Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

Plumber, Steamfitter (Pipefitter), HVAC/R Service Tech

Work Zones in Preference Order:

Green Bay Area (Yellow), Appleton Area (Green), Fond du Lac Area (Orange)

Relevant Experience Level:

None. Nothing even close-but I'm a hard worker and willing to learn!

Years of Full-Time Work Experience:

1-3

Welding Experience:

Tell us about any jobs where you've learned pipetrades relevant skills:

Working alongside my handyman father, he has worked residential plumbing jobs in which i have watched and helped him problem solve and complete these jobs

Tell us about any hobbies that have boosted pipetrade-relevant skills:

My dad is a self employed handyman in the area. Growing up I have always tagged along on different types of jobs he was tasked with. This has helped me get a basic understanding of construction trades.

Shift Availability:

Full-time, 1st Shift (Days), Overtime, Weekends

Post HS Education:

Some 4-year college

Add'l Edu. Details:

What trades-related courses did you take in school?

Math-Algebra

Why is an apprenticeship an attractive option to you?

As I previously mentioned, being that my father is a handyman I have always been in work environments where I don't know exactly what to do but i'm open and eager to learn. An apprenticeship requires you to do the same and I find that to be a good option for me.

The work while learning aspect of an apprenticeship is also an attractive reason for me. Being able to help my family out financially while also expanding my knowledge off and on the job site is honestly very important to me.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I have always had a passion for learning and physical work

What construction software or technologies do you have training in?

Any Safety Certificates:

Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

Plumber, HVAC/R Service Tech

Work Zones in Preference Order:

Green Bay Area (Yellow), Appleton Area (Green)

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:

10+

Welding Experience:

Flux Core - Some Knowledge, Stick - Some Knowledge

Tell us about any jobs where you've learned pipetrades relevant skills:

As a self employed carpenter, I've been around the rough framing and finishing stages of projects ranging from single family homes to 100 unit apartment buildings. I have worked in conjunction with pipe trades before, and they seem a lot happier than the electricians.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I've fixed up every home I have ever lived in, in a myriad of ways. I also have a 1981 Datsun project I have been modifying for some time. It's worth noting that my wife loves thrifting and my kid loves breaking toys, so that's brought a certain level of resourceful repair skills to the forefront in my life.

Shift Availability:

Full-time, Overtime

Post HS Education:

Some 2-year college

Add'l Edu. Details:

1 semester machining through nwtc

What trades-related courses did you take in school?

Drafting and Design, Math-Algebra, Math-Geometry, Metals, Welding, Automotive Technology, Electrical Trades / Electronics

What construction software or technologies do you have training in?

AutoCAD, CNC

Any Safety Certificates:**Add'l Details:****Why is an apprenticeship an attractive option to you?**

I love the idea of expanding my knowledge of building further than framing and finishing, and this seems to be the best way to do it. My ideal scenario is to be cross trained between plumbing and hvac, and to take the one year construction electrical course at night so as to be as well versed and knowledgeable for myself and my team.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've become skilled carpenter, primarily in finish work, and am looking to grow my knowledge and experience while supporting my young family more reliably.

Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

HVAC/R Service Tech

Work Zones in Preference Order:

Appleton Area (Green)

Relevant Experience Level:

Some. I have worked for a plumber, steamfitter or HVAC/R contractor.

Years of Full-Time Work Experience: 10+

Welding Experience:

Flux Core - Some Knowledge, MIG - Some Knowledge, TIG - Some Knowledge, Stick - Some Knowledge

Tell us about any jobs where you've learned pipetrades relevant skills:

I worked for my dad when I was young teenager doing excavating, sewer and water, and operating equipment. I worked for my uncle in my later teens doing residential plumbing, Most don't care about work when your a teen but you never forget the skills, and I have done more than most full time guys ever get to. Then I became a machinist, anything to do with metal I can pretty much do it. Then I took a position as director of maintenance, gained a lot of knowledge in a short time, boilers, large hot water heaters, backflow valves, air exchangers, electrical, maintenance records

Other Relevant Courses & Certifications

Add'l Edu. Details:

I have a few certifications for machining, basically nonrelevant but two for cam software, gibbscam, and mastercam, and one

What trades-related courses did you take in school?

What construction software or technologies do you have training in?

CNC

Any Safety Certificates:

First Aid / CPR

Add'l Details:

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I very much enjoy fishing, more than most, watching my son play football, my daughter play volleyball, Bow hunting, Long walks, outdoors or in the woods in any weather and I enjoy fixing, taking things apart to just clean up everything mechanically or make it work better. I feel all of these are transferable into the trades, outdoors in any weather pretty big part of the trades, fishing and hunting uses patients and being independent, and fixing things has a lot to do with the trades.

Why is an apprenticeship an attractive option to you?

Honestly, when I was younger it wasn't affordable to do with a stay at home wife and two young kids. Now its more manageable, I was also told I could test out of a lot of things so that's huge. Benefits are a giant plus, doing something different everyday and working outside is something Ive been wanting to do basically my whole adult life. Mostly though I enjoy doing work like this.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

A few years ago, I quit my career as a machinist of 17 years, and took a position as director of maintenance at a nursing home, It originally was an old hospital so fairly a good size building, but very old, it was heated by very old steam boilers. The building was very much pieced together, some rooms were steam, and some hydronic everything about that fascinated me enough to take a course in low pressure steam boilers, and it was very interesting. I fixed and maintained 90% of it on my own when I could not figure it out, a tech from tweet garrot came to the rescue watching him troubleshoot and dial everything in was interesting. Anything that keeps an industrial building working interests me, automation, hvac, plumbing even power.

Why is an apprenticeship an attractive option to you?

Did some amount of research and came to the conclusion that getting immediate hands-on-training and on-the-job experience suited me and my learning style much better than a traditional classroom or E-Learning setting.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

27, at a point in my life where I've done some serious self reflection and realized that I want a better future for myself first and possibly for someone else in the future. 3 months ago I was at the lowest possible point in my life, and after some serious soul searching and painful mistakes I wondered if something like Welding or HVAC would be up my alley, especially as someone who has never seriously put much thought or effort into long-term career prospects.

I believe I have enough mechanical aptitude, am a quick-learner, and am EXTREMELY attentive to detail and receptive to constructive criticism. Hands-on-work has always been more my thing, and I should have given it more thought sooner. Overall, I'm looking to dive into something feet-first and give it my all. Attentive, timely, and eager to adapt.

Why is an apprenticeship an attractive option to you?

An HVAC apprenticeship appeals to me because it offers the chance to learn a valuable, in-demand trade through real hands-on experience. I like the idea of working with both my mind and my hands—understanding how heating, ventilation, and air conditioning systems work, then applying that knowledge to solve real problems. The HVAC field combines mechanical skill, technical knowledge, and problem-solving, which keeps the work interesting and challenging. Being able to train under experienced technicians while

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've always been drawn to work that's hands-on and practical, where I can see the direct results of my effort. The building trades offer that sense of accomplishment and purpose — creating something real, useful, and lasting. I'm interested in developing skills that allow me to contribute to projects that shape communities, whether it's constructing homes, maintaining infrastructure, or ensuring buildings are safe and efficient. Working in this field also provides the opportunity to learn from experienced tradespeople and continually grow through new challenges.

I'm especially motivated by the teamwork and problem-solving that come with the trades. Every job site requires communication, coordination, and adaptability — skills I value and want to strengthen. I'm eager to gain technical knowledge, master tools and techniques, and build a c

Why is an apprenticeship an attractive option to you?

I believe that this would help me to learn even more about hvac that I already do. I learn more efficiently on the field than I do in a classroom. This would help me solidify my career path and help me find a stable and long time employer so I can help support my my family.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

My father had a tile company when I was growing up, I was fortunate enough to help him. I was exposed to construction and seeing things from start to finish of a project. I love working with my hands and seeing the craftsmanship I was doing. I was instilled with work good work ethic because of it.

I wanted to do hvac because I like helping people to be comfortable in the place that they are in due to my work. I was also curious on how hvac actually worked, I highly enjoy doing hvac and I wish to continue learning the trade and succeeding in it. I wish to be the best as I can.

Why is an apprenticeship an attractive option to you?

An apprenticeship is attractive to me because it gives me the opportunity to learn a skilled trade the right way; through real, hands on experience. I've always believed that the best way to learn is by doing, and the apprenticeship path allows me to gain knowledge directly from experienced professionals.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

What interested me in the building trades is they combine skill, teamwork, and problem-solving, 3 things I take pride in. I want to develop these skills through hands on learning and eventually become a tradesmen you can rely on.

I've always enjoyed working with technology building things, troubleshooting, and figuring out how different parts work together. It's taught me to be patient, detail-oriented, and good at solving problems, which are all useful in the trades.

I also like doing hands-on projects and small repairs at home. It's helped me get comfortable using tools, thinking through steps, and staying focused until the job's done skills I know will carry over well into construction work.

Why is an apprenticeship an attractive option to you?

An apprenticeship interests me because it's a practical way to learn I get real, hands-on experience while earning a paycheck, instead of only studying in a classroom. Learning directly from experienced people in the field feels like the best way to build skills that actually matter on the job.

It also gives me a clear path toward a stable, long-term career. I want to develop skills that are always in demand and give me opportunities to grow over time, and an

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Coming from an IT background, I've spent years solving problems in a digital space, but I realized I want a career where my work is more hands-on and has a visible impact. The building trades offer that balance problem-solving, technical thinking, and real results I can take pride in.

The pipe trades interest me because they combine precision and planning with practical skills, and the work directly supports how people live and work every day. It's still challenging and technical, but in a way that feels more tangible and rewarding.

Why is an apprenticeship an attractive option to you?

The ability to learn and improve my skills on the job, while getting feedback and advice from people who are in the field sounds right up my alley. I learn better by doing.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

There are a few reasons I'm interested in this career. The most important reason would be the ability to provide for my family. My grandfather Don Hermesen was in the trades, and speaks very highly of the opportunity. After talking with him I've realized that my willingness to learn and ability to work hard would take me far in this field. It's rewarding to work with my hands, and to see the results of my work right in front of me.

Welding Experience:

Tell us about any jobs where you've learned pipetrades relevant skills:

One of the ways I can explain is that my automotive skills could be applied to solving real world problems in the pipe trade. How I see this is that you might have to diagnose issues. Just like on a vehicle that has a problem or something that may be wrong when it comes to piping. Overall, this could show that there is a strong desire for working on challenging issues. I think that my ability to adapt and maintain a high standard of work could make me a valuable asset in the pipe trades.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

One of the hobbies I have are working on vehicles. I have also had the opportunity and interest to do my own vehicle work. It mainly stems from loving to do stuff hands on. Anytime I have an opportunity like this I always try to take advantage of it. I think that hands on stuff like this is always inspiring to other trades.

Add'l Details:

Why is an apprenticeship an attractive option to you?

One of the reasonings is because it offers a financially stable way of handling the learning and hand on process. If this option were not available, it would be a struggle for me to get into any kind of trade. Also, going off what I was saying before, I think learning hands on also helps to retain more information about the trade. There has always been more of a spark for me having to do the activity hands on. An apprenticeship is the friendliest option for me.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

My interest mainly comes from enjoying hands on work. I absolutely love doing problem solving. I also like the fact that not every job is the same. It is a mental and physical aspect that is needed for every job. I like to use skills that I can attain through this kind of work to see a good result from it. It has always just been satisfying to me which is why I like it.

I am also looking at this to greatly advance my career path. I am looking for a very good and stable job. I am looking for a job that offers good benefits and securities. This is why I am willing to go above and beyond expectations to obtain this. I am willing to take as much time as needed to get into this career path.

What construction software or technologies do you have training in?

AutoCAD, CNC, Inventor

Any Safety Certificates:

Add'l Details:

Why is an apprenticeship an attractive option to you?

An apprenticeship program is a good option for me because I am a very hands on learner and it allows me to gradually improve my skills. My previous job allowed me to start as a youth apprentice and also work through a 2 year degree with a co-op. This worked well for me to be able to understand the skills I was learning while being able to use them which is a way that I personally am able to progress very easily.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Since High School I've known that I want to be able to work with my hands, being able to see the results of my work when I'm done. I have a background in auto body collision repair which gave me a lot of experience with welding, using hand and power tools and working with precision measuring to make panels fit. I really enjoyed the hands on and detailed side of the work. With the building trades I get the opportunity to use the same skills I have but in a different scenario. Joining the pipe trades rather than sticking with auto body would allow me to keep the aspect of craftsmanship that I love but using it for something bigger.

Add'l Details:
Why is an apprenticeship an attractive option to you?

I am intrested in an apprenticeship because it gives me the ability to learn while doing. I get to take the skills learned and apply then in order to solidify my understanding. Having a mentor also allows me gain a deeper understanding of each topic by asking questions that may not be answered in a classroom.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I love to learn new things and i like to see the results of my work. Im always taking on projects at home and its the most rewarding way i spend my time. I have attended college in the past but i prefer to learn by doing not just observing. I also enjoy working as a team to accomplish a common goal.

Why is an apprenticeship an attractive option to you?

Because I am interested in learning about the HVAC career path and being an apprentice would teach me all about this job and help me to lead myself into growth with this career.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

It was always high up on the "What do I want to do" list for me. I started thinking more about it my junior going into senior year of high school. I have decided this because of the very good pay in these job's and the good things I hear about the benefits and the environment in trade job's. Specifically the HVAC trade was recommended to me by a youth apprenticeship coordinator named DJ Kloidia. He gave me a ton of info on this and it made me very excited to start my career. Due to set backs and lack of communication it is a little bit late that I am taking initiative on this but I am very interested in starting my career as an HVAC worker as soon as possible!!!

Post HS Education:

Bachelor Degree

Add'l Edu. Details:

Degree Major - Supply Chain Management

What trades-related courses did you take in school?

Math-Calculus, Math-Algebra, Math-Geometry, Math-Precalculus / Trigonometry

What construction software or technologies do you have training in?

Business ERP Systems and some exposure to CAD software

Any Safety Certificates:

First Aid / CPR

Add'l Details:**Tell us about any hobbies that have boosted pipetrade-relevant skills:**

In my free time, I enjoy woodworking, lawncare, landscaping, home renovations, and repairing my truck and motorcycle. These hobbies have built my problem-solving skills, attention to detail, and comfort with tools and materials. All directly transferable to the construction trades. Even fishing has helped me develop patience and focus, qualities that support steady, precise work. Together, these activities show my passion for hands-on projects and strengthen the skills needed for a career in the trades.

Why is an apprenticeship an attractive option to you?

An apprenticeship is attractive to me because it lets me learn hands-on while still earning a steady income that can help support my wife and kids. I've realized through past supply chain work and hobbies that I thrive on problem solving and practical work. An apprenticeship provides structured training, mentorship, and stability, while allowing me to build a long-term career I can take pride in.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've worked in supply chain roles for several years, but I realized I'm most fulfilled when I'm problem solving and working with my hands rather than sitting behind a desk. I want a career where I can build, fix, and contribute directly to projects in a practical, hands-on way.

A close friend in UA 400 recommended the pipe trades to me, and after hearing about the training, teamwork, and pride he takes in his work, I thought it could be a great fit. His experience, along with my own desire for hands-on problem solving, motivated me to look into a career in the building trades, specifically in the pipe trades.

Tell us about any jobs where you've learned pipetrades relevant skills:

The jobs that I've had never had anything related to pipe trades but I have taken some classes related to HVAC at lakeshore technical college

Tell us about any hobbies that have boosted pipetrade-relevant skills:

Some of my hobbies include fishing, being with friends and family, driving, kayaking, and building things. 2-3 of these can kinda relate to construction trades being on you look at it. For instance driving is one because is trades you do need a license to operate a vehicle if trying to get to and leave work but also if asked to drive a work vehicle then one is required. Then we have being with friends and family and when on job sites most guys and girls see everyone as friends or even some as family. Building is the obvious one I do like to build but mainly with wood.

Add'l Details:

Why is an apprenticeship an attractive option to you?

An apprenticeship is the most appropriate option for me because it would still help me get guidance and the learning experience that I will need in the near future.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

What mainly interested me about building trades is the hands on work, I've always been a hands on worker and like working with my hands because then I feel like I can understand what I'm doing rather than just looking and typing something or writing. Another reason I was interested is there's not many people going into trades anymore which honestly surprised me but I've also come from a family of trade workers. I have family members that have worked in construction and roofing but they also do their own projects which sometimes include them doing piping or even electrical at times. The main reason I wanna go into HVAC is because I believe there is a lot of benefits with it such as if a personal heating or ac problem occurs then I would possibly be able to fix it on my own or even help some who is having the same issue.

Tell us about any jobs where you've learned pipetrades relevant skills:

I have not had any that are directly applicable to pipes themselves, but I have learned how to work in a team environment, how to be adaptable, and how to work efficiently to reach an end goal.

I experienced these skills during my current position as a Business Assistant for Heartland Dental, as well as when I was a Digital Inventory Speciality for Sinclair Broadcasting.

Full-time, Weekends, Overtime, 1st Shift (Days)

Post HS Education:

Bachelor Degree

Add'l Edu. Details:

I majored in Communications, with a minor in Advertising from the University of Wisconsin-Whitewater.

What trades-related courses did you take in school?

Math-Algebra, Math-Geometry

What construction software or technologies do you have training in?

Any Safety Certificates:

Add'l Details:

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I love working on house projects, such as building shelves, painting, and installing trim, as well as working on my car and learning how to be self-sufficient.

Doing things with my hands and learning while I try is very motivating for me. I use every opportunity to "get my hands dirty" to learn as much about projects as I can.

Why is an apprenticeship an attractive option to you?

The ability to learn while I earn and be able to start obtaining skills from day one is the largest attractive option for me.

I am also very drawn to learning from a journeyman and having that expert there that I can watch and absorb knowledge from.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I have heard a little about the pipe trades since my uncle is a pipe fitter. I also really enjoy the idea of working with my hands and being able to build something lasting that I can be proud of.

I originally went to college, but have found that I am drawn to be in a field where I can help people and work in a team to accomplish something tangible together.

Electrical Trades / Electronics, Math-Algebra, Math-Geometry, Math-Precalculus / Trigonometry, Woodworking / Woodshop

What construction software or technologies do you have training in?

Any Safety Certificates:

Add'l Details:

Why is an apprenticeship an attractive option to you?

An apprenticeship is attractive to me because of the opportunity to have a paycheck while at the same time learning a skill. Traditional schooling doesn't fit my life so an apprenticeship provides the best way towards the career I want.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I am interested in a career in the pipetrades because of skills and knowledge that I'd learn along the way. I want a career in the trades because I love working with my hands. This would be so much more than just a job. It would be something I love doing. Something I'm proud of doing.

Why is an apprenticeship an attractive option to you?

I feel that I learn best when working beside someone experienced. I've worked with a lot of people who have done apprenticeships and most have had positive things to say about the experience. I would also hope that one day I would be able to mentor someone who was starting out in the trade.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I have always enjoyed working with my hands, building things, and repairing things. There is nothing more satisfying to me than repairing something, turning it on and seeing it work. I have done a little bit of work with HVAC systems in the past. Currently I'm looking to go full time into HVAC work.

Years of Full-Time Work Experience: 10+**Welding Experience:**

Stick - Some Knowledge, MIG - Some Knowledge

Tell us about any jobs where you've learned pipetrades relevant skills:

While in the U.S. Coast Guard as a Damage Controlman, I gained extensive experience in areas directly related to the pipe trades. I regularly installed, maintained, and repaired water, fuel, and fire suppression piping systems. I worked with various materials, including steel and copper, and became skilled in welding, cutting, and brazing. My job also required me to read blueprints, follow safety protocols, and perform emergency repairs in high pressure situations.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

One of my main hobbies is working on mechanical projects and repairs, which has helped me develop strong problem solving skills, attention to detail, and confidence using hand and power tools. I also enjoy staying physically active through fitness and outdoor activities, which keep me in good shape for the physical demands of construction work. These hobbies have taught me discipline, patience, and how to work safely and efficiently, skills that directly transfer to the construction trades.

Why is an apprenticeship an attractive option to you?

An apprenticeship is an attractive option because it offers the opportunity to earn while I learn, gaining real-world, hands on experience under the guidance of skilled professionals. I value structured learning, and combining classroom instruction with practical on-the job training is the ideal way for me to build long term, high demand skills. Coming from the Coast Guard, I'm used to learning by doing and working as part of a team, so the apprenticeship model fits naturally with how I succeed and grow. It's also a

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've always been drawn to hands on work that requires precision, problem-solving, and a strong work ethic, which is why the building trades appeal to me. The pipe trades, in particular, interest me because they combine physical skill with technical knowledge and offer the chance to work on systems essential to daily life. I'm motivated by the opportunity to learn a highly respected craft, take pride in quality work, and be part of a trade that plays a vital role in residential and industrial infrastructure.

My current hobbies I like to do now are pretty physical. I work as a Service Shop Technician. There is always something new I can learn in my job. I really like to learn and be challenge when I'm doing something new. I also like going to the gym. Keeps me active and healthy.

The biggest thing I've done and something I felt pride about and that can transferrable is how I was able to fix my moms lawn. We have a pretty back yard and it was just full of

Why is an apprenticeship an attractive option to you?

If I'm being honest, I just didn't think college was for me. Thankfully I've been able to experience many jobs. And I realized two things about myself. I like to be problem solver and I like to physically move and work.

Once I learned from the apprenticeship program. I believe it was probably one of the best options I have. And like I stated previously, I will like to use this experience and

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I come from a family that works in the trades. My dad is a plumber and my brother is experienced in property maintenance and construction work. So I wish to follow the same route. I also like working physical jobs better than staying in a cube stuck on a computer. That's the reason why I'm generally interested in the trades.

I'm specifically focus on HVAC because, like any other trade, its going to be needed for as long as this world lives. I think HVAC is very crucial specifically where you have cold winter seasons and hot summer seasons. So if a HVAC system breaks, people will always NEED it to be fixed. And where there is work. There is money. I hope to use the skills and knowledge I learn in the program to create something for myself later on.

Disciplines of Interest:

HVAC/R Service Tech

Work Zones in Preference Order:

Green Bay Area (Yellow)

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:

0

Welding Experience:

Tell us about any jobs where you've learned pipetrades relevant skills:

I haven't had any work experience in pipe trades

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I enjoy woodworking and have built cabinets including tv stands, side tables, and other numerous projects.

Shift Availability:

Full-time

Post HS Education:

Some 2-year college

Add'l Edu. Details:

Took college technical math and psychology in high school through NWTC and animal science through FVTC

What trades-related courses did you take in school?

Building Trades / Construction, Drafting and Design, Math-Algebra, Math-Geometry, Metals, Woodworking / Woodshop

What construction software or technologies do you have training in?

AutoCAD

Any Safety Certificates:

OSHA 10

Add'l Details:

Why is an apprenticeship an attractive option to you?

The opportunity to learn on the job as well as the benefits of apprenticeship. I have also done youth apprenticeship through high school at my current job at the Suring Milling Co.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I went to a career fair through school and pipe trades was the most interesting to me. I enjoyed tech ed classes in high school. I enjoy building things and working with my hands.

Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

Steamfitter (Pipefitter), HVAC/R Service Tech, Plumber

Work Zones in Preference Order:

Green Bay Area (Yellow)

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:

1-3

Welding Experience:

Flux Core- Skilled, MIG - Skilled, TIG - Some Knowledge, Stick - Some Knowledge

Tell us about any jobs where you've learned pipetrades relevant skills:

I worked for my dad in his construction company and he did everything so I have learned basic plumbing skills like fixing leaks and installing toilets, I've been working as a structural seam welder for the past 2 years in this position, I have learned welding in many positions, gaps, and procedures, I have full understanding of weld symbols reading Blueprints, measuring in imperial and metric measurements, competent in many types of metals like stainless, copper nickel, steel and aluminum

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I have many hobbies, like rock climbing, puzzles, and wood working. I feel rock climbing contributes control, ability to think and work in unsatisfactory conditions. I believe puzzles enhance your problem solving skills, and using critical thinking skills. Wood working can contribute measuring skills, and reading comprehension of blueprints if you were to copy something you found online. I also enjoy art welding this could easily contribute to construction skills as welding is something you would do on a daily basis.

What construction software or technologies do you have training in?

Word

Any Safety Certificates:

First Aid / CPR

Add'l Details:

Why is an apprenticeship an attractive option to you?

You get paid to learn and people are expecting you to not know much instead of going into a job and being expected to do everything a journeyman can. You will get a more hands on training than basic book skills and how much you can remember on paper and I'm a person who is a hands on learner I can retain more information as someone physically shows me how it's done instead of describing it. Another reason is you really get to know the ins and outs of a trade with 5 years of training

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I got interested in the trades at a young age when I started working construction around the age of 15 and when I turned 18, I became a structural welder and I've loved it ever since. I'm very interested in the pipe trades because my lifelong dream is to become a rig welder on the pipeline, so I was looking into possibilities to get my foot in the door and I came across the local 400. I have spoken to a few people in this local and they seem to love it and that what brings me here today interested in applying for the apprenticeship for the steamfitters.

HVAC/R Service Tech, Pipe Fabricator, Steamfitter (Pipefitter), Plumber

Work Zones in Preference Order:

Fond du Lac Area (Orange)

Relevant Experience Level:

None. Nothing even close-but I'm a hard worker and willing to learn!

Years of Full-Time Work Experience:

1-3

Welding Experience:
Tell us about any jobs where you've learned pipetradese relevant skills:

I can't say ive worked a job that holds valuable hands on skills for trades. However,In my past jobs, I've learned to swork hard and stay focused, skills that are essential in the pipe trades. I've worked in fast-paced environments where teamwork and communication were key to getting the job done right.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

In my free time, I enjoy playing chess, staying active through sports and running, and working on basic car maintenance. Chess helps me stay sharp and think critically, planning several steps ahead, which is useful for problem-solving on the job. Sports and running keep me physically fit and teach discipline and teamwork, which are important in construction environments. Working on cars has given me hands-on experience with tools, mechanics, and how systems work, which all happen to be skills related to construction trades.

Shift Availability:

Post HS Education:

Some 4-year college

Add'l Edu. Details:

So upon my college career I've majored in Geograhpy then switched to a Math Education major. I'm more drawn to classes

What trades-related courses did you take in school?

Math-Algebra, Math-Calculus, Math-Geometry, Math-Precalculus / Trigonometry

Why is an apprenticeship an attractive option to you?

An apprenticeship is attractive to me because it lets me learn by doing. I prefer hands-on work over sitting in a classroom all day, and an apprenticeship gives me the chance to earn while I learn a valuable trade. I like that I can build real skills. It's a practical, rewarding path that fits the way I learn and work best.

What construction software or technologies do you have training in?
What interested you in a career in the building trades in general, and specifically, a career in the pipetradese?

I'm interested in the pipe trades because I enjoy hands-on work, problem-solving, and using my math skills in real-world situations. I'm drawn to the stability, high earning potential, and the chance to learn a valuable skill that's always in demand.

In my free time, I enjoy working on hands-on projects like fixing things around the house, assembling furniture, and helping with basic plumbing repairs, which all relate directly to the skills needed in pipefitting. I've always had an interest in figuring out how things work and finding efficient ways to put things together, which has strengthened my attention to detail and mechanical thinking.

Why is an apprenticeship an attractive option to you?

An apprenticeship is important to me as an adult because it gives me the opportunity to learn a skilled trade through real-world experience while earning a paycheck. This practical, on-the-job learning approach is ideal for me because I'm ready to work hard, grow my skills, and move forward in a career that offers long-term stability and advancement.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I want to become a pipefitter because I enjoy working with my hands and solving problems in a way that produces real, visible results. The pipefitting trade offers a unique mix of physical labor, technical skill, and precision, all of which align with my strengths and interests. I'm drawn to the idea of building and installing systems that are essential to the function of buildings, factories, and infrastructure.

Another reason I want to pursue a career as a pipefitter is the opportunity for long-term growth and stability. The trade offers strong job security, excellent wages, and the chance to continue learning through on-the-job experience.

Add'l Details:

Why is an apprenticeship an attractive option to you?

With living in an apartment with my fiancée i have bills each month including a car loan. Taking time off or working part time is not an option for me. Being an apprentice is my best route for starting a career because then I learn on the job and do not have to worry about missing paychecks or short paychecks.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Since high school I've just been working factory production jobs. I'm turning 27 this year and it is time I invest in a career where I can advance in. I am also getting married and have major life goals I would like to meet as in purchasing my first house with my future wife and live comfortably while doing so. I am a DYler and like to fix things my self, like my car. My main example related to this apprenticeship is the bathroom sink in my apartment was backing up. So I went underling the sink and removed the drain plug and the U Piper I believe it's called and cleaned out the hair and gunk in the sink, ever since it's been draining like normal.

Add'l Details:

Why is an apprenticeship an attractive option to you?

I am living in my own apartment with my fiancé. So that means bills, and a car loan payment. Apprenticeships is, what I believe, a very good option for someone in my situation. I will be working while being trained and not having to worry about missing paychecks while pursuing my career.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've been working production jobs since high school. As I'm approaching 30 years old in a few years, getting married, and have major life goals as in purchasing a house it is time for me to invest in a career. I've always liked working with my hands. As a kid I'd help my dad work on cars, different carpentry projects around the house, and with my apartment I've taken it up to fixing minor things. Example, our bathroom sink was backing up so I took out the drain stop and U Pipe I believe it's called and unclogged all the hair and other gunk in it, not it runs like new. That is what I believe made me think I'd enjoy plumbing. I also crave an interactive job that challenges me and leaves me satisfied.

Why is an apprenticeship an attractive option to you?

an apprenticeship would give me the opportunity to dive headfirst into a brand new opportunity that would bring me, steady work, financial stability, more responsibility, and accountability, and the chance to work really hard, An apprenticeship attracts my interest for many reasons. The main reason being stability, and an opportunity to grow and work hard. I'm very fond of the idea of constantly learning, and in a different environment. Working towards financial stability, in a career path that gives me options.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

My interest in this career comes from the main point of stability. I am a hands-on, personable, confident, young man, looking to place oneself where I can find stability, structure, and hard work. I have always made it a point to work more than one job at a time. But I would love to work in a Career., A career in the trades would allow me an opportunity to dive headfirst into stability, structure, hard work, and financial stability. Made it a point to have more than one job at a time, but it would be amazing to have one solid career.

I want to continue my education for a better career and don't mind going back to school to further my education for a greater future

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've always been interested in the trades because I grew up around them—my dad worked as a finished carpenter, and from a young age, I was exposed to the satisfaction that comes from working with your hands and seeing a project come together from start to finish. That early exposure sparked a respect for skilled labor and the pride that comes with doing a job well. More recently, I've developed a strong interest in the pipetrades through my work cleaning and servicing storm and sanitary sewers. That hands-on experience opened my eyes to how critical plumbing systems are to public health and infrastructure, and it gave me a real passion for the trade. I enjoy problem-solving, working in a physically active job, and being part of a team that keeps essential systems running safely and efficiently.

Why is an apprenticeship an attractive option to you?

The apprenticeship interest me because I'm looking for something more I want a career . I wasn't sure for awhile exactly what I wanted to do but I knew I was good with my hands. After talking with the guys from veterans plumbing and working alongside them, I realized this trade could be something that I would be interested in. So after looking more into it I realized i could see myself doing this. I don't mind working inside outside. I don't mind getting dirty. And im looking for something I can do for a while were I'm

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Been working alongside some of the guys from veterans plumbing. I find it very interesting and really easy to pick up on things. They suggest to me that i should try getting an apprenticeship though the union., I'm looking to a career as a plumber I have worked alongside many in the past two years. I've been at my current job, many of the guys from veterans, plumbing and maritime plumbing. It's a trade that seems to come very easily to me and a trade that sparks my interest. Im looking for something long term and something I see myself for the long run, I'm looking to have a career and something that I truly have a passion in and something that I see myself doing long-term I've worked a long time for a while and I've worked alongside HVAC technicians for a while and it is truly something that interest me

On the side, I do a lot of mechanic work. I build cars and modify them for fun. I also have experience with building computers which I have found is very similar to most HVAC systems. Working with my hands has always left me with a great feeling of satisfaction being able to stand back after everything is done and see the hard work that has paid off., Outside of work, I do a lot of handy work for friends and family ranging from simple electrical, HVAC, and plumbing. I also like to work on my own personal truck as well as on trucks belonging to buddies. I've learned a lot of problem solving and critical thinking

Why is an apprenticeship an attractive option to you?

The idea of an apprenticeship to me is a chance to prove myself has a working individual. I believe that as long as I put in the work and dedication that the apprenticeship will benefit me greatly. It opens up a large network of people to me and I can choose to stand out by working hard and continually learning., The idea of an apprenticeship is more beyond just working and learning for me. I believe that having an apprenticeship within the union will open doors to new opportunities when or wherever it may be. The

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've always been a hands on learner. I did a bit of electrical work for a small contractor before I tried HVAC/R and fell in love with it. Everything from the low voltage system controls to ductwork it involved had me hooked. I especially love the system controls part of it because it reminded me a lot about building computers which is a hobby of mine. I feel that with my young age and commitment to the quickly advancing HVAC field, now is the prime time for me to strengthen my career in it., I originally started out in electrical but found myself in an HVAC Install position and have fallen in love with it ever since. I've found a deep passion for HVACR since then and now yearn to increase my knowledge in the field as much as possible. I started and am still at a non union shop as I thought it'd be a great starting point, however, I've quickly realized through experience and friends within the union that joining the union would be the next step in my career.

Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

HVAC/R Service Tech, Plumber

Work Zones in Preference Order:

Appleton Area (Green), Green Bay Area (Yellow), Green Bay Area (Yellow)

Relevant Experience Level:

None. Nothing even close-but I'm a hard worker and willing to learn!, None. Nothing even close-but I'm a hard worker and willing to learn!

Years of Full-Time Work Experience: 4-6, 7-9

Welding Experience:

Tell us about any jobs where you've learned pipetrades relevant skills:

None., None.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I'm a runner. I like moving around quite a bit and would appreciate a physical job. I also like to read books and write stories for fun. That no doubt has helped me improve my communication skills over the years, something I'm sure would help in the construction trades., I enjoy running and reading. Running allows me to use my body well on the job, and reading, of course, makes it easier for me to learn on the job.

Shift Availability:

Full-time, 1st Shift (Days), Full-time, 1st Shift (Days)

Post HS Education:

Bachelor Degree, Bachelor Degree

Add'l Edu. Details:

BA in English, BA in English

What trades-related courses did you take in school?

Math-Calculus, Math-Algebra, Math-Geometry, Math-Precalculus / Trigonometry

Why is an apprenticeship an attractive option to you?

Feedback is typically more immediate than written feedback you could receive as a humanities major in college. It's easier to track your progress in developing certain skills. It's more satisfying in that regard. I like to know when I am doing well on a particular task rather than just rationalizing to myself that, for example, my leadership abilities or writing is actually getting better when that may just be my own perception. I like that, as an apprentice, I would get to deal with real things and know that it is not just my own

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I'm interested in the practical nature of the building trades. I also appreciate the opportunities to troubleshoot problems as they arise., I want to work somewhere I have the opportunity to continue to learn on the job.

What construction software or technologies do you have training in?

Any Safety Certificates:
