

Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

Plumber, Steamfitter (Pipefitter), HVAC/R Service Tech

Work Zones in Preference Order:

Green Bay Area (Yellow), Appleton Area (Green)

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:

1-3

Welding Experience:**Tell us about any jobs where you've learned pipetrades relevant skills:**

I haven't had a job related to pipe trades but I have gains skills out of them that could be helpful such as time management, team work, and responsibilities.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

My skills on volunteering can be helpful because they will serve me well in the construction industry. I also have a good time management when it comes to deadline on when a project needs to be done I have good time management that can be helpful in the construction trades. I love hands on work and the passion that I will put into putting something together from start to finish will boost my skills in the transfer table construction trades.

Shift Availability:

Full-time, Overtime, 1st Shift (Days), Weekends

Post HS Education:

No

Add'l Edu. Details:**What trades-related courses did you take in school?**

Drafting and Design, Math-Algebra, Math-Geometry, Math-Precalculus / Trigonometry, Woodworking / Woodshop

What construction software or technologies do you have training in?**Any Safety Certificates:****Add'l Details:****Why is an apprenticeship an attractive option to you?**

Because it allows me to gain practical, hands-on experience while earning a salary, effectively "earning while they learn" without accumulating student debt. It also provides me with direct mentorship from industry experts leading to certifications.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I am looking for a long-term career with growth opportunities, not just a job. The construction industry offers stability, and I want to develop a skill set that is in high demand. I'm also looking. I enjoy working with my hands and seeing a project through from start to finish.

I like to joke that welding is in my blood considering how long dad was in the trade. I took as many shop classes in high school as they'd allow and enjoy working with my hands, learning, and problem solving.

I'm looking to build a career in something I enjoy. The classes I took in high school were fun and engaging and this career path sort of has a sentimental side to it as well.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

My dad was a pipefitter for quite a long time and I'm interested in making a career change.

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience: 10+

Welding Experience:

Flux Core - Some Knowledge, MIG - Some Knowledge

Tell us about any jobs where you've learned pipetrades relevant skills:

My knowledge base is more about exposure or working beside the pipefitters rather than directly. I tended to work in commercial medical new construction or within hospitals in Green Bay in relation to the hospitals audits. As pipes were run through different fire-barriers, I would work on repairing or fitting the pipes with devices to restore the fire rating in relation to state requirements. As a Foreman, I'd work with the crews as a liason with the super and my crew to make sure we address their needs in regards to regulations and the building phase.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I still have most of my old firestopping gear, but I like to keep busy. I build sneak boats for duck hunting, decoys, and some leatherworking. Basically, I like detailed work, and keep busy learning new plans and skill sets, and all of it can apply to the construction trades. To be honest, I probably inherited from my time in construction, not vice-versa.

Patience and attention to detail always come in handy, and learning to read different schematics is just like studying the plans for each new site we might be working on. In

Why is an apprenticeship an attractive option to you?

An apprenticeship appeals because I know there is a lot I don't know, and you have to work in the field to really learn the trade. In addition, an apprenticeship gives your mentors and co-workers time to get to know you, and time for you to learn the company's culture and the groups you work with. I'm leaning into a Union apprenticeship, as I think it will give me more access to commercial-type construction, which appeals more than working in residential. However, I'm just leaning into what I know,

What trades-related courses did you take in school?

Welding, Math-Algebra, Woodworking / Woodshop

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've worked for several years as a Firestopper in Green Bay with a lot of new construction in partnership with IEI, Shue, Boldt, and Miron most often. I made it to foreman, but got tempted to go into office work. Honestly, I miss working with my hands and need a career I can retire from. I'm just starting some classes in welding.

What construction software or technologies do you have training in?

AutoCAD, Bluebeam

Procore, excel

Add'l Details:

Why is an apprenticeship an attractive option to you?

I feel an apprenticeship is a good option for me because it provides the opportunity to learn a skilled trade utilizing hands-on experience from someone skilled in the trade.

It allows me to further my education while developing skills in a specific trade.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

In high school, I completed several courses in construction, wiring, metals and woodworking. I've also gained hands-on experience working for a woodworking company, as well as a machine shop.

I've always enjoyed working with my hands and staying busy, which has led me to develop a strong interest in learning a skilled trade. My brother-in-law, is a steamfitter and greatly enjoys his work, and hearing about his experiences, has made the field appealing to me. I am interested in the fabrication and installation of piping systems and the satisfaction of seeing a completed job.

Why is an apprenticeship an attractive option to you?

An apprenticeship allows me to learn gradually how to properly be the best professional I can possibly be in my role and to my peers. It allows growth and opportunity to further expand on that knowledge such as becoming a journeyman or eventually a master.

Apprenticeships are key opportunities that help shape me or anyone really, to get started in a trade and focus on that as a career moving forward.

What trades-related courses did you take in school?

Drafting and Design, Math-Algebra

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

As I got older, more mature, I realized having real world skills that can benefit the community and/or my family longevity wise is better than sitting at a desk all day that doesn't contribute to anything other than a salary. I see trades as irreplaceable and also beneficial to the community paid for or not.

I currently sit at a desk and while I'll admit it was nice when I was "younger" I find my lifestyle more active and more willing to learn. I am very ambitious and will achieve my goals. I see trades as a career opportunity of growth and the ability to put back into the community.

What construction software or technologies do you have training in?

AutoCAD, Solidworks

Meanwhile snowboarding has taught me to persevere through failure, and be patient when learning.

Why is an apprenticeship an attractive option to you?

An apprenticeship is an attractive option to me for multiple reasons. The first reason being, hands on job training where I can earn while I learn. Another reason is, while experiencing on the job training I will receive in school learning. The last reason an apprenticeship is an attractive option to me is, as I work my way up to obtaining a fulfilling career, it will be done debt free.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I took welding courses in high school, I enjoyed stick and tig welding very much and wanted to do it as a lifelong career. After looking into all the different stick and tig welding jobs I found the pipetrades, and I became intrigued instantly.

Disciplines of Interest:

Steamfitter (Pipefitter)

Work Zones in Preference Order:

Green Bay Area (Yellow)

Relevant Experience Level:

Some. I have worked for a plumber, steamfitter or HVAC/R contractor.

Years of Full-Time Work Experience:

10+

Welding Experience:

Tell us about any jobs where you've learned pipetrades relevant skills:

I was a pipefitter at bayship for 11 months

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I like fixing and building things

Shift Availability:

Full-time, 1st Shift (Days), Overtime

Post HS Education:

No

Add'l Edu. Details:

What trades-related courses did you take in school?

What construction software or technologies do you have training in?

Any Safety Certificates:

Add'l Details:

Why is an apprenticeship an attractive option to you?

I want to get paid to learn a trade

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I was employed at bayship building as a pipefitter

Contact Information:

To speak with candidate #7218226, access your Candidate Request Tool at <https://pipetradecareers.com/contractors/candidates/WI400>

I attended Hobart Institute of Welding Technology. In this program I grew skills such as Oxyacetylene cutting, SMAW,

What trades-related courses did you take in school?

Math-Geometry, Math-Precalculus / Trigonometry, Metals

What construction software or technologies do you have training in?

CNC

Mastercam

Any Safety Certificates:

OSHA 10

Add'l Details:

Why is an apprenticeship an attractive option to you?

I believe that apprenticeships are a great way to enter a field. With little to no experience I went into the Manufacturing industry and completed an apprenticeship. In this instance, with my experience, I believe an apprenticeship would give me the experience I need to become a journeyman.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I attended Hobart Welding Institute and have been glued to the fact that I can go out and work in that field. I learned so much already at the school although i'm willing to learn as much as possible to get further into the trade. In my high school education we did not have the opportunity to learn welding, fabrication, or any trades of any sort.

My goal in getting into this field is to get as much on the job experience as possible so eventually I could start my own fabrication business. Welding to me is a new opportunity with every company, part, and weld.

Add'l Details:

Why is an apprenticeship an attractive option to you?

Apprenticeship is an attractive option to me because it aligns with my interests and the pay and benefits are pretty great. It seems like it offers some very good opportunity's and gives good job security. I just want to have a career that I can depend on and not worry about retirement. I am still young and strong and I am willing to work hard. I prefer to work hard and am a hands on type of guy. A lot of my friends are in the trades and I feel like I would fit right in.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

My friend in the laborers union recommended it and I've done some research on it myself.

Other Relevant Courses & Certifications

Add'l Edu. Details:

Welding Certification

What trades-related courses did you take in school?

Welding, Math-Geometry, Math-Precalculus / Trigonometry, Math-Algebra

Why is an apprenticeship an attractive option to you?

An apprenticeship is an attractive option to me because it offers the opportunity to continue building a long-term career through hands-on training while learning directly from experienced professionals in the trade. At 27, I am at a point where I am focused on developing mastery, stability, and pride in my work rather than short-term positions. I value structured learning combined with real-world application, and the steamfitter apprenticeship provides exactly that balance.

What construction software or technologies do you have training in?

AutoCAD, Solidworks

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I went through a course to receive a welding certificate and worked as a welder for almost a year. This apprenticeship seems like the next step in my career journey.

I majored in industrial engineering, however I only attended for one semester before I realized it was not the correct career

What trades-related courses did you take in school?**What construction software or technologies do you have training in?****Any Safety Certificates:****Add'l Details:****Why is an apprenticeship an attractive option to you?**

I am very intrigued by the structure of the apprenticeship program. I like how you start at the bottom as a pre apprentice and have to earn your spot to become an apprentice. I am also attracted to the year after year of progression of becoming more skilled and earning more benefits. The guarantee that you will earn your journeyman license as long as you are working hard and make progress in your skills and education is what I am so interested in.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I am very excited about how the apprenticeship program works. I am willing to work hard for my chance to earn an apprenticeship position and I like how the system works by allowing you to progress year after year. Right out of high school I decided to try attending the University of WI Platteville to become an engineer, however after one semester I decided that a traditional university was not the right path for me to follow. Now I am interested in the trades because of the structure and stability of the program.

Years of Full-Time Work Experience:

7-9

Welding Experience:

Tell us about any jobs where you've learned pipetrades relevant skills:

I've worked four years as a commercial finish carpenter on offices, hotels, hospitals, and labs—framing studs, hanging drywall, installing ceilings, casework, doors, and trim. I read blueprints daily and coordinated with mechanical drawings, laying out walls and chases around ducts, sprinklers, plumbing, and medical gas lines. That taught me the clearances pipe systems need and how to use lasers and levels for dead-accurate work to tight tolerances, skills that'll help me run pipe.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I do a fair bit of woodworking, building furniture, decks for friends, that kind of thing. It's all about reading plans, cutting accurate angles, and making strong joints that'll hold up over time. The precision with levels, squares, and layout tools is basically the same as what I use hanging pipe or setting equipment. Plus, you learn how materials behave under load, which helps when you're rigging heavy pipe or figuring supports in the field. When the weather's decent, I'm out hiking, hunting, or kayaking

Add'l Details:

Why is an apprenticeship an attractive option to you?

steam fitter

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I got into the building trades because I wanted a job where I could actually see what I'd done at the end of the day. There's something satisfying about finishing a shift and looking at a wall that wasn't there before, or a system that's now running because of the work you put in. I like using my hands, solving problems on the spot, and not being stuck behind a desk. Plus, the trades pay well without piling on a ton of college debt, and the work's always there if you're good at it.

What pulls me toward pipe trades in particular is how much variety and real skill is involved. You're dealing with everything from water lines to steam systems in big plants or hospitals, figuring out blueprints, welding, and making sure it all fits perfectly under pressure.

I have worked mainly in retail, but I've worked as a maintenance crew member at a golf course where my hands got dirty, and I was able to learn and use new tools. My dad and brothers have been able to get me a great idea as well where working on cars, side projects and more have been a normal part of life.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I am very artistic and have a steady hand. I know that welding requires a steady hand, so I feel that I can learn fast and grow within the trade. I played multiple competitive sports since the age of 3 throughout college and going on, where I have learned more about life than anything or anywhere else. Resilience, hard work, determination, time management, commitment and more. Growing up with two older brothers and playing boys sports, I am not afraid to get my hands dirty.

What trades-related courses did you take in school?

Math-Algebra, Math-Geometry

Why is an apprenticeship an attractive option to you?

I have worked since I was 13 years old, and trades have come up for years. I have never been able to find the time until now to pursue it. I would love to do something where I can work, learn, and earn at the same time. As an adult with big bills, it is necessary to find something where I can earn and learn at once. There are many trades, but welding catches my eye by a mile. My brother is a lineman and went to tech college, and I have already been through the ropes of student loans, and I do not need any more of those. So,

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I have a college bachelor's degree in Exercise Sports Science. Although I am female, I have always had a passion for working hard regardless of what it entails. I grew up with 2 older brothers and a very hard working, determined father who taught me the ropes of independence and resilience. All three work in the trades, and I went straight to college to play college hockey. My eldest brother is the handy man of the family, and I have always looked up to him. Soon after graduated college, I learned that I wanted to do something where I can work independently or with a team, while also earning a good income so that I can afford the life that I want. I did a little bit of research, and I found that welding would possibly be a great fit. I have a very steady hand and the right mindset. I know that it won't be easy, but I am willing to work.

Why is an apprenticeship an attractive option to you?

Because I want to learn a trade I don't want To be working these dead end jobs I have been since 2020 I feel that now I have to make a change I'm 23 now and I see a clear path ahead of me and I am pursuing it which is why I came across you guys, For me it's learning while working and making money and an apprenticeship gives me that opportunity unlike going to college to work for someone that's why I plan on going to college for trade welding technical diploma cause that's

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I'm interested in this trade because next year fall of 2026 I'm going to college to get my welding technical diploma and I want to have a job when I'm done and hopefully it benefits you guys but yeah I just want a good well paying career and I want to travel and I feel this road will help me achieve that and I'm hoping you guys are willing to take a chance on me., The building trades offer strong career opportunities, job stability, and the chance to keep learning new skills. I like that it's active work, not just sitting at a desk, and that effort and skill really matter and I plan on going to college next fall 2026 for welding and when I graduate hopefully it will benefit you guys and still have a job waiting for me when I go back cause my goal is to travel and I see a road and it's right Infront of me and with you guys I can make that become reality.

Why is an apprenticeship an attractive option to you?

An apprenticeship would help build on the experience I have already accumulated over the last couple of years in the industry. Learning about proper pipe fit up's and weld procedures would greatly benefit my skills and ability to achieve my full potential as a trade worker.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've worked in the maritime industry as a shipfitter for the last three years I, I've enjoyed the daily challenges involved in the industry and am looking for a stable future. Everyone that I've spoken to in regards to local 400 has had a positive experience and nothing but good things to say about it. Working as a shipfitter has exposed me to the pipe industry and its challenges as a trade. I already have experience in blueprint reading as well as some weld experience.

Why is an apprenticeship an attractive option to you?

The biggest reason I want to start an apprenticeship is to have the opportunity to meet new people and come across new opportunities. I am also young and have time to learn and work my way up. I really have no major responsibilities right now so I would like to work somewhere where I can work long days learning and working hands on. I have nothing tying me down to my location either, therefore I could work just about anywhere, I would like to start an apprenticeship to get paid while I learn and also be able to learn

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I could never work behind a desk. I work well with my hands and don't have the patients to sit and look at a screen all day. I know there is good money to be made in the this trade and I'm willing to work very hard to work my way towards that money, I am most interested in being paid while I learn, but I also just love to create. I fell in love with the trades in high school and work alongside many of them in my current job, and am ready to make a move to a company that is better for me. I am specifically interested in the pipe trades because I've been advised there is lots of money to be made in them, but I don't necessarily have my heart set on them. I'm pretty much open to anything and would like to learn more about it.

I haven't had any jobs related to pipe trades but I have been to a school where they took me to learn about pipe trades

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I stay active and enjoy activities that require physical endurance and teamwork, which has strengthened my work ethic and reliability. Whether it's working with others on a project or staying committed to finishing a task, these experiences have helped me develop strong communication skills, time management, and the ability to work safely and efficiently. All of these skills are directly transferable to construction trades, where cooperation, consistency, and accountability are essential.

Shift Availability:**Post HS Education:** No**Add'l Edu. Details:****What trades-related courses did you take in school?****What construction software or technologies do you have training in?****Any Safety Certificates:****Add'l Details:****Why is an apprenticeship an attractive option to you?**

An apprenticeship is an attractive option to me because it allows me to learn a skilled trade through a combination of hands-on experience and classroom instruction while earning an income at the same time. I learn best by doing, and an apprenticeship provides real-world training under experienced professionals, which helps build confidence, strong technical skills, and safe work habits from the start.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I am interested in pursuing a career in the pipe trades because it offers hands-on work, problem-solving, and the opportunity to build skills that are in high demand. I enjoy working with my hands and seeing the direct results of my effort, whether it's installing systems, maintaining equipment, or troubleshooting issues. The pipe trades appeal to me because they combine technical knowledge with practical experience, allowing me to continuously learn while contributing to essential infrastructure that people rely on every day.

What trades-related courses did you take in school?

Welding

What construction software or technologies do you have training in?

CNC

Any Safety Certificates:

Add'l Details:

Why is an apprenticeship an attractive option to you?

I would love to learn more about the pipeline and steamfitting careers and further my education on welding. I would also like to meet professionals with lots of work experience. Another reason would be lack of income because I still live with my parents due to attending full-time Technical College, only allowing me to work a part-time job while also paying some bills and other expenses

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I am interested in building trades in general because I have realized that hands-on is the best way for me to learn, and it is the type of work I enjoy the most. I am specifically interested in the pipetrades because I really enjoy welding and building or creating things.

Years of Full-Time Work Experience: 4-6

Welding Experience:

Tell us about any jobs where you've learned pipetrades relevant skills:

I was a carpenter in remodeling and I feel like measuring and finding correct angles for my cuts would be something towards the pipe trades.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I'm always tinkering on my vehicles or with my motorcycle when I get the chance too. I also do carpentry on the side, always building little projects/ remodeling

Shift Availability: Full-time, 1st Shift (Days)

Post HS Education: No

Add'l Edu. Details:

What trades-related courses did you take in school?

What construction software or technologies do you have training in?

Any Safety Certificates: OSHA 10

Add'l Details:

Why is an apprenticeship an attractive option to you?

I see an apprenticeship as a building block for my future and great way to learn a lot of experience head on.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I have worked construction since ive been out of highschool. I have worked on cars/ motorcycles since I've been 16. My experience Ranges from construction material testing, carpentry, soil drilling and being a blaster. I have an interest in this path because it seems like a good career to be hands on in and a lot I can learn.

Pipe Fabricator, Steamfitter (Pipefitter)

Work Zones in Preference Order:

Green Bay Area (Yellow), Appleton Area (Green)

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience: 10+

Welding Experience:

MIG - Some Knowledge, Flux Core - Some Knowledge, Stick - Some Knowledge

Tell us about any jobs where you've learned pipetrades relevant skills:

At my current employer there is need to understand drawings and schematics for electrical assemblies. I am also certified to operate a forklift.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

My main hobby would be a small hobby farm. Some of skills I have that would transfer over would be accountability, chores need to be done everyday. Problem solving is another transferrable skill, everything isn't going to go exactly to plan and you need to be able to solve problems and figure things out. I also do some light welding on equipment when it breaks. These would be some of the skills I feel a future employer would find transferrable to construction trades.

Shift Availability:

Full-time, 1st Shift (Days), Overtime

Add'l Details:

Why is an apprenticeship an attractive option to you?

The apprenticeship is attractive to me for the fact that it is on the job training as well as in the classroom. I feel I am better able to learn by having hands on experience as well as in the classroom.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I have been in manufacturing for the past 14 years. I am looking to learn a skill. I took welding classes in high school but didn't pursue it after graduation. I am looking to join a trade where I can learn new skills and abilities. Welding and Fabrication is a skill that I would like to learn to proficiently.

Add'l Details:

Why is an apprenticeship an attractive option to you?

1 on 1 training from a Master Plumber is appealing as I feel it's a good way to learn. Specifically, being able to ask questions and get answers in real time is huge for me. I like to ask questions on why one system would work and why specific alternatives would or would not work.

Additionally, a proven and well-established system of classroom teaching via a union feels

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've worked 3 years as a large-scale Chemical Operator and have some familiarity with pipe systems, liquid flow, and siphons. The field has interested me ever since, and drives me towards the behind-the-scenes hardware work.

More importantly, I seek a career where I have a long-term goal of mastery. Many career fields are simply a job with no meaningful growth, whereas a trade has clearly-defined growth and a path for learning.

Post HS Education:

Some 2-year college

Add'l Edu. Details:

I have driven heavy machinery but I'm not certified. In high school I was taking classes for welding I also did torch cutting.

What trades-related courses did you take in school?

Building Trades / Construction, Metals, Welding, Woodworking / Woodshop, Automotive Technology

What construction software or technologies do you have training in?

No

Any Safety Certificates:**Add'l Details:****Why is an apprenticeship an attractive option to you?**

I would like to get better at being a welder. Learning the ins and outs of everything on how to be the best welder possible. I would like to take the opportunity to get my foot in the door and make this my full time job. I've always loved welding just never got the opportunity to learn everything about it after high school I self taught on how to do the small basic things.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I would like to be a welder of any kind i currently have been practicing my welds trying to get better.

Contractor Notes:

Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

Steamfitter (Pipefitter), Plumber

Work Zones in Preference Order:

Fond du Lac Area (Orange), Green Bay Area (Yellow), Appleton Area (Green)

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience: 1-3

Welding Experience:

Flux Core - Some Knowledge, MIG - Some Knowledge, TIG - Some Knowledge, Stick - Some Knowledge

Tell us about any jobs where you've learned pipetrades relevant skills:

I currently work at WE Energies as a Gas Inspector. Some job responsibilities include helping and overseeing contractors who install new underground gas piping and service piping to customers' homes. Through this job, I've gained knowledge of customers' gas piping and other facilities piped into and out of their homes. I believe these skills will transfer to the pipe trades, providing me with prior knowledge and enabling me to jump-start my learning.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I assist my dad with various construction projects around the house and help with miscellaneous farm work. These projects have helped me gain a basic understanding of various trades and develop problem-solving skills. As well as gaining a strong work ethic, learning to never give up, and asking for help when needed. I believe these skills will transfer to the construction trades and help me excel in the field.

Other Relevant Courses & Certifications

Add'l Edu. Details:

I have a Technical Diploma from Moraine Park Technical College in Gas Utility Construction and Service.

What trades-related courses did you take in school?

Math-Algebra, Welding, Metals, Automotive Technology, Math-Geometry

What construction software or technologies do you have training in?

AutoCAD

Any Safety Certificates:

First Aid / CPR

Add'l Details:

Why is an apprenticeship an attractive option to you?

An apprenticeship attracts me because I want to learn a trade and earn money while doing so. An apprenticeship offers me the opportunity to learn both in the field and in school while getting paid, without incurring a large amount of expenses. An apprenticeship also offers a bright future, being able to gain a Journeyman's card, Union benefits, and job security.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I'm interested in the pipe trades because I want a strong career with a positive future ahead of it, and a job I enjoy going to every day. I enjoy working with my hands and being able to travel for work. I believe the pipe trades can offer me everything I am looking for.

CNC

Any Safety Certificates:

First Aid / CPR, First Aid / CPR

Add'l Details:

Why is an apprenticeship an attractive option to you?

There's a lot of growth to learn and see different things as my future goes on, I like to learn new things and try and learn as much as i can while i have the opportunity. I also know how well the pay can be for a professional tradesmen., It gives me the opportunity to learn and grow while working at the same time. I always wanted something where it has endless options and this would best suite that.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Where i currently work we work we are a fabrication place and i enjoy building things, fixing things and dealing with angles and measurements. We work on dairy products and running dairy tubes and such and it interest me to be on diffrent jobs working on different said jobs., What most intrest me is the ability to do and or make something and it be meaningful. I take pride in my work and nothing better suited that then something that everyone needs in a day to day basis. I'm also a very hands on person and i've always liked doing stuff with my skills wether it be building something, fixing it and or learning about something new and trying it.

Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

Steamfitter (Pipefitter), Pipe Fabricator, HVAC/R Service Tech

Work Zones in Preference Order:

Appleton Area (Green), Green Bay Area (Yellow)

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience: 1-3

Welding Experience:

Flux Core - Some Knowledge, MIG - Skilled, Stick - Some Knowledge

Tell us about any jobs where you've learned pipetrades relevant skills:

Auto body repair and refinishing technician- i learned how to precisely measure, cut and fit body panels like quarter panels and bed sides and repair frame damage. To do this I learned how to accurately use tram gauges, tape measures, and calipers. I prepped and welded panels onto vehicles and welded structural supports. Used estimates, repair procedures, wiring diagrams, frame measurement diagrams, and technical data sheets to properly repair vehicles. I also gained proficient use of hand tools and power tools.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

One hobby is show water skiing, for the last 9 years I've skied on a team. This includes solo and team acts. Skiing is very physical and requires a lot of attention to detail and patience both on water and off. It also gives me a high safety awareness due to the equipment and sites that need to be maintained and checked over every time I go out on the water.

I also enjoy working on my cars, using tools, knowing what I need. It also helps me troubleshoot problems and understand how things fit together and work with or without

Shift Availability:

Full-time, 1st Shift (Days), Overtime

Post HS Education:

Some 2-year college, Other Relevant Courses & Certifications

Add'l Edu. Details:

Technical diploma for Auto collision repair and refinishing technician - Fox Valley Technical College I-car MIG welding

What trades-related courses did you take in school?

Automotive Technology, Building Trades / Construction, Electrical Trades / Electronics, Drafting and Design, Construction Technology, Math-Algebra, Math-Geometry, Math-Precalculus / Trigonometry, Metals, Welding, Woodworking / Woodshop

Why is an apprenticeship an attractive option to you?

An apprenticeship program is a good option for me because I am a very hands on learner and it allows me to gradually improve my skills. My previous job allowed me to start as a youth apprentice and also work through a 2 year degree with a co-op. This worked well for me to be able to understand the skills I was learning while being able to use them which is a way that I personally am able to progress very easily.

What construction software or technologies do you have training in?

AutoCAD, CNC, Inventor

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Since High School I've known that I want to be able to work with my hands, being able to see the results of my work when I'm done. I have a background in auto body collision repair which gave me a lot of experience with welding, using hand and power tools and working with precision measuring to make panels fit. I really enjoyed the hands on and detailed side of the work. With the building trades I get the opportunity to use the same skills I have but in a different scenario. Joining the pipe trades rather than sticking with auto body would allow me to keep the aspect of craftsmanship that I love but using it for something bigger.

Being able to make a living while learning my trade., Being able to make a living, while learning my trade.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I took welding classes in high school and it was the most fun I've ever had. I finished all of the courses that my school had to offer and then moved onto college level welding classes at Fox Valley Technical College, while still in high school.

Since I graduated high school, I've been working as a Department Manager at McDonald's, but I know that I'm meant to be a welder or steamfitter, I'm just not entirely sure where to start. One of my friends is in the 400 and recommended this opportunity to me., I took welding classes in high school and they were the most fun, informative classes I've ever taken. I completed all of the courses that my school had to offer, before moving onto college-level courses at Fox Valley Technical College, while still in high school.

Since I graduated, I've been working as a Department Manager at McDonald's, but I always knew that I was meant for more. I'm not the best welder but I know it's what I'm

I would like to further my knowledge and skills to be able to become a journeyman as soon as possible while doing it. I believe I can do great things with the proper guidance and training that I believe will come from this opportunity.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I became interested in the pipe trades after having a conversation with my former welding instructor at Lakeshore Technical College. I explained to him where I was at in life, and some of the goals I'd like to accomplish; He then suggested I complete the advanced pipe welding course offered at LTC before being introduced to the Local 400.

I took the course, gained a lot of valuable knowledge, and believe I'm ready to explore better opportunities and put my skills to the test.

Add'l Details:

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I am interested in becoming a steamfitter because I have always had people in my life that inspired hands on activities and work. My grandpa was a machinist for many years, along with my cousin who steam fits for the local 400. They have impacted me to enjoy hands on jobs like working on cars and welding.
Another reason why I want to become a steamfitter is because I went to Neenah Highschool and they offered welding class at the school. I took as many of the welding classes as I could because I enjoyed the classes themselves but also it the fact that I grew a liking towards welding. It opened my eyes that even though something can be hard, it can also be fun to work around problem and difficulties you might face.

Metals, Welding, Math-Geometry, Math-Algebra, Woodworking / Woodshop

What construction software or technologies do you have training in?**Any Safety Certificates:** OSHA 30**Add'l Details:****Why is an apprenticeship an attractive option to you?**

The main reason an apprenticeship is an attractive option to me is an apprenticeship provides a clear path for career growth, certifications, and long-term job security. Knowing that I'll be gaining skills that are in high demand and can't easily be outsourced gives me confidence in my future. I'm also intrigued by the structured learning environment, where classroom instruction supports the hands-on work, helping me grow both technically and professionally in a way that's immediately applicable on the job site.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I had done trade work prior to this, and it interests me because tradesmen are the true backbone of everything, without them there is quite literally nothing. Specifically, I was drawn to the pipe trades because of the precision, challenge, and importance of the work. Whether it's plumbing, steamfitting, or welding, the pipe trades require a high level of skill and attention to detail, which I find rewarding. I also appreciate the variety of work environments and the chance to be part of essential systems that keep buildings and infrastructure running safely and efficiently.

Why is an apprenticeship an attractive option to you?

An apprenticeship is attractive to me because it allows me to learn a skilled trade while earning a living at the same time. I like the idea of gaining hands-on experience under trained professionals instead of just sitting in a classroom. It provides a clear path to a steady career, opportunities for advancement, and the chance to build skills that will always be in demand. I also value the mentorship and union support that come with an apprenticeship, because it means I'll be guided, challenged, and set up for long-term

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I'm interested in a career in the building trades because I value hard work, hands-on learning, and being part of projects that create something lasting and useful. The trades provide stability, good wages, and the opportunity to constantly grow my skills while contributing to work that supports communities.

Specifically, I'm drawn to the pipe trades because they combine problem-solving with physical skill, precision, and teamwork. Pipe systems are essential for safety, comfort, and efficiency in buildings, so I like the idea of playing a key role in work that people rely on every day. The trade also offers opportunities for steady employment, advancement, and eventually building a lifelong career I can take pride in

Disciplines of Interest:

HVAC/R Service Tech, Plumber, Steamfitter (Pipefitter), Pipe Fabricator

Work Zones in Preference Order:

Green Bay Area (Yellow), Appleton Area (Green), Fond du Lac Area (Orange)

Relevant Experience Level:

None. Nothing even close-but I'm a hard worker and willing to learn!

Years of Full-Time Work Experience: 10+**Welding Experience:****Tell us about any jobs where you've learned pipetrades relevant skills:**

I've only ever helped with preparing the work site and cleaning up after building homes, a friend of mine had a small construction company here in Madison a while back.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I like to read and learn new things. I'm a quick learner. My hobbies wouldn't really help me with work because my hobbies include reading and learning about events in history.

Shift Availability: 2nd Shift (Nights), 1st Shift (Days), Weekends, Overtime, Part-time, Full-time**Post HS Education:** No**Add'l Edu. Details:****What trades-related courses did you take in school?****What construction software or technologies do you have training in?****Any Safety Certificates:****Add'l Details:****Why is an apprenticeship an attractive option to you?**

Having a skill/trade would not only give me job security but I feel like it would renew my purpose as a person.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've always been interested in building and working with my hands. I've worked a lot of dead end jobs and I'd like to have more for myself. Wisconsin is growing and this would be great job security to secure my future.

Contractor Notes:

Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

Steamfitter (Pipefitter), Pipe Fabricator

Work Zones in Preference Order:

Green Bay Area (Yellow)

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience: 1-3

Welding Experience:

MIG - Some Knowledge, MIG - Skilled, Stick - Some Knowledge, Flux Core - Some Knowledge

Tell us about any jobs where you've learned pipetrades relevant skills:

Assembly at American Custom Metal Fabrication, pipefitting for natural gas lines

Tell us about any hobbies that have boosted pipetrade-relevant skills:

In my own time, I like to take on smaller welding projects for friends and family. I also enjoy taking things apart and fixing them, and performing maintenance and work on both mine and my boyfriend's vehicles. I also visit my highschool and help them build sets for shows they put on. These hobbies keep me working with my hands even after work or during unemployment. I believe using tools regularly has kept me sharp, and has also given me opportunities to make mistakes and learn from them outside of work.

What construction software or technologies do you have training in?

AutoCAD, CNC

Any Safety Certificates:

Add'l Details:

Why is an apprenticeship an attractive option to you?

An apprenticeship appeals to me because I'm starting fresh in a new trade, and am looking for a place that will be able to provide training and patience as I start a new path in my life. I believe on-the-job training can be more valuable than school, especially in the trades.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I took an interest in the trades young because of my dad, who is a diesel mechanic. This interest continued in highschool, where I took any and all shop classes available to me. I also was able to get a job as a diesel mechanic at the same shop as my dad. After almost two years and taking diesel courses at NWTC, I realized it wasn't for me, and started looking for other trades to work in. My first job outside of diesel mechanics was at a metal fabrication shop, where I was hired and put as an assembler. I had originally joined to weld so this was initially disappointing. However, while assembling, I was introduced to pipe fitting, where I was given a plan and the parts, and told to figure it out from there. I found it incredibly satisfying when it all came together, and I quickly excelled at it.

What trades-related courses did you take in school?

Welding

What construction software or technologies do you have training in?**Any Safety Certificates:****Add'l Details:****Why is an apprenticeship an attractive option to you?**

To gain knowledge and experience from individuals who have mastered the skills and have the tricks of the trade to pass down, while performing the actual duties of the job. An apprenticeship is basically learning the book knowledge by hands on, real world experience. Which in my opinion is the most raw way of education and learning there is.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Growing up, my father was a carpenter. Naturally I picked up an interest in tools and manual labor, not the most experienced but I do have a desire to learn and achieve. Then my family relocated and dad got involved in the trades pipe fitting, I would see books he would have and flip through them to see what his new thing was (this was during a young age). He inspired me to become a welder and learn a thing or two about a thing or two! Teach, train, and guide me. I will pick up fast, become efficient and skilled in anything I put my mind to.

Add'l Details:

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I love working on house projects, such as building shelves, painting, and installing trim, as well as working on my car and learning how to be self-sufficient.

Doing things with my hands and learning while I try is very motivating for me. I use every opportunity to "get my hands dirty" to learn as much about projects as I can.

Why is an apprenticeship an attractive option to you?

The ability to learn while I earn and be able to start obtaining skills from day one is the largest attractive option for me.

I am also very drawn to learning from a journeyman and having that expert there that I can watch and absorb knowledge from.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I have heard a little about the pipe trades since my uncle is a pipe fitter. I also really enjoy the idea of working with my hands and being able to build something lasting that I can be proud of.

I originally went to college, but have found that I am drawn to be in a field where I can help people and work in a team to accomplish something tangible together.

Any Safety Certificates:**Add'l Details:****Why is an apprenticeship an attractive option to you?**

An apprenticeship is an attractive option to me because I essentially get paid to learn a lifelong skill. An apprenticeship allows me to learn and work experience in, rather than only learning about it at a school.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

What interested me in a career in the building trades is the opportunity for growth and knowledge. Building things intrigues me, so I am looking for a career in the building trades.

What sparked my interest in pipefitting was seeing videos about the trade and what really goes on behind it. I would want to someday start my own company, but first I need to learn and perfect my craft.

None of my previous jobs have given me the opportunity to learn applicable skills, At my current employer, I have developed skills related to the pipe trades, particularly welding. Much of our work involves constructing docks supported by driven pilings, and I am responsible for welding the dock structures to those pilings. This has given me hands-on experience working with structural components, following specifications, and producing strong, reliable welds in field conditions.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I enjoy turning a wrench as I am a hobby mechanic and enjoy bodywork, Outside of work, I spend a lot of my time wrenching on my own trucks, doing maintenance, repairs, and troubleshooting mechanical issues. Working on vehicles has taught me how to use tools properly, follow procedures, and think through problems instead of just throwing parts at them. I'm used to diagnosing issues, tearing equipment down, and putting it back together the right way, whether it's dealing with engines, fuel systems, electrical components, or driveline parts.

Add'l Details:

Why is an apprenticeship an attractive option to you?

Get paid while I learn and the benefits that it will provide for my future, An apprenticeship is attractive to me because it lets me earn a living while learning a skilled trade the right way, instead of taking shortcuts or just guessing in the field. I learn best by doing the work hands-on alongside experienced journeymen who know the trade and can pass that knowledge down. The combination of classroom training and real jobsite experience makes sense to me, and I respect that the apprenticeship holds people to a

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

what interest me in a career in the pipe trades is the benefits, and I have always enjoyed constructing things and welding, I want to get into HVAC because I like working with my hands and fixing real problems, not sitting behind a desk. I've always been the type of person who wants to understand how things work and why they fail, and HVAC is a trade where you're constantly troubleshooting mechanical and electrical systems that people depend on every day. I enjoy physical work, using tools, and taking something that isn't working and making it right again. In a place like Wisconsin, heating and cooling isn't a luxury — it's a necessity — and I take pride in the idea of doing work that keeps people safe and comfortable.

Why is an apprenticeship an attractive option to you?

I want a good way to jump start my career. This is a great way start and advance my opportunity. I have heard great things from people I know about this program. It is a great way to improve my skills and learn new things. I am willing to push my self to get better., An apprenticeship is a good choice for me because I can learn the trade while working and earning money. I like that I can get real hands-on experience instead of just learning in a classroom.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

When I was in high school I took a welding class. I enjoyed the class and excelled in lots of the skills. After that class I always thought about it and how I would love to have a career in this industry. I have tried different jobs and I have always came back to this. I know this is something I would enjoy and stay with long term., I have always been drawn to hands-on work that combines problem-solving, technical skill, and tangible results. The building trades, in particular, offer the satisfaction of creating something lasting and essential for communities. I admire the teamwork, precision, and pride that go into every project, and I value the opportunity to develop specialized skills while contributing to infrastructure that people rely on every day.

Specifically, the pipetrades interest me because of their critical role in keeping buildings functional and safe. From installing complex systems to ensuring they operate efficiently, the work requires both technical knowledge and attention to detail. I'm motivated by the idea of working in a field where my efforts directly impact public health safety and

Why is an apprenticeship an attractive option to you?

I would like to learn and make money at the same time given the fact I live on my own.

I also have a friend who is an apprentice through you guys and likes it., I'm a hands on learner, never did like learning everything straight from a textbook or online, so learning hands on and making money while doing so is the right thing for me, I like to work hands on, and make money while doing so. I think an apprentice ship is perfect for me because

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Have been a painter, and did masonry since high school, and have seen many trades online that I would like to learn/ work, and wanted to find a career that I enjoy and can work in for many years to come.

I have a friend that has gone through this company and has an apprenticeship and talked highly of it as well., I've done, masonry, painting, worked in paper mills, always been interested in finding a career that I can rely on and find stability in with always having work., Have a buddy my age, that has gone through this same apprenticeship and he said that it's a good place to start a career and I've been interested in finding myself a career for awhile now.

Why is an apprenticeship an attractive option to you?

Because I wanna expand my knowledge and make a good career out of welding since I really love doing it and I have a passion for it. I love being under the hood!, I wanna be a strong independent person to produce good work and have a stable home and family, it's very important to me. You guys have amazing benefits and I get to do what I love also while making a living!, I wanna work with other guys learning the same thing and I'm young still and wanna make a honest living and get a head start while I'm young

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I absolutely love welding and I just moved to Wisconsin and really wanna get back into welding!!!, I am very passionate about welding and it makes me feel good to do a good weld and be satisfied with it. I love being in a trade environment also, I work a Pierce manufacturing welding bodies together but not my end goal, I wanna do something more and learn something more of a challenge and a change would be good

Tell us about any jobs where you've learned pipetrades relevant skills:

I've only ever been around plumbers, hvac, welders and electricians while doing my work as an insulator I haven't had much hands on experience with the pipe trades yet, I haven't done any jobs where I've had to do anything with pipes. Just when doing insulation on job sites I've had to insulate around pipe and watch them be installed and that has always been interesting to me making it neat and look good., I currently do insulation, so I'm always working around pipes and watching them be installed. I think it's cool how the pipes are all routed and set in place to make them be as efficient as

Tell us about any hobbies that have boosted pipetrade-relevant skills:

More so looking to get into it more I have always been a hands on person wanting to learn with my hands, Right after I graduated high school I went out and got a job doing insulation. I've always looked at the other crews on the job sites and thought to myself I'd like to be more of a part more building the house than insulating. Plumbing work has been interesting me more., I do side work every other day if not every day after work, working doing a variety of things: drywall, insulation, siding, pulling wires, and other things like that.

Why is an apprenticeship an attractive option to you?

I'd like to get right into the work field and possibly go to college later on the further my career, The apprenticeship program is nice for me because, I like the idea that you can be enrolled in both school learning your skills for the job and also be actively working on a job site as well. I also like that you don't have to pay into school much more past books and supplies coming from a lower income family that would help a lot., I like the idea of being able to work on the job while at the same time being able to go to school and learn

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I graduated high school and got an insulation job and watched as all the other crews did their part of putting the house together and was always interested in the plumbers, What interests me the most is working with my hands and watching the project build day by day. I enjoy knowing that I am a part of a crew who can work together and become something big., What interests me the most is working with my hands, and being a part of a group where we can all work together and be efficient. A career in the pipe trades has always been my thing ever since high school!

Tell us about any jobs where you've learned pipetrades relevant skills:

When it comes to jobs. Nothing. I haven't worked a job that dealt with pipe trades., I've been in manufacturing for as long as I can remember. I have done sandblasting, worked with sand cores and plastics. I don't think those would be applicable to the pipe trades. And then on the side I've worked vehicles. So for skills, the main big one would have to be attention to detail.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I'll help my father weld once in a while we're not the best but it's definitely a learning experience. Same goes for when he needs help building or adding additions to the house or yard., One of my main hobbies is working on cars. I've spent a lot of time doing my own repairs, upgrades, and modifications — everything from installing intakes and exhaust systems to troubleshooting mechanical issues. Working on vehicles has helped me build skills that transfer directly into the construction trades.

I GET PAID TO TRAIN!!! And work towards having a stable career. I'll also be learning new skills that'll help me advance in whatever career I decide to go in., An apprenticeship is attractive to me because I learn best through hands-on experience, and the apprenticeship model gives me the chance to build real skills while earning a wage. Instead of going into debt for school, I can learn directly from experienced tradespeople and apply those skills on the job every day. With my background working on cars and

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I would like to build my skills and learn new things. I like to be challenged. I work hard and I'm willing to learn. Trades are great paying jobs and there will always be work needed., I want a career where I'm not stuck behind a desk — something hands-on, skilled, and reliable. That's why the building trades appeal to me. The pipe trades specifically interest me because I enjoy mechanical work, problem-solving, and the precision involved with piping systems. It's a career where I can continue growing, learn from experienced tradespeople, and build a solid future.
