

Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

Plumber, Steamfitter (Pipefitter), HVAC/R Service Tech

Work Zones in Preference Order:

Green Bay Area (Yellow), Appleton Area (Green)

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:

1-3

Welding Experience:**Tell us about any jobs where you've learned pipetrades relevant skills:**

I haven't had a job related to pipe trades but I have gains skills out of them that could be helpful such as time management, team work, and responsibilities.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

My skills on volunteering can be helpful because they will serve me well in the construction industry. I also have a good time management when it comes to deadline on when a project needs to be done I have good time management that can be helpful in the construction trades. I love hands on work and the passion that I will put into putting something together from start to finish will boost my skills in the transfer table construction trades.

Shift Availability:

Full-time, Overtime, 1st Shift (Days), Weekends

Post HS Education:

No

Add'l Edu. Details:**What trades-related courses did you take in school?**

Drafting and Design, Math-Algebra, Math-Geometry, Math-Precalculus / Trigonometry, Woodworking / Woodshop

What construction software or technologies do you have training in?**Any Safety Certificates:****Add'l Details:****Why is an apprenticeship an attractive option to you?**

Because it allows me to gain practical, hands-on experience while earning a salary, effectively "earning while they learn" without accumulating student debt. It also provides me with direct mentorship from industry experts leading to certifications.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I am looking for a long-term career with growth opportunities, not just a job. The construction industry offers stability, and I want to develop a skill set that is in high demand. I'm also looking. I enjoy working with my hands and seeing a project through from start to finish.

Stick - Some Knowledge, MIG - Some Knowledge

Tell us about any jobs where you've learned pipetrades relevant skills:

As a steel tube mill operator, I setup a multi step machine to take a flat sheet of steel and form it into a tube, welded with a high frequency welder and then sized into either square, rectangular, round, or a custom shaped tube. Using small tolerances of ± 0.003 to ± 0.008 depending on the size of the tube. Setting up the Mill using blueprints, feeler gauges, and micrometers to ensure that everything would be working smoothly and to ensure the correct diameter of the finished product.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

One of my hobbies that has transferable skills is woodworking. With woodworking, being able to look at a blueprint and transform it into a creation using precision measurements and cuts to have everything line up perfectly. Sometimes along the line a wrench gets thrown into the plan and you have to get creative to adapt and overcome the problems. Also, utilizing multiple hand tools gives me a better understanding of what needs to be done on the job site.

Welding Experience:

Tell us about any jobs where you've learned pipetrades relevant skills:

In my previous jobs, I've developed skills that directly apply to the pipe trades, including showing up on time, working long shifts, following instructions, and staying focused on safety. I've had roles that required physical work, problem-solving, and working with tools or equipment, as well as communicating with supervisors and coworkers to get the job done correctly. These experiences taught me accountability, attention to detail, and how to work as part of a team, all of which are important on a construction job site.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

In my free time, I do a lot of hands-on projects at home like assembling furniture, installing wall fixtures, and fixing things when they break instead of replacing them. I enjoy figuring out how things go together, following instructions, measuring, and making sure everything is done correctly and safely. These activities have helped me build patience, problem-solving skills, and attention to detail, which I know transfer directly to construction and trade work where accuracy, responsibility, and working with tools are important.

Why is an apprenticeship an attractive option to you?

An apprenticeship is an active option for me because I learn best by doing, not just sitting in a classroom. I like being hands-on, asking questions, and learning directly from experienced workers while actually being on the job. An apprenticeship gives me the chance to earn while I learn, build real skills, and grow into the trade the right way, which is exactly what I'm looking for in a long-term career.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

What interests me about the building trades is being able to work with my hands and actually see the results of the work I put in. I like jobs where effort matters, where you're learning something real, and where showing up and doing the work counts for something. I'm looking for a long-term career, not just another job, and the trades offer stability, structure, and the chance to build skills that will always be needed. I'm especially interested in the pipe trades because I enjoy mechanical work and problem-solving, and I like understanding how systems work and how to fix them when something goes wrong. HVAC in particular stood out to me because it's hands-on, technical, and constantly in demand. I respect the apprenticeship process and the expectations that come with it, and I'm ready to learn, work hard, and grow

Years of Full-Time Work Experience: 10+

Welding Experience:

Flux Core - Some Knowledge, MIG - Some Knowledge

Tell us about any jobs where you've learned pipetrades relevant skills:

My knowledge base is more about exposure or working beside the pipefitters rather than directly. I tended to work in commercial medical new construction or within hospitals in Green Bay in relation to the hospitals audits. As pipes were run through different fire-barriers, I would work on repairing or fitting the pipes with devices to restore the fire rating in relation to state requirements. As a Foreman, I'd work with the crews as a liason with the super and my crew to make sure we address their needs in regards to regulations and the building phase.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I still have most of my old firestopping gear, but I like to keep busy. I build sneak boats for duck hunting, decoys, and some leatherworking. Basically, I like detailed work, and keep busy learning new plans and skill sets, and all of it can apply to the construction trades. To be honest, I probably inherited from my time in construction, not vice-versa.

Patience and attention to detail always come in handy, and learning to read different schematics is just like studying the plans for each new site we might be working on. In

Why is an apprenticeship an attractive option to you?

An apprenticeship appeals because I know there is a lot I don't know, and you have to work in the field to really learn the trade. In addition, an apprenticeship gives your mentors and co-workers time to get to know you, and time for you to learn the company's culture and the groups you work with. I'm leaning into a Union apprenticeship, as I think it will give me more access to commercial-type construction, which appeals more than working in residential. However, I'm just leaning into what I know,

What trades-related courses did you take in school?

Welding, Math-Algebra, Woodworking / Woodshop

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've worked for several years as a Firestopper in Green Bay with a lot of new construction in partnership with IEI, Shue, Boldt, and Miron most often. I made it to foreman, but got tempted to go into office work. Honestly, I miss working with my hands and need a career I can retire from. I'm just starting some classes in welding.

What construction software or technologies do you have training in?

AutoCAD, Bluebeam

Procore , excel

Building Trades / Construction, Metals, Woodworking / Woodshop, Welding

What construction software or technologies do you have training in?**Any Safety Certificates:****Add'l Details:****Why is an apprenticeship an attractive option to you?**

I feel an apprenticeship is a good option for me because it provides the opportunity to learn a skilled trade utilizing hands-on experience from someone skilled in the trade.

It allows me to further my education while developing skills in a specific trade.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

In high school, I completed several courses in construction, wiring, metals and woodworking. I've also gained hands-on experience working for a woodworking company, as well as a machine shop.

I've always enjoyed working with my hands and staying busy, which has led me to develop a strong interest in learning a skilled trade. My brother-in-law, is a steamfitter and greatly enjoys his work, and hearing about his experiences, has made the field appealing to me. I am interested in the fabrication and installation of piping systems and the satisfaction of seeing a completed job.

Why is an apprenticeship an attractive option to you?

An apprenticeship allows me to learn gradually how to properly be the best professional I can possibly be in my role and to my peers. It allows growth and opportunity to further expand on that knowledge such as becoming a journeyman or eventually a master.

Apprenticeships are key opportunities that help shape me or anyone really, to get started in a trade and focus on that as a career moving forward.

What trades-related courses did you take in school?

Drafting and Design, Math-Algebra

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

As I got older, more mature, I realized having real world skills that can benefit the community and/or my family longevity wise is better than sitting at a desk all day that doesn't contribute to anything other than a salary. I see trades as irreplaceable and also beneficial to the community paid for or not.

I currently sit at a desk and while I'll admit it was nice when I was "younger" I find my lifestyle more active and more willing to learn. I am very ambitious and will achieve my goals. I see trades as a career opportunity of growth and the ability to put back into the community.

Why is an apprenticeship an attractive option to you?

Its an attractive option because you can learn a lot from a trade from scratch and be very knowledgeable at the end. You get to work along side many professionals learning from them and not just learning the trade but the many ways you can go about getting the job done. Not just out in the field but in the classroom as well. Overall its a clear path where if you put in the work you will be very successful.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I have always been interested in the building trades since I have been in school. I always enjoyed working with my hands and being able to build things from scratch or fix things. It wasn't until I started working after high school with a paint line manufacturing company where I started doing many things. One of those things was plumbing, and up until today that's what I do the most there and I do really enjoy it. Either if it was new construction gas piping or PVC piping I really enjoy it and I always wanted to further into that specific career. I know there is a lot to learn in the plumbing trade. I do see many plumbing videos and wish I could learn that trade from the very beginning.

Years of Full-Time Work Experience:

1-3

Welding Experience:

Tell us about any jobs where you've learned pipetrades relevant skills:

I currently in a warehouse where I regularly used power tools and equipment, which helped me develop safe work habits, attention to detail, and efficiency. The job required teamwork, time management, and the ability to follow procedures in a fast-paced environment. These skills are directly applicable to the pipe trades, where safe tool use, precision, and coordination with others are essential.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

In my current role, I regularly work with power tools, which has helped me become comfortable with safe operation, precision, and attention to detail. I enjoy using tools and take pride in doing tasks correctly and efficiently.

Outside of work, I enjoy building things for friends, such as tables and dressers. These projects have strengthened my measuring, planning, and problem-solving skills, as well as my ability to follow layouts and work through challenges as they arise. Both my work

First Aid / CPR

Add'l Details:

Why is an apprenticeship an attractive option to you?

An apprenticeship is an attractive option to me because it allows me to earn while I learn, gaining real-world experience on the job while also developing the technical knowledge in the classroom. I like the balance of hands-on training and structured learning, and I'm motivated to prove myself both in the field and academically. An apprenticeship gives me the opportunity to build strong skills, learn from experienced tradespeople, and grow into a reliable, skilled professional over time.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've always been interested in a career in the trades because I enjoy building things and seeing tangible results from my work. Working with my hands gives me a strong sense of accomplishment, especially when a project comes together from start to finish. I also enjoy problem-solving, whether that means figuring out how to make something fit, function properly, or resolve an unexpected issue on the job.

The trades appeal to me because they combine hands-on work with critical thinking and precision. I take pride in knowing that my work contributes to something lasting and functional. Completing a job correctly and efficiently gives me great satisfaction.

Add'l Details:

Why is an apprenticeship an attractive option to you?

I am very intrigued by the structure of the apprenticeship program. I like how you start at the bottom as a pre apprentice and have to earn your spot to become an apprentice. I am also attracted to the year after year of progression of becoming more skilled and earning more benefits. The guarantee that you will earn your journeyman license as long as you are working hard and make progress in your skills and education is what I am so interested in.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I am very excited about how the apprenticeship program works. I am willing to work hard for my chance to earn an apprenticeship position and I like how the system works by allowing you to progress year after year. Right out of high school I decided to try attending the University of WI Platteville to become an engineer, however after one semester I decided that a traditional university was not the right path for me to follow. Now I am interested in the trades because of the structure and stability of the program.

Add'l Details:**Why is an apprenticeship an attractive option to you?**

An apprenticeship is attractive to me because you get paid to learn. I also was never a big go sir in a school setting for a whole day so being able to go to school and work is really what I want and being able to do hands on learning and doing it in the real world.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

What interest me in building trades is being able to work hands on I've always been a hands on learner and worker. I always want to feel like I did something in life like driving by a building and being able to say I helped get that building up and going. I've always been good with Working with a crew and problem solving when I'm alone. I love working outside and moving around all day. I like getting my hands dirty and not afraid to work in dirty places.

What trades-related courses did you take in school?**What construction software or technologies do you have training in?****Any Safety Certificates:****Add'l Details:****Why is an apprenticeship an attractive option to you?**

An apprenticeship is an attractive option to me because it offers the opportunity to earn while learning, combining hands-on experience with classroom instruction. This approach allows me to develop real-world skills under the guidance of experienced professionals while building a strong foundation in safety, technical knowledge and best practices from the start.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I am interested in a career in the building trades because I enjoy hands-on work, problem-solving and seeing real results from my efforts at the end of each day. The trades offer a stable career path, opportunities for continuous learning and the chance to develop skills that are always in demand.

Specifically, the pipe trades interest me because they combine technical knowledge with practical work. I am drawn to the precision involved in installing and maintaining piping systems, as well as the responsibility of ensuring safety, efficiency and reliability in buildings and infrastructure. I also value the strong apprenticeship training, teamwork and long-term career growth that the pipe trades provide.

Why is an apprenticeship an attractive option to you?

Because I want to learn a trade I don't want To be working these dead end jobs I have been since 2020 I feel that now I have to make a change I'm 23 now and I see a clear path ahead of me and I am pursuing it which is why I came across you guys, For me it's learning while working and making money and an apprenticeship gives me that opportunity unlike going to college to work for someone that's why I plan on going to college for trade welding technical diploma cause that's

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I'm interested in this trade because next year fall of 2026 I'm going to college to get my welding technical diploma and I want to have a job when I'm done and hopefully it benefits you guys but yeah I just want a good well paying career and I want to travel and I feel this road will help me achieve that and I'm hoping you guys are willing to take a chance on me., The building trades offer strong career opportunities, job stability, and the chance to keep learning new skills. I like that it's active work, not just sitting at a desk, and that effort and skill really matter and I plan on going to college next fall 2026 for welding and when I graduate hopefully it will benefit you guys and still have a job waiting for me when I go back cause my goal is to travel and I see a road and it's right Infront of me and with you guys I can make that become reality.

Welding Experience:

Tell us about any jobs where you've learned pipetrades relevant skills:

One past or present job I've had where I've learned skills applicable to the pipe trades is my package handling. The physical labor aspect goes into the pipe trades a lot. Another thing would be the proper handling of different items while meeting the proper safety standards.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

Some hobbies and activities I have or do that would boost my skills as being transferable to construction trade is drawing, cooking, and going to the gym. For drawing it definitely feeds my creativity which could go into blueprints or seeing the bigger picture when it comes to whatever is being laid out. As for cooking the repetitiveness of timing, instructions, and coordination can tie into that very well. Lastly the gym since I love being active and strong which can help a lot when it comes to lifting and moving around for long periods of time.

Shift Availability: Full-time

Post HS Education: Other Relevant Courses & Certifications

Add'l Edu. Details: OSHA 10

What trades-related courses did you take in school?

Math-Algebra

Why is an apprenticeship an attractive option to you?

An apprenticeship is an attractive option to me as I like the aspect of doing the learning, but with hands on included as well. As more of a visual learner I tend to gravitate and thrive in environments where it is balanced out. I process information at a pace that I feel like aligns with the program of an apprenticeship.

What construction software or technologies do you have training in?

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

What initially interested me in the building trades in general was not only the hands on work, but the opportunity of community. Actively getting out and serving the community is something I enjoy. I take value and pride in working hard toward overcoming challenges. Allowing my mind to learn, adapt, and solve different problems that may arise. I find that a career in the pipetrades interests me and reflects what I am looking for.

Any Safety Certificates: OSHA 10

Years of Full-Time Work Experience: 10+

Welding Experience:

Flux Core - Some Knowledge, Stick - Some Knowledge

Tell us about any jobs where you've learned pipetrades relevant skills:

As a self employed carpenter, I've been around the rough framing and finishing stages of projects ranging from single family homes to 100 unit apartment buildings. I have worked in conjunction with pipe trades before, and they seem a lot happier than the electricians.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I've fixed up every home I have ever lived in, in a myriad of ways. I also have a 1981 Datsun project I have been modifying for some time. It's worth noting that my wife loves thrifting and my kid loves breaking toys, so that's brought a certain level of resourceful repair skills to the forefront in my life.

Shift Availability:

Full-time, Overtime

Post HS Education:

Some 2-year college

Add'l Edu. Details:

1 semester machining through nwtc

What trades-related courses did you take in school?

Drafting and Design, Math-Algebra, Math-Geometry, Metals, Welding, Automotive Technology, Electrical Trades / Electronics

Why is an apprenticeship an attractive option to you?

I love the idea of expanding my knowledge of building further than framing and finishing, and this seems to be the best way to do it. My ideal scenario is to be cross trained between plumbing and hvac, and to take the one year construction electrical course at night so as to be as well versed and knowledgeable for myself and my team.

What construction software or technologies do you have training in?

AutoCAD, CNC

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've become skilled carpenter, primarily in finish work, and am looking to grow my knowledge and experience while supporting my young family more reliably.

Disciplines of Interest:

HVAC/R Service Tech

Work Zones in Preference Order:

Appleton Area (Green)

Relevant Experience Level:

Some. I have worked for a plumber, steamfitter or HVAC/R contractor.

Years of Full-Time Work Experience: 10+

Welding Experience:

Flux Core - Some Knowledge, MIG - Some Knowledge, TIG - Some Knowledge, Stick - Some Knowledge

Tell us about any jobs where you've learned pipetrades relevant skills:

I worked for my dad when I was young teenager doing excavating, sewer and water, and operating equipment. I worked for my uncle in my later teens doing residential plumbing, Most don't care about work when your a teen but you never forget the skills, and I have done more than most full time guys ever get to. Then I became a machinist, anything to do with metal I can pretty much do it. Then I took a position as director of maintenance, gained a lot of knowledge in a short time, boilers, large hot water heaters, backflow valves, air exchangers, electrical, maintenance records

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I very much enjoy fishing, more than most, watching my son play football, my daughter play volleyball, Bow hunting, Long walks, outdoors or in the woods in any weather and I enjoy fixing, taking things apart to just clean up everything mechanically or make it work better. I feel all of these are transferable into the trades, outdoors in any weather pretty big part of the trades, fishing and hunting uses patients and being independent, and fixing things has a lot to do with the trades.

Shift Availability:

Full-time, Part-time, Overtime, 1st Shift (Days)

Post HS Education:

Other Relevant Courses & Certifications

Add'l Edu. Details:

I have a few certifications for machining, basically nonrelevant but two for cam software, gibbscam, and mastercam, and one

What trades-related courses did you take in school?

Why is an apprenticeship an attractive option to you?

Honestly, when I was younger it wasn't affordable to do with a stay at home wife and two young kids. Now its more manageable, I was also told I could test out of a lot of things so that's huge. Benefits are a giant plus, doing something different everyday and working outside is something Ive been wanting to do basically my whole adult life. Mostly though I enjoy doing work like this.

What construction software or technologies do you have training in?

CNC

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

A few years ago, I quit my career as a machinist of 17 years, and took a position as director of maintenance at a nursing home, It originally was an old hospital so fairly a good size building, but very old, it was heated by very old steam boilers. The building was very much pieced together, some rooms were steam, and some hydronic everything about that fascinated me enough to take a coarse in low pressure steam boilers, and it was very interesting. I fixed and maintained 90% of it on my own when I could not figure it out, a tech from tweet garrot came to the rescue watching him troubleshoot and dial everything in was interesting. Anything that keeps an industrial building working interests me, automation, hvac, plumbing even power.

Did some amount of research and came to the conclusion that getting immediate hands-on-training and on-the-job experience suited me and my learning style much better than a traditional classroom or E-Learning setting.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

27, at a point in my life where I've done some serious self reflection and realized that I want a better future for myself first and possibly for someone else in the future. 3 months ago I was at the lowest possible point in my life, and after some serious soul searching and painful mistakes I wondered if something like Welding or HVAC would be up my alley, especially as someone who has never seriously put much thought or effort into long-term career prospects.

I believe I have enough mechanical aptitude, am a quick-learner, and am EXTREMELY attentive to detail and receptive to constructive criticism. Hands-on-work has always been more my thing, and I should have given it more thought sooner. Overall, I'm looking to dive into something feet-first and give it my all. Attentive, timely, and eager to adapt.

An HVAC apprenticeship appeals to me because it offers the chance to learn a valuable, in-demand trade through real hands-on experience. I like the idea of working with both my mind and my hands—understanding how heating, ventilation, and air conditioning systems work, then applying that knowledge to solve real problems. The HVAC field combines mechanical skill, technical knowledge, and problem-solving, which keeps the work interesting and challenging. Being able to train under experienced technicians while

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've always been drawn to work that's hands-on and practical, where I can see the direct results of my effort. The building trades offer that sense of accomplishment and purpose — creating something real, useful, and lasting. I'm interested in developing skills that allow me to contribute to projects that shape communities, whether it's constructing homes, maintaining infrastructure, or ensuring buildings are safe and efficient. Working in this field also provides the opportunity to learn from experienced tradespeople and continually grow through new challenges.

I'm especially motivated by the teamwork and problem-solving that come with the trades. Every job site requires communication, coordination, and adaptability — skills I value and want to strengthen. I'm eager to gain technical knowledge, master tools and techniques, and build a c

I believe that this would help me to learn even more about hvac that I already do. I learn more efficiently on the field than I do in a classroom. This would help me solidify my career path and help me find a stable and long time employer so I can help support my my family.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

My father had a tile company when I was growing up, I was fortunate enough to help him. I was exposed to construction and seeing things from start to finish of a project. I love working with my hands and seeing the craftsmanship I was doing. I was instilled with work good work ethic because of it.

I wanted to do hvac because I like helping people to be comfortable in the place that they are in due to my work. I was also curious on how hvac actually worked, I highly enjoy doing hvac and I wish to continue learning the trade and succeeding in it. I wish to be the best as I can.

The ability to learn and improve my skills on the job, while getting feedback and advice from people who are in the field sounds right up my alley. I learn better by doing.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

There are a few reasons I'm interested in this career. The most important reason would be the ability to provide for my family. My grandfather Don Hermesen was in the trades, and speaks very highly of the opportunity. After talking with him I've realized that my willingness to learn and ability to work hard would take me far in this field. It's rewarding to work with my hands, and to see the results of my work right in front of me.

Years of Full-Time Work Experience:

1-3

Welding Experience:**Tell us about any jobs where you've learned pipetrades relevant skills:**

One of the ways I can explain is that my automotive skills could be applied to solving real world problems in the pipe trade. How I see this is that you might have to diagnose issues. Just like on a vehicle that has a problem or something that may be wrong when it comes to piping. Overall, this could show that there is a strong desire for working on challenging issues. I think that my ability to adapt and maintain a high standard of work could make me a valuable asset in the pipe trades.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

One of the hobbies I have are working on vehicles. I have also had the opportunity and interest to do my own vehicle work. It mainly stems from loving to do stuff hands on. Anytime I have an opportunity like this I always try to take advantage of it. I think that hands on stuff like this is always inspiring to other trades.

Post HS Education:

No

Add'l Edu. Details:**What trades-related courses did you take in school?****What construction software or technologies do you have training in?****Any Safety Certificates:****Add'l Details:****Why is an apprenticeship an attractive option to you?**

One of the reasonings is because it offers a financially stable way of handling the learning and hand on process. If this option were not available, it would be a struggle for me to get into any kind of trade. Also, going off what I was saying before, I think learning hands on also helps to retain more information about the trade. There has always been more of a spark for me having to do the activity hands on. An apprenticeship is the friendliest option for me.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

My interest mainly comes from enjoying hands on work. I absolutely love doing problem solving. I also like the fact that not every job is the same. It is a mental and physical aspect that is needed for every job. I like to use skills that I can attain through this kind of work to see a good result from it. It has always just been satisfying to me which is why I like it.

I am also looking at this to greatly advance my career path. I am looking for a very good and stable job. I am looking for a job that offers good benefits and securities. This is why I am willing to go above and beyond expectations to obtain this. I am willing to take as much time as needed to get into this career path.

Technical diploma for Auto collision repair and refinishing technician - Fox Valley Technical College I-car MIG welding

Why is an apprenticeship an attractive option to you?

An apprenticeship program is a good option for me because I am a very hands on learner and it allows me to gradually improve my skills. My previous job allowed me to start as a youth apprentice and also work through a 2 year degree with a co-op. This worked well for me to be able to understand the skills I was learning while being able to use them which is a way that I personally am able to progress very easily.

What trades-related courses did you take in school?

Automotive Technology, Building Trades / Construction, Electrical Trades / Electronics, Drafting and Design, Construction Technology, Math-Algebra, Math-Geometry, Math-Precalculus / Trigonometry, Metals, Welding, Woodworking / Woodshop

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Since High School I've known that I want to be able to work with my hands, being able to see the results of my work when I'm done. I have a background in auto body collision repair which gave me a lot of experience with welding, using hand and power tools and working with precision measuring to make panels fit. I really enjoyed the hands on and detailed side of the work. With the building trades I get the opportunity to use the same skills I have but in a different scenario. Joining the pipe trades rather than sticking with auto body would allow me to keep the aspect of craftsmanship that I love but using it for something bigger.

What construction software or technologies do you have training in?

AutoCAD, CNC, Inventor

I have some college credits working towards my associates degree in criminal Justice.

What trades-related courses did you take in school?**What construction software or technologies do you have training in?****Any Safety Certificates:****Add'l Details:****Why is an apprenticeship an attractive option to you?**

Apprenticeship is an attractive option to me because I would like to learn and build a skilled trade career, this allows me to do that while also being able to earn money for my family.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

My father was a steam fitter by trade, I have tried to go through advanced schooling such as college to further my career paths but have realized that it is not for me. Instead I realize that I learn better by working and would like to have a real career that pays well while I learn. My father has suggested that I would do well in the trades because of this.

What trades-related courses did you take in school?

Math-Algebra

What construction software or technologies do you have training in?**Any Safety Certificates:**

First Aid / CPR

Add'l Details:**Why is an apprenticeship an attractive option to you?**

I am intrested in an apprenticeship because it gives me the ability to learn while doing. I get to take the skills learned and apply then in order to solidify my understanding. Having a mentor also allows me gain a deeper understanding of each topic by asking questions that may not be answered in a classroom.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I love to learn new things and i like to see the results of my work. Im always taking on projects at home and its the most rewarding way i spend my time. I have attended college in the past but i prefer to learn by doing not just observing. I also enjoy working as a team to accomplish a common goal.

Why is an apprenticeship an attractive option to you?

Because I am interested in learning about the HVAC career path and being an apprentice would teach me all about this job and help me to lead myself into growth with this career.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

It was always high up on the "What do I want to do" list for me. I started thinking more about it my junior going into senior year of high school. I have decided this because of the very good pay in these job's and the good things I hear about the benefits and the environment in trade job's. Specifically the HVAC trade was recommended to me by a youth apprenticeship coordinator named DJ Kloida. He gave me a ton of info on this and it made me very excited to start my career. Due to set backs and lack of communication it is a little bit late that I am taking initiative on this but I am very interested in starting my career as an HVAC worker as soon as possible!!!

Add'l Edu. Details:

Degree Major - Supply Chain Management

What trades-related courses did you take in school?

Math-Calculus, Math-Algebra, Math-Geometry, Math-Precalculus / Trigonometry

What construction software or technologies do you have training in?

Business ERP Systems and some exposure to CAD software

Any Safety Certificates:

First Aid / CPR

Add'l Details:**Tell us about any hobbies that have boosted pipetrade-relevant skills:**

In my free time, I enjoy woodworking, lawncare, landscaping, home renovations, and repairing my truck and motorcycle. These hobbies have built my problem-solving skills, attention to detail, and comfort with tools and materials. All directly transferable to the construction trades. Even fishing has helped me develop patience and focus, qualities that support steady, precise work. Together, these activities show my passion for hands-on projects and strengthen the skills needed for a career in the trades.

Why is an apprenticeship an attractive option to you?

An apprenticeship is attractive to me because it lets me learn hands-on while still earning a steady income that can help support my wife and kids. I've realized through past supply chain work and hobbies that I thrive on problem solving and practical work. An apprenticeship provides structured training, mentorship, and stability, while allowing me to build a long-term career I can take pride in.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've worked in supply chain roles for several years, but I realized I'm most fulfilled when I'm problem solving and working with my hands rather than sitting behind a desk. I want a career where I can build, fix, and contribute directly to projects in a practical, hands-on way.

A close friend in UA 400 recommended the pipe trades to me, and after hearing about the training, teamwork, and pride he takes in his work, I thought it could be a great fit. His experience, along with my own desire for hands-on problem solving, motivated me to look into a career in the building trades, specifically in the pipe trades.

Tell us about any jobs where you've learned pipetrades relevant skills:

The jobs that I've had never had anything related to pipe trades but I have taken some classes related to HVAC at lakeshore technical college

Tell us about any hobbies that have boosted pipetrade-relevant skills:

Some of my hobbies include fishing, being with friends and family, driving, kayaking, and building things. 2-3 of these can kinda relate to construction trades being on you look at it. For instance driving is one because is trades you do need a license to operate a vehicle if trying to get to and leave work but also if asked to drive a work vehicle then one is required. Then we have being with friends and family and when on job sites most guys and girls see everyone as friends or even some as family. Building is the obvious one I do like to build but mainly with wood.

Add'l Details:

Why is an apprenticeship an attractive option to you?

An apprenticeship is the most appropriate option for me because it would still help me get guidance and the learning experience that I will need in the near future.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

What mainly interested me about building trades is the hands on work, I've always been a hands on worker and like working with my hands because then I feel like I can understand what I'm doing rather than just looking and typing something or writing. Another reason I was interested is there's not many people going into trades anymore which honestly surprised me but I've also come from a family of trade workers. I have family members that have worked in construction and roofing but they also do their own projects which sometimes include them doing piping or even electrical at times. The main reason I wanna go into HVAC is because I believe there is a lot of benefits with it such as if a personal heating or ac problem occurs then I would possibly be able to fix it on my own or even help some who is having the same issue.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I love working on house projects, such as building shelves, painting, and installing trim, as well as working on my car and learning how to be self-sufficient.

Doing things with my hands and learning while I try is very motivating for me. I use every opportunity to "get my hands dirty" to learn as much about projects as I can.

Why is an apprenticeship an attractive option to you?

The ability to learn while I earn and be able to start obtaining skills from day one is the largest attractive option for me.

I am also very drawn to learning from a journeyman and having that expert there that I can watch and absorb knowledge from.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I have heard a little about the pipe trades since my uncle is a pipe fitter. I also really enjoy the idea of working with my hands and being able to build something lasting that I can be proud of.

I originally went to college, but have found that I am drawn to be in a field where I can help people and work in a team to accomplish something tangible together.

Why is an apprenticeship an attractive option to you?

The idea of an apprenticeship to me is a chance to prove myself has a working individual. I believe that as long as I put in the work and dedication that the apprenticeship will benefit me greatly. It opens up a large network of people to me and I can choose to stand out by working hard and continually learning., The idea of an apprenticeship is more beyond just working and learning for me. I believe that having an apprenticeship within the union will open doors to new opportunities when or wherever it may be. The

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've always been a hands on learner. I did a bit of electrical work for a small contractor before I tried HVAC/R and fell in love with it. Everything from the low voltage system controls to ductwork it involved had me hooked. I especially love the system controls part of it because it reminded me a lot about building computers which is a hobby of mine. I feel that with my young age and commitment to the quickly advancing HVAC field, now is the prime time for me to strengthen my career in it., I originally started out in electrical but found myself in an HVAC Install position and have fallen in love with it ever since. I've found a deep passion for HVACR since then and now yearn to increase my knowledge in the field as much as possible. I started and am still at a non union shop as I thought it'd be a great starting point, however, I've quickly realized through experience and friends within the union that joining the union would be the next step in my career.

Why is an apprenticeship an attractive option to you?

I want to find a new career and plumbing was what drew my interest and I know for a fact I want to do it. It's challenging which is what I like. It allows me to be in different jobs and doesn't seem repetitive like a factory job would be. The benefits package that union offers is unmatched. In the economy that we live in, the wage is very attractive.

I'm looking for a long lasting career that will allow me to do my own side gigs and do

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I want to learn a trade where I can work as a builders trade and/or work as an on call plumber. I want to step away from the factory setting because it is too repetitive for me and seems to always be a dead end career for the most part. I am currently a welder and I've been looking to grow away from that full time and challenge myself to learn something new and challenging and at the same time make more money.

I a. Still willing to put into use my welding abilities if it calls for it in plumbing but would also like to learn something that will allow me to do side gigs and do my own projects/repairs on my own property. Plumbers seem to be in demand and make a good amount of money without putting at risk my health like a career in welding would normally do. I want to challenge myself with this new career., Looking for a rewarding carreer where I'm not stuck in a factory doing the same thing all day. I graduated Itc from welding school and have experience in welding but I wanna learn more I wanna learn a

None, nothing even close-but I'm a hard worker and willing to learn, a little, no specific trade experience, but I have general skills in construction or welding

Years of Full-Time Work Experience: 10+, 10+**Welding Experience:****Tell us about any jobs where you've learned pipetrades relevant skills:**

My dad taught me a lot about pipe fitting and plumbing I have done a lot of home projects and worked on the pipes at home. Also worked on remodeling a camper and turning it into a more homey camper, I worked at the local shop for my dad in Illinois when I was 18. I would do inventory weekly and would deliver parts and tools to the workers on work sites. My dad would take the time to explain to me how things worked

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I have done many jobs and many do it yourself projects and was very proud of the work that was developed I'm competent and able to figure things out I like to take my time to learn my craft and apply the skills I learned working hard everyday doing 2 jobs from dawn till 11 I know all about hard work, I am smart and hard working. Currently I am kitchen manager but I know I have the capability to do anything I put my mind into. Also when I was 18 I worked with my dad for about 2 years

Stick - Some Knowledge, MIG - Some Knowledge, Stick - Some Knowledge

Tell us about any jobs where you've learned pipetrades relevant skills:

When it comes to jobs. Nothing. I haven't worked a job that dealt with pipe trades., I've been in manufacturing for as long as I can remember. I have done sandblasting, worked with sand cores and plastics. I don't think those would be applicable to the pipe trades. And then on the side I've worked vehicles. So for skills, the main big one would have to be attention to detail.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I'll help my father weld once in a while we're not the best but it's definitely a learning experience. Same goes for when he needs help building or adding additions to the house or yard., One of my main hobbies is working on cars. I've spent a lot of time doing my own repairs, upgrades, and modifications — everything from installing intakes and exhaust systems to troubleshooting mechanical issues. Working on vehicles has helped me build skills that transfer directly into the construction trades.

Shift Availability:**Post HS Education:** No, No**Add'l Edu. Details:****What trades-related courses did you take in school?****What construction software or technologies do you have training in?****Any Safety Certificates:****Add'l Details:****Why is an apprenticeship an attractive option to you?**

I GET PAID TO TRAIN!!! And work towards having a stable career. I'll also be learning new skills that'll help me advance in whatever career I decide to go in., An apprenticeship is attractive to me because I learn best through hands-on experience, and the apprenticeship model gives me the chance to build real skills while earning a wage. Instead of going into debt for school, I can learn directly from experienced tradespeople and apply those skills on the job every day. With my background working on cars and

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I would like to build my skills and learn new things. I like to be challenged. I work hard and I'm willing to learn. Trades are great paying jobs and there will always be work needed., I want a career where I'm not stuck behind a desk — something hands-on, skilled, and reliable. That's why the building trades appeal to me. The pipe trades specifically interest me because I enjoy mechanical work, problem-solving, and the precision involved with piping systems. It's a career where I can continue growing, learn from experienced tradespeople, and build a solid future.
