

Youth Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

Pipe Fabricator

Work Zones in Preference Order:

Appleton Area (Green)

High School:

West De Pere highschool

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:**Welding Experience:****Shift Availability:**

Full-time, summer employment

Tell us about any jobs where you've learned pipetrades relevant skills:

I was a custom fabricator/ custom projects welder at ACMF, my first fab shop i worked at and I am currently a production welder at robinson but have also done structural here as well.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

Welding, fabricating, and making things work

What trades-related courses did you take in school?

Building Trades / Construction, Electrical Trades / Electronics, Drafting and Design, Math-Algebra, Math-Geometry, Math-Precalculus / Trigonometry, Metals, Welding, Woodworking / Woodshop, Automotive Technology

Why is an apprenticeship an attractive option to you?

I am already in 2 apprenticeship programs through my school and have also been an apprentice at 2 different fab shops, 1 which i am currently employed at(robinson) and am looking for more opportunity/growth.

What construction software or technologies do you have training in?

Revit

Welding

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**Any Safety Certificates:****Add'l Details:****Contact Information:**

Contractor Notes:

Youth Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

Plumber, Steamfitter (Pipefitter), HVAC/R Service Tech, Pipe Fabricator

Work Zones in Preference Order:Appleton Area (Green), Fond du Lac Area (Orange) **High School:** Oshkosh West High School**Relevant Experience Level:**

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:**Welding Experience:**

MIG - Some Knowledge

Shift Availability:

Full-time, summer employment, Part-time, school

Tell us about any jobs where you've learned pipetrades relevant skills:

Not specifically to the pipe trades but I have gone on quite a few side jobs with my brother to help out with electrical work.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I currently work at Menards as a cart pusher/cashier and being around, and stocking, pipes, pvc, appliances, etc. has made me familiar with many tools and equipment I would most likely be working with in this line of work. Also on an unrelated note I have a very strong passion for snowboarding.

What trades-related courses did you take in school?

Math-Algebra, Math-Geometry, Metals, Welding, Woodworking / Woodshop

Why is an apprenticeship an attractive option to you?

Mostly because of the fact that I can get on site training, in class learning, and so much more while getting paid, completely eliminating student debts, job searching and other things that typically come with traditional schooling.

What construction software or technologies do you have training in?

AutoCAD, Inventor

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

From my understanding the trades in general are a dying career with most teen and adults around my age not wanting to put in the work ethic to get into one of the most important roles in our community. We rely on the trades to have a complete and sturdy community. I simply want to be apart of what most people my age have nothing to do with. I have a very strong work ethic and am willing to put in what it takes. The plumbing side of the trades interests me the most because my brother is an electrician, and instead of following in his footsteps directly I want to go down a slightly different path.

Any Safety Certificates:

First Aid / CPR

Plumber, Steamfitter (Pipefitter), HVAC/R Service Tech

Work Zones in Preference Order:Fond du Lac Area (Orange), Appleton Area (Green) **High School:** Kimberly**Relevant Experience Level:**

Some. I have worked for a plumber, steamfitter or HVAC/R contractor.

Years of Full-Time Work Experience:**Welding Experience:****Shift Availability:**

Full-time, summer employment

Tell us about any jobs where you've learned pipetrades relevant skills:

I worked as a HVAC helper at energy control and design were I assisted in seasonal maintenance.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I like to hunt and fish and do anything outdoors

What trades-related courses did you take in school?

Building Trades / Construction, Electrical Trades / Electronics, Math-Algebra, Math-Geometry, Math-Precalculus / Trigonometry

Why is an apprenticeship an attractive option to you?

I would like to get hands on learn while in school and have the ability to finish high school and jump right into the trades with some experience

What construction software or technologies do you have training in?

Inventor

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I love to use my hands in anything that do. I love to start something and see the final results and see how all the work pays off.

Any Safety Certificates:

First Aid / CPR, OSHA 10

Pipe Fabricator

Work Zones in Preference Order:

Appleton Area (Green)

High School:

Luther L Wright High School

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:**Welding Experience:**

MIG - Some Knowledge, TIG - Some Knowledge

Shift Availability:

Full-time, summer employment

Tell us about any jobs where you've learned pipetrades relevant skills:

I have had some side jobs welding I have messed with some piping on trailers.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I have grown up around cars, working on them and building them. It has taught me a lot about making things work and learning how things work. Also sometimes having to fabricate your own stuff to get the job done. Very similar to how it can be in construction trades.

What trades-related courses did you take in school?

Welding, Woodworking / Woodshop, Metals, Math-Geometry, Math-Algebra

Why is an apprenticeship an attractive option to you?

Because I'd like to be able to earn while I learn. Also I believe it is well suited for me.

What construction software or technologies do you have training in?

CNC, Inventor

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I ended up getting into welding when I was younger, and I want to further my experience with welding and fabrication. With welding and fabrication something I enjoy very much and have been working on for a few years now.

Any Safety Certificates:

OSHA 10

Appleton Area (Green)

High School:

Appleton East high school

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:**Welding Experience:**

Stick - Skilled, TIG - Skilled, MIG - Skilled

Shift Availability:

Part-time, school year employment

Tell us about any jobs where you've learned pipetrades relevant skills:

I worked Landscaping that thought me a lot. That gave me my work ethic experienced in working non stop and hard work. I've also been in fence working that thought me working with equipment/machines.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I live on a farm so I work every single day if that giving the animals food, fixing tractors and welding when the fence breaks also I work with my dad in his landscaping business. That gives me the work ethic and living with my boss just makes me work harder.

What trades-related courses did you take in school?

Welding, Math-Algebra, Math-Geometry

Why is an apprenticeship an attractive option to you?

An apprenticeship is an attractive option for me because I love to work hands on. Also I like to plan for my future and I feel like join a youth apprenticeship would set me up for success. I want to be a welder when I grew up so I would get more practice in something I wanna do.

What construction software or technologies do you have training in?

welding

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I'm interested in building trades because I like learning with my hands and I feel like a learn better with my hands. I love seeing the end result when I work so hard on a project. I want to be apart of something that gets me to where I wanna be in life.

Disciplines of Interest:

Pipe Fabricator, Steamfitter (Pipefitter)

Work Zones in Preference Order:

Appleton Area (Green)

High School:

Link2Learn Virtual Charter School

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:

Welding Experience:

Shift Availability:

Full-time, summer employment

Tell us about any jobs where you've learned pipetrades relevant skills:

I've worked at Cafe Nutrition for 4 years where I developed teamwork skills, time management skills, and reliability. The job has required me to work to the best of my ability, show up on time, work at a fast pace efficiently, and communicate with coworkers. Though the job is not trade specific it helped me develop a good work ethic, the ability to keep the workspace clean, and work safely.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

A main hobby I have right now is working on my car, it's helped me by learning how to use many different tools and provide skills involving hands on work and my ability to problem solve, and be patient when i have too. Through the trial and error working on my car has taught me how important it is to get things right the first time, and to resolve problems if they do show up. It's helped me build skills mechanically and mentally.

I'm also taking classes at Fox Valley Technical College where I just completed GMAW 1,

What trades-related courses did you take in school?

Welding, Math-Algebra, Math-Geometry, Metals

Why is an apprenticeship an attractive option to you?

An apprenticeship is attractive to me because it would allow me to learn through hands on work with experienced trade workers. I learn best through hands on teaching styles and an apprenticeship would give the opportunity to develop skills the right way while being provided feedback and work.

What construction software or technologies do you have training in?

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I'm interested in a career in the building trades because I've always loved hands on work where, seeing finishing results, and oppurtunities to learn and improve my skills. I have ADHD which influences my love for work that involves hands on skills, and using tools rather than sitting behind a desk.

The pipetrades interest me because of the combination of the fabrication, welding, and problem solving throughout the whole process. The idea of working from drawings, welding/fitting pipe, and being apart of big projects also interest me . I'm looking for a way I can continue to grow my welding and fabrication skills while building a stable future for myself as well.

Work Zones in Preference Order:

Appleton Area (Green), Green Bay Area (Yellow)

High School:

Denmark High School

Relevant Experience Level:

None. Nothing even close-but I'm a hard worker and willing to learn!

Years of Full-Time Work Experience:**Welding Experience:****Shift Availability:**

Part-time, school year employment, Full-time,

Tell us about any jobs where you've learned pipetrades relevant skills:

I have worked at Rent-A-Tent setting up and taking down tents, which has taught me physical work, teams work, following instructions and job-safety. I have also driven salt truck, where I learned responsibility, attention to surroundings, and working in changing conditions.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

My hobbies are hunting, shooting trap, tractor pulling, and recreational vehicles. These things have taught me to follow rules, procedures, and safety hazards. It has also built patience to stay calm under pressure and attention to detail. I have built understanding of engines and equipment. I am comfortable working in all conditions, indoor and out.

What trades-related courses did you take in school?

Math-Algebra, Math-Geometry, Engineering, Woodworking / Woodshop

Why is an apprenticeship an attractive option to you?

It allows me to learn hands-on skills while earning money and gaining real work experience. This opportunity allows me to stay engaged, build responsibility, and start developing skills that will prepare me for a long-term career.

What construction software or technologies do you have training in?

CNC, AutoCAD, Inventor

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I am interested in the pipe trades because I enjoy hands-on physical work and learning practical skills that have real-world value. Through summer work I've learned that I work best in environments where I can see the results of my work. I'm interested in learning more to lead to a long-term career opportunities.

Shift Availability:

Full-time, summer employment, Part-time, school

Tell us about any jobs where you've learned pipetrades relevant skills:

I haven't had any jobs that work with pipe trades but I have had a summer Custodial position which makes you on your feet and moving the whole day and having to squeeze into positions to clean stuff. Also it taught me discipline and hard work ethic to be able to come in every day of the summer except weekends and give 100%.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I am currently in show choir in high school which focuses on teamwork and confidence to be able to perform. It also makes you work hard and push yourself to become better which can transfer over into the trades. I worked during the past two summers as custodial helper and it built discipline and a hard work ethic to come in every day of the work week and put in 8 hours of work. I also lift as a hobby to keep me active and my body healthy to be able to transfer that into the trades later on in life.

What trades-related courses did you take in school?

Math-Geometry, Welding, Math-Algebra

Why is an apprenticeship an attractive option to you?

It is attracting me because you get on the job experience with a professional to teach you the basics to help decide if that career is for you. I want to do an apprenticeship to learn if this career is for me.

What construction software or technologies do you have training in?**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

I am currently in a welding class and I really like it and I visited the Local 400 to see my opportunities after High school. It made me think why not combine something I like into a career and keep learning new things. Plus the pay is good to be able to support my family when I am older. I read more into steamfitters and it was really interesting so that is why I want a career in the pipe trades.

I have not worked in any jobs where I learned skills that are applicable to the pipe trades, but I have helped my dad fixing air conditioners and many more stuff. Even if I don't have experience at all in a job, I will try my best on learning and working in the pipe trades.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I help my dad when he need help to fix something in cars or in our home. I really like solve problems and find ways to solve problems. I like to move a lot and do a lot of interactive movement. I liked to do sports such as soccer, basketball, and I also want to try box.

What trades-related courses did you take in school?

Math-Algebra, Math-Geometry, Math-Precalculus / Trigonometry

Why is an apprenticeship an attractive option to you?

I really like the offer of earning while you learn. I'm able to talk to professionals and what they do every day. I will learn skills that can help me and the people around me. I will also avoid student debt. I cans start before graduating from high school. I will have more experience in a job than most of other kids of my age.

What construction software or technologies do you have training in?**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

I want to earn wile I learn and gain more skills that can actually help me while doing something. I want to work in the pipe trades because I think there are to many things that I can work for in the pipe trades. I can be a fabricator which is something that I want to do.

Tell us about any jobs where you've learned pipetrades relevant skills:

The only jobs I have done that are similar are plumbing with my dad.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I help my dad with home remodeling projects, I enjoy working with my uncle Tom on vehicles and projects. I do alot of construction type work as it is what my family did.

What trades-related courses did you take in school?

Welding, Woodworking / Woodshop, Math-Algebra, Math-Geometry

Why is an apprenticeship an attractive option to you?

Starting an apprenticeship seems to be for me due to my hands on learning style. I work hard and make sure my work is high quality. I take my time and ensure my work is done correctly the first time. Having someone to work under and sharpen my skills, would greatly improve my quality of work.

What construction software or technologies do you have training in?

Solidworks

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I am very interested in welding. I took welding classes at SPASH my junior year and loved it very much. I started with gas welding and ended with TIG welding. It just connected in my brain and I understood it perfectly and knew this is what I wanted to do the rest of my life.

Welding Experience:

MIG - Skilled, TIG - Some Knowledge

Shift Availability:

Part-time, school year employment, Full-time,

Tell us about any jobs where you've learned pipetrades relevant skills:

My first job was at evergreen campground and I basically just did maintenance like cleaning things up, raking, leafblowing things of that nature and then last summer I worked at master electric doing residential electrical work and I could not work there anymore because of school starting. And you guys give me the opportunity to work during the school year which is great for me.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

One of my biggest hobbies is hunting. I enjoy being apart of nature and taking in gods creation. Hunting has allowed me to become a very patient person because sometimes you just have to be really patient and there is nothing you can do about it. And I feel like that being patient at work and doing the best I can to learn is a very good trait to have in the workforce.

What trades-related courses did you take in school?

Welding, Woodworking / Woodshop, Metals, Building Trades / Construction, Electrical Trades / Electronics, Engineering, Math-Algebra, Math-Geometry

Why is an apprenticeship an attractive option to you?

An apprenticeship is attractive to me because it gives me the chance to earn while I learn. Instead of sitting in a classroom full-time, I can gain real hands-on experience while getting paid and working toward a solid career. I like the idea of learning directly from experienced tradespeople who can teach the skills that really matter on the job.

It's also appealing because an apprenticeship offers a clear path for growth and stability.

What construction software or technologies do you have training in?

AutoCAD, CNC, Solidworks

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've always been drawn to hands-on work where I can see the results of what I build and take pride in a finished product. The building trades offer the opportunity to work on projects that have a real, lasting impact on communities — from homes and schools to major infrastructure. I'm also interested in the teamwork, problem-solving, and skill development that come with the trades. It's a career path where hard work, reliability, and craftsmanship are valued and rewarded.

Any Safety Certificates:

First Aid / CPR

I am specifically interested in pipetrades because I have done some welding in the past a little bit and I really enjoyed it. I would love to explore the trade and learn more about it.

Tell us about any jobs where you've learned pipetrades relevant skills:

Over the years I gained some skills from my jobs such as tools. I've used so many tools over my time for so many different projects. Some as big as a shear to some as small as a pliers. I learn how to make duct work so I have a general idea of how hvac works. I frequently used a tape measure so I have overall skill when it comes measurements., I've had two jobs that gave me skills I know will carry over into the pipe trades. One was working with my dad, where I got hands-on experience with basic hand tools and power tools. That job gave me a good sense of what it's like to be on a construction site and how things operate. My other job was in a sheet metal shop, where I worked with

Tell us about any hobbies that have boosted pipetrade-relevant skills:

My favourite hobby is working out. I have been consistently going for 5 years. I value my time at the gym and always try to make time for it. I think working out can transfer to a construction trade by showing great amount of determination and work ethic., One of my main hobbies that directly connects to the construction trades is working out. I genuinely enjoy it and spend most of my free time in the gym. It's not just about staying fit, the gym is a great environment where I've been able to improve my communication and social skills by interacting with others, which are key in any construction setting. I'm also extremely dedicated to this routine. Whether it's a

What trades-related courses did you take in school?

Automotive Technology, Math-Algebra, Math-Geometry, Metals, Welding, Math-Geometry, Math-Algebra, Metals, Welding, Automotive Technology

Why is an apprenticeship an attractive option to you?

I think an apprenticeship is a good option for me because I want to learn. I learn hands on so doing an apprenticeship will allow me to work and learn the way I enjoy. I also think an apprenticeship is a great way to still be motivated to work considering you still make money during the process., An apprenticeship is an attractive option to me because I learn best through hands-on experience. I've always worked harder and stayed more focused when I'm actively doing something, rather than sitting at a computer for hours

What construction software or technologies do you have training in?

CNC, CNC

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I was interested in this career because I enjoy being in the shop and working consistently. From a young age my father showed me a path of work through construction, I worked along side him and experienced what it would be like to be a carpenter. Since then I've been in a shop that I've grown to enjoy the work environment. I enjoy fabricating and feel like it's the route I would love to further explore., What got me interested in the pipe trades was joining a shop. Before that, I worked with my father doing carpentry, which taught me a lot of useful skills, but I realized it wasn't what I really wanted to do long-term. After moving into a shop environment, I found that I enjoyed the hands-on work and the atmosphere. That experience helped me see that the pipe trades are the right fit for me, and it's the direction I want to go with my career.

I would like to get on the job training and I don't plan on going to college because I want to work right after high school.

What construction software or technologies do you have training in?**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

I like the hands on stuff and really enjoy welding. I tried welding in 8th grade and loved it. Now I learned how much money they made which made me think I could do that for my career and I like the labor. I could not see myself working in an office.

Southwest High School, Southwest

Relevant Experience Level:

None. Nothing even close-but I'm a hard worker and willing to learn!, None. Nothing even close-but I'm a hard worker and willing to learn!

Years of Full-Time Work Experience:

Welding Experience:

Shift Availability:

Part-time, school year employment, Full-time,

Tell us about any jobs where you've learned pipetrades relevant skills:

I've drove forklift for a warehouse where I learned that it doesn't matter how long someone has had a job. They still make mistakes. I've worked at Taco Bell where I have to learn quickly to keep up with the changes, I have worked for a cold storage warehouse where I had to learn on how to manage a crew to get work done safely and in a timely manner, I work at taco bell and know how to manage a crew.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I work long weeks and am able to learn quickly. I have no issue working late hours., I have done woodworking and a little welding before but I have helped with teams before and I have drove forklift before. these are all transferrable because it shows I like to work with my hands and I know how to help manage.

What trades-related courses did you take in school?

Math-Algebra, Math-Geometry, Math-Precalculus / Trigonometry, Woodworking / Woodshop, Math-Algebra, Math-Geometry, Math-Precalculus / Trigonometry, Woodworking / Woodshop

Why is an apprenticeship an attractive option to you?

I get to learn without going into debt and I get paid to learn what I want to do, because it allows me to get out of a temporary job and start my future

What construction software or technologies do you have training in?

CNC

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

My dad has been telling me since I started working that the trades are the way to go. I didn't have any interest at first but then I learned more and I fell in love with making people's day better by fixing their things. My AC at home goes out all the time and I'd love to know how to fix it., I have always been interested because I would rather make something happen than to sit behind a computer all day

High School:

South West High School

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:

Welding Experience:

TIG - Some Knowledge, MIG - Some Knowledge, Stick - Some Knowledge

Shift Availability:

Part-time, school year employment

Tell us about any jobs where you've learned pipetrades relevant skills:

My first job was a bagger/cart runner at Festival Foods, I learned basic communication and customer service here. Next I worked at Mcdonald's, here I had to learn almost every position in the kitchen. I am currently employed at Five Guys and am one of the main crew members, Time management and communication are the top priority while making orders.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I started skating and snowboarding last year and they both taught me to learn from my mistakes. I have also learned to keep getting up no matter what, failing is a part of life. I can use this mentality to keep my work persistent and learn from the best.

What trades-related courses did you take in school?

Automotive Technology, Welding, Metals, Woodworking / Woodshop, Math-Precalculus / Trigonometry, Math-Geometry, Math-Algebra

Why is an apprenticeship an attractive option to you?

I will be getting trained by professionals at a young age, cementing the trade in my mind. A 2 year or 4 year tech school would cost money and I am in a bad financial situation at the moment. Learning a trade right out of high school will set me up for life.

What construction software or technologies do you have training in?

CNC

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

It's a job that has very good benefits financially. With the pensions and even insurance coverage, I would find a job that I can rely on until I retire. You can meet many smart people in trades and I'm excited to learn what they know. A career in pipe trades is usually a local job, so I won't have to worry about moving or traveling far from home.

Tell us about any jobs where you've learned pipetrades relevant skills:

The only job I have related to a type of trade is the fields, you get your body down and working I move my hands constantly while working. It's about waking up early in the morning getting to the job site and getting done what the farmer wants done that day.

My other job at mcdonald's i work in the kitchen so I prep, cook and assemble so I got to be fast in my work. The Work environment seems to get stressful if there some not moving with speed.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I really enjoy going to the gym to lift weights and feel good mentally and physically. Lifting weights brings so much joy to my life and a notice it being effective when i'm at work, having to lift heavy equipment and to push myself during difficult scenarios and difficult situations.

I played sports in high school also have a job so I can't let my coaches down at practice or in game nor can I fail my manager. So I make sure time management is always precise because lacking is not tolerated in most places i've been a team member at.

What trades-related courses did you take in school?

Welding, Woodworking / Woodshop, Metals, Math-Geometry, Math-Algebra, Engineering, Automotive Technology, Building Trades / Construction, Construction Technology

Why is an apprenticeship an attractive option to you?

An apprenticeship is a really attractive option because I believe it's a really smart move to get people going in what they wanna pursue. For example, I really want an apprenticeship in HVAC because I view that as a long time goal I wanna be an HVAC technician. Sometimes it can be hard to get involved so in that case the apprenticeship makes it a really good option.

Getting paid for learning new skills is only just a plus, you're learning the future skill and

What construction software or technologies do you have training in?

Throughout my life, I always liked exploring my options and doing things right. A 4 or 2 year college doesn't call my attention after high school. I've been working since I was 13 so I always liked making an honest dollar. My teachers, parents and counselors tell me that my idea of getting into the trades is a really smart idea. And all I wanna do is move forward with it.

Any Safety Certificates:

I made research and talk to many workers in the trades and they tell me how it's the best decision they could've made. I talked to my teacher about it earlier in the school year he mentioned if he was in high school again he would've definitely taken the route towards the trades. I'm really looking forward to doing something special and different after high school for myself, my family and a new company.

Tell us about any jobs where you've learned pipetrades relevant skills:

I'm currently working at The Home Depot. I possess a range of skills that can be applied to various positions in the manufacturing industry, including assembly and tool use, Inventory control, Teamwork, problem-solving, and Effective Communication., There are a couple good skills I have acquired while working at my job. Some of these skills include; critical thinking and problem solving. Often times at work I have to figure out issues that customers have had with their orders and their products. Communication is another skill I use a lot. Most of the time I have to ask some of my fellow associates for help with something. Such as loading something or helping a customer with something

Tell us about any hobbies that have boosted pipetrade-relevant skills:

Woodworking, metalworking, welding, A couple things I like to do in my free time are; building guitars and working with wood projects. I often use critical thinking while building these as well. Most times there is something I mess up when making things, I take a step and try to figure out what step I messed up on and then try to go back and fix it. Another skill I often use is communication. With my current job that I'm at I need to be able to effectively communicate with my fellow workers.

What trades-related courses did you take in school?

Automotive Technology, Drafting and Design, Math-Algebra, Welding, Building Trades / Construction, Woodworking / Woodshop, Metals, Automotive Technology, Building Trades / Construction, Drafting and Design, Welding, Woodworking / Woodshop

Why is an apprenticeship an attractive option to you?

It is a great opportunity to expand my career options and get more experience in the work world., I feel it's a good way to improve my skills that can apply to the workforce. I'm willing to learn whatever is necessary to get the job done.

What construction software or technologies do you have training in?

AutoCAD, Inventor, AutoCAD, CNC

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've always wanted to find a job in manufacturing but was never able to find a solid position., Ever since I was a little kid, sometimes I used to go with my grandpa to his hvac job, when he showed me what he does I thought it would be pretty cool to work these types of jobs. Ever since then in school, I have been taking shop classes and loved taking them. I feel like pipe fitting would be a really cool trade to try out.

Tell us about any jobs where you've learned pipetrades relevant skills:

I currently am employed at Wisconsin Steel Fabrication LLC as a youth Apprentice Since June of 2025. I work 5:30a-5pm Monday through Thursday and 5:30am-12pm on Friday. I do a variety of duties including prepping metal for the welders, quality checks on the finished work, painting, increments of welding throughout the day, cleaning the shop, and assist with loading/unloading materials. Prior to that, I worked for Level Plain Dairy where I learned to work independently being solely responsible for milking and feeding the herd along with cleaning the barn.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I play Lacrosse which helps build my strength, endurance, communication and teamwork skills along with showing my commitment to the team. I enjoy hunting and fishing in my free time, this helps me to relax and improve my patience. My dad does a lot of home improvement projects both at home and up north in which I enjoy helping and learning the skills he passes on to me.

What trades-related courses did you take in school?

Building Trades / Construction, Construction Technology, Welding, Woodworking / Woodshop, Metals, Drafting and Design

Why is an apprenticeship an attractive option to you?

I am very interested in getting a jumpstart on the skills and knowledge I need to develop a strong career in the pipe fitting and pipe fabrication industry. An apprenticeship offers me the opportunity to get hands on learning while building my future. I believe the sooner I begin developing these skills the better employee I will be.

What construction software or technologies do you have training in?

Bluebeam, Revit, Inventor

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I have taken Intro to ACE Academy, Welding Tech 1, Building Construction 1 & 2, and Metals Manufacturing Tech 1 classes in school. My sister's boyfriend is a 3rd year apprentice with the Local 400 as a Pipefitter, I have discussed the career with him and am excited about the opportunities the Local 400 offers. I currently work at a metal fabrication shop as a youth apprentice, working 4 12-hour and 1 6-hour day per week, learning the basics of the metals trade and welding. Based on what I have learned and experienced so far, I have really enjoyed the welding and metals trade. This summer I really enjoyed working in a busy metal fabrication shop. I believe this would be a rewarding career for me.

Since I enjoy welding and I would like to try a new variation of welding., I have friends who are active members of the Local 400 who spoke very highly of the program. I feel that what I have heard from them and what was presented to me when I came and toured the facility with my high school welding class emphasized everything even more so.

I want to learn more about how to succeed in my chosen trade. I have a goal to master a

What construction software or technologies do you have training in?

Inventor, Revit, Bluebeam, Inventor, Bluebeam, Revit, CNC

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I personally enjoy welding a lot have taken two welding classes through school and am planning to take another one next year. I know someone that I doing steam fitting currently at Great Lakes mechanical and he's had an influence on that path that I want to go with welding. Haven't had a lot of experience welding on pipe but, I'm willing to learn how to., I have taken multiple welding courses throughout high school. I enjoy the trade because it is something a little different every time I weld, and I really thrive on the challenge.

AutoCAD, CNC, Solidworks, AutoCAD, CNC, CNC, AutoCAD, Laser Scanning, Inventor

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

i don't enjoy working in retail or food service and my dad is a welder at the power plant in Manitowoc. i want to follow his steps, i want to follow my dad's foot steps and become a welder when i'm older. i have been welding in the garage for as long as i can remember, I am interested in working in the trades as a welder and pipe fitter because I value hands-on work that produces real results. I enjoy seeing a project come together through skill, precision, and teamwork. I understand Welding and pipe fitting require problem-solving, attention to detail, and technical skill—qualities I am motivated to develop and apply in a challenging, real-world environment.

Tell us about any jobs where you've learned pipetrades relevant skills:

I've had a couple of jobs where I learned skills that I think are really useful for the pipe trades. At Fleet Farm, I worked in logistics, which meant handling inventory, unloading trucks, and organizing stock. This job taught me how to manage materials efficiently and safely, which is super important in the pipe trades. I also had to be very precise and pay attention to detail, since mistakes could cause big problems. At Jellystone Campground, I worked in maintenance and as a store clerk. In maintenance, I did a lot of repair and upkeep tasks. In my past jobs, I've built skills that connect well to the pipe trades. Working at a warehouse taught me how to handle

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I enjoy woodworking and participating in various sports, both of which have equipped me with valuable skills for the pipe trades. Woodworking has helped my attention to detail, precision, and ability to follow complex plans—essential traits for tasks such as pipe fitting and system installation. It has also improved my problem-solving abilities, crucial for working with intricate piping systems. Meanwhile, participating in sports has built my physical stamina, strength. Sports have also taught me how to work well with others and communicate. In my free time, I enjoy weightlifting, hunting, and fishing. Weightlifting has helped me build strength and discipline, which are important

What trades-related courses did you take in school?

Math-Algebra, Math-Geometry, Woodworking / Woodshop, Drafting and Design, Engineering, Math-Algebra, Math-Geometry, Math-Precalculus / Trigonometry, Woodworking / Woodshop, Engineering

Why is an apprenticeship an attractive option to you?

An apprenticeship is a great option for me because it offers hands-on experience in a real work environment. Instead of just sitting in a classroom, I get to learn by actually doing the job, which I believe is the best way to understand and master any skill. Plus, apprenticeships often come with a salary, so I can earn money while I'm learning. This means I can support myself and maybe even save up for the future without having to worry about student loans or debt.

What construction software or technologies do you have training in?

Inventor, Inventor

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I have always been fascinated by the building trades because they offer a unique blend of hands-on work, problem-solving, and the tangible satisfaction of seeing a project come to life. The ability to work with different materials and tools to create something is a rewarding feeling I want to experience.

Specifically, my interest in the pipe trades comes from several factors. The complexity and precision required in the pipe trades are particularly appealing. Working with systems essential for everyday life, such as plumbing, heating, and cooling, offers a constant challenge and keeps the work engaging. Going with this I love being on my feet and working with my hands. I'm interested in the pipe trades because I want a career where I can work with my hands and actually see the results of what I'm doing. College didn't feel like the right fit for me, and I realized I wanted something more practical where I could learn on the job and build real skills. The pipe trades caught my attention
