Disciplines of Interest:

Pipe Fabricator, Pipe Fabricator

Work Zones in Preference Order:

Appleton Area (Green), Appleton Area (Green)

High School:

Kaukauna High School, Kaukauna High

Relevant Experience Level:

Some. I have worked for a plumber, steamfitter or HVAC/R contractor., Some. I have worked for a plumber steamfitter or HVAC/R contractor

Years of Full-Time Work Experience:

Welding Experience:

MIG - Some Knowledge, Stick - Some Knowledge, MIG - Some Knowledge, Stick - Some Knowledge

Shift Availability:

Part-time, school year employment, Full-time,

Tell us about any jobs where you've learned pipetrades relevant skills:

Over the years I gained some skills from my jobs such as tools. I've used so many tools over my time for so many different projects. Some as big as a shear to some as small as a pliers. I learn how to make duct work so I have a general idea of how hvac works. I frequently used a tape measure so I have overall skill when it comes measurements., I've had two jobs that gave me skills I know will carry over into the pipe trades. One was working with my dad, where I got hands-on experience with basic hand tools and power tools. That job gave me a good sense of what it's like to be on a construction site and how things operate. My other job was in a sheet metal shop, where I worked with

Tell us about any hobbies that have boosted pipetrade-relevant skills:

My favourite hobby is working out. I have been consistently going for 5 years. I value my time at the gym and always try to make time for it. I think working out can transfer to a construction trade by showing great amount of determination and work ethic., One of my main hobbies that directly connects to the construction trades is working out. I genuinely enjoy it and spend most of my free time in the gym. It's not just about staying fit, the gym is a great environment where I've been able to improve my communication and social skills by interacting with others, which are key in any construction setting. I'm also extremely dedicated to this routine. Whether it's a

What trades-related courses did you take in school?

Automotive Technology, Math-Algebra, Math-Geometry, Metals, Welding, Math-Geometry, Math-Algebra, Metals, Welding, Automotive Technology

Why is an apprenticeship an attractive option to you?

I think an apprenticeship is a good option for me because I want to learn. I learn hands on so doing an apprenticeship will allow me to work and learn the way I enjoy. I also think an apprenticeship is a great way to still be motivated to work considering you still make money during the process., An apprenticeship is an attractive option to me because I learn best through hands-on experience. I've always worked harder and stayed more focused when I'm actively doing something, rather than sitting at a computer for hours

What construction software or technologies do you have training in?

CNC, CNC

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I was interested in this career because I enjoy being in the shop and working consistently. From a young age my father showed me a path of work through construction, I worked along side him and experienced what it would be like to be a carpenter. Since then I've been in a shop that I've grown to enjoy the work environment. I enjoy fabricating and feel like it's the route I would love to further explore., What got me interested in the pipe trades was joining a shop. Before that, I worked with my father doing carpentry, which taught me a lot of useful skills, but I realized it wasn't what I really wanted to do long-term. After moving into a shop environment, I found that I enjoyed the hands-on work and the atmosphere. That experience helped me see that the pipe trades are the right fit for me, and it's the direction I want to go with my career.

Stick - Some Knowledge**Shift Availability:**

Full-time, summer employment, Part-time, school

Tell us about any jobs where you've learned pipetrades relevant skills:

I've never worked in this trade but i have lived on a farm and welded farm equipment and took and welding class i've also learned things from parents.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I wrestle and am gonna play soccer, it makes me a harder worker because it pushes me and with wrestling i'm around guys so they push me and i get crap from them all the time. i also have been around farming my whole life so that has showed me hard work. My grades in school might say i'm not a hard worker but im the type of kid that can't just sit in a class room and i'm more hands on. I also have taken a welding class but i had shoulder surgery causing me to barley pass since i couldn't do it for the remainder of the school year. I also do like fishing and snowboarding.

What trades-related courses did you take in school?

Welding, Math-Algebra, Math-Geometry, Automotive Technology

Why is an apprenticeship an attractive option to you?

I would like to do pipe fitting because it includes welding which i love and have the biggest passion for and i love geometry so i think it would be fitting for me. I am also interested in construction some what but mainly pipe fitting. I've always wanted to do an apprenticeship but i figured out freshman year i wanted to do one when I was in my welding class and we took a trip to Appleton West Highschool. I talked to DJ Kloda and did the activity set up. I'm also looking to get a better education in welding since north

What construction software or technologies do you have training in?

None

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I would like to go into welding, i'm currently enrolled at Appleton north highschool and took welding plus have welded on farm equipment i work at pick n save as or right now. i'm also 15 and turn 16 january 3rd. I am a hard worker but i am in wrestling during the winter and soccer but will work after practice and am looking at getting an apprenticeship and jr and sr year leave early and take only core classes for credits and so i'm making money. ill have a truck by the time i get my licenses too, my dads a dye maker and works at fv tools and dye and my mom is a welder she was in eau clair but is now looking for a welding job around her current location so ive kinda grow up around that stuff.

Pipe Fabricator

Work Zones in Preference Order:

Green Bay Area (Yellow)

High School:

South West High School

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:

Welding Experience:

TIG - Some Knowledge, MIG - Some Knowledge, Stick - Some Knowledge

Shift Availability:

Part-time, school year employment

Tell us about any jobs where you've learned pipetrades relevant skills:

My first job was a bagger/cart runner at Festival Foods, I learned basic communication and customer service here. Next I worked at Mcdonald's, here I had to learn almost every position in the kitchen. I am currently employed at Five Guys and am one of the main crew members, Time management and communication are the top priority while making orders.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I started skating and snowboarding last year and they both taught me to learn from my mistakes. I have also learned to keep getting up no matter what, failing is a part of life. I can use this mentality to keep my work persistent and learn from the best.

What trades-related courses did you take in school?

Automotive Technology, Welding, Metals, Woodworking / Woodshop, Math-Precalculus / Trigonometry, Math-Geometry, Math-Algebra

Why is an apprenticeship an attractive option to you?

I will be getting trained by professionals at a young age, cementing the trade in my mind. A 2 year or 4 year tech school would cost money and I am in a bad financial situation at the moment. Learning a trade right out of high school will set me up for life.

What construction software or technologies do you have training in?

CNC

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

It's a job that has very good benefits financially. With the pensions and even insurance coverage, I would find a job that I can rely on until I retire. You can meet many smart people in trades and I'm excited to learn what they know. A career in pipe trades is usually a local job, so I won't have to worry about moving or traveling far from home.

Tell us about any jobs where you've learned pipetrades relevant skills:

The only job I have related to a type of trade is the fields, you get your body down and working I move my hands constantly while working. It's about waking up early in the morning getting to the job site and getting done what the farmer wants done that day.

My other job at mcdonald's i work in the kitchen so I prep, cook and assemble so I got to be fast in my work. The Work environment seems to get stressful if there some not moving with speed.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I really enjoy going to the gym to lift weights and feel good mentally and physically. Lifting weights brings so much joy to my life and a notice it being effective when i'm at work, having to lift heavy equipment and to push myself during difficult scenarios and difficult situations.

I played sports in high school also have a job so I can't let my coaches down at practice or in game nor can I fail my manager. So I make sure time management is always precise because lacking is not tolerated in most places i've been a team member at.

What trades-related courses did you take in school?

Welding, Woodworking / Woodshop, Metals, Math-Geometry, Math-Algebra, Engineering, Automotive Technology, Building Trades / Construction, Construction Technology

Why is an apprenticeship an attractive option to you?

An apprenticeship is a really attractive option because I believe it's a really smart move to get people going in what they wanna pursue. For example, I really want an apprenticeship in HVAC because I view that as a long time goal I wanna be an HVAC technician. Sometimes it can be hard to get involved so in that case the apprenticeship makes it a really good option.

Getting paid for learning new skills is only just a plus, you're learning the future skill and

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Throughout my life, I always liked exploring my options and doing things right. A 4 or 2 year college doesn't call my attention after high school. I've been working since I was 13 so I always liked making an honest dollar. My teachers, parents and counselors tell me that my idea of getting into the trades is a really smart idea. And all I wanna do is move forward with it.

I made research and talk to many workers in the trades and they tell me how it's the best decision they could've made. I talked to my teacher about it earlier in the school year he mentioned if he was in high school again he would've definitely taken the route towards the trades. I'm really looking forward to doing something special and different after high school for myself, my family and a new company.

Tell us about any jobs where you've learned pipetrades relevant skills:

I'm currently working at The Home Depot. I possess a range of skills that can be applied to various positions in the manufacturing industry, including assembly and tool use, Inventory control, Teamwork, problem-solving, and Effective Communication. There are a couple good skills I have acquired while working at my job. Some of these skills include; critical thinking and problem solving. Often times at work I have to figure out issues that customers have had with their orders and their products. Communication is another skill I use a lot. Most of the time I have to ask some of my fellow associates for help with something. Such as loading something or helping a customer with something

Tell us about any hobbies that have boosted pipetrade-relevant skills:

Woodworking, metalworking, welding. A couple things I like to do in my free time are; building guitars and working with wood projects. I often use critical thinking while building these as well. Most times there is something I mess up when making things, I take a step and try to figure out what step I messed up on and then try to go back and fix it. Another skill I often use is communication. With my current job that I'm at I need to be able to effectively communicate with my fellow workers.

What trades-related courses did you take in school?

Automotive Technology, Drafting and Design, Math-Algebra, Welding, Building Trades / Construction, Woodworking / Woodshop, Metals, Automotive Technology, Building Trades / Construction, Drafting and Design, Welding, Woodworking / Woodshop

Why is an apprenticeship an attractive option to you?

It is a great opportunity to expand my career options and get more experience in the work world. I feel it's a good way to improve my skills that can apply to the workforce. I'm willing to learn whatever is necessary to get the job done.

What construction software or technologies do you have training in?

AutoCAD, Inventor, AutoCAD, CNC

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've always wanted to find a job in manufacturing but was never able to find a solid position. Ever since I was a little kid, sometimes I used to go with my grandpa to his hvac job, when he showed me what he does I thought it would be pretty cool to work these types of jobs. Ever since then in school, I have been taking shop classes and loved taking them. I feel like pipe fitting would be a really cool trade to try out.

Youth Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

Steamfitter (Pipefitter), Pipe Fabricator

Work Zones in Preference Order:

Appleton Area (Green)

High School:

Kimberly High School

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:

Welding Experience:

MIG - Some Knowledge, Stick - Some Knowledge, TIG - Some Knowledge

Shift Availability:

Full-time, summer employment, Part-time, school

Tell us about any jobs where you've learned pipetrades relevant skills:

I currently am employed at Wisconsin Steel Fabrication LLC as a youth Apprentice Since June of 2025. I work 5:30a-5pm Monday through Thursday and 5:30am-12pm on Friday. I do a variety of duties including prepping metal for the welders, quality checks on the finished work, painting, increments of welding throughout the day, cleaning the shop, and assist with loading/unloading materials. Prior to that, I worked for Level Plain Dairy where I learned to work independently being solely responsible for milking and feeding the herd along with cleaning the barn.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I play Lacrosse which helps build my strength, endurance, communication and teamwork skills along with showing my commitment to the team. I enjoy hunting and fishing in my free time, this helps me to relax and improve my patience. My dad does a lot of home improvement projects both at home and up north in which I enjoy helping and learning the skills he passes on to me.

What trades-related courses did you take in school?

Building Trades / Construction, Construction Technology, Welding, Woodworking / Woodshop, Metals, Drafting and Design

Why is an apprenticeship an attractive option to you?

I am very interested in getting a jumpstart on the skills and knowledge I need to develop a strong career in the pipe fitting and pipe fabrication industry. An apprenticeship offers me the opportunity to get hands on learning while building my future. I believe the sooner I begin developing these skills the better employee I will be.

What construction software or technologies do you have training in?

Bluebeam, Revit, Inventor

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I have taken Intro to ACE Academy, Welding Tech 1, Building Construction 1 & 2, and Metals Manufacturing Tech 1 classes in school. My sister's boyfriend is a 3rd year apprentice with the Local 400 as a Pipefitter, I have discussed the career with him and am excited about the opportunities the Local 400 offers. I currently work at a metal fabrication shop as a youth apprentice, working 4 12-hour and 1 6-hour day per week, learning the basics of the metals trade and welding. Based on what I have learned and experienced so far, I have really enjoyed the welding and metals trade. This summer I really enjoyed working in a busy metal fabrication shop. I believe this would be a rewarding career for me.

Tell us about any jobs where you've learned pipetrades relevant skills:

I currently work at the City of Two Rivers water department. I started an apprenticeship there in 5/2024 and am still currently employed there.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I enjoy working on vehicles and have helped my neighbor pour concrete. In high school, I had Home Repair and Construction class which gave me a glimpse into the construction trades.

What trades-related courses did you take in school?

Woodworking / Woodshop, Math-Algebra, Metals, Math-Geometry

Why is an apprenticeship an attractive option to you?

This is an attractive option for me to get hands-on experience and learn the trade to have better future opportunities.

What construction software or technologies do you have training in?

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I am currently a youth apprentice at the City of Two Rivers water department and often work around plumbers and other trade workers. I started this apprenticeship in 5/2024 and now would like to try something different my senior year of high school. This experience helped me to be interested in the plumbing field.

Youth Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

HVAC/R Service Tech, Steamfitter (Pipefitter), Pipe Fabricator

Work Zones in Preference Order:Appleton Area (Green) **High School:** Kimberly High School**Relevant Experience Level:**

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:**Welding Experience:****Shift Availability:**

Full-time, summer employment, Part-time, school

Tell us about any jobs where you've learned pipetrades relevant skills:

I've worked fast food, retail, and sales professionally, but none of those apply to skills in the pipe trades besides my learning ability, socializing, and working well with others, although I've landscaped for family friends and relatives most of my life doing projects such as building sheds, basic carpentry which may be applicable to pipe trades.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

Some of my hobbies are landscaping, and household work for neighbors, friends, relatives such as woodworking projects and general house labor.

What trades-related courses did you take in school?

Building Trades / Construction, Electrical Trades / Electronics, Construction Technology, Math-Algebra, Math-Geometry, Woodworking / Woodshop

Why is an apprenticeship an attractive option to you?

I've recently been looking into my options for the future, experimenting with different options such as retail, sales, and landscaping, the apprentice option is appealing to me because it allows me to work with my hands and actively stay busy, whilst learning trades from a young age that can create a Career for my future.

What construction software or technologies do you have training in?**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

I've worked in fast food and landscaping most my life, recently I've been working sales and haven't found it to be my strong suit, I prefer to work with my hands and actively work.

Any Safety Certificates:

First Aid / CPR

Youth Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

HVAC/R Service Tech

Work Zones in Preference Order:

Fond du Lac Area (Orange)

High School:

Howard's Grove Highschool

Relevant Experience Level:

None. Nothing even close-but I'm a hard worker and willing to learn!

Years of Full-Time Work Experience:

Welding Experience:

TIG - Some Knowledge, Stick - Some Knowledge, MIG - Some Knowledge

Shift Availability:

Part-time, school year employment

Tell us about any jobs where you've learned pipetrades relevant skills:

I've worked in a retail store which has taught me customer service, the ability to consistently lift heavy items, being friendly and helpful to my coworkers. Working there has also shown me that I can learn new things pretty quick via hands on learning.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I work on cars with my dad, he races cars for a hobby and I help him a lot, as well as work on my own car, I've done the basics to working on a car to doing full blown engine swaps, I'm very handy and I love working with my hands. I'm also a hands on learner so once I'm shown how to do something I can normally replicate what said person just did.

What trades-related courses did you take in school?

Drafting and Design, Math-Algebra, Math-Geometry, Metals, Welding, Woodworking / Woodshop, Math-Precalculus / Trigonometry, Automotive Technology

Why is an apprenticeship an attractive option to you?

Because if I do it in Highschool I may be able to come out of Highschool with a scholarship and then I can work for a company and make money only after a few years. Which excites me because making money and doing something hands on is what I love to do.

What construction software or technologies do you have training in?

Inventor, CNC

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've always wanted to have a job eventually that is very hands on, I don't like sitting still so an office job would suit me. My cousin does HVAC and she loves her job and she explained to me and I'm interested in it now. I'm also interested because I know that the trades are in need and you can make some pretty good money.

i haven't had a job near pipe trades. like i've said before it is hard to get accepted into those type of jobs when you have little to no experience and most places doubt girls in trades. but i've always been willing to learn and be a hard worker towards it., None

Tell us about any hobbies that have boosted pipetrade-relevant skills:

my main source of welding is from school. i started freshman year and i plan on doing it for the rest of my highschool career. i've always wanted to do competitions, etc. but it's hard to find that confidence when your a girl going into the trades. i rely on school but plan on doing more hopefully soon., I don't really do any welding or trades in general in my free time.

What trades-related courses did you take in school?

Woodworking / Woodshop, Welding, Math-Geometry, Math-Algebra, Engineering, Automotive Technology, Math-Algebra, Math-Geometry, Welding, Woodworking / Woodshop

Why is an apprenticeship an attractive option to you?

help me do something i love during the day. explore more options. i prefer work over school, i love to work for what i want and have. going to school for a few hours then work right after seems like the dream to me, getting education but also doing what i love after., Gives me more opportunities. I prefer work over school any day and not just because of money it keeps me busy and it's what I enjoy during my day.

What construction software or technologies do you have training in?**Any Safety Certificates:**

First Aid / CPR, First Aid / CPR

Add'l Details:**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

my family is in the trades and once i started doing welding and other shop classes in school, i always had a passion in it and wanted to do it in the future and after highschool. it helps me to be stronger and brave and more hardworking, especially with welding since there's a lot of mistakes. i've learned to keep going no matter what and to not give up. i've learned a lot in the past two years of me welding that it takes a strong person to do. welding truly makes me happy and that's why i want to do it as a job. friends and family and even teachers has always helped me through it. especially when im going through tough times with not getting it the first few times or when i feel im gonna give up. but you can't give up in trades or any job. ever since i started welding thats what i would do in my free time, even if its to get better., My family is big into trades. My dad used to do construction, my uncle is a welder. I've always had an interest in welding and construction in general. Ever since I started high school I took shop classes and once I started welding I loved it immediately

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I work with table saws and reciprocating saws almost daily at my current job, helping replace wooden lattice. I also have installed two faucets and a toilet in my own house. I've fixed and installed drywalling and built a staircase and a deck, all while using a variety of power and hand tools.

What trades-related courses did you take in school?

Math-Algebra, Math-Geometry, Automotive Technology, Building Trades / Construction, Math-Precalculus / Trigonometry

Why is an apprenticeship an attractive option to you?

Because I will be getting reimbursed for the learning I'm doing, all while getting hands on job experience. I'll be able to learn the ins and outs of the job while receiving guidance from experienced professionals.

What construction software or technologies do you have training in?

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I like working with my hands and meeting and working with new people. I like the pipe trades the most since it allows me to meet a diverse group of customers and work for a company of my choosing. The plumbing trade has been something I've wanted to do for years now, and this would be an amazing opportunity for me to learn about all the work and trades surrounding plumbing.

Tell us about any jobs where you've learned pipetrades relevant skills:

I work with my dad's roofing company where I have learned all about it and I know how the pipes go in people houses, I work in the summer roofing with my dad's company I know all about it. I do welds on people pipes on their cars when I go to my dad's friend shop fix them., I work with my dad's roofing company in the summer and any chance I can.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I play soccer where I have to lead my teammates on doing the right things and not the bad ones if I am working and see someone fooling around or not doing what they are supposed to do I will tell them that they should do their work and do the right things., I play soccer have been since I was a kid I'm trying my hardest to get captain this year been on varsity since freshman year starting that's been a great thing. In the summer I go work with my dad's company roofing and down the whole day working for him so I'm not the scared type of person and I'll accomplish anything that comes my way., I play soccer and this year I'm trying my hardest to get the captain spot. Been on varsity

What trades-related courses did you take in school?

Engineering, Math-Algebra, Math-Geometry, Welding, Woodworking / Woodshop, Metals, Building Trades / Construction, Math-Algebra, Math-Geometry, Metals, Welding, Woodworking / Woodshop, Engineering, Building Trades / Construction, Building Trades / Construction, Engineering, Math-Algebra, Math-Geometry, Metals, Welding, Woodworking / Woodshop

Why is an apprenticeship an attractive option to you?

Because it's better to start early than later start now for you can get the life you have always wanted you start later that might not be a chance have time to make it right. I'm a hard working person I don't like just sitting around I need to be doing something and it's better if it's something I love to do., Because it's better to start sooner than later starting to late might not be good because you can have better options starting sooner that later., Because it's a way to start something big sooner. If you start sooner you have better

What construction software or technologies do you have training in?

CNC, Laser Scanning, CNC, Laser Scanning, CNC, Laser Scanning

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I love doing welding and anything to do with construction that would be a job I'm looking for when I am done with high school., Welding and construction has been in my life I still have two more trimesters of welding and for construction. For welding it's something I like doing it's something I can do and because I'm a person that always needs to be doing something that's a great thing for welding because I'll always be busy., Always like doing welding still have two more years of welding classes in my school to learn even more. I am involved with any type of construction and welding.

Years of Full-Time Work Experience:**Welding Experience:**

Stick - Some Knowledge, TIG - Some Knowledge, MIG - Some Knowledge

Shift Availability:

Full-time, summer employment, Part-time, school

Tell us about any jobs where you've learned pipetrades relevant skills:

Non of the jobs i have had correlate to the trades they are all food related. But in school many of the classes i took can correlate to the trades.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I enjoy drawing/art and making designs, i took some design classes and fabrication classes in school i always did good in them and enjoyed the work i was doing. I have also had many other jobs and am good at time management as well as talking to people, at my past jobs this was needed. One of my hobbies is skate boarding, basically i can go standing for ling periods of time with no issue.

What trades-related courses did you take in school?

Metals, Welding, Math-Algebra, Math-Geometry, Drafting and Design, Engineering, Woodworking / Woodshop

Why is an apprenticeship an attractive option to you?

A youth apprenticeship is in my vision for my future i want to become a welder and make alot of money so i can have the things i want in life. Its a job i would enjoy and listen well in because i want to achieve becoming a full time welder. There are many other reasons for my interest in the trades but these are just a couple.

What construction software or technologies do you have training in?

CNC

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I like the idea of having a job i would actually enjoy learning about while building a full time career. I have always had a interest in the trades since i was a kid, my grandfather had me help out when he did shop work and i grew to like it alot. My grandpa has influenced me in alot of aspects of my life and this just feels like a great career for me because of him. I also don't want to work in any fast food industry or retail, the trades are way more enticing and fun.

Youth Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

Plumber, Steamfitter (Pipefitter), HVAC/R Service Tech, Pipe Fabricator

Work Zones in Preference Order:

Green Bay Area (Yellow), Appleton Area (Green), Fond du Lac Area (Orange)

High School:

Hortonville high school

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:**Welding Experience:**

Stick - Skilled, MIG - Skilled, TIG - Some Knowledge

Shift Availability:

Part-time, school year employment

Tell us about any jobs where you've learned pipetrades relevant skills:

I've worked as a Mason tender for 7+ years, a landscaper for 3+ years, I help my neighbor who restores barns as often as I'm available, I help my other neighbor on his farm when requested. All helped me improve my critical thinking skills. I've learned quality craftsmanship and the importance of doing it right the first time. Im given experience using unfamiliar machines and making them familiar. Every job I have keeps me growing, on track, and my toes thinking and calling for creativity. I get to be innovative and adaptive.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I hunt and trap year round, any critters or pests that are a problem on the jobsite can be handled by yours truly. Building, organizing, and creating have always been a strong suit for me. I also regularly draw up plans from my head onto paper. From there I effectively communicate my ideas to the people close to me so we're on the same page.

What trades-related courses did you take in school?

Building Trades / Construction, Electrical Trades / Electronics, Drafting and Design, Construction Technology, Math-Algebra, Math-Geometry, Math-Precalculus / Trigonometry, Metals, Welding, Woodworking / Woodshop

Why is an apprenticeship an attractive option to you?

I'm a big fan of being hands on learning and immediately being able to apply it in my day to day life; plus get results and feedback right then and there. Being able to learn useful knowledge that I'm ensured to use for the rest of my life peaks my excitement. Sitting in a classroom environment for extended excess periods of time is in my opinion boring and bothers me because I can be applied more effectively elsewhere. I enjoy construction most because we use what we learn, and continue to grow in knowledge. I'm able to stay

What construction software or technologies do you have training in?

AutoCAD, Inventor, Revit, CNC

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I like hands on activities. I'm not interested in a college degree or getting indoctrinated. I've been working in the trades as a Mason tender alongside my dad for over 7+ years. The trades, building and creating is something I've always enjoyed.

Tell us about any jobs where you've learned pipetrades relevant skills:

I do not have any Jobs in which I have learned skills applicable to the pipe trades.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

In addition to my interest in the trades, I actively participate in rugby and football, where I've developed strong teamwork skills and a deep understanding of the importance of fulfilling your role and contributing to a common goal. I also currently work at a pizza restaurant. While it's not directly related to the trades, it has taught me the value of hard work, reliability, and maintaining a strong work ethic. One of my personal goals is to continually improve myself while also helping those around me grow and succeed.

What trades-related courses did you take in school?

Woodworking / Woodshop, Building Trades / Construction, Electrical Trades / Electronics, Engineering, Math-Algebra, Math-Geometry

Why is an apprenticeship an attractive option to you?

An apprenticeship stands out to me because I learn best through hands-on experience. I got some exposure to HVAC in my Construction class (ACE) at Fond du Lac High School, and it really sparked my interest. Being part of the rugby and football teams has also taught me the value of teamwork and doing your job right. I currently work at a pizza restaurant, which has helped me build a strong work ethic. I see an apprenticeship as the perfect way to keep learning, work hard, and start a career in a field I'm excited about.

What construction software or technologies do you have training in?**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

I am interested in pursuing a career as an HVAC Technician because of the valuable skills and knowledge the field offers. I have heard many positive things about the industry and believe that my abilities and interests make me a strong fit for this role. I gained hands-on experience through my Construction class, ACE, at Fond du Lac High School, where I was introduced to aspects of HVAC work. I am highly motivated, enjoy working hard, and am confident that this path aligns well with my strengths and goals.

Tell us about any jobs where you've learned pipetrades relevant skills:

I've done renovation of duplex's doing woodwork and some small plumbing jobs. I've added additions to our house one plumbed the bathroom.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I've built houses and don't the plumbing work for our houses and bathrooms. Other hobbies is hunting and fishing along with football

What trades-related courses did you take in school?

Automotive Technology, Building Trades / Construction, Electrical Trades / Electronics, Math-Algebra, Math-Geometry, Math-Precalculus / Trigonometry, Metals, Welding, Woodworking / Woodshop

Why is an apprenticeship an attractive option to you?

I want to learn as I go, along with getting paid. Reading from a book dosent really help me so when I'm doing it I pick it up a lot fast. I'm also looking to get out of school for work and gain experience in the trade.

What construction software or technologies do you have training in?

Inventor, Revit, AutoCAD

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've always know I've wanted to do some sort of welding. I've taken many classes through our High school, I've also done the field goal competition for ua400 this year. I find plumbing interesting because I like to use my hands and tools and it involves welding so it's best of both worlds.

Work Zones in Preference Order:

Appleton Area (Green)

High School:

Weyauwega-Fremont High School

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:**Welding Experience:****Shift Availability:**

Full-time, summer employment, Part-time, school

Tell us about any jobs where you've learned pipetrades relevant skills:

I have not had any jobs related to pipe trades but I have a mind that is willing and ready to learn. I really have no experience with any pipe trades but I have been doing projects with my dad till he got sick and by myself since the day I was born. I am very adaptable and am ready to learn.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I moved about a year and a half ago to a dual duplex my family owns. We are almost done, but have been in the process of a complete remodel, making a dual duplex one home. In this span of a year and a half I've learned a lot of skills I think are a little irrelevant to plumbing but still fits requirements of using simple brain knowledge like drywall, flooring, framing, and a good grip on how to use most hand tools. I have always been thought to think outside of the box and use the materials I have ready.

What trades-related courses did you take in school?

Woodworking / Woodshop, Math-Algebra

Why is an apprenticeship an attractive option to you?

I like to keep my brain moving and innovating. An office job or a stationary job never fit my liking. Plumbing is a job that I have always liked and think it will be a good lifelong career on my body and mind. I have also explored plumbing jobs near me and the opportunities are very good after you become a licensed plumber from what I am seeing.

What construction software or technologies do you have training in?**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

I always wanted to join a trade; The demand for plumbers sparked my interest a few years back and is the job that I have always dreamed of doing out of high school.

None. Nothing even close-but I'm a hard worker and willing to learn!

Years of Full-Time Work Experience:

Welding Experience:

Stick - Skilled, TIG - Some Knowledge, MIG - Skilled, Flux Core - Some Knowledge

Shift Availability:

Full-time, summer employment, Part-time, school

Tell us about any jobs where you've learned pipetrades relevant skills:

I have not had any jobs related to pipe trades yet but this is where I wanna make my opportunity

Tell us about any hobbies that have boosted pipetrade-relevant skills:

In school I'm taking any, and every metals class I can, not just metals, but construction as well. I grew up with my dad who has always been a welder growing young, and now growing old and still welding, he's always showed me and talked to me about everything he's done or worked on. We unfortunately don't have a welder at home but as soon as I found out last year I could weld in school for it I knew that's what I wanted to do and ever since I've just been working and going to school to weld

What trades-related courses did you take in school?

Welding, Metals, Woodworking / Woodshop, Math-Geometry, Math-Algebra, Automotive Technology, Building Trades / Construction

Why is an apprenticeship an attractive option to you?

An apprenticeship is more attractive to me because it focuses hands on more to what I'm there for instead of filling my schedule with random elective classes I get to work on what I want to work on like welding

What construction software or technologies do you have training in?

AutoCAD, Inventor

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

There's a need for welders all around and I believe I have a good talent in welding and I would like to take my talent and use it in the field. I specifically want to be in the pipe trades because I believe that's where I'll do my best but I also want to prove those wrong who said I couldn't.

Youth Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

Pipe Fabricator, Plumber

Work Zones in Preference Order:

Appleton Area (Green)

High School:

Hortonville high school

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:

Welding Experience:

MIG - Skilled, Flux Core - Some Knowledge, TIG - Some Knowledge,
Stick - Skilled

Shift Availability:

Full-time, summer employment, Part-time, school

Tell us about any jobs where you've learned pipetrades relevant skills:

Well I worked at wash monkey and there the owner would show me how to keep up with some things in the wash and some of that involved welding or sorts and he let me do a little mig while we were doing some maintenance

Tell us about any hobbies that have boosted pipetrade-relevant skills:

Well I do play hockey and a lot of it and I have been playing it for a long time so I know how to work with a team. This will help me drastically in the trades because almost every job is with someone so by knowing how to work with a team is a good skill for me to have going into the trades

What trades-related courses did you take in school?

Building Trades / Construction, Electrical Trades / Electronics, Engineering, Math-Geometry, Math-Algebra, Metals, Woodworking / Woodshop, Welding

Why is an apprenticeship an attractive option to you?

I believe that doing a youth apprenticeship will help me boost myself to a life time career . I also have a couple older friends that do the youth apprenticeship and I see this as a great opportunity for me to see how the trades really are

What construction software or technologies do you have training in?

AutoCAD, Inventor

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I found interest in the trades from out hands on shop classes. One of those classes was metals and I loved that class so I figured it wouldn't hurt to look at some opportunities. As well as my interests from plumbing came about because I have a couple people in my family who do plumbing and from hearing what they do that interested me as well.

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:**Welding Experience:**

Stick - Some Knowledge, MIG - Some Knowledge, MIG - Skilled

Shift Availability:

Full-time, summer employment, Part-time, school

Tell us about any jobs where you've learned pipetrades relevant skills:

I have not had employed in the construction trade, but I have done small jobs regarding yard work and mowing the lawn for my neighbors. I learned how to stay committed to showing up to work and doing quality work.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I enjoy golfing, and I started golfing for my school this year, where I learned how to work my way up as someone new to the team and how to stay focused and keep my head up after a bad shot because I know that I won't make that same mistake. This relates to the construction trades because mistakes happen and I think I can learn from my mistakes and be better because of it. Teamwork, communication, hard work, and pride are all key factors in sports that I enjoy, and are also a big part of the workforce.

What trades-related courses did you take in school?

Welding, Woodworking / Woodshop, Metals, Math-Algebra, Math-Geometry, Drafting and Design

Why is an apprenticeship an attractive option to you?

I've enjoyed all of the shop classes I've taken and I've heard great things about Local 400. I am also looking for a summer job and I thought an apprenticeship would be a great opportunity to learn the trades.

What construction software or technologies do you have training in?

AutoCAD, Solidworks

Chief Architect

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I first took an interest when I took some welding and shop classes at the start of high school. Since then, I've kept an interest and continued with shop classes. My Dad, Uncle, and Cousin are also currently pipefitters for Local 400. I would love the opportunity to learn the trade.

Disciplines of Interest:

Plumber, HVAC/R Service Tech

Work Zones in Preference Order:

Appleton Area (Green)

High School:

Appleton North

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:

Welding Experience:

MIG - Some Knowledge, Stick - Some Knowledge

Shift Availability:

Part-time, school year employment, Full-time,

Tell us about any jobs where you've learned pipetrades relevant skills:

I have done jobs with my grandpa (not actually employed) where I have learned to put in garage doors and the tools used to do so. I have a current job at fleet farm where I have learned the names of many tools I have not know of before.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

One of my hobbies is fishing which has taught me patience, troubleshooting, and how to read water conditions. All of which require problem solving which I'm sure is needed in the trades. Hunting has taught me how to stay focused for hours on end without losing precision. Also, another one of my hobbies is working out, staying in shape should make it possible for me to do physically demanding things on the Jobsite.

What trades-related courses did you take in school?

Math-Algebra, Math-Geometry, Math-Precalculus / Trigonometry, Welding

Why is an apprenticeship an attractive option to you?

It is a way to get right into work out of high school instead of sitting still or going to even more classes. That interests me because I have goals I want to achieve such as buying myself a boat, a nice house, the best equipment for my hobbies, etc. and going to a 4 year college would make it take longer to achieve that, whereas an apprenticeship has me learning a skill that I will continuously get better at throughout my career.

What construction software or technologies do you have training in?

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

What originally interested me was going straight out of school and learning something I can use for the rest of my life no matter where I am without having to go to some 4 year college to learn it. Also, getting paid while learning is something I just recently heard about and definitely interests me more. The reason the pipe trades interested me is because I have seen people who are around dads age who are in plumbing and do very well for themselves.

Tell us about any jobs where you've learned pipetrades relevant skills:

N/A

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I have taken welding courses in high school which has allowed me to learn valuable skills that could help me with learning HVAC. I have also taken woodworking classes where I also learned valuable skills that will help me in the trade. A hobby I have is soccer which requires a lot of training and teamwork. Having the training mentality and teamwork skill will help me succeed in HVAC.

What trades-related courses did you take in school?

Welding

Why is an apprenticeship an attractive option to you?

I am interested in an apprenticeship for various reasons. One reason is because of the ability to learn hands on training from the experienced professionals and the ability to attend school while experiencing the hands-on work. Second reason is because of the continues learning and career advancements that an apprenticeship will bring for me. The third reason is because an apprenticeship will give me the opportunity to earn a steady income while gaining the skills necessary to succeed in the industry.

What construction software or technologies do you have training in?

AutoCAD

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

A career in trades interest me because there is a lot of room for creativity and innovation. It is a career that seems empowering and constantly evolving throughout the years. I am very passionate about learning HVAC and look forward to working in the trade.

I am currently on my high schools golf team. Golf is something I am very interested in at getting better at and that drive to get better and learn will really assist me in learning a trade.

What trades-related courses did you take in school?

Math-Algebra, Math-Geometry, Woodworking / Woodshop

Why is an apprenticeship an attractive option to you?

The apprenticeship will give me the tools and education I need to be successful for my future. I am not interested in attending a four year college, but I want to have a successful career that I will really enjoy.

What construction software or technologies do you have training in?

AutoCAD

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I have had wood working in high school, which really got me thinking about the trades. I was able to come up to my dad's work and meet with a foreman and he introduced me to some of the workers and I was able to discuss their work. I like to work hands on and learn how everything is connected and interrelated. I am most interested in becoming an Electrician.

Tell us about any jobs where you've learned pipetrades relevant skills:

I've been working at Hyvee for a little more than 2 years. I have not learned any hard skills applicable to the pipe trades, however, I have learned many soft skills that are important. I have learned how to effectively communicate with others and how to fulfill their wants. I have learned how to work together as a team to get the job done efficiently and with good communication. I have also learned that attention to detail is important in everything that I do to produce quality work.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I enjoy mathematics which is definitely transferable to construction trades. It's crucial to be precise with calculations to ensure quality work. Another hobby I have is going to the gym which keeps me in shape to be physically able to do the job and reduces the chances of me getting injured.

What trades-related courses did you take in school?

Electrical Trades / Electronics, Math-Algebra, Math-Geometry, Welding, Woodworking / Woodshop, Metals

Why is an apprenticeship an attractive option to you?

An apprenticeship is an attractive option to me because it's a pathway to what I want to do in the long term. It would help gain necessary hands-on experience to advance in the industry and reach my goal of becoming a fabricator.

What construction software or technologies do you have training in?**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

I am interested in the building trades because I am a person who likes working with my hands and it would be a very fulfilling career for me. I have some experience with different aspects of the building trades, particularly welding. It's something that I definitely want to pursue as a career in the long term. I would like to become an apprentice to gain experience that will help me progress in the trade.

I have learned through my School and my teachers told me to find a job that has welding because they see good in my future, I have no experience with pipe trades but I have heard of them and want to learn more, I haven't been to any jobs that include welding but I have spent my whole high school doing welding.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I take a welding class and I weld daily when I get the chance to, I also have family and friends that are in the trades and they have told me they love it, I do automotive and welding but I'm much better at welding and I have taught myself many things but I prefer to be taught by a professional., My current hobbies are hunting and also fishing, I love being outside and I love the wilderness

What trades-related courses did you take in school?

Welding, Math-Algebra, Building Trades / Construction, Automotive Technology, Welding, Building Trades / Construction, Engineering, Metals, Math-Algebra, Math-Geometry, Welding, Metals, Building Trades / Construction

Why is an apprenticeship an attractive option to you?

I want to be an apprentice because I would like to learn more and experience the difficulties that are involved in welding, People can teach me better ways to do the things I love and I also can learn new things, I would like to start off my future with a dream that I can finally achieve and hope to live a fantastic life

What construction software or technologies do you have training in?

Machining, None

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I started welding my junior year and I have had a huge change in what I have wanted to do after high-school. It went from going to the military to becoming a welder in the trades. I have heard that people in the trades become successful and have a great future and they also love doing their job. It has been my dream to go and work for something that I love do on a daily and never get bored., My friend noah eide, and also my welding teacher wanted me to go into a welding career. They wanted me to go to peirce manufacturing, local 400, and Azco. I have tried other places but they have said no they can't do it.

Any Safety Certificates:

OSHA 10, OSHA 10

Add'l Details:

I wish to be in the local 400 because I want to learn more new things and hopefully have this as my future., In my junior year of high school, I decided to take a welding class. I have enjoyed every second in that welding class, so I took it again during my senior year and I have found out what I have liked the most to weld with I have also found out what I

Tell us about any jobs where you've learned pipetrades relevant skills:

other than school I don't have many., While I'm new to the plumbing industry, I have taken classes like welding, metals, and construction in high school.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I do allot of random tasks like fixing lawn mowers roofing etc. all of this stuff should help me become a better tradesmen, Welding is a hobby of mine. it has helped me develop an understanding of working with metals and patience.

What trades-related courses did you take in school?

Math-Algebra, Welding, Woodworking / Woodshop, Math-Geometry, Metals, Engineering, Electrical Trades / Electronics, Building Trades / Construction, Automotive Technology, Metals, Electrical Trades / Electronics, Welding

Why is an apprenticeship an attractive option to you?

I feel that an apprenticeship will help me get good job experience before I enter the field., I enjoy hands-on work and learning. An apprenticeship offers the opportunity to gain experience while being trained by professionals. It also allows me to earn while I learn, which is an affordable way to build a career.

What construction software or technologies do you have training in?

CNC

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

We have a decent welding program in are school and I have taken some of the courses. I felt like welding for me was more of a hobby than a job, but I now feel the pipe trades would have a mix of both that's why I've been looking into it more., I'm comfortable with hands-on tasks and enjoy fixing things.

Tell us about any jobs where you've learned pipetrades relevant skills:

I have worked on two different farms in the last 4 years. Working on a farm gives you a great range of learning experiences. Knowledge of tools/power tools are gained through use of them. Team work and communication skills are must haves in order to complete tasks such as moving and separating animals. These are applicable in nearly all jobs., Over the last four years I've worked on two different farms and helped out at my uncle's shop. At these jobs I have gained basic knowledge and operations of many power tools. I have also greatly improved my problem solving skills.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I love welding and spend much of my free time at school in the shop doing this building my skills and knowledge in this area. Outside of school I enjoy working on my truck. I have minimal knowledge when it comes to vehicles. This often provides challenges for me that I enjoy working on and researching to solve. This builds great problem solving skills that can be used in nearly any job., In school I spent any free time that I had in our metal shop working on projects that tested and improved my skills specifically in welding. At home you can usually find me in the garage or shed working on my latest adventure. Wether it be working on a vehicle or building my latest project whatever it

What trades-related courses did you take in school?

Engineering, Math-Algebra, Math-Geometry, Metals, Welding, Woodworking / Woodshop, Building Trades / Construction, Construction Technology, Engineering, Math-Algebra, Math-Geometry, Metals, Welding, Woodworking / Woodshop

Why is an apprenticeship an attractive option to you?

As a hands on learner, an apprenticeship enables me to be out in the field learning trades from experienced people who enjoy and have the same love for them that I do, rather than sitting in a classroom everyday., An apprenticeship is appealing to me because it would allow me to to work while also getting some education. I have a strong work ethic growing up working on farms, so I am eager to get into the workplace and gain real on the job experience. On the flip side, I recognize that education is also important to build

What construction software or technologies do you have training in?

CNC, CNC

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've always been a hands on learner and worker. As I have gone through highschool, I've loved to be in the shop weather I have a project to work on or I'm helping someone else. I spend nearly all my free time there. I've grown a specific fascination and love for metal manufacturing and welding, which has brought me here., I love learning while working with my hands. Wether it was at school or is at home working on personal projects, I'm always looking to grow my knowledge and skills. Through shop classes I grew a special love for welding and metal fabrication. I always love a good adventure or new experience, especially one that tests my skills. I feel that this career would do just that.

Tell us about any jobs where you've learned pipetrades relevant skills:

I have not worked at any jobs that relate to trades, I have only worked in environments that needed teamwork to properly operate. Like most jobs.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I don't really do anything related to trades or construction but I am a quick learner, I took welding and am currently taking cabinet and furniture, they're not current hobbies because I can't do it at home but I would if I could. Going step by step using multiple tools to get the end result is very satisfying to me. In those classes I have to communicate with classmates and work together efficiently to get a certain part done by the end of class, I find myself working very smoothly with people and we understand each other pretty quick.

What trades-related courses did you take in school?

Welding, Math-Geometry, Math-Algebra, Welding, Woodworking / Woodshop, Math-Geometry, Math-Algebra, Math-Precalculus / Trigonometry

Why is an apprenticeship an attractive option to you?

It's a lot more simple than college and is strictly teaching me on stuff I'll actually need to know. Also love the fact that I'm getting paid to be an apprentice, I do not want to pay for college whatsoever. It's so expensive and in this day and age there isn't any guarantee that degree will be worth it for me in the end. Taking this route is way more appealing to me as I technically don't have to directly pay for schooling and it sets me right on the path of my whole career, all I have to do is simply start and work as hard as I possibly

What construction software or technologies do you have training in?

I knew I wanted something hands on and nothing like an office job or something real boring, along with the amazing pay and zero college debt I'm just gonna force myself to push as hard as I can in this career path, I love to work in hands on environments so I knew I was going into the trades. I was originally going for welding but I prefer to be driving around place to place instead of one spot. I didn't want some office job, I need an activity to keep me and my brain active. I like working with multiple people on one project and am efficient with a group so I couldn't think of a better place for me than pipe/steamfitting.

I have not had any jobs related to this, None

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I like the outdoors such as hunting and fishing. Doing both of these hobbies requires me to plan ahead before a hunting or fishing trip, gather my equipment and also use it safely to accomplish the goal. This is a similar skill needed in the trades field.

I also enjoy small construction jobs such as helping my grandpa with repairs on his duplex he rents or at his home. I also do small construction jobs for my hobbies such as building new tree stands., My biggest hobby is working on my own car. My dad has taught me a lot and I have a lot of experience with basic tool knowledge. I also like to hunt and fish and lots of other outdoor activities which has allowed me to work with

What trades-related courses did you take in school?

Math-Geometry, Math-Algebra, Math-Algebra, Math-Geometry

Why is an apprenticeship an attractive option to you?

I enjoy working with my hands rather than a classroom learning environment. On the job training appeals to me rather than spending years in a classroom learning a degree., I prefer hands on learning then typical classroom learning. I also like to learn from people with the most knowledge and experience in the field.

What construction software or technologies do you have training in?**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

I really became interested because most of my friends and family are either in trades or wanting to be in a trade. Also i'm really not interested at all to go to college because I think I would dislike it. I also feel that there is a lot more opportunities within the trades than other jobs. I also enjoy lots of hands on work and activities in general. Another reason i'm interested is the skills you learn from this work. These skills will help with other aspects of life rather than just the trade in general., I'm interested in a career in the trades because I like on-the-job training and working with my hands. I prefer to work in an environment where I can learn and grow in my field.

I have an interest in learning about HVAC, plumbing or pipe trades because the field seems interesting to me and is in high demand.

Tell us about any jobs where you've learned pipetrades relevant skills:

I've had a couple of jobs where I learned skills that I think are really useful for the pipe trades. At Fleet Farm, I worked in logistics, which meant handling inventory, unloading trucks, and organizing stock. This job taught me how to manage materials efficiently and safely, which is super important in the pipe trades. I also had to be very precise and pay attention to detail, since mistakes could cause big problems.

At Jellystone Campground, I worked in maintenance and as a store clerk. In maintenance, I did a lot of repair and upkeep tasks. In my past jobs, I've built skills that connect well to the pipe trades. Working at a warehouse taught me how to handle

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I enjoy woodworking and participating in various sports, both of which have equipped me with valuable skills for the pipe trades. Woodworking has helped my attention to detail, precision, and ability to follow complex plans—essential traits for tasks such as pipe fitting and system installation. It has also improved my problem-solving abilities, crucial for working with intricate piping systems. Meanwhile, participating in sports has built my physical stamina, strength. Sports have also taught me how to work well with others and communicate. In my free time, I enjoy weightlifting, hunting, and fishing. Weightlifting has helped me build strength and discipline, which are important

What trades-related courses did you take in school?

Math-Algebra, Math-Geometry, Woodworking / Woodshop, Drafting and Design, Engineering, Math-Algebra, Math-Geometry, Math-Precalculus / Trigonometry, Woodworking / Woodshop, Engineering

Why is an apprenticeship an attractive option to you?

An apprenticeship is a great option for me because it offers hands-on experience in a real work environment. Instead of just sitting in a classroom, I get to learn by actually doing the job, which I believe is the best way to understand and master any skill. Plus, apprenticeships often come with a salary, so I can earn money while I'm learning. This means I can support myself and maybe even save up for the future without having to worry about student loans or debt.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I have always been fascinated by the building trades because they offer a unique blend of hands-on work, problem-solving, and the tangible satisfaction of seeing a project come to life. The ability to work with different materials and tools to create something is a rewarding feeling I want to experience.

Specifically, my interest in the pipe trades comes from several factors. The complexity and precision required in the pipe trades are particularly appealing. Working with systems essential for everyday life, such as plumbing, heating, and cooling, offers a constant challenge and keeps the work engaging. Going with this I love being on my feet and working with my hands. I'm interested in the pipe trades because I want a career where I can work with my hands and actually see the results of what I'm doing. College didn't feel like the right fit for me, and I realized I wanted something more practical where I could learn on the job and build real skills. The pipe trades caught my attention

What construction software or technologies do you have training in?

Inventor, Inventor
