

Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

Steamfitter (Pipefitter), Pipe Fabricator, HVAC/R Service Tech

Work Zones in Preference Order:

Fond du Lac Area (Orange)

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience: 10+**Welding Experience:**

MIG - Some Knowledge

Tell us about any jobs where you've learned pipetrades relevant skills:

I've never held a job that was dedicated to pipe welding. But at my last job, I did have to make structural pieces often using pipe.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I like to make model cars and engines, puzzles, sports, all of my own mechanic work on my vehicles. It's made me more mechanically inclined, logical, dextrous hands, and I like to keep my mind sharp.

Shift Availability:

Full-time, 1st Shift (Days)

Post HS Education:

Other Relevant Courses & Certifications

Add'l Edu. Details:

Welding and blueprint reading courses back in 2010.

What trades-related courses did you take in school?

Math-Algebra, Metals, Welding

What construction software or technologies do you have training in?

Solidworks

Any Safety Certificates:

First Aid / CPR

Add'l Details:**Why is an apprenticeship an attractive option to you?**

I view it as the next step to progress my career and goals. I've done most of what I can in shops, I want to learn something new and challenging.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I love welding, have done it for many years. I've done construction in both electrical and ironworker in a shop. Personally, I'm tired of working in shops, where you're just another number.

I feel like I've done most of what I can in a shop setting, and now I want to expand my knowledge and branch out to a more difficult side of welding. And earn a better wage for the future of my family.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

One of my main hobbies is working on hands-on projects, like fixing things, doing small repairs, and improving spaces at home. I also enjoy activities like fishing and working with tools, which require patience, focus, and attention to detail.

These hobbies have helped me develop skills that transfer well into the construction trades, such as problem-solving, mechanical thinking, and working safely with tools. They've also taught me the importance of being consistent, staying focused on a task, and

Why is an apprenticeship an attractive option to you?

An apprenticeship is attractive to me because it offers the opportunity to earn while learning and gain real hands-on experience in the field. I value being able to develop practical skills under the guidance of experienced professionals while building a strong foundation in the trade.

It also provides a clear path for long-term career growth, allowing me to continuously

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've always been interested in hands-on work and understanding how mechanical systems function. My experience working with refrigeration and HVAC systems has shown me how important skilled trades are in keeping operations running efficiently and safely.

The building trades offer a stable career where I can continue learning and improving my skills. I'm especially interested in the pipetrades because they relate directly to systems I already have experience with, like piping, heating, and cooling. I enjoy working with tools, solving problems, and being part of a team that builds and maintains essential systems.

AutoCAD

Any Safety Certificates:**Add'l Details:****Why is an apprenticeship an attractive option to you?**

Well because i've had apprenticeships before and they are such an amazing opportunity for me to learn new things such as welding trade as well as getting paid to learn and doing what i love such as welding, what more could i ask for! I think it's an attractive option to me because in the union and trade industry the opportunities are endless and you always have room to expand and grow no matter what.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Honestly 2 years ago i didn't have an interest in welding but for my senior year of high school i took a welding class , and i thought "great another pointless class for me" but not even a month in i fell inlove with the trade . The patience and the results of my welds made me love it even more, it's calm and easy to do for me

Add'l Details:

Why is an apprenticeship an attractive option to you?

An apprenticeship is attractive to me because it offers the opportunity to learn a skilled trade through real hands-on experience while earning a living. I value being able to learn directly in the field, working alongside experienced professionals, rather than only in a classroom setting. The structured nature of an apprenticeship, with clear progression and skill development, is important to me because it provides a path where I can continuously improve and see measurable growth over time.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've always been interested in hands-on, mechanical work where I can see the direct results of what I'm doing. I enjoy problem-solving and working with tools, and I've found that I learn best by doing. The building trades stand out to me because they offer a clear path to develop real, valuable skills while building something tangible and long-lasting.

Specifically, I'm interested in the pipetrades because of how essential they are to everyday life. Whether it's heating, cooling, plumbing, or industrial systems. I like that the work is both technical and practical, and that there's always something new to learn. It's a career where I can continuously improve, take pride in my work, and know that what I'm doing has real impact.

What construction software or technologies do you have training in?

CNC, Solidworks, Robotic Total Station

Any Safety Certificates:**Add'l Details:****Why is an apprenticeship an attractive option to you?**

I believe that the best way to pass on a trade is to learn from the best who practice it daily. I have trained many partners at my job, and in order for them to succeed is to demonstrate and have them practice everything I do for a reason. I train them as we go through the job, and when a learning moment happens, I show them how we troubleshoot whatever comes up. Then they have confidence in working on their own.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I practice and have demonstrated the use of geometry with sheet metal of various types of metals to be welded. I wish to continue to learn and practice those skills that I have talent for.

Years of Full-Time Work Experience:

7-9

Welding Experience:

Tell us about any jobs where you've learned pipetrades relevant skills:

I've worked in a few different roles that have each built skills I'll carry into the pipetrades. In underwriting I developed sharp attention to detail and the ability to read technical documents. At St. Norbert College in facilities I got hands-on experience alongside tradespeople and exposure to how buildings and their systems are maintained. As a basketball director I learned to communicate clearly, manage logistics, and perform under pressure. Across all three I built a work ethic around showing up and being dependable, and that's exactly what I plan to bring.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

In my free time I enjoy hands-on projects around the house. I've built an home office in my basement and worked on plumbing and HVAC projects at home, which gave me direct exposure to the kind of systems work the pipetrades involve. I also regularly help family and friends with their projects, which has taught me how to work alongside others and see a job through to the end.

I do my own yard work and lawn maintenance, which builds the habit of showing up,

Add'l Details:

Why is an apprenticeship an attractive option to you?

The apprenticeship model appeals to me because it's built around doing the work, not sitting in a classroom hoping it translates later. Learning directly from experienced journeymen on real job sites means the lessons stick because they're earned in the field. I also appreciate that there's a structured path with clear milestones, so I always know where I stand and what I'm working toward. Getting paid while I learn means I can commit to it fully without the financial pressure that comes with traditional schooling.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've spent a few years in the workforce and learned something important about myself. A desk job isn't for me, and neither is work that doesn't feel like it amounts to anything real. That feeling pushed me to stop settling and make a deliberate change toward a career I could be proud of. The pipetrades caught my attention because it demands more than just physical effort. You're reading blueprints, solving problems on the fly, and understanding how a whole system needs to behave. That challenge is exactly what I've been looking for.

The pipetrades offer something most fields don't, a clear path forward, strong pay, solid benefits, and work that isn't going anywhere. I'm ready to start at the bottom and earn every step. This is a deliberate decision.

What construction software or technologies do you have training in?

AutoCAD, CNC, Inventor, Solidworks

Any Safety Certificates:

Add'l Details:

Why is an apprenticeship an attractive option to you?

An apprenticeship is an attractive option to me because it's an education without the debt. School cost a lot of money, on top of taking up a ton of time where I don't get paid. An apprenticeship would allow me to make money, get an education, and work experience. An apprenticeship would also allow me to build a successful career while gaining the required skills.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

The thing that interest me in the trades is the apprenticeship program. I want to learn and pursue an education, wether it's a journey man card or degree, without the debt and being able to build on the skills I learn while I work. I also enjoy the hands on work of welding/ construction.
I don't know a ton about the pipe trades. I decided to look into them since I have experience with metal fabrication, and some experience with construction.

What trades-related courses did you take in school?

Math-Geometry, Math-Algebra, Math-Precalculus / Trigonometry, Math-Calculus

Why is an apprenticeship an attractive option to you?

I want to get into the trade right away, I have no experience in the trade thus far, but an apprenticeship gives me the ability to learn while working hands-on, and get credentials that actually mean something when I'm done.

And I'm realistic about where I'm at, I'm not a tradesman, I'd rather spend five years learning properly than spend ten years figuring it out the hard way. I'm also an adult with

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I currently work in the world of digital marketing, but find the work unfulfilling. I've always enjoyed working with my hands and doing hard work, I'm fortunate to own a home and some of the most rewarding things about the home have been completing renovations. I think it's great to look back at the project you've done after it's completed and see what you've accomplished.

Plumbing, steam fitting, HVAC appeal to me because it requires problem-solving, strategic thinking, and of course physical labor.

What construction software or technologies do you have training in?

AutoCAD, Bluebeam

Any Safety Certificates:

First Aid / CPR

Add'l Details:

Why is an apprenticeship an attractive option to you?

There are very few employers and industries willing to train new employees and many solid careers are gated behind a requirement of already having experience to get an entry-level position. An apprenticeship seems like a great way to gain necessary work experience in a good trade.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've had a few different jobs over the years and I find that jobs where I'm making something, or working with my hands frequently, are often more enjoyable than jobs where I'm sitting at a desk all day. Additionally, my aunt was a union pipefitter until she retired and she always seemed to have stable employment and enjoyed her work well enough.

Add'l Details:**Why is an apprenticeship an attractive option to you?**

I'm a little older, I enjoy learning and loved school, now though the idea of learning and earning simultaneously is really the only option I have for greater advancement. I like that apprenticeships are structured hands on learning environments. Gives me a chance to increase my skill set without setting my family and life commitments behind.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've been around the building trades for my whole adult life. Usually in estimator/sales/project management roles. I want to be here because I'm looking for a career with a solid foundation and a clear path for advancement. I've always been interested in how complex systems work. Specifically, I'm drawn to the HVAC/Mechanical side because it requires a balance of physical skill and mental logic. My long-term goal is to move into Project Management, I want to learn the trade from the ground up so that when eventually if I have the right stuff, I know exactly what it takes to get the job done right, safely and on schedule.

Welding Experience:

Stick - Some Knowledge, MIG - Some Knowledge

Tell us about any jobs where you've learned pipetrades relevant skills:

As a steel tube mill operator, I setup a multi step machine to take a flat sheet of steel and form it into a tube, welded with a high frequency welder and then sized into either square, rectangular, round, or a custom shaped tube. Using small tolerances of +/-0.003 to +/-0.008 depending on the size of the tube. Setting up the Mill using blueprints, feeler gauges, and micrometers to ensure that everything would be working smoothly and to ensure the correct diameter of the finished product.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

One of my hobbies that has transferable skills is woodworking. With woodworking, being able to look at a blueprint and transform it into a creation using precision measurements and cuts to have everything line up perfectly. Sometimes along the line a wrench gets thrown into the plan and you have to get creative to adapt and overcome the problems. Also, utilizing multiple hand tools gives me a better understanding of what needs to be done on the job site.

What trades-related courses did you take in school?

Why is an apprenticeship an attractive option to you?

It gives me a sense of doing something greater, and to help people on their worst days. It also gives me a sense of stability, have a career that serves a purpose, and to learn skills that I can use in my day to day life outside of work. It also gives me a skill set to be able to help people, and being able to give back to my community when needed.

What construction software or technologies do you have training in?

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I have always be one for wanting a hands on approach to solving problems, whether they are complex or simple. I've always felt a sense of pride knowing that I helped build something that a person is able to utilize for years to come. The pipe trades has always been held a special place for me because knowing a complex system and being able to navigate it with ease makes a feeling of accomplishment feel even greater.

Welding Experience:

Tell us about any jobs where you've learned pipetrades relevant skills:

In my previous jobs, I've developed skills that directly apply to the pipe trades, including showing up on time, working long shifts, following instructions, and staying focused on safety. I've had roles that required physical work, problem-solving, and working with tools or equipment, as well as communicating with supervisors and coworkers to get the job done correctly. These experiences taught me accountability, attention to detail, and how to work as part of a team, all of which are important on a construction job site.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

In my free time, I do a lot of hands-on projects at home like assembling furniture, installing wall fixtures, and fixing things when they break instead of replacing them. I enjoy figuring out how things go together, following instructions, measuring, and making sure everything is done correctly and safely. These activities have helped me build patience, problem-solving skills, and attention to detail, which I know transfer directly to construction and trade work where accuracy, responsibility, and working with tools are important.

Add'l Details:

Why is an apprenticeship an attractive option to you?

An apprenticeship is an active option for me because I learn best by doing, not just sitting in a classroom. I like being hands-on, asking questions, and learning directly from experienced workers while actually being on the job. An apprenticeship gives me the chance to earn while I learn, build real skills, and grow into the trade the right way, which is exactly what I'm looking for in a long-term career.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

What interests me about the building trades is being able to work with my hands and actually see the results of the work I put in. I like jobs where effort matters, where you're learning something real, and where showing up and doing the work counts for something. I'm looking for a long-term career, not just another job, and the trades offer stability, structure, and the chance to build skills that will always be needed. I'm especially interested in the pipe trades because I enjoy mechanical work and problem-solving, and I like understanding how systems work and how to fix them when something goes wrong. HVAC in particular stood out to me because it's hands-on, technical, and constantly in demand. I respect the apprenticeship process and the expectations that come with it, and I'm ready to learn, work hard, and grow

Why is an apprenticeship an attractive option to you?

An apprenticeship appeals because I know there is a lot I don't know, and you have to work in the field to really learn the trade. In addition, an apprenticeship gives your mentors and co-workers time to get to know you, and time for you to learn the company's culture and the groups you work with. I'm leaning into a Union apprenticeship, as I think it will give me more access to commercial-type construction, which appeals more than working in residential. However, I'm just leaning into what I know,

What trades-related courses did you take in school?

Welding, Math-Algebra, Woodworking / Woodshop

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've worked for several years as a Firestopper in Green Bay with a lot of new construction in partnership with IEI, Shue, Boldt, and Miron most often. I made it to foreman, but got tempted to go into office work. Honestly, I miss working with my hands and need a career I can retire from. I'm just starting some classes in welding.

Why is an apprenticeship an attractive option to you?

An apprenticeship allows me to learn gradually how to properly be the best professional I can possibly be in my role and to my peers. It allows growth and opportunity to further expand on that knowledge such as becoming a journeyman or eventually a master.

What trades-related courses did you take in school?

Drafting and Design, Math-Algebra

Apprenticeships are key opportunities that help shape me or anyone really, to get started in a trade and focus on that as a career moving forward.

What construction software or technologies do you have training in?

AutoCAD, Solidworks

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

As I got older, more mature, I realized having real world skills that can benefit the community and/or my family longevity wise is better than sitting at a desk all day that doesn't contribute to anything other than a salary. I see trades as irreplaceable and also beneficial to the community paid for or not.

I currently sit at a desk and while I'll admit it was nice when I was "younger" I find my lifestyle more active and more willing to learn. I am very ambitious and will achieve my goals. I see trades as a career opportunity of growth and the ability to put back into the community.

Why is an apprenticeship an attractive option to you?

Its an attractive option because you can learn a lot from a trade from scratch and be very knowledgeable at the end. You get to work along side many professionals learning from them and not just learning the trade but the many ways you can go about getting the job done. Not just out in the field but in the classroom as well. Overall its a clear path where if you put in the work you will be very successful.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I have always been interested in the building trades since I have been in school. I always enjoyed working with my hands and being able to build things from scratch or fix things. It wasn't until I started working after high school with a paint line manufacturing company where I started doing many things. One of those things was plumbing, and up until today that's what I do the most there and I do really enjoy it. Either if it was new construction gas piping or PVC piping I really enjoy it and I always wanted to further into that specific career. I know there is a lot to learn in the plumbing trade. I do see many plumbing videos and wish I could learn that trade from the very beginning.

Add'l Details:**Why is an apprenticeship an attractive option to you?**

An apprenticeship is an attractive option to me because it allows me to earn while I learn, gaining real-world experience on the job while also developing the technical knowledge in the classroom. I like the balance of hands-on training and structured learning, and I'm motivated to prove myself both in the field and academically. An apprenticeship gives me the opportunity to build strong skills, learn from experienced tradespeople, and grow into a reliable, skilled professional over time.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've always been interested in a career in the trades because I enjoy building things and seeing tangible results from my work. Working with my hands gives me a strong sense of accomplishment, especially when a project comes together from start to finish. I also enjoy problem-solving, whether that means figuring out how to make something fit, function properly, or resolve an unexpected issue on the job.

The trades appeal to me because they combine hands-on work with critical thinking and precision. I take pride in knowing that my work contributes to something lasting and functional. Completing a job correctly and efficiently gives me great satisfaction.

No

Add'l Edu. Details:**What trades-related courses did you take in school?**

Welding, Metals

What construction software or technologies do you have training in?**Any Safety Certificates:**

First Aid / CPR

Add'l Details:**Why is an apprenticeship an attractive option to you?**

i am looking for a career that i can be proud of and keep doing until the day i retire. and i love being able to learn new skills.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've always liked working with my hands. Right now I am working as a carpentry but I am looking for more of a career. Mainly what interested me in this career is the fact my grandfather used to be a plumber and i've always wanted to do it since.

What trades-related courses did you take in school?**What construction software or technologies do you have training in?****Any Safety Certificates:****Add'l Details:****Why is an apprenticeship an attractive option to you?**

I am very intrigued by the structure of the apprenticeship program. I like how you start at the bottom as a pre apprentice and have to earn your spot to become an apprentice. I am also attracted to the year after year of progression of becoming more skilled and earning more benefits. The guarantee that you will earn your journeyman license as long as you are working hard and make progress in your skills and education is what I am so interested in.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I am very excited about how the apprenticeship program works. I am willing to work hard for my chance to earn an apprenticeship position and I like how the system works by allowing you to progress year after year. Right out of high school I decided to try attending the University of WI Platteville to become an engineer, however after one semester I decided that a traditional university was not the right path for me to follow. Now I am interested in the trades because of the structure and stability of the program.

Add'l Edu. Details:**What trades-related courses did you take in school?**

Building Trades / Construction, Math-Algebra, Math-Geometry, Drafting and Design

What construction software or technologies do you have training in?**Any Safety Certificates:**

OSHA 10

Add'l Details:**Why is an apprenticeship an attractive option to you?**

An apprenticeship is attractive to me because you get paid to learn. I also was never a big go sir in a school setting for a whole day so being able to go to school and work is really what I want and being able to do hands on learning and doing it in the real world.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

What interest me in building trades is being able to work hands on I've always been a hands on learner and worker. I always want to feel like I did something in life like driving by a building and being able to say I helped get that building up and going. I've always been good with Working with a crew and problem solving when I'm alone. I love working outside and moving around all day. I like getting my hands dirty and not afraid to work in dirty places.

Why is an apprenticeship an attractive option to you?

An apprenticeship is an attractive option to me because it offers the opportunity to earn while learning, combining hands-on experience with classroom instruction. This approach allows me to develop real-world skills under the guidance of experienced professionals while building a strong foundation in safety, technical knowledge and best practices from the start.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I am interested in a career in the building trades because I enjoy hands-on work, problem-solving and seeing real results from my efforts at the end of each day. The trades offer a stable career path, opportunities for continuous learning and the chance to develop skills that are always in demand.

Specifically, the pipe trades interest me because they combine technical knowledge with practical work. I am drawn to the precision involved in installing and maintaining piping systems, as well as the responsibility of ensuring safety, efficiency and reliability in buildings and infrastructure. I also value the strong apprenticeship training, teamwork and long-term career growth that the pipe trades provide.

Why is an apprenticeship an attractive option to you?

Well it seems to me that there is a lot of people trying to help you succeed and a structured environment which helps stay on the path to success but I also like the option that while I'm learning I'm not just learning that are putting you out in the real world environment getting you prepared for everything right away not just learning in a class, I'm somewhat mine who does best by clearing hands on so an apprenticeship really stand out to me. Being able to work on real job sites while learning the trade would help me

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Well plumbing always seemed cool and different to me because yes it's hard work but to me it seems like fun dirty work which intrigues me. But other than that iv known people that work in the trades and they all seem to push me to go in that direction but plumbing caught my eye the most., I've been interested in working with my hands and building things that matter in the world. The building trades and specifically plumbing stood out the most to me because it's not just a job, you can physically see the results of your work at the end of the day and that's something I find really satisfying. I also like the idea of learning practical skills that I can use in my day to day life. Another thing that draws me to the pipe trades is the opportunity for steady work, good pay and career growth. I'm looking for something long term where I can keep improving, take pride in my work a build a solid future for myself a I feel like this trade offers that.

Why is an apprenticeship an attractive option to you?

Because I want to learn a trade I don't want To be working these dead end jobs I have been since 2020 I feel that now I have to make a change I'm 23 now and I see a clear path ahead of me and I am pursuing it which is why I came across you guys, For me it's learning while working and making money and an apprenticeship gives me that opportunity unlike going to college to work for someone that's why I plan on going to college for trade welding technical diploma cause that's

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I'm interested in this trade because next year fall of 2026 I'm going to college to get my welding technical diploma and I want to have a job when I'm done and hopefully it benefits you guys but yeah I just want a good well paying career and I want to travel and I feel this road will help me achieve that and I'm hoping you guys are willing to take a chance on me., The building trades offer strong career opportunities, job stability, and the chance to keep learning new skills. I like that it's active work, not just sitting at a desk, and that effort and skill really matter and I plan on going to college next fall 2026 for welding and when I graduate hopefully it will benefit you guys and still have a job waiting for me when I go back cause my goal is to travel and I see a road and it's right Infront of me and with you guys I can make that become reality.

Why is an apprenticeship an attractive option to you?

An apprenticeship is an attractive option to me as I like the aspect of doing the learning, but with hands on included as well. As more of a visual learner I tend to gravitate and thrive in environments where it is balanced out. I process information at a pace that I feel like aligns with the program of an apprenticeship.

What construction software or technologies do you have training in?

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

What initially interested me in the building trades in general was not only the hands on work, but the opportunity of community. Actively getting out and serving the community is something I enjoy. I take value and pride in working hard toward overcoming challenges. Allowing my mind to learn, adapt, and solve different problems that may arise. I find that a career in the pipetrades interests me and reflects what I am looking for.

Any Safety Certificates:

OSHA 10

Welding Experience:

Flux Core - Some Knowledge, Stick - Some Knowledge

Tell us about any jobs where you've learned pipetrades relevant skills:

As a self employed carpenter, I've been around the rough framing and finishing stages of projects ranging from single family homes to 100 unit apartment buildings. I have worked in conjunction with pipe trades before, and they seem a lot happier than the electricians.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I've fixed up every home I have ever lived in, in a myriad of ways. I also have a 1981 Datsun project I have been modifying for some time. It's worth noting that my wife loves thrifting and my kid loves breaking toys, so that's brought a certain level of resourceful repair skills to the forefront in my life.

Shift Availability:

Full-time, Overtime

Post HS Education:

Some 2-year college

Add'l Edu. Details:

1 semester machining through nwtc

What trades-related courses did you take in school?

Drafting and Design, Math-Algebra, Math-Geometry, Metals, Welding, Automotive Technology, Electrical Trades / Electronics

Why is an apprenticeship an attractive option to you?

I love the idea of expanding my knowledge of building further than framing and finishing, and this seems to be the best way to do it. My ideal scenario is to be cross trained between plumbing and hvac, and to take the one year construction electrical course at night so as to be as well versed and knowledgeable for myself and my team.

What construction software or technologies do you have training in?

AutoCAD, CNC

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've become skilled carpenter, primarily in finish work, and am looking to grow my knowledge and experience while supporting my young family more reliably.

Some. I have worked for a plumber, steamfitter or HVAC/R contractor.

Years of Full-Time Work Experience: 10+

Welding Experience:

Flux Core - Some Knowledge, MIG - Some Knowledge, TIG - Some Knowledge, Stick - Some Knowledge

Tell us about any jobs where you've learned pipetrades relevant skills:

I worked for my dad when I was young teenager doing excavating, sewer and water, and operating equipment. I worked for my uncle in my later teens doing residential plumbing, Most don't care about work when your a teen but you never forget the skills, and I have done more than most full time guys ever get to. Then I became a machinist, anything to do with metal I can pretty much do it. Then I took a position as director of maintenance, gained a lot of knowledge in a short time, boilers, large hot water heaters, backflow valves, air exchangers, electrical, maintenance records

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I very much enjoy fishing, more than most, watching my son play football, my daughter play volleyball, Bow hunting, Long walks, outdoors or in the woods in any weather and I enjoy fixing, taking things apart to just clean up everything mechanically or make it work better. I feel all of these are transferable into the trades, outdoors in any weather pretty big part of the trades, fishing and hunting uses patients and being independent, and fixing things has a lot to do with the trades.

Shift Availability:

Post HS Education:

Other Relevant Courses & Certifications

Add'l Edu. Details:

I have a few certifications for machining, basically nonrelevant but two for cam software, gibbscam, and mastercam, and one

What trades-related courses did you take in school?

Why is an apprenticeship an attractive option to you?

Honestly, when I was younger it wasn't affordable to do with a stay at home wife and two young kids. Now its more manageable, I was also told I could test out of a lot of things so that's huge. Benefits are a giant plus, doing something different everyday and working outside is something Ive been wanting to do basically my whole adult life. Mostly though I enjoy doing work like this.

What construction software or technologies do you have training in?

CNC

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

A few years ago, I quit my career as a machinist of 17 years, and took a position as director of maintenance at a nursing home, It originally was an old hospital so fairly a good size building, but very old, it was heated by very old steam boilers. The building was very much pieced together, some rooms were steam, and some hydronic everything about that fascinated me enough to take a coarse in low pressure steam boilers, and it was very interesting. I fixed and maintained 90% of it on my own when I could not figure it out, a tech from tweet garrot came to the rescue watching him troubleshoot and dial everything in was interesting. Anything that keeps an industrial building working interests me, automation, hvac, plumbing even power.

Why is an apprenticeship an attractive option to you?

Did some amount of research and came to the conclusion that getting immediate hands-on-training and on-the-job experience suited me and my learning style much better than a traditional classroom or E-Learning setting.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

27, at a point in my life where I've done some serious self reflection and realized that I want a better future for myself first and possibly for someone else in the future. 3 months ago I was at the lowest possible point in my life, and after some serious soul searching and painful mistakes I wondered if something like Welding or HVAC would be up my alley, especially as someone who has never seriously put much thought or effort into long-term career prospects.

I believe I have enough mechanical aptitude, am a quick-learner, and am EXTREMELY attentive to detail and receptive to constructive criticism. Hands-on-work has always been more my thing, and I should have given it more thought sooner. Overall, I'm looking to dive into something feet-first and give it my all. Attentive, timely, and eager to adapt.

Why is an apprenticeship an attractive option to you?

An apprenticeship is attractive to me because it allows me to earn while I learn, gain hands on experience from professionals, and build a solid career without having to take the route of traditional schooling., I am looking to get my hands dirty and would really want to start as soon as possible, which this seems like the way to do that.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I was drawn to the building trades because I enjoy hands-on work and creating something lasting. Plumbing and the pipetrades interest me specifically because they're essential to every project, require problem solving and precision, and offer a career where I can keep learning while making a real impact., I've always been really interested in installing and building, and have recently been enjoying troubleshooting, I also have a buddy in the union and he tells me all about it.

Why is an apprenticeship an attractive option to you?

The ability to learn while working on the job, An apprenticeship is attractive to me because it lets me learn while I'm actually working in the field instead of just sitting in a classroom. I like the idea of getting paid to build real skills and see how things are done on real job sites. It feels like a more direct way to start a career and figure things out as I go.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I have a very strong interest in the pipe trades because it is a very hands on job and I am a person who likes to work with hands., I'm interested in the building trades because I like working with my hands and being able to see the work I've done at the end of the day. I also like learning real skills and working on a team.

Why is an apprenticeship an attractive option to you?

I want to find a new career and plumbing was what drew my interest and I know for a fact I want to do it. It's challenging which is what I like. It allows me to be in different jobs and doesn't seem repetitive like a factory job would be. The benefits package that union offers is unmatched. In the economy that we live in, the wage is very attractive.

I'm looking for a long lasting career that will allow me to do my own side gigs and do

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I want to learn a trade where I can work as a builders trade and/or work as an on call plumber. I want to step away from the factory setting because it is too repetitive for me and seems to always be a dead end career for the most part. I am currently a welder and I've been looking to grow away from that full time and challenge myself to learn something new and challenging and at the same time make more money.

I a. Still willing to put into use my welding abilities if it calls for it in plumbing but would also like to learn something that will allow me to do side gigs and do my own projects/repairs on my own property. Plumbers seem to be in demand and make a good amount of money without putting at risk my health like a career in welding would normally do. I want to challenge myself with this new career., Looking for a rewarding carreer where I'm not stuck in a factory doing the same thing all day. I graduated Itc from welding school and have experience in welding but I wanna learn more I wanna learn a

Why is an apprenticeship an attractive option to you?

Get paid while I learn and the benefits that it will provide for my future, An apprenticeship is attractive to me because it lets me earn a living while learning a skilled trade the right way, instead of taking shortcuts or just guessing in the field. I learn best by doing the work hands-on alongside experienced journeymen who know the trade and can pass that knowledge down. The combination of classroom training and real jobsite experience makes sense to me, and I respect that the apprenticeship holds people to a

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

what interest me in a career in the pipe trades is the benefits, and I have always enjoyed constructing things and welding, I want to get into HVAC because I like working with my hands and fixing real problems, not sitting behind a desk. I've always been the type of person who wants to understand how things work and why they fail, and HVAC is a trade where you're constantly troubleshooting mechanical and electrical systems that people depend on every day. I enjoy physical work, using tools, and taking something that isn't working and making it right again. In a place like Wisconsin, heating and cooling isn't a luxury — it's a necessity — and I take pride in the idea of doing work that keeps people safe and comfortable.

Why is an apprenticeship an attractive option to you?

I've never done well in a classroom only environment. In high school my favorite classes were machine tool, welding, and wood working. I learn so much better in a hands-on setting.

I'm also tired of just working "jobs". I want a career. And the "earn as you learn" format of a apprenticeship work perfectly for my family and I. I don't have the knowledge or

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Throughout my years working for Disney I've spoken to many individuals in the Engineering department that work for a variety of trades. My current job can be very monotonous and unfulfilling. I've been interested in pursuing an apprenticeship in the pipetrades because I would prefer to have a more hands-on career. Unfortunately with the low union pay in Florida and extremely high cost of living, I cannot afford to lose my current job.

My wife and I are planning to move to Wisconsin next year. My goal is to start a career journey that allows me to provide a comfortable life for my family., I'm looking for steady, hands-on work where I can build something real and take care of my family. I want to learn a trade, get better at it, and earn my way up.

The pipetrades stand out because it's solid essential work that's always needed I like
