant skills:

Working out, lifting (weight), fixing things

Shift Availability:

Full-time, 1st Shift (Days)

Post HS Education:

Other Relevant Courses & Certifications

Add'l Edu. Details:

English 101

What trades-related courses did you take in school?

Math-Algebra, Math-Geometry, Math-Calculus

What construction software or technologies do you have training in?

Any Safety Certificates:

Add'l Details:

Why is an apprenticeship an attractive option to you?

I am interested in the fact that you can work and learn at the same time. I am excited and overwhelmed to hopefully be a welder. I first learned about an apprenticeship through the WIOA program.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I have always been interested in the field of welding. Mostly because I like to repair things. I am a hard working woman and can handle weight. My close cousin is also a welder and i only just found that out but it only makes me more excited to work.

Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

Pipe Fabricator

Work Zones in Preference Order:

Green Bay Area (Yellow)

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:

0

Welding Experience:

MIG - Skilled, Stick - Some Knowledge

Tell us about any jobs where you've learned pipetrades relevant skills:

I haven't had a formal job yet, but I've gained a lot of applicable skills through school classes and hands-on programs. For example, I've taken tech-ed and shop classes where I learned how to use tools safely, follow detailed instructions, measure accurately, and complete projects from start to finish. I'm also currently attending a camp at Tweet/Garot, which has given me direct exposure to the pipe trades. There, I've been learning the importance of teamwork, safety procedures, and how to work with different materials and systems

Shift Availability:

Full-time

Post HS Education:

No

Add'l Edu. Details:

What trades-related courses did you take in school?

Welding, Metals

What construction software or technologies do you have training in?

Any Safety Certificates:

Add'l Details:

Tell us about any hobbies that have boosted pipetrade-relevant skills:

One of my main hobbies is woodworking, which I got into at a young age thanks to my dad. I grew up spending time in his shop, helping him with different projects and learning how to use tools safely and effectively. That experience taught me the importance of precision, patience, and attention to detail

Why is an apprenticeship an attractive option to you?

An apprenticeship is attractive to me because it allows me to learn the trade hands-on while earning a paycheck. I like the idea of gaining real-world experience under the guidance of skilled professionals instead of sitting in a classroom all day.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've always been drawn to hands-on work where I can see the real-world results of what I do. The building trades appealed to me because they offer a chance to work on essential projects that have a lasting impact. Specifically, the pipe trades stood out to me because of the combination of technical skill, problem-solving, and the critical role they play in making systems function safely and efficiently.

Add'l Details:

Why is an apprenticeship an attractive option to you?

I've had a high school meeting with local 400 and the benefits sounds really good.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I started catching on more about welding during my high school years. I've always liked the idea of building or creating something tangible and lasting through hands-on work. I'm drawn to the physical nature of the work, the problem solving on the job site and doing it with a team.

Additionally, I feel as if the building trades offer a strong sense of purpose and stability. These careers are essential to every community, providing structure we depend on daily. Roads, homes, and lots more. Hands on work is something I've love doing because it shows personal pride in craftsmen, and the ability to make a meaningful contribution to society.

The apprenticeship program at the local 400 was attractive to me for the opportunity to grow and learn more as the years go. I like to feel like I'm always improving my life as the years go. I don't like to feel like I'm wasting my life away and with this program I feel like it's a good career path that leads me to where I want to be in life. I can see there is an abundance of opportunity here. What really had me considering this as well was my brother who also works for the local 400. I can see how he is able to live a good life

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've always been a more hands on worker. I have also been looking for something where I can grow more so as soon as my brother told me about the local 400 and how it's a paid to learn program. It intrigued me a whole lot he brought over a folder with more information and from what I've read and seen I feel like the local 400 would be a good fit for me. Pipe trades is something completely new to me but I've always been a fast learner and I like to do things fast and the right way. I feel as long as there is someone willing to teach me the right way I will make a good part of any team. My managers and past foremen would also always say how I was a good worker and pick things up quick. I'm excited and ready to work and learn about the pipe trades.

Relevant Experience Level:

None. Nothing even close-but I'm a hard worker and willing to learn! A little. No specific trade experience but I have general skills in construction or welding

Years of Full-Time Work Experience: 1-3, 1-3

Welding Experience:

MIG - Some Knowledge, MIG - Some Knowledge

Tell us about any jobs where you've learned pipetrades relevant skills:

I currently work and have worked at Kafka conveyors and equipment. As a summer job while in high school, I worked on a plasma cutter, worked in assembly and now currently working on fabricating the conveyors., Since I was young I worked with my dad at Kafka Conveyors and Equipment as summer help. I've worked in the assembly part, ran a plasma cutter for the shop and now fabricate the conveyors for them.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I enjoy fishing which has taught me patience, and to keep a clear mind even when they aren't biting. I always enjoy building random things whether that be storage boxes out of wood or even for my car audio. That has taught me to be precise and always to double check measurements., I like to go fishing which has taught me patience when the fish aren't biting or going the way I want it too. I enjoy building things out of wood which has taught me to be precise and always to double check my measurements.

Add'l Details:

Why is an apprenticeship an attractive option to you?

I find this the route too go because I'll be learning on the job and not be going into debt. Instead I'll be working and communicating with coworkers and getting to know them. It also allows me to work full time and have a livable wage while learning., Instead of going into debt at college I'll be able to learn real hands on experience while on the job. I'll be able to communicate and work with fellow coworkers and build bonds with them while making a livable wage. It will also allow me to continue my education and learn new skills

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I found out how expensive college was and started working for with my dad's company who've recently taught me how to read blue prints and do MIG welding. I am a fabricator building conveyors and enjoy welding and want to pursue a career in it. My grandpa was an electrician for many years and motivated me to go out and become an apprentice because of the valuable experience you learn from it., I wanted to go to college until I found out how much it cost for me. I recently started welding MIG at my job and found a passion for it, which made me want to learn more and gain knowledge. My grandpa was an electrician and motivated me to pursue pipe trades if I had a passion for welding.

CNC

Any Safety Certificates:

Add'l Details:

Why is an apprenticeship an attractive option to you?

It appeals to me since I've already gone through and apprenticeship during high school at Fox Valley Tool and Die and I learned a lot of skills and lessons from the let's say old timers at work that I can use anytime

And as an apprentice you can get the most experience working in every field getting skills in every process making yourself more valuable to your company until you get

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I got interested in the pipetrades because I like to work long hours and be able to travel to do work on site. I've always liked to do the work nobody else wants to do. My first job when I was 14 working on a farm also helped steer me in the direction of the trades. I have coworkers at my current apprenticeship that used to be pipefitters and I've heard a lot from them about the job that I said I'd love to do

One thing I like about working in the building trades is you get to learn a lot of skills and lessons from the veteran workers. The most important thing I've learned from being in the trades is to slow down, don't slow down the speed you're getting the work done but slow down your thinking. Make sure everything is done right before you do it so the company doesn't have to spend money that doesn't need to be spent redoing your mistake

Why is an apprenticeship an attractive option to you?

The additional education, and career opportunities have a large appeal to me. In industry a journymens license in skilled professionals "Batchelor degree" demonstrating the time and dedication a person has put into to master a craft. I believe it's the highest honor, for someone who prides themselves on working with their hands, can obtain.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

A instructor I had at fox valley tech recommended me to go into the field of pipe welding. I felt this was a good option for me because of my attention to detail, eagerness to learn, and love for personal challenge and growth. Not all welders have what it takes to be pipe welders, but I believe I do. The benefits, opportunity, and education potential was too much for me to ignore, and I wish to explore pipe welding as a career.

Add'l Details:
Why is an apprenticeship an attractive option to you?

The reason why an apprenticeship is an attractive option to me is because I want to open my mind to learning more on the pipe trades and possibly get a job working in the pipe trades.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I grew up working in a shop learning how to build things with wood. Later on, specifically in high school, I got into welding. I used to do some welding on my family's farm on the side but, got very into welding in high school. I started to do more with stick (SMAW), MIG (GMAW), and TIG (GTAW). As I got more into welding, I decided that I wanted to do it as a job. I started talking to people who came to the trades fair we held at school and came to the conclusion that welding was the way I wanted to go.

In college, I asked my instructor if I could try pipe after I got done with pipe to plate with TIG. He said yes so, I did it and thought, "This is something I could really do for a job." I started to practice more and more as time went on. I really got into it when we went to the Local 400 for a tour.

Why is an apprenticeship an attractive option to you?

An older class mate from highschool graduated welding school with me a went on to join the steamfitters union and told me to check it out.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I enjoy Tig welding and the skill it takes to do it right and the competitive nature among fellow welders is great motivation to help them become the best they can be. Can't be the best if your not working with the best.

Add'l Details:

Why is an apprenticeship an attractive option to you?

An apprenticeship interests me because I want to have the on-the-job training that apprenticeships offer while also earning a wage, and to further develop my career.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've always had an interest in welding, I was just unsure of what I actually wanted to do welding wise. I had an opportunity to apply for an apprenticeship which is what i am currently working towards, and I thought pipe fitting/welding would be a perfect fit for me.

I do not believe my job as a contractor for HatPonics has given me any skills in welding. However, I've had jobs here in Wisconsin while working for HatPonics during the winter and the cold never scared me off from work. There were plenty of days where my crew was on site working and none of the other crew based out of Wisconsin were., I do not have any job experience in the pipe trades. In HatPonics, our steel buildings used a variety of machined and welded metals and pipes. I've learned how good welds look and how a bad weld looks. The bad welds sometimes resulting in failures while operating

Tell us about any hobbies that have boosted pipetrade-relevant skills:

One hobby that would pertain to contributing to my work in construction and trades would be working on family vehicles. Having to break down the different schematics and apply basic tool knowledge. Another would be when I still lived in TN and I would help my friends build their houses in Rocky Top. There were no blueprints for say, but you had to have no how and the ability to operate machines such as catapillers. Know how to lay a good foundation and work through the TN humidity., One of my hobbies I had that would boost my skills in the construction trades would be my time in Rocky top, TN. Whenever I

Apprenticeships weren't very possible for me in TN. I would've had to basically move to another part of TN just to make it somewhat affordable. Here I will be able to give it me all. I love to learn new skills being able to get paid while I learn is a blessing. Not to mention, all the great people I'll be able to meet along the way. The way the unions are set up here in Wisconsin is an amazing opportunity and I will take full advantage of it if yall will let me., In TN I would've had to drive a couple hours each day to be able to get a

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

When I first got out of high-school I was going to go to college for engineering, however, my parents urged me to give the trades a try. I found that working with my hands and back was what made me happy. And like granddaddy always said, "if you can find a job you enjoy, you'll never work a day in your life.", When I first graduated high school, I was going to go into engineering and computer science. However, my parents urged me to go into the trades. I started working at HatPonics and found that building, working with my hands and back, is what made me happy. As granddaddy always said, "Son, if you can find something you enjoy and get paid for it, you'll never work a day in your life." I felt like it was time to move on from HatPonics and get started working in more traditional trades like welding. I know that if I put my back into welding like I did as an erector or as I did in school I will be able to achieve all my goals.

Welding certificate

What trades-related courses did you take in school?

Welding, Math-Algebra, Math-Geometry

Why is an apprenticeship an attractive option to you?

I feel that it would help me learn more about the trade I wish to go into. You can read all the books you want to but it can't compare to learning from someone who has already made that mistake or has found a better way of going about solving a problem. Having an experienced mentor gives the student or apprentice a better understanding of that material, they are able to ask more questions with better answers than finding them in a book or online. Personally I see myself as someone who learns better hands on and

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I hadn't had a lot of experience in highschool just a couple of odd ends on the farm. However I went to the tech and took a welding class and had so much fun. I graduated the program and got my certificate. I am now looking forward to the next step in taking classes to get into the position that I feel I'd have the most fulfillment doing.

Why is an apprenticeship an attractive option to you?

I think the apprenticeship is a great opportunity for me to expand my skills and work towards a job that pays good and can go all across the country, instead of just being dedicated to one place that can slow down and lay people off.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

What first interested in the building trades was my dad, as a child I would always help with his construction projects, and mechanical projects. Which lead me to finding a local contractor and helping out for my first job. What brought me to welding was at home I started building go karts, mini bikes, etc. I currently do have a job at marinette Marine as a welder. I would like to expand my skills on pipe, whether it's pipe fitting or welding I would prefer welding over the two but I like both. I've also done some fitting so I can read a blueprint pretty well. I think I would be a great addition to your crew.

Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

Plumber, HVAC/R Service Tech, Pipe Fabricator, Steamfitter (Pipefitter), Pipe Fabricator

Work Zones in Preference Order:

Green Bay Area (Yellow), Appleton Area (Green), Green Bay Area (Yellow), Appleton Area (Green)

Relevant Experience Level:

None. Nothing even close-but I'm a hard worker and willing to learn!, None. Nothing even close-but I'm a hard worker and willing to learn!

Years of Full-Time Work Experience: 10+, 7-9**Welding Experience:****Tell us about any jobs where you've learned pipetrades relevant skills:**

I have not had any jobs in my past that correlates to pipe trades but I am eager to learn, I do not have any jobs in the past that would portray myself into the pipefitting career. I honestly don't have any idea what trade I want to do, all I do know is that I have had many full time jobs, year after year, never been fired but leaving jobs because they were careers they were just jobs.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I have a strong appreciation for the outdoors, whether it's hiking, hunting, or simply exploring nature. While this may not directly relate to the construction trades, I believe it has helped me develop resilience and a positive mindset, particularly when faced with challenging conditions. Having experienced various outdoor environments, including cold and difficult weather, I am confident that I can maintain a strong work ethic and stay motivated during tough days on the job., Landscaping

What trades-related courses did you take in school?

Building Trades / Construction, Math-Algebra, Math-Geometry, Woodworking / Woodshop, Math-Algebra, Woodworking / Woodshop

What construction software or technologies do you have training in?**Any Safety Certificates:**

First Aid / CPR, First Aid / CPR

Add'l Details:**Why is an apprenticeship an attractive option to you?**

I am particularly drawn to an apprenticeship because it offers the opportunity to engage in hands-on learning, allowing me to acquire practical skills rather than being confined to a desk. The prospect of gaining valuable, real-world experience through this path is highly appealing. Additionally, I find reassurance in knowing that upon completing my apprenticeship, I will enter a field where I have built a solid foundation of knowledge and skills, and where my hard work and dedication will be recognized and rewarded., Knowing

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I am particularly drawn to the trades because they offer a unique opportunity to build a solid career foundation while gaining a deep understanding of how buildings and interiors are constructed and function. After several years of exploring different job opportunities, I believe that acquiring skills in the trades will not only provide me with valuable, hands-on experience but also serve as a strong asset when it comes time to buy and maintain my own home in the future., Sense Of knowing what I want to do for the rest of my life

Why is an apprenticeship an attractive option to you?

I am interested in pursuing and building a career in welding! My girlfriend suggested I look into an apprenticeship program because her grandfather, dad and brother all started their electrical careers through apprenticeship in the union! I want to build my skill and knowledge and be able to work well doing it!, I want to learn and gain experience.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I worked in Bay Shipping Marina in Sturgeon Bay doing basic welding. I am interested in Pursing a career in welding., I've worked for agency called PDS in Green Bay, WI that gave me work for Fincantieri Bay Shipbuilding (FBS). For the times I've worked for the shipyard I did some steel fitting work like torching and welding parts and I enjoyed. Only thing I didn't like about it was that it's a temporary job since it's through an agency. I'd like to take the next step and to try to make it a career.

I have my high school diploma from Preble High School in Green Bay, WI. If I can have a opportunity to get an apprenticeship I will make the most of it to make a good career as a steamfitter or pipe fabrication. Thank you.
