

Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

Plumber

Work Zones in Preference Order:

Appleton Area (Green), Fond du Lac Area (Orange)

Relevant Experience Level:

None. Nothing even close-but I'm a hard worker and willing to learn!

Years of Full-Time Work Experience:

4-6

Welding Experience:

Tell us about any jobs where you've learned pipetrades relevant skills:

Not sure if this based off an experience but my high school job at a salvage yard. Being 14 years old and showing on time to work and showing up with a good attitude and working hard with whatever task I was given.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

One of my biggest hobbies is going to the gym at 5am. Being able to have structure and discipline. Also being able to have time management when I am there because I have to work after going to the gym. My favorite thing about this hobby is waking up early, working hard and breaking a sweat and really challenging myself to my full potential every day. I think that really translates to trades because hard work pays off and it's all about what you put in and being able to reach your full potential.

Post HS Education:

Associate Degree

Add'l Edu. Details:

Marketing Associate's Degree, Technical Diploma in Digital Marketing, Technical Diploma in Sales Specialist

What trades-related courses did you take in school?

Math-Geometry, Math-Algebra, Math-Precalculus / Trigonometry, Woodworking / Woodshop

What construction software or technologies do you have training in?

Any Safety Certificates:

Add'l Details:

Why is an apprenticeship an attractive option to you?

The biggest thing for me is the fact that you can learn from someone who has been in my shoes and can teach and show things along the way. In addition, you aren't just thrown in the fire and have to figure it out on your own. Another point that interests me is that you get to learn in the classroom and then also apply what you learn with your hands. I think that's the best part of the apprenticeship is you learn and apply and have a journeyman to guide you and help along the way.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I recently graduated from Fox Valley Technical College in 2023 with a marketing degree. The last two years have been a struggle to find what I want to do with my life. Ultimately, I want to do something with my hands and be able to challenge myself every day with a new task. I don't want to be at a desk doing the same task and sitting in the same chair for the rest of my life. This last year I have gotten close to my girlfriend's dad who is a plumber and owns his own company and has given me a lot of advice. Furthermore, taking that advice I want to be able to have a skill/trade that I can have for the rest of my life and have something new every day that I can work on and constantly learn and grow. I think that's what interests me the most for the trades is being able to constantly be able to learn and work hard and be rewarded.

Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

Plumber, Steamfitter (Pipefitter), HVAC/R Service Tech

Work Zones in Preference Order:

Green Bay Area (Yellow), Appleton Area (Green), Fond du Lac Area (Orange)

Relevant Experience Level:

None. Nothing even close-but I'm a hard worker and willing to learn!

Years of Full-Time Work Experience:

1-3

Welding Experience:

Tell us about any jobs where you've learned pipetrades relevant skills:

Working alongside my handyman father, he has worked residential plumbing jobs in which i have watched and helped him problem solve and complete these jobs

Tell us about any hobbies that have boosted pipetrade-relevant skills:

My dad is a self employed handyman in the area. Growing up I have always tagged along on different types of jobs he was tasked with. This has helped me get a basic understanding of construction trades.

Shift Availability:

Full-time, 1st Shift (Days), Overtime, Weekends

Post HS Education:

Some 4-year college

Add'l Edu. Details:

What trades-related courses did you take in school?

Math-Algebra

Why is an apprenticeship an attractive option to you?

As I previously mentioned, being that my father is a handyman I have always been in work environments where I don't know exactly what to do but i'm open and eager to learn. An apprenticeship requires you to do the same and I find that to be a good option for me.

The work while learning aspect of an apprenticeship is also an attractive reason for me. Being able to help my family out financially while also expanding my knowledge off and on the job site is honestly very important to me.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I have always had a passion for learning and physical work

What construction software or technologies do you have training in?

Add'l Edu. Details:

1 semester machining through nwtc

What trades-related courses did you take in school?

Drafting and Design, Math-Algebra, Math-Geometry, Metals, Welding, Automotive Technology, Electrical Trades / Electronics

What construction software or technologies do you have training in?

AutoCAD, CNC

Any Safety Certificates:**Add'l Details:****Why is an apprenticeship an attractive option to you?**

I love the idea of expanding my knowledge of building further than framing and finishing, and this seems to be the best way to do it. My ideal scenario is to be cross trained between plumbing and hvac, and to take the one year construction electrical course at night so as to be as well versed and knowledgeable for myself and my team.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've become skilled carpenter, primarily in finish work, and am looking to grow my knowledge and experience while supporting my young family more reliably.

Add'l Details:
Why is an apprenticeship an attractive option to you?

An apprenticeship is an attractive option for me because it is an opportunity to enter into a worthwhile career without going the traditional school route. I like the idea of on the job training so I can start to gain practical experience right away. Mostly it is a chance for me to better my career so I can provide for my family and be proud of the work I do.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

What generally interested me about a career in the building trades was the opportunity to have a fulfilling career that allows me to provide for my family. What specifically interested me in the pipe trades was a genuine interest int the work itself. I find plumbing work to be very interesting and satisfying work because proper plumbing is an essential part of any home or business. I also like the idea of being home every nite and weekend to be with my family.

Why is an apprenticeship an attractive option to you?

Because its the best way to get into trades without going into debt. getting thought on the job site instead of the seating in a class all day. Multiple opportunities. learn from the best in the business. being able to travel.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

What interest me about trades is that your always moving from one plays to another. I have never been a person who can stay in one spot all day. Leading new skills that will last me a lifetime.

The amount of different opportunities that you can get without going to college. I'm a person who likes to get their hands dirty and problem solve. Traveling to different job sites.

Even though I don't have any experience being a plumber a do see a good career. I have done research on how pluming is a secure job and how wages are only going to go up. Having the ability to move anywhere in the countrv and able to find work

NA

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I stated earlier that I like to fix up old furniture (sanding, staining, repairs, etc.). I enjoy finding out how things work and how to repair them myself rather than just throwing things out and buying something new. I attend stained glass classes and my Mom has a stained glass workshop built into our basement. So I have used a Soldering Iron for those projects, glass cutters, grinders, saws etc. I like to garden in the summer time and do yard work. So physical work does not bother me (often carrying bags of soil, mulch, etc.).

Why is an apprenticeship an attractive option to you?

I want to switch careers and an apprenticeship is the best opportunity for me to do so. I went to school for Business and then worked multiple jobs in sales, management, customer service, security and more. These work experiences led me to believe that I should have gone into the trades originally. An apprenticeship allows me to go into something I have little experience in, learn it correctly from those who do, and actually move forward on a career path that better suits me as a person.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I went to college for Business & Marketing, and have had many different jobs over the years but nothing has been fulfilling. I have never been satisfied in an office setting and want to work with my hands. I want to do a job and be able to see and feel proud of actual results. I have always enjoyed learning and I want to pick up a valuable trade. In my free time I like to spend my time outside, fix up old furniture and I build stained glass projects. While researching different trades I saw that Plumbing gives me the ability to work hands on, problem solve and learn a valuable skill that many just take for granted.

Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

HVAC/R Service Tech, Plumber

Work Zones in Preference Order:

Green Bay Area (Yellow)

Relevant Experience Level:

None. Nothing even close-but I'm a hard worker and willing to learn!

Years of Full-Time Work Experience:

10+

Welding Experience:

Tell us about any jobs where you've learned pipetrades relevant skills:

My 10 years of kitchen experience has honed my skills of communication, working with a purpose, teamwork, speed, and efficiency.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I like cooking and working in kitchens. With that, I've developed a strong foundation of skills that directly transfer to the trades. Working in fast-paced, high-pressure environments has sharpened my ability to stay focused, organized, and efficient — all essential in hands-on trade work. I'm used to following detailed procedures, troubleshooting problems quickly, and maintaining equipment to ensure everything runs smoothly and safely. Attention to detail, time management, and teamwork have been central to my success in the kitchen and would serve me well on any job site.

Shift Availability:

Full-time

Post HS Education:

Some 2-year college

Add'l Edu. Details:

I was enrolled in culinary school but didn't finish due to life events.

Why is an apprenticeship an attractive option to you?

I like the ability to learn under someone experienced giving me the necessary skills I need, and as I don't have a ton of money it allows me to learn without having to pay to go back to school.

What trades-related courses did you take in school?

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I like working with my hands and after working in kitchens for 10 years I wanted to do something new

What construction software or technologies do you have training in?

Any Safety Certificates:

First Aid / CPR

Add'l Details:

Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

Steamfitter (Pipefitter), Plumber

Work Zones in Preference Order:

Fond du Lac Area (Orange), Green Bay Area (Yellow), Appleton Area (Green)

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:

1-3

Welding Experience:

Flux Core - Some Knowledge, MIG - Some Knowledge, TIG - Some Knowledge, Stick - Some Knowledge

Tell us about any jobs where you've learned pipetrades relevant skills:

I currently work at WE Energies as a Gas Inspector. Some job responsibilities include helping and overseeing contractors who install new underground gas piping and service piping to customers' homes. Through this job, I've gained knowledge of customers' gas piping and other facilities piped into and out of their homes. I believe these skills will transfer to the pipe trades, providing me with prior knowledge and enabling me to jump-start my learning.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I assist my dad with various construction projects around the house and help with miscellaneous farm work. These projects have helped me gain a basic understanding of various trades and develop problem-solving skills. As well as gaining a strong work ethic, learning to never give up, and asking for help when needed. I believe these skills will transfer to the construction trades and help me excel in the field.

Shift Availability:

Post HS Education:

Other Relevant Courses & Certifications

Add'l Edu. Details:

I have a Technical Diploma from Moraine Park Technical College in Gas Utility Construction and Service.

What trades-related courses did you take in school?

Math-Algebra, Welding, Metals, Automotive Technology, Math-Geometry

What construction software or technologies do you have training in?

AutoCAD

Any Safety Certificates:

First Aid / CPR

Add'l Details:

Why is an apprenticeship an attractive option to you?

An apprenticeship attracts me because I want to learn a trade and earn money while doing so. An apprenticeship offers me the opportunity to learn both in the field and in school while getting paid, without incurring a large amount of expenses. An apprenticeship also offers a bright future, being able to gain a Journeyman's card, Union benefits, and job security.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I'm interested in the pipe trades because I want a strong career with a positive future ahead of it, and a job I enjoy going to every day. I enjoy working with my hands and being able to travel for work. I believe the pipe trades can offer me everything I am looking for.

The skills from working on cars can transfer well to plumbing and HVAC. Both require using tools, following directions, and solving problems. If you're good at fixing cars, you already know how to take things apart, understand how systems work, and pay attention to details.

These same skills help in plumbing and HVAC because you need to find leaks, connect parts, and make sure everything runs safely. Being good with your hands and thinking

Why is an apprenticeship an attractive option to you?

I think an apprenticeship is a good way to learn because you get paid while you train. You get real hands-on experience and learn from people who know the trade.

It's also a good way to start a career. When you finish, you have a skill, steady work, and a good future ahead of you

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I want to become a plumber/HVAC technician because I like working with my hands and fixing things. I enjoy learning how plumbing and heating systems work and want to use those skills to help people.

This career is a good fit for me because it offers steady work and the chance to learn something new every day. I want to build a good future doing work I can be proud of

Tell us about any jobs where you've learned pipetrades relevant skills:

I work at a ship yard and seen it a lot around there and found it interesting. Also my girlfriends dad taught me about it and said it one of the best trades.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

In my free time I like to fish a lot so that can transfer patients over to the work place. Also I play basketball so I'm very eager to push harder and keep going.

Shift Availability:

Post HS Education: No

Add'l Edu. Details:

What trades-related courses did you take in school?

Woodworking / Woodshop, Math-Algebra

What construction software or technologies do you have training in?

Any Safety Certificates:

Add'l Details:

Why is an apprenticeship an attractive option to you?

It's the most efficient way to learn new things that can help you later in life to achieve great things.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I would like to learn plumbing so I can open a door to much more. After I learn enough I could start a business or work as a contractor. Also takes out house expenses if I can do it myself less money I'd have to pay. Another thing that I find interesting about plumbing is that it will always be needed you need plumbing for just about anything to do with water.

Disciplines of Interest:

Pipe Fabricator, Plumber

Work Zones in Preference Order:

Green Bay Area (Yellow), Appleton Area (Green)

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:

7-9

Welding Experience:

Stick - Some Knowledge, TIG - Some Knowledge, MIG - Some Knowledge

Tell us about any jobs where you've learned pipetrades relevant skills:

I have not had any job where I was actively learning skills that are applicable to the pipe trade.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I've always enjoyed hands-on work, from fixing cars to building fences and installing pools. In high school, I was head fabricator for the robotics team, which taught me precision, teamwork, and problem-solving.

Welding comes naturally to me, and I've even taught others, though I know there's more to learn. Completing some OSHA requirements also gave me early safety training, building a solid foundation for a career in the trades.

Shift Availability:

Full-time

Post HS Education:

Some 2-year college

Add'l Edu. Details:**What trades-related courses did you take in school?**

Math-Algebra, Robotics, Welding, Woodworking / Woodshop, Metals, Math-Geometry, Electrical Trades / Electronics

What construction software or technologies do you have training in?

AutoCAD

Any Safety Certificates:

First Aid / CPR, OSHA 10

Add'l Details:**Why is an apprenticeship an attractive option to you?**

An apprenticeship is attractive because it lets me earn while I learn, gain hands-on experience, and grow under the guidance of skilled mentors, setting me up for long-term success in the trades.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I come from a family that has always worked in the trades, and I've seen firsthand the pride, skill, and hard work it takes to build something lasting. Growing up around that environment gave me an appreciation for hands-on work and the stability it can provide. At the same time, I want to take that foundation and create an even stronger legacy for my future family. Switching into the trades allows me to honor where I come from while also building a career that offers growth, financial stability, and the chance to pass on not just skills, but opportunities for the next generation.

Add'l Details:

Why is an apprenticeship an attractive option to you?

An apprenticeship gives me the opportunity to learn about the job with people who have a lot of experience and it also allows me to learn in the classroom, so it shows me the basic information in the job and hands on experience.

I just think learning from professionals would be a great opportunity for me to learn and become a myself. And in the classroom side of things it slows me to lean the basic before

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I like to work with my hands and I'd like to grow within the career. The pipetrades are jobs that will always be needed. I also look forward to learning about something and becoming a professional in that field.

One of my friends is a pipefitter and he always tells me to get in to the trades. He also just bought a house at the age of 23 so I'd like be able to do that soon with a job in the trades.

Years of Full-Time Work Experience:

4-6

Welding Experience:

Tell us about any jobs where you've learned pipetrades relevant skills:

Most of my background is in Corrections/Law Enforcement and Security. My most relevant skills would be communication and detail orientation. Communication is important when talking to customers and coworkers. Tasks need to be completed correctly and efficiently. This would not be possible without clear communication skills. Lastly, detailed oriented skills are important to ensure reliable and consistent outcomes whether it's documenting a use-of-force or completing a complex task.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

As a Correctional Officer, I have strong communication, crisis management, and detail-oriented skills. I am fast on my feet and always ready to learn something new. In my free time, I build, remodel and landscape. I in the last two years, I remodeled my kitchen/bathroom, redone electrical in my house/garage, and completed many carpentry projects. Currently, I am building a doghouse that is approx. 4ft x 6ft with lighting, insulation and a deck.

Northeast Wisconsin Technical College Associate of Criminal Justice Law Enforcement Certificate: 720-hour Law

What trades-related courses did you take in school?

What construction software or technologies do you have training in?

Any Safety Certificates:

First Aid / CPR

Add'l Details:

Why is an apprenticeship an attractive option to you?

The most aesthetic reason for an Apprenticeship is the paid on the job training. To start a lot of jobs would require one to pay out of pocket or take out loans for a college degree. I'm looking for a job that invests in me and my abilities. I am looking for a long term job that constantly be investing in me throughout my career.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I want to grow in a career where I can utilize hands on learning and have work/personal life balance. I have always been a quick learner, who loves tasks and detail-oriented projects. Over the last two years, I have remodeled my bathroom & kitchen, landscaped my yard, and completed many carpentry/woodworking projects. I have gained great appreciation for the trades and would love to be part of it. Currently, I am working as a Correctional Officer and would like a change of pace in a career that is always in demand. While I love the hands-on aspects of being a Correctional Officer, I am looking for a job that will give me a better work/personal life balance and a job I can see myself working long-term.

Why is an apprenticeship an attractive option to you?

An apprenticeship is attractive to me because it allows me to earn while I learn, gaining hands-on experience while building a career in plumbing. I like that I'll be learning directly from skilled professionals instead of only in a classroom.

Plumbing is a trade that requires precision and problem-solving, and an apprenticeship gives me the chance to develop those skills step by step. It's a clear path to becoming a

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I became interested in the building trades because I enjoy hands-on work and being part of something that people depend on every day. I like the idea of learning a skilled trade that challenges me to think critically, solve problems, and put effort into projects that have a real impact in the community. The trades also offer a solid career path with opportunities to keep improving my skills and knowledge over time.

Plumbing in particular stands out to me because it is an essential trade that requires both technical knowledge and precision. I'm drawn to the responsibility of making sure systems are safe, reliable, and built to last. I like that plumbing combines physical work with problem-solving, and it's a career where I can continue to grow while taking pride in knowing my work helps people live more comfortably and safely.

Why is an apprenticeship an attractive option to you?

I love a job that provides me with something new every day. I am humble to admit the things I don't know and will work hard to apply myself when presented a new challenge on the job. I enjoy a team atmosphere with a common goal. I believe tradesman are the backbone to our country and I will proudly work to provide the best for American industries

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I want to learn to be self-sufficient with residential construction. I enjoy a job that I can learn something new every day and there are avenues to grow within a company. I am pleased about the benefits of long-term union workers as they are compensated very well. I came from a career change being a firefighter EMT and I enjoy that the trades offer consistent scheduling compared to previous work. As somebody willing to work OT, the trades provide good opportunities and compensation for workers

What trades-related courses did you take in school?

Math-Algebra

Why is an apprenticeship an attractive option to you?

I like to learn new skills and feel comfortable while doing them. I recently became a home owner which has come with plenty of challenges around the house. I have leaned on my dad to show me how to do some minor plumbing fixes and electrical issues around the house. I learn best by being shown what to do and practicing at it. I feel an apprenticeship is right for me because it offers me the ability to learn with someone with experience and allow me to be hands on with the skills I am looking to learn.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

For years, I have worked jobs that trained me to problem solve, work with others, and handle day to day operations. Although I appreciate the experience they gave me, I am looking to move into a career. I am looking for the opportunity to develop a skill that I can use in and out of the workplace. As well as starting a career, my fiancé and I recently purchased a home together, and having the ability to better provide for my family is a very important aspect to me looking into this position

Metals, Welding, Math-Geometry, Math-Algebra, Woodworking / Woodshop

What construction software or technologies do you have training in?**Any Safety Certificates:**

OSHA 30

Add'l Details:**Why is an apprenticeship an attractive option to you?**

The main reason an apprenticeship is an attractive option to me is an apprenticeship provides a clear path for career growth, certifications, and long-term job security. Knowing that I'll be gaining skills that are in high demand and can't easily be outsourced gives me confidence in my future. I'm also intrigued by the structured learning environment, where classroom instruction supports the hands-on work, helping me grow both technically and professionally in a way that's immediately applicable on the job site.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I had done trade work prior to this, and it interests me because tradesmen are the true backbone of everything, without them there is quite literally nothing. Specifically, I was drawn to the pipe trades because of the precision, challenge, and importance of the work. Whether it's plumbing, steamfitting, or welding, the pipe trades require a high level of skill and attention to detail, which I find rewarding. I also appreciate the variety of work environments and the chance to be part of essential systems that keep buildings and infrastructure running safely and efficiently.

Add'l Edu. Details:

Degree Major - Supply Chain Management

What trades-related courses did you take in school?

Math-Calculus, Math-Algebra, Math-Geometry, Math-Precalculus / Trigonometry

What construction software or technologies do you have training in?

Business ERP Systems and some exposure to CAD software

Any Safety Certificates:

First Aid / CPR

Add'l Details:

Tell us about any hobbies that have boosted pipetrade-relevant skills:

In my free time, I enjoy woodworking, lawncare, landscaping, home renovations, and repairing my truck and motorcycle. These hobbies have built my problem-solving skills, attention to detail, and comfort with tools and materials. All directly transferable to the construction trades. Even fishing has helped me develop patience and focus, qualities that support steady, precise work. Together, these activities show my passion for hands-on projects and strengthen the skills needed for a career in the trades.

Why is an apprenticeship an attractive option to you?

An apprenticeship is attractive to me because it lets me learn hands-on while still earning a steady income that can help support my wife and kids. I've realized through past supply chain work and hobbies that I thrive on problem solving and practical work. An apprenticeship provides structured training, mentorship, and stability, while allowing me to build a long-term career I can take pride in.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've worked in supply chain roles for several years, but I realized I'm most fulfilled when I'm problem solving and working with my hands rather than sitting behind a desk. I want a career where I can build, fix, and contribute directly to projects in a practical, hands-on way.

A close friend in UA 400 recommended the pipe trades to me, and after hearing about the training, teamwork, and pride he takes in his work, I thought it could be a great fit. His experience, along with my own desire for hands-on problem solving, motivated me to look into a career in the building trades, specifically in the pipe trades.

I love working on house projects, such as building shelves, painting, and installing trim, as well as working on my car and learning how to be self-sufficient.

Doing things with my hands and learning while I try is very motivating for me. I use every opportunity to "get my hands dirty" to learn as much about projects as I can.

Why is an apprenticeship an attractive option to you?

The ability to learn while I earn and be able to start obtaining skills from day one is the largest attractive option for me.

I am also very drawn to learning from a journeyman and having that expert there that I can watch and absorb knowledge from.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I have heard a little about the pipe trades since my uncle is a pipe fitter. I also really enjoy the idea of working with my hands and being able to build something lasting that I can be proud of.

I originally went to college, but have found that I am drawn to be in a field where I can help people and work in a team to accomplish something tangible together.

Add'l Details:

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I enjoy hands-on projects like small repairs, building, and organizing spaces. These hobbies have taught me precision, attention to detail, and how to work safely with tools. I also like troubleshooting and finding solutions when things don't go as planned, which has built my patience and problem-solving skills, both essential in the pipetrades.

Why is an apprenticeship an attractive option to you?

An apprenticeship stands out to me because I don't just want to learn about a trade, I want to live it, every single day. I like the idea of being out in the field, learning from experienced professionals, and applying new skills as I go. For me, the best way to truly master something is by doing it, and an apprenticeship gives me that hands-on experience from the very start.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've always loved the idea of building something real, something people can see, use, and depend on every single day. The building trades caught my attention because they're not just jobs, they're careers that create lasting impact. I like knowing that the work I do could be part of a home, a school, or a business for decades.

The pipetrades, in particular, feel like the perfect fit for me because they mix hands-on skill with problem-solving. It's not just about putting pipe together, it's about understanding systems, making them safe, and keeping things running smoothly for entire communities. I like the challenge of learning precise techniques and the responsibility that comes with doing work that truly matters. For me, it's more than a career path, it's a way to take pride in my work every single day.

Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

Plumber

Work Zones in Preference Order:

Appleton Area (Green)

Relevant Experience Level:

Some. I have worked for a plumber, steamfitter or HVAC/R contractor.

Years of Full-Time Work Experience:

10+

Welding Experience:

Tell us about any jobs where you've learned pipetrades relevant skills:

Remodeling - working with others and on my own. I have experience with PVC, pex, copper, and gas pipe.
In 2021 I was a pre-apprentice at Alpine Plumbing in Greenfield, WI. We worked on multifamily and commercial remodels. At the time I didn't want to pursue the apprenticeship but I learned a great deal there.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

My main hobby is building fine furniture. I work only with wood and it requires extreme attention to detail, high precision, and patience to do a thing well. All of these skills translate into a trade.

Shift Availability:

Full-time, Overtime, 1st Shift (Days)

Post HS Education:

Bachelor Degree

Add'l Edu. Details:

Double major at UW-Milwaukee Class of 2015 Graduated with honors

Why is an apprenticeship an attractive option to you?

Stability, consistency, predictability, as well as satisfaction in actually accomplishing something tangible.

What trades-related courses did you take in school?

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I have always liked working with my hands and building things. When I bought a house some years ago it needed extensive renovation and that was when I first had to learn plumbing. It was a four family property and I replaced all the plumbing waste and water in it (with a plumber consultant making sure I followed all codes).
Through all of the remodeling, woodworking, and construction tasks I've performed plumbing has always been my favorite.

What construction software or technologies do you have training in?

Any Safety Certificates:

First Aid / CPR

Add'l Details:

Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

Plumber

Work Zones in Preference Order:

Green Bay Area (Yellow)

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:

4-6

Welding Experience:

MIG - Some Knowledge, TIG - Some Knowledge, Stick - Some Knowledge, Flux Core - Some Knowledge

Tell us about any jobs where you've learned pipetrades relevant skills:

I worked with a small team doing waste management where I hooked up hoses and pumps the pump out the waste from the large tanks. I also worked with fire hose to clean out tank fully after pumping it almost dry.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I work on my dirtbikes and other off-road vehicles, I enjoy working with my hands and don't mind getting dirty at all. I like to learn new things especially when it comes to hands on things.

Shift Availability:

Full-time, Overtime

Post HS Education:

No

Add'l Edu. Details:

What trades-related courses did you take in school?

Welding, Automotive Technology, Math-Geometry

What construction software or technologies do you have training in?

AutoCAD, Inventor, Revit

Any Safety Certificates:

OSHA 10

Add'l Details:

Why is an apprenticeship an attractive option to you?

An apprenticeship is very attractive to me because I really would like to become a plumber and if I go through the apprenticeship I will be able to go to school while also working and learning. Another big factor is all school will be paid for and that I won't have any student debt.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I love working with my hands and heard about the trades in early high school and knew that's what I wanted to do. Later I narrowed it down to electrician or plumber, then later decided on plumber because it better fits what I like to do.

Why is an apprenticeship an attractive option to you?

An apprenticeship is an attractive option because it offers the opportunity to earn while I learn, gaining real-world, hands on experience under the guidance of skilled professionals. I value structured learning, and combining classroom instruction with practical on-the job training is the ideal way for me to build long term, high demand skills. Coming from the Coast Guard, I'm used to learning by doing and working as part of a team, so the apprenticeship model fits naturally with how I succeed and grow. It's also a

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've always been drawn to hands on work that requires precision, problem-solving, and a strong work ethic, which is why the building trades appeal to me. The pipe trades, in particular, interest me because they combine physical skill with technical knowledge and offer the chance to work on systems essential to daily life. I'm motivated by the opportunity to learn a highly respected craft, take pride in quality work, and be part of a trade that plays a vital role in residential and industrial infrastructure.

Add'l Details:

Why is an apprenticeship an attractive option to you?

In my opinion it is the best way a person can learn something and especially for myself because I am a hands on learning individual and prefer to work with someone in person teaching me skills. The apprenticeship program also provides education taught by experts in the profession. You also have opportunities of getting licensed and becoming a journeyman.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

The trades have always interested me in many ways since I was a kid, I have always been a hands on person, not caring if i get my hands dirty. Plumbing specifically interests me because it is one of the most useful skills you can have owning a household and it comes with many benefits such as working side jobs and creating your own business. Another aspect of why plumbing interests me is that you are helping people in need when their home or business has a problem and you are the one to fix it. I am a hard working individual with a very good work ethic, I am always looking forward to learning new things every day and doing the best job that I can.

My current hobbies I like to do now are pretty physical. I work as a Service Shop Technician. There is always something new I can learn in my job. I really like to learn and be challenge when I'm doing something new. I also like going to the gym. Keeps me active and healthy.

The biggest thing I've done and something I felt pride about and that can transferrable is how I was able to fix my moms lawn. We have a pretty back yard and it was just full of

Why is an apprenticeship an attractive option to you?

If I'm being honest, I just didn't think college was for me. Thankfully I've been able to experience many jobs. And I realized two things about myself. I like to be problem solver and I like to physically move and work.

Once I learned from the apprenticeship program. I believe it was probably one of the best options I have. And like I stated previously, I will like to use this experience and

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I come from a family that works in the trades. My dad is a plumber and my brother is experienced in property maintenance and construction work. So I wish to follow the same route. I also like working physical jobs better than staying in a cube stuck on a computer. That's the reason why I'm generally interested in the trades.

I'm specifically focus on HVAC because, like any other trade, its going to be needed for as long as this world lives. I think HVAC is very crucial specifically where you have cold winter seasons and hot summer seasons. So if a HVAC system breaks, people will always NEED it to be fixed. And where there is work. There is money. I hope to use the skills and knowledge I learn in the program to create something for myself later on.

Why is an apprenticeship an attractive option to you?

The program that has been set up sounded like a fantastic opportunity for me. It sounds like a much more attractive option than going to a four year college.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I enjoy solving problems, working with my hands, and building things. I've heard from many people there is a need for more workers in the pipetrades and I want to play my part in filling it.

Why is an apprenticeship an attractive option to you?

I've been living with my fiancée for a few years and so I want to take the next steps into moving into a true career however I need to make sure I'm making enough to take care of the bills & my other obligations.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I go to a local lounge on Saturdays & had a conversation with a owner of a plumbing company in the madison area. He told me about the opportunities and what the job truly involves, specifically he mentioned the often negative association with "filth" and how that is a exaggeration which was something originally holding me back im not afraid to work hard & get dirty but I was aware of the stigma and wasn't sure if this is the path I wanted to take. Im looking for a career where I can earn my keep provide for my fiancé & hopefully future family.

Steamfitter (Pipefitter), HVAC/R Service Tech, Plumber

Work Zones in Preference Order:

Green Bay Area (Yellow)

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:

1-3

Welding Experience:

Flux Core- Skilled, MIG - Skilled, TIG - Some Knowledge, Stick - Some Knowledge

Tell us about any jobs where you've learned pipetrades relevant skills:

I worked for my dad in his construction company and he did everything so I have learned basic plumbing skills like fixing leaks and installing toilets, I've been working as a structural seam welder for the past 2 years in this position, I have learned welding in many positions, gaps, and procedures, I have full understanding of weld symbols reading Blueprints, measuring in imperial and metric measurements, competent in many types of metals like stainless, copper nickel, steel and aluminum

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I have many hobbies, like rock climbing, puzzles, and wood working. I feel rock climbing contributes control, ability to think and work in unsatisfactory conditions. I believe puzzles enhance your problem solving skills, and using critical thinking skills. Wood working can contribute measuring skills, and reading comprehension of blueprints if you were to copy something you found online. I also enjoy art welding this could easily contribute to construction skills as welding is something you would do on a daily basis.

What construction software or technologies do you have training in?

Word

Any Safety Certificates:

First Aid / CPR

Add'l Details:
Why is an apprenticeship an attractive option to you?

You get paid to learn and people are expecting you to not know much instead of going into a job and being expected to do everything a journeyman can. You will get a more hands on training than basic book skills and how much you can remember on paper and I'm a person who is a hands on learner I can retain more information as someone physically shows me how it's done instead of describing it. Another reason is you really get to know the ins and outs of a trade with 5 years of training

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I got interested in the trades at a young age when I started working construction around the age of 15 and when I turned 18, I became a structural welder and I've loved it ever since. I'm very interested in the pipe trades because my lifelong dream is to become a rig welder on the pipeline, so I was looking into possibilities to get my foot in the door and I came across the local 400. I have spoken to a few people in this local and they seem to love it and that what brings me here today interested in applying for the apprenticeship for the steamfitters.

Years of Full-Time Work Experience:

1-3

Welding Experience:

Tell us about any jobs where you've learned pipetradese relevant skills:

I can't say ive worked a job that holds valuable hands on skills for trades. However,In my past jobs, I've learned to swork hard and stay focused, skills that are essential in the pipe trades. I've worked in fast-paced environments where teamwork and communication were key to getting the job done right.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

In my free time, I enjoy playing chess, staying active through sports and running, and working on basic car maintenance. Chess helps me stay sharp and think critically, planning several steps ahead, which is useful for problem-solving on the job. Sports and running keep me physically fit and teach discipline and teamwork, which are important in construction environments. Working on cars has given me hands-on experience with tools, mechanics, and how systems work, which all happen to be skills related to construction trades.

Shift Availability:

Full-time, 1st Shift (Days)

Post HS Education:

Some 4-year college

Add'l Edu. Details:

So upon my college career I've majored in Geograhpy then switched to a Math Education major. I'm more drawn to classes

What trades-related courses did you take in school?

Math-Algebra, Math-Calculus, Math-Geometry, Math-Precalculus / Trigonometry

Why is an apprenticeship an attractive option to you?

An apprenticeship is attractive to me because it lets me learn by doing. I prefer hands-on work over sitting in a classroom all day, and an apprenticeship gives me the chance to earn while I learn a valuable trade. I like that I can build real skills. It's a practical, rewarding path that fits the way I learn and work best.

What construction software or technologies do you have training in?

What interested you in a career in the building trades in general, and specifically, a career in the pipetradese?

I'm interested in the pipe trades because I enjoy hands-on work, problem-solving, and using my math skills in real-world situations. I'm drawn to the stability, high earning potential, and the chance to learn a valuable skill that's always in demand.

AutoCAD

Any Safety Certificates:**Add'l Details:****Why is an apprenticeship an attractive option to you?**

I like the idea of learning by doing, not just sitting in a classroom. With an apprenticeship, I can build real experience on the job while also getting formal training from experienced professionals.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I first became interested in the pipe trades when a friend told me about steamfitting. I looked it up and thought it sounded like a great fit for me. Steamfitters work on important systems that keep buildings running, like heating and cooling. It's a job that takes skill, hard work, and teamwork, and I want to be part of something that makes a difference.

Why is an apprenticeship an attractive option to you?

Although I appreciate classroom learning, I learn best by doing. I think an apprenticeship will keep me excited about learning as I immediately use the skills I am learning. I also need to generate some income for myself as a new high school graduate, and this seems like a good way to both learn and earn!

Also, I have a cousin who is doing a diesel tech apprenticeship and he is enjoying it. They

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

The reason why I am interested in the pipetrades is because I thought that I could learn how pipe systems work and how they are installed. I don't know a lot about how pipe systems work and I would like to learn and grow my knowledge in this trade.

I have taken a few welding classes (Fox Valley Technical College) so I know some things about welding, but I can still learn how it applies in the pipetrades. I am looking for work which will challenge me and that I do most of my life.

Some. I have worked for a plumber, steamfitter or HVAC/R contractor.

Years of Full-Time Work Experience: 10+

Welding Experience:

Stick - Some Knowledge, TIG - Some Knowledge, MIG - Some Knowledge

Tell us about any jobs where you've learned pipetrades relevant skills:

As an adult seeking a new career path, I am highly motivated to learn the field of pipefitting and committed to making a successful transition. I bring a strong work ethic, reliability, and the maturity that comes with life experience, all of which I believe are valuable assets in a hands-on, detail-oriented trade like pipefitting. I'm eager to develop the technical skills required, from reading blueprints to installing and maintaining piping systems, and I'm not afraid to start at the ground level to build a solid foundation.

Shift Availability:

Full-time, 1st Shift (Days), 2nd Shift (Nights)

Post HS Education:

No

Add'l Edu. Details:

What trades-related courses did you take in school?

Welding, Woodworking / Woodshop, Metals, Building Trades / Construction

What construction software or technologies do you have training in?

Any Safety Certificates:

Add'l Details:

Tell us about any hobbies that have boosted pipetrade-relevant skills:

In my free time, I enjoy working on hands-on projects like fixing things around the house, assembling furniture, and helping with basic plumbing repairs, which all relate directly to the skills needed in pipefitting. I've always had an interest in figuring out how things work and finding efficient ways to put things together, which has strengthened my attention to detail and mechanical thinking.

Why is an apprenticeship an attractive option to you?

An apprenticeship is important to me as an adult because it gives me the opportunity to learn a skilled trade through real-world experience while earning a paycheck. This practical, on-the-job learning approach is ideal for me because I'm ready to work hard, grow my skills, and move forward in a career that offers long-term stability and advancement.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I want to become a pipefitter because I enjoy working with my hands and solving problems in a way that produces real, visible results. The pipefitting trade offers a unique mix of physical labor, technical skill, and precision, all of which align with my strengths and interests. I'm drawn to the idea of building and installing systems that are essential to the function of buildings, factories, and infrastructure.

Another reason I want to pursue a career as a pipefitter is the opportunity for long-term growth and stability. The trade offers strong job security, excellent wages, and the chance to continue learning through on-the-job experience.

Add'l Edu. Details:

Dwelling contractor license, currently enrolled in accounting program at NTC., Small Business Entrepreneurship Degree,

What trades-related courses did you take in school?

Math-Algebra

What construction software or technologies do you have training in?

Any Safety Certificates:

First Aid / CPR, First Aid / CPR

Add'l Details:

Why is an apprenticeship an attractive option to you?

Learn while I earn. I want to learn the trade(s), so it's a no-brainer to seek an apprenticeship. I bring a lot of leadership & managerial experience, but I also want to mater the technical side of trades. I enjoy working hands-on., I am interested in master a trade in which I already work along side on the jobsite daily.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Past experience, I have worked in the residential remodeling/construction industry, so there is familiarity. I also am close to completing an associates degree in business at the NTC, so hopefully completing the pre-apprenticeship exams will be manageable.

Years of Full-Time Work Experience:

7-9

Welding Experience:

Tell us about any jobs where you've learned pipetrades relevant skills:

In my manufacturing jobs, I learned how to work with machinery, follow safety procedures, and stay detail-oriented. I also gained experience with teamwork and staying productive under pressure.

While I haven't worked directly in the pipe trades, the hands-on skills and discipline I've built in those roles give me a solid foundation to succeed and grow in this field.

Shift Availability:

Full-time, Overtime, Weekends, 1st Shift (Days), 2nd Shift (Nights)

Post HS Education:

No

Add'l Edu. Details:

What trades-related courses did you take in school?

What construction software or technologies do you have training in?

Any Safety Certificates:

First Aid / CPR

Add'l Details:

Tell us about any hobbies that have boosted pipetrade-relevant skills:

One of my main hobbies is working out. It helps me stay disciplined, focused, and physically ready for demanding work. I've built a strong mindset through training, which translates well to staying consistent and pushing through tough jobs.

I also enjoy hands-on projects like fixing things around the house or helping friends move or build stuff. It's taught me the value of teamwork, being dependable, and paying attention to detail—all key in the construction trades.

Why is an apprenticeship an attractive option to you?

An apprenticeship is attractive to me because it gives me the chance to earn while I learn. I don't just want a job — I want a career, and this path gives me real skills, real pay, and a clear future.

I like learning hands-on from experienced professionals. That kind of knowledge is priceless, and I'm ready to show up, work hard, and grow into someone people can count on.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I'm drawn to the building trades because I like working with my hands and seeing the results of a hard day's work. I take pride in learning skills that actually matter and can be used for life.

The pipe trades interest me because they're essential, challenging, and offer real opportunity. I'm ready to put in the work, learn the craft, and build a solid career doing something that matters.

I have not worked any jobs that could be related to the apprenticeship. Since High school i worked at a iron castings foundry, food production and a papermill.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

Cars are my big hobbies. I understand it's not related to the apprenticeship. Working on them though taught me how to diagnosis the issue, how to solve it, and execute a plan of action fixing it. Doing my own car work tool I've become familiar and comfortable on how to use handtools, power tools, minor fabrication, and attention to small details. The reason I'm not pursuing an automotive career is that I worry if I work on cars for my job I won't be passionate on working on my own car or my friends and family.

Add'l Details:

Why is an apprenticeship an attractive option to you?

With living in an apartment with my fiancée i have bills each month including a car loan. Taking time off or working part time is not an option for me. Being an apprentice is my best route for starting a career because then I learn on the job and do not have to worry about missing paychecks or short paychecks.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Since high school I've just been working factory production jobs. I'm turning 27 this year and it is time I invest in a career where I can advance in. I am also getting married and have major life goals I would like to meet as in purchasing my first house with my future wife and live comfortably while doing so. I am a DYler and like to fix things my self, like my car. My main example related to this apprenticeship is the bathroom sink in my apartment was backing up. So I went underling the sink and removed the drain plug and the U Piper I believe it's called and cleaned out the hair and gunk in the sink, ever since it's been draining like normal.

Add'l Details:

Why is an apprenticeship an attractive option to you?

I am living in my own apartment with my fiancé. So that means bills, and a car loan payment. Apprenticeships is, what I believe, a very good option for someone in my situation. I will be working while being trained and not having to worry about missing paychecks while pursuing my career.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've been working production jobs since high school. As I'm approaching 30 years old in a few years, getting married, and have major life goals as in purchasing a house it is time for me to invest in a career. I've always liked working with my hands. As a kid I'd help my dad work on cars, different carpentry projects around the house, and with my apartment I've taken it up to fixing minor things. Example, our bathroom sink was backing up so I took out the drain stop and U Pipe I believe it's called and unclogged all the hair and other gunk in it, now it runs like new. That is what I believe made me think I'd enjoy plumbing. I also crave an interactive job that challenges me and leaves me satisfied.

Why is an apprenticeship an attractive option to you?

an apprenticeship would give me the opportunity to dive headfirst into a brand new opportunity that would bring me, steady work, financial stability, more responsibility, and accountability, and the chance to work really hard, An apprenticeship attracts my interest for many reasons. The main reason being stability, and an opportunity to grow and work hard. I'm very fond of the idea of constantly learning, and in a different environment. Working towards financial stability, in a career path that gives me options.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

My interest in this career comes from the main point of stability. I am a hands-on, personable, confident, young man, looking to place oneself where I can find stability, structure, and hard work. I have always made it a point to work more than one job at a time. But I would love to work in a Career., A career in the trades would allow me an opportunity to dive headfirst into stability, structure, hard work, and financial stability. Made it a point to have more than one job at a time, but it would be amazing to have one solid career.

Years of Full-Time Work Experience:

1-3

Welding Experience:

Stick - Some Knowledge

Tell us about any jobs where you've learned pipetrades relevant skills:

In my senior year of High School, I worked a job in Manufacturing at Green Bay Packaging. Although the skills may not directly correlate, it conditioned me to learn soft skills such as being on my feet for long hours, being forced into awkward positions.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

One of my bigger hobbies is woodworking. When I was younger, I would work with my dad outside while he taught me about what he did in his line of work (HVAC) and basic tools. I held that fondly growing up, and now love to create projects for myself or do work around the house.

I believe these skills are transferable to the pipe trade as I have prior experience with pipe pliers, hacksaws, and other basic tools. I also understand the importance of PPE.

What trades-related courses did you take in school?

Engineering, Electrical Trades / Electronics

What construction software or technologies do you have training in?

Any Safety Certificates:

Add'l Details:

Why is an apprenticeship an attractive option to you?

It is the most direct way to learn the trade. As stated previously, I want to explore my options, and this is something I am highly interested in. I have always been a hands-on learner, so I know that learning from watching videos isn't for me.

The other reason I want to pursue an apprenticeship is that I have ruled out White Collared jobs from what I want in my future. It is much easier to jump from trade to trade

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

After high school, I went to College only to complete one year and realize this wasn't what I wanted to do with my life. I went for the wrong reasons and was influenced to do so by someone I thought was close to me. After some soul searching, I looked back to High School, where I loved shop classes, specifically the idea of working with my hands and welding.

I am only 19 and have a life to live. I want to pursue what I love before I am at an age where it is hard to switch. The only way to truly know if I like the work done in the pipe trades is to do it.

Why is an apprenticeship an attractive option to you?

Not only fits my working style but demands more know-how and is an appreciated skill in which I would like to expand and learn to do. I've always had an interest in the trades and even shadowed some and I feel that working in plumbing would be the best direction for me and continual growth to stay sharp in the trades

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Plumbing is not only a year-round need but also extends beyond that is in every major type of work from industrial, to residential, and commercial the constant need of not only plumbing but the trades in general to keep the demand of infrastructure up and running but modernized and needing skilled laborers to meet the demand for a ever-growing industry and its workers. For me helping in that regard gives me a purpose and helping society so I wouldn't ever need to ask the why but the where and when. While being able to support my dad and my future ambitions is a great opportunity all around

Why is an apprenticeship an attractive option to you?

An apprenticeship is an attractive option to me due to the fact that I've always thought about becoming a trades man. Throughout my whole life I've always wanted to be a welder/plumber but never met the requirements for it. I think I would have a great chance working as one climbing up the ranks throughout my career in the trades

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Honestly the design the well looked environment when it gets down to work. Since I was young I've always liked to work in general. I'm currently 17 and I am a early highschool graduate I would like to work in the trades for my future

I like to work with pipes also plumbing would like to know more about it as well. I believe I have a strong passion in me coming out for trades such as plumbing as well as welding. There's a lot of trades out there but in special these 2 are the ones that interest me the most

Add'l Details:**Why is an apprenticeship an attractive option to you?**

I want to continue my education for a better career and don't mind going back to school to further my education for a greater future

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've always been interested in the trades because I grew up around them—my dad worked as a finished carpenter, and from a young age, I was exposed to the satisfaction that comes from working with your hands and seeing a project come together from start to finish. That early exposure sparked a respect for skilled labor and the pride that comes with doing a job well. More recently, I've developed a strong interest in the pipetrades through my work cleaning and servicing storm and sanitary sewers. That hands-on experience opened my eyes to how critical plumbing systems are to public health and infrastructure, and it gave me a real passion for the trade. I enjoy problem-solving, working in a physically active job, and being part of a team that keeps essential systems running safely and efficiently.

Why is an apprenticeship an attractive option to you?

Apprenticing allows me to earn money whilst I learn a valuable skill. Office jobs are coming and going. However all trades are needed constantly. It's a career path I know I'll always have work to be done. Plus it's a stable career. I enjoy math, working with my hands, and exerting my work ethic. An apprenticeship fits all my needs.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I want to be a plumber because I enjoy working with my hands and solving practical problems. Throughout high school, I found that I preferred hands-on tasks over sitting at a desk all day. I've always been interested in how things work, especially around the house, and plumbing seems like a great way to turn that interest into a career. I like the idea of doing work that actually helps people every day, whether it's fixing a leak or installing something new.

I'm also looking for a job that's steady and in demand, and plumbing seems like a smart choice. I know it's hard work, but I'm not afraid to learn and put in the effort. I'm ready to start building a career that gives me real skills and the chance to move up over time. Becoming a plumber feels like the right step for me after high school, and I'm excited to get started.

Why is an apprenticeship an attractive option to you?

The apprenticeship interest me because I'm looking for something more I want a career . I wasn't sure for awhile exactly what I wanted to do but I knew I was good with my hands. After talking with the guys from veterans plumbing and working alongside them, I realized this trade could be something that I would be interested in. So after looking more into it I realized i could see myself doing this. I don't mind working inside outside. I don't mind getting dirty. And im looking for something I can do for a while were I'm

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Been working alongside some of the guys from veterans plumbing. I find it very interesting and really easy to pick up on things. They suggest to me that i should try getting an apprenticeship though the union., I'm looking to a career as a plumber I have worked alongside many in the past two years. I've been at my current job, many of the guys from veterans, plumbing and maritime plumbing. It's a trade that seems to come very easily to me and a trade that sparks my interest. Im looking for something long term and something I see myself for the long run, I'm looking to have a career and something that I truly have a passion in and something that I see myself doing long-term I've worked a long time for a while and I've worked alongside HVAC technicians for a while and it is truly something that interest me

Why is an apprenticeship an attractive option to you?

An apprenticeship in plumbing is an attractive option for me because I believe it's a hard skill to acquire. Which in return makes for a very respectable, honest career choice. An apprenticeship is an attractive career option for me because of how stable it is. Not only financially but I feel it mentally sets you up for the long run as well. With having time spent in a school setting as well as a day to day learning experience on the job. I truly believe having the knowledge of an experienced tradesmen is important and will be a key

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I come from a large family tree of tradesmen. Most importantly I want to pursue a respectable career. A career that takes hard work and dedication. What interests me the most about getting into the pipe trades. Is knowing I will obtain knowledge I can carry with me for the rest of my life. With the hopes of I can pass my skills down to my children. My family is heavily involved in the construction industry which also is a major influence for me. I have been working construction since 2023 building and demolishing industrial grade scaffolding. As well as gaining some years of experience driving forklifts, and telehandlers.

One of my hobbies is fishing, when going fishing it helps with my patience. When you are out on the lake you can not rush and you have to stay calm and under control. With this hobbie I have transferred this to my daily life.

Another hobbies I have to weight lifting. With this hobby it works on my mental strength and physical strength. I have to have the mental power to do more and push my limits to get better. With pushing myself it helps me physically, I have been able to get stronger and be able to lift more than I thought I ever would., I enjoy doing small home projects

Why is an apprenticeship an attractive option to you?

I want a good way to jump start my career. This is a great way start and advance my opportunity. I have heard great things from people I know about this program. It is a great way to improve my skills and learn new things. I am willing to push my self to get better., An apprenticeship is a good choice for me because I can learn the trade while working and earning money. I like that I can get real hands-on experience instead of just learning in a classroom.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

When I was in high school I took a welding class. I enjoyed the class and excelled in lots of the skills. After that class I always thought about it and how I would love to have a career in this industry. I have tried different jobs and I have always came back to this. I know this is something I would enjoy and stay with long term., I have always been drawn to hands-on work that combines problem-solving, technical skill, and tangible results. The building trades, in particular, offer the satisfaction of creating something lasting and essential for communities. I admire the teamwork, precision, and pride that go into every project, and I value the opportunity to develop specialized skills while contributing to infrastructure that people rely on every day.

Specifically, the pipetrades interest me because of their critical role in keeping buildings functional and safe. From installing complex systems to ensuring they operate efficiently, the work requires both technical knowledge and attention to detail. I'm motivated by the idea of working in a field where my efforts directly impact public health safety and

Solidworks

Any Safety Certificates:**Add'l Details:****Why is an apprenticeship an attractive option to you?**

I would like to learn and make money at the same time given the fact I live on my own.

I also have a friend who is an apprentice through you guys and likes it., I'm a hands on learner, never did like learning everything straight from a textbook or online, so learning hands on and making money while doing so is the right thing for me, I like to work hands on, and make money while doing so. I think an apprentice ship is perfect for me because

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Have been a painter, and did masonry since high school, and have seen many trades online that I would like to learn/ work, and wanted to find a career that I enjoy and can work in for many years to come.

I have a friend that has gone through this company and has an apprenticeship and talked highly of it as well., I've done, masonry, painting, worked in paper mills, always been interested in finding a career that I can rely on and find stability in with always having work., Have a buddy my age, that has gone through this same apprenticeship and he said that it's a good place to start a career and I've been interested in finding myself a career for awhile now.

Work Zones in Preference Order:

Fond du Lac Area (Orange), Appleton Area (Green), Fond du Lac Area (Orange)

Relevant Experience Level:A little. No specific trade experience, but I have general skills in construction or welding., A little.
No specific trade experience, but I have general skills in construction or welding**Years of Full-Time Work Experience:** 1-3, 1-3**Welding Experience:****Tell us about any jobs where you've learned pipetrades relevant skills:**

Mudjacking it's far fetched from pipe trades, but it was still construction., n/A

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I've worked a construction job before (Mudjacking), & I learned a lot about working with people- customers & co workers. I'm a very good people's person so I know how to get along & get work done. I'm familiar with power tools, hand tools, ladders, etc. AND I AM A SPONGE WITH INFORMATION. But as hobbies, I don't do it as much as I'd like, but building things is fun & seeing things come along is interesting., I like to put together whatever I can. I like brainstorming with a team and getting a task done.

Why is an apprenticeship an attractive option to you?

Stability & growth!! Get paid to learn & this is the type of work & knowledge that I can take outside of work.

What construction software or technologies do you have training in?**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

I am currently a correctional officer. The work is stressful as is the schedule & hours. I want something stable & a place I can make good money whilst working & enjoy my work. I come from a family that have been in trades & they were always so eager to get me to get into one. And I wish I would have sooner. I'm looking to build a career & skyrocket from there & the pipe trade, plumbers & steamfitters trade is where'd I'd do it., I need a career & I've always considered doing an apprenticeship.

Tell us about any jobs where you've learned pipetrades relevant skills:

I've only ever been around plumbers, hvac, welders and electricians while doing my work as an insulator I haven't had much hands on experience with the pipe trades yet, I haven't done any jobs where I've had to do anything with pipes. Just when doing insulation on job sites I've had to insulate around pipe and watch them be installed and that has always been interesting to me making it neat and look good., I currently do insulation, so I'm always working around pipes and watching them be installed. I think it's cool how the pipes are all routed and set in place to make them be as efficient as

Tell us about any hobbies that have boosted pipetrade-relevant skills:

More so looking to get into it more I have always been a hands on person wanting to learn with my hands, Right after I graduated high school I went out and got a job doing insulation. I've always looked at the other crews on the job sites and thought to myself I'd like to be more of a part more building the house than insulating. Plumbing work has been interesting me more., I do side work every other day if not every day after work, working doing a variety of things: drywall, insulation, siding, pulling wires, and other things like that.

Any Safety Certificates:

First Aid / CPR, First Aid / CPR

Add'l Details:**Why is an apprenticeship an attractive option to you?**

I'd like to get right into the work field and possibly go to college later on the further my career, The apprenticeship program is nice for me because, I like the idea that you can be enrolled in both school learning your skills for the job and also be actively working on a job site as well. I also like that you don't have to pay into school much more past books and supplies coming from a lower income family that would help a lot., I like the idea of being able to work on the job while at the same time being able to go to school and learn

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I graduated high school and got an insulation job and watched as all the other crews did their part of putting the house together and was always interested in the plumbers, What interests me the most is working with my hands and watching the project build day by day. I enjoy knowing that I am a part of a crew who can work together and become something big., What interests me the most is working with my hands, and being a part of a group where we can all work together and be efficient. A career in the pipe trades has always been my thing ever since high school!

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I am currently an under water welder. I have experience welding both top side and under water. I also have experience burning top side with oxy acetylene and burning underwater in zero visibility., Use to be an underwater welder so I love to dive and have down a lot of underwater construction., Always have liked to tinker and fix things. From my teenage years construction always peeked my interest. Especially looking at the beginning product then seeing the results of the finished product.

Why is an apprenticeship an attractive option to you?

To be able to learn on the job by an experienced tradesman. I have always learned better hands on., The reason is because I need to learn a new job but also be able to provide for my family at the same time!, I'm a hands on kind of learner versus learning from a PowerPoint.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I'm currently an underwater welder. I am looking into becoming a plumber because I recently had to get a sewer line replaced on my house and I was intrigued by the whole process after watching the plumber., Have always been interested in learning plumbing! Had a plumber come redo a sewer line in my house and wanted to help him put it in but was not able to ever since then have been curious about plumbing., In my second house I owned I had to have the whole sewer line ripped up and replaced to the city connection. I sat at the window and watched them lay pipe. I was really intrigued watching the plumber.

Math-Calculus, Math-Algebra, Math-Geometry, Math-Precalculus / Trigonometry

Why is an apprenticeship an attractive option to you?

Feedback is typically more immediate than written feedback you could receive as a humanities major in college. It's easier to track your progress in developing certain skills. It's more satisfying in that regard. I like to know when I am doing well on a particular task rather than just rationalizing to myself that, for example, my leadership abilities or writing is actually getting better when that may just be my own perception. I like that, as an apprentice, I would get to deal with real things and know that it is not just my own

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I'm interested in the practical nature of the building trades. I also appreciate the opportunities to troubleshoot problems as they arise., I want to work somewhere I have the opportunity to continue to learn on the job.

Add'l Details:

Why is an apprenticeship an attractive option to you?

The reason why because of the opportunity that I will have and it will be a good way to start a career in the trades., An apprenticeship is attractive to me because I can learn hands-on, earn while I train, and build real skills for a long-term career. I like gaining experience from professionals instead of just classroom learning.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I get to be able to do hands-on work and the job stability because we will always need plumbers., What interested me in the building trades is the opportunity for a stable, rewarding career where you can develop real skills and move up based on hard work. The pipe trades stood out to me because of the combination of welding, fabrication, and mechanical work. I like that it's a trade where safety, accuracy, and teamwork matter. I want to be part of a union where I can learn through apprenticeship, grow my skills, and contribute to large projects that require high-level craftsmanship.
