# Pre-Apprentice Candidate Pipefolio

**Disciplines of Interest:** Plumber, Pipe Fabricator, Steamfitter (Pipefitter)

**Work Zones in Preference Order:** Fond du Lac Area (Orange)

**Relevant Experience Level:** A little. No specific trade experience, but I have general skills in construction or welding.

**Years of Full-Time Work Experience:** 10+

**Welding Experience:** MIG - Some Knowledge, Stick - Some Knowledge

**Tell us about any jobs where you've learned pipetrades relevant skills:**

For the better part of a decade I worked in the agriculture repair sector. And that required a lot of thinking on your feet and fabrication skills.

**Tell us about any hobbies that have boosted pipetrade-relevant skills:**

I currently race a legend car. It has taught me alot on teamwork and sometimes it doesn't always go right and you can't just give up and throw in the towel. You have to keep plugging along until you can make something of it.

**Shift Availability:** Full-time, 1st Shift (Days), Overtime, Weekends

**Post HS Education:** Associate Degree, Some 2-year college

**Add'l Edu. Details:** Agricultural Equipment Service Tech, And Currently A Licensed Teacher In Wi, For technology education.

**What trades-related courses did you take in school?**

Woodworking / Woodshop, Metals, Welding

**What construction software or technologies do you have training in?**

Solidworks

**Any Safety Certificates:**

**Add'l Details:**

**Why is an apprenticeship an attractive option to you?**

Paid to learn how to make a difference and no day is always the same, lots of variety in the trades.

**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

The ability to help people and earn while you learn was a big draw for me. I come from a vast experience set. I worked in the Agriculture repair sector for the better part of ten years, then I ventured into education for a brief stint as a solution to a labor shortage. While in education I was a tech ed teacher and was pushing my students to consider the trades, After a few unsuccessful try's at continuing to become a educator, I decided to take my own advice and pursue another trade.

# Pre-Apprentice Candidate Pipefolio

**Disciplines of Interest:** Steamfitter (Pipefitter), Pipe Fabricator, HVAC/R Service Tech

**Work Zones in Preference Order:** Fond du Lac Area (Orange)

**Relevant Experience Level:** A little. No specific trade experience, but I have general skills in construction or welding.

**Years of Full-Time Work Experience:** 10+

**Welding Experience:** MIG - Some Knowledge

**Tell us about any jobs where you've learned pipetrades relevant skills:**

Ive never held a job that was dedicated to pipe welding. But at my last job, I did have to make structural pieces often using pipe.

**Tell us about any hobbies that have boosted pipetrade-relevant skills:**

I like to make model cars and engines, puzzles, sports, all of my own mechanic work on my vehicles. Its made me more mechanically inclined, logical, dexetrous hands,and I like to keep my mind sharp.

**Shift Availability:** Full-time, 1st Shift (Days)

**Post HS Education:** Other Relevant Courses & Certifications

**Add'l Edu. Details:** Welding and blueprint reading courses back in 2010.

**What trades-related courses did you take in school?**

Math-Algebra, Metals, Welding

**What construction software or technologies do you have training in?**

Solidworks

**Any Safety Certificates:** First Aid / CPR

**Add'l Details:**

**Why is an apprenticeship an attractive option to you?**

I view it as the next step to progress my career and goals. Ive done most of what I can in shops, I want to learn something new and challenging.

**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

I love welding, have done it for many years. Ive done construction in both electrical and ironworker in a shop. Personally, im tired of working in shops, where youre just another number.

I feel like I've done most of what I can in a shop setting, and now I want to expand my knowledge and branch out to a more difficult side of welding. And earn a better wage for the future of my family.

# Pre-Apprentice Candidate Pipefolio

**Disciplines of Interest:** Steamfitter (Pipefitter)

**Work Zones in Preference Order:** Appleton Area (Green)

**Relevant Experience Level:** A little. No specific trade experience, but I have general skills in construction or welding.

**Years of Full-Time Work Experience:**

**Welding Experience:**

**Tell us about any jobs where you've learned pipetrades relevant skills:**

None

**Tell us about any hobbies that have boosted pipetrade-relevant skills:**

I don't know if I have any that would be directly transferrable. I enjoy working on cars and do some recreational gun building

**Shift Availability:**

**Post HS Education:** No

**Add'l Edu. Details:**

**What trades-related courses did you take in school?**

**Why is an apprenticeship an attractive option to you?**

It gives me the opportunity to get into a trade while also being able to work.

**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

The process of building/creating something new is something I've always enjoyed

**What construction software or technologies do you have training in?**

**Any Safety Certificates:**

**Add'l Details:**

**Contact Information:**

To speak with candidate #8208574, access your Candidate Request Tool at https://pipetradecareers.com/contractors/candidates/WI400

# Pre-Apprentice Candidate Pipefolio

**Disciplines of Interest:** Plumber, Steamfitter (Pipefitter)

**Work Zones in Preference Order:** Fond du Lac Area (Orange), Appleton Area (Green)

**Relevant Experience Level:** Some. I have worked for a plumber, steamfitter or HVAC/R contractor.

**Years of Full-Time Work Experience:** 10+

**Welding Experience:**

**Tell us about any jobs where you've learned pipetrades relevant skills:**

Working for my father for 15+ years.

**Tell us about any hobbies that have boosted pipetrade-relevant skills:**

I grew up working with my dad who is skilled in plumbing, electrical, and carpentry. I live on a farm currently and I enjoy improving property by building things needed for myself and my animals.

**Shift Availability:** Full-time, 1st Shift (Days)

**Post HS Education:** Bachelor Degree

**Add'l Edu. Details:** B.S. Business management

**What trades-related courses did you take in school?**

Math-Algebra, Math-Geometry, Math-Precalculus / Trigonometry, Math-Calculus

**What construction software or technologies do you have training in?**

Laser Scanning

**Any Safety Certificates:** First Aid / CPR

**Add'l Details:** Veteran

**Why is an apprenticeship an attractive option to you?**

I want to jump into the trades feet first and get started on the rest of my life. I have a family to provide for so I do not want to be a "helper" for an unknown amount of time where I won't be working toward completing apprentice hours.

I have a strong urge to continue to work on myself and improve my skills as well as help those around me improve.

**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

I enjoy creating things and I find satisfaction being able to do things myself instead of relying on other people.

# Pre-Apprentice Candidate Pipefolio

**Disciplines of Interest:** Steamfitter (Pipefitter), Pipe Fabricator

**Work Zones in Preference Order:** Appleton Area (Green), Green Bay Area (Yellow)

**Relevant Experience Level:** None. Nothing even close-but I'm a hard worker and willing to learn!

**Years of Full-Time Work Experience:** 4-6

**Welding Experience:**

**Tell us about any jobs where you've learned pipetrades relevant skills:**

All of my working experience has been in kitchens and casinos and I believe the problem solving skills would be the most transferable.

**Tell us about any hobbies that have boosted pipetrade-relevant skills:**

I don't currently have any hobbies that I think could transfer over to the trades. I'm willing to learn anything that I can and work towards any goal I have in mind.

**Shift Availability:** Full-time, Overtime, Weekends, 1st Shift (Days), 2nd Shift (Nights)

**Post HS Education:** Some 2-year college

**Add'l Edu. Details:**

**What trades-related courses did you take in school?**

**What construction software or technologies do you have training in?**

**Any Safety Certificates:**

**Add'l Details:**

**Why is an apprenticeship an attractive option to you?**

It's an attractive option for me because of the fact that you can get paid to learn about the field that I am working towards.

**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

I recently developed an interest in the pipe trades during my stint in college. I have been working as a table games dealer in Iowa and came to the realization that I want to do something that I could be proud of.

I've always been a very hands on person. I started researching career paths for me and I landed on the pipe trade after talking about it with a few friends and it seemed like a great choice. Being able to see my work completed in front of me sounds amazing.

# Pre-Apprentice Candidate Pipefolio

**Disciplines of Interest:** Steamfitter (Pipefitter)

**Work Zones in Preference Order:** Appleton Area (Green)

**Relevant Experience Level:** Some. I have worked for a plumber, steamfitter or HVAC/R contractor.

**Years of Full-Time Work Experience:** 1-3

**Welding Experience:** Stick - Some Knowledge

**Tell us about any jobs where you've learned pipetrades relevant skills:**

I previously worked as a pre-apprentice at an HVAC contractor, where I assisted journeymen with repairing and diagnosing HVAC equipment. In this role, I gained hands-on experience working with mechanical systems, learning how to troubleshoot issues, identify faulty components, and understand how different parts of heating and cooling systems function together. I was exposed to tools, equipment, and safety procedures used in the trade, which helped me build a strong foundation in working safely and efficiently in a technical environment.

**Tell us about any hobbies that have boosted pipetrade-relevant skills:**

I like to in my free time work on my car so some experience with tools helps in the trades

**Shift Availability:** Full-time

**Post HS Education:** Other Relevant Courses & Certifications

**Add'l Edu. Details:** I went to a technical school for hvac did 1 semester I have my universal epa. Learned alot of basic HVAC

**What trades-related courses did you take in school?**

Woodworking / Woodshop, Electrical Trades / Electronics, Math-Algebra, Metals, Welding

**What construction software or technologies do you have training in?**

AutoCAD

**Any Safety Certificates:**

**Add'l Details:**

**Why is an apprenticeship an attractive option to you?**

An apprenticeship is an attractive option to me because it combines hands-on, real-world experience with structured learning. Instead of only studying concepts in a classroom, I would have the opportunity to apply skills directly in a professional environment, which helps me understand how things actually work in practice.Another reason I find an apprenticeship appealing is that it provides a clear pathway into a skilled profession while I continue to grow. Being able to earn while I learn makes it a practical option, but

**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

I don't like working behind a desk and take pride in my work and I feel like the trades are very rewarding if you work hard. I got interested in highschool.

# Pre-Apprentice Candidate Pipefolio

**Disciplines of Interest:** Steamfitter (Pipefitter)

**Work Zones in Preference Order:** Green Bay Area (Yellow)

**Relevant Experience Level:** None. Nothing even close-but I'm a hard worker and willing to learn!

**Years of Full-Time Work Experience:**

**Welding Experience:** Flux Core- Skilled, MIG - Skilled, TIG - Skilled, Stick - Some Knowledge

**Tell us about any jobs where you've learned pipetrades relevant skills:**

The only job that was close enough to the pipe trades was HVAC. My dad owns his own business and i workout with him sometimes.

**Tell us about any hobbies that have boosted pipetrade-relevant skills:**

In my free time, I like to workout. This helps with welding because if I have to hold my arm in a position it doesn't get tired as easily. That activity has helped me build a good mentality and has helped me with being more patient and help me be all around strong hands on my skills.

**Shift Availability:**

**Post HS Education:** No, Other Relevant Courses & Certifications

**Add'l Edu. Details:**

**What trades-related courses did you take in school?**

Math-Algebra, Math-Geometry, Welding, Metals, Drafting and Design

**What construction software or technologies do you have training in?**

**Any Safety Certificates:** First Aid / CPR

**Add'l Details:**

**Why is an apprenticeship an attractive option to you?**

Well to get a appreciation ship at local 400 i gotta earn it. But an apprenticeship would help with everything. Not only do i get to work with other experienced people but i get to learn more and more everyday.

**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

In high school i got into welding. When i graduated i took off to NWTC and have been building my dream to become a welder ever since.

# Pre-Apprentice Candidate Pipefolio

**Disciplines of Interest:** Pipe Fabricator, Steamfitter (Pipefitter)

**Work Zones in Preference Order:** Fond du Lac Area (Orange), Appleton Area (Green)

**Relevant Experience Level:** A little. No specific trade experience, but I have general skills in construction or welding.

**Years of Full-Time Work Experience:** 4-6

**Welding Experience:** TIG - Some Knowledge, Stick - Some Knowledge

**Tell us about any jobs where you've learned pipetrades relevant skills:**

Not much experience working in places where pipe trades were used.

**Tell us about any hobbies that have boosted pipetrade-relevant skills:**

I really enjoy working on my truck and cars in general, I'd say I'm fairly mechanically inclined and understand how things work pretty easily. I think understanding how things move, fit and work together is a great skill to have as a welder or a fitter in the pipe trades. I enjoy fixing things and would say I'm a pretty good problem solver when things don't exactly go right the first time.

**Shift Availability:** Full-time, Part-time, Overtime, 1st Shift (Days), Weekends, 2nd Shift (Nights)

**Post HS Education:** Associate Degree

**Add'l Edu. Details:** I have an associates degree in welding, I've taken fabrication classes, I've taken classes on mig, tig, and stick. I'd say I

**What trades-related courses did you take in school?**

Welding, Metals, Math-Algebra, Engineering, Math-Geometry, Automotive Technology, Building Trades / Construction, Math-Precalculus / Trigonometry, Woodworking / Woodshop

**What construction software or technologies do you have training in?**

Solidworks

**Any Safety Certificates:** OSHA 10

**Add'l Details:**

**Why is an apprenticeship an attractive option to you?**

Well I'm a first generation welder so don't know too much about how to get into the pipe industry so I thought an apprenticeship is a good way to get my foot in the door.

**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

Well I took a welding class in high school and I really enjoyed it. I never really knew what I wanted to do for a living, gave college a try but it wasn't it so I went to a community college for welding and got an associates degree in it so I have some experience but no real work experience. I thought a union apprenticeship would be a great place to start and learn even more while making money. I've seen pipe welding and pipe fitting all over the place I have a little experience in it but I've really enjoyed the challenge of it.

# Pre-Apprentice Candidate Pipefolio

**Disciplines of Interest:** Pipe Fabricator, Steamfitter (Pipefitter)

**Work Zones in Preference Order:** Green Bay Area (Yellow)

**Relevant Experience Level:** Some. I have worked for a plumber, steamfitter or HVAC/R contractor.

**Years of Full-Time Work Experience:** 7-9

**Welding Experience:** Flux Core- Skilled, MIG - Some Knowledge, Stick - Some Knowledge

**Tell us about any jobs where you've learned pipetrades relevant skills:**

Working out one pack of foundry, I became particularly skilled in hand tools like dye grinders and angle grinders. Along with working at a structural shipyard, it became experienced in flux cord to arc welding 23 and 4G and the NAVSEA seam test

**Tell us about any hobbies that have boosted pipetrade-relevant skills:**

Like to stay active and outside with my kids and they keep me young so I'm not so sore after work. A lot more work related note I like to try and create little projects in my garage.

**Shift Availability:** Overtime, Weekends, 2nd Shift (Nights), 1st Shift (Days), Full-time

**Post HS Education:** Other Relevant Courses & Certifications

**Add'l Edu. Details:** 16 month welding apprentice Fcaw and Gmpaw

**What trades-related courses did you take in school?**

Welding

**What construction software or technologies do you have training in?**

AutoCAD

**Any Safety Certificates:** OSHA 10

**Add'l Details:** Veteran

**Why is an apprenticeship an attractive option to you?**

Gives you more opportunities to learn on the job rather than going to school and being expected to know everything once you get out.

**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

I'm currently in an apprenticeship for Finn Katagiri, Marinette Marine welding structural steel with FCAW. I want to further my knowledge and become more experienced in the welding trade. I like to study all types of welding and different processes.

**Add'l Details:**

**Why is an apprenticeship an attractive option to you?**

An apprenticeship is attractive to me because I can earn while I learn and gain real hands-on experience instead of just classroom knowledge. I like the idea of learning and building skills on the job.

**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

I'm interested in the trades because I like hands-on work and being able to see the results of what I do. I enjoy solving problems and working on projects that have a real purpose. Pipe trades stand out because it's not just physical work but you have to understand how systems work . It seems like a stable career that I can grow and take pride in my work.

# Pre-Apprentice Candidate Pipefolio

**Disciplines of Interest:** HVAC/R Service Tech, Steamfitter (Pipefitter)

**Work Zones in Preference Order:** Green Bay Area (Yellow), Appleton Area (Green)

**Relevant Experience Level:** A little. No specific trade experience, but I have general skills in construction or welding.

**Years of Full-Time Work Experience:**

**Welding Experience:**

**Tell us about any jobs where you've learned pipetrades relevant skills:**

In my current job, I work with ammonia refrigeration and HVAC systems, where I help maintain equipment and work around piping systems while following strict safety procedures. This has helped me develop skills in troubleshooting, using tools, and understanding how mechanical systems operate.

Along with my MIG welding certification, I've built a strong hands-on foundation that applies directly to the pipe trades.

**Tell us about any hobbies that have boosted pipetrade-relevant skills:**

One of my main hobbies is working on hands-on projects, like fixing things, doing small repairs, and improving spaces at home. I also enjoy activities like fishing and working with tools, which require patience, focus, and attention to detail.

These hobbies have helped me develop skills that transfer well into the construction trades, such as problem-solving, mechanical thinking, and working safely with tools. They've also taught me the importance of being consistent, staying focused on a task, and

**Shift Availability:**

**Post HS Education:** Other Relevant Courses & Certifications

**Add'l Edu. Details:** I have a MIG welding certification and hands-on experience working with ammonia refrigeration and HVAC systems,

**What trades-related courses did you take in school?**

Welding

**What construction software or technologies do you have training in?**

**Any Safety Certificates:**

**Add'l Details:**

**Why is an apprenticeship an attractive option to you?**

An apprenticeship is attractive to me because it offers the opportunity to earn while learning and gain real hands-on experience in the field. I value being able to develop practical skills under the guidance of experienced professionals while building a strong foundation in the trade.

It also provides a clear path for long-term career growth, allowing me to continuously

**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

I've always been interested in hands-on work and understanding how mechanical systems function. My experience working with refrigeration and HVAC systems has shown me how important skilled trades are in keeping operations running efficiently and safely.

The building trades offer a stable career where I can continue learning and improving my skills. I'm especially interested in the pipetrades because they relate directly to systems I already have experience with, like piping, heating, and cooling. I enjoy working with tools, solving problems, and being part of a team that builds and maintains essential systems.

# Pre-Apprentice Candidate Pipefolio

**Disciplines of Interest:** Steamfitter (Pipefitter)

**Work Zones in Preference Order:** Appleton Area (Green)

**Relevant Experience Level:** A little. No specific trade experience, but I have general skills in construction or welding.

**Years of Full-Time Work Experience:** 0

**Welding Experience:** MIG - Skilled, Flux Core- Skilled, TIG - Skilled, Stick - Skilled

**Tell us about any jobs where you've learned pipetrades relevant skills:**

So far, just my training in school at NWTC

**Tell us about any hobbies that have boosted pipetrade-relevant skills:**

I like to learn a lot from many things as I can and I believe that will transfer to the trades and make me the best at what I do

**Shift Availability:** Full-time, Overtime, Weekends

**Post HS Education:** Other Relevant Courses & Certifications

**Add'l Edu. Details:** I will receive my technical diploma in welding from NWTC in May

**What trades-related courses did you take in school?**

Math-Algebra, Math-Calculus, Welding, Math-Geometry, Metals

**What construction software or technologies do you have training in?**

**Any Safety Certificates:**

**Add'l Details:**

**Why is an apprenticeship an attractive option to you?**

Learn while working while getting paid at the same time

**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

This career interested me because I believe the pipetrades have great opportunity to grow as a career and also a helpful person in society. I can work in big projects and I believe that having this knowledge can also open doors for me to make my own business later on down the line.

# Pre-Apprentice Candidate Pipefolio

**Disciplines of Interest:** Plumber, Steamfitter (Pipefitter), HVAC/R Service Tech, Pipe Fabricator

**Work Zones in Preference Order:** Green Bay Area (Yellow)

**Relevant Experience Level:** A little. No specific trade experience, but I have general skills in construction or welding.

**Years of Full-Time Work Experience:** 1-3

**Welding Experience:**

**Tell us about any jobs where you've learned pipetrades relevant skills:**

I've learned team working skills at green bay packaging as well as at Laforce , i also learned communication skills, leadership skills , translation skills since i am bilingual , ability to follow instructions and read small blueprints/ work orders . At Laforce I learned more welding skills, grinding skills and many more

**Tell us about any hobbies that have boosted pipetrade-relevant skills:**

Well I love to watch football and always interested in learning more about new things to like power tools, welding skills, sometimes at work when I want to learn new things i do it and i always ask others for advice towards my welding career. The sky's the limit for me , i have team working skills, communication skills, I'm bilingual, hard worker , eager to learn more

**Shift Availability:** Full-time, Part-time, Overtime, 1st Shift (Days), Weekends

**Post HS Education:** No

**Add'l Edu. Details:**

**What trades-related courses did you take in school?**

Automotive Technology, Building Trades / Construction, Math-Algebra, Math-Geometry, Welding

**What construction software or technologies do you have training in?**

AutoCAD

**Any Safety Certificates:**

**Add'l Details:**

**Why is an apprenticeship an attractive option to you?**

Well because i've had apprenticeships before and they are such an amazing opportunity for me to learn new things such as welding trade as well as getting paid to learn and doing what i love such as welding, what more could i ask for! I think it's an attractive option to me because in the union and trade industry the opportunities are endless and you always have room to expand and grow no matter what.

**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

Honestly 2 years ago i didn't have an interest in welding but for my senior year of high school i took a welding class , and i thought "great another pointless class for me" but not even a month in i fell inlove with the trade . The patience and the results of my welds made me love it even more, it's calm and easy to do for me

# Pre-Apprentice Candidate Pipefolio

**Disciplines of Interest:** Steamfitter (Pipefitter)

**Work Zones in Preference Order:** Appleton Area (Green), Green Bay Area (Yellow)

**Relevant Experience Level:** A little. No specific trade experience, but I have general skills in construction or welding.

**Years of Full-Time Work Experience:** 10+

**Welding Experience:** Stick - Some Knowledge

**Tell us about any jobs where you've learned pipetrades relevant skills:**

Well, Switchgear Power Systems has been very informative regarding how to problem solve issues with parts, using different tools and equipment of all different sizes and strength, along with patience to sit and understand a problem and how to determine the best solution.

**Tell us about any hobbies that have boosted pipetrade-relevant skills:**

I currently work two full time jobs. I think my first job, a therapist, helps with the people skills I may need when dealing with employers and customers. My second job as a mechanical assembler at Switchgear Power Systems allows me to gain experience working on systems and having to problem solve and find creative solutions.

**Shift Availability:** Full-time, Overtime, Weekends, 1st Shift (Days), 2nd Shift (Nights)

**Post HS Education:** Bachelor Degree

**Add'l Edu. Details:** I have a masters degree in Clinical Mental Health.

**What trades-related courses did you take in school?**

**What construction software or technologies do you have training in?**

**Any Safety Certificates:**

**Add'l Details:**

**Why is an apprenticeship an attractive option to you?**

I think the main reason why the apprenticeship is attractive to me is due to the fact I think I can find self satisfaction in working with my
Hands on large scale projects. I am learning to follow my gut instinct more and want to be able to give myself the opportunity to switch careers and do something that brings me joy.

**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

I originally wanted to join a trade because I enjoyed problem solving and working with my hands. Unfortunately, I listened to other people and went a different route. However, I've come to realize that I need to do the things I want to do and am interested in. I've been reading about steamfitters and I think I would enjoy the challenge and find satisfaction in the work.

# Pre-Apprentice Candidate Pipefolio

**Disciplines of Interest:** Steamfitter (Pipefitter)

**Work Zones in Preference Order:** Green Bay Area (Yellow)

**Relevant Experience Level:** None. Nothing even close-but I'm a hard worker and willing to learn!

**Years of Full-Time Work Experience:** 4-6

**Welding Experience:**

**Tell us about any jobs where you've learned pipetrades relevant skills:**

Not many of my jobs have been applicable to the pipe trades I don't think. I have worked in the industrial industry for a bit now, warehouse, receiving, and factory work. I've been taught to manage pressure that comes from work, I've learned a lot of problem solving skills due to lack of manpower or material.

A lot of team building with switching from warehouse to factory line, learning the ways things work in the factory was newer to me about 2 years ago, but in two days I was

**Tell us about any hobbies that have boosted pipetrade-relevant skills:**

I do stay active on my days off, I do play a bit of video games, there is this factory builder where you're managing overall efficiency, calculating numbers to make sure it operates smoothly. I do home workouts as well just to stay active, to keep the muscle I have and build more.

I tend to help my grandparents out with building projects they have at their house, wether it may be making a new planter pot site, or making a wheelchair ramp for my

**Shift Availability:** Full-time, Part-time, Overtime

**Post HS Education:** No

**Add'l Edu. Details:**

**What trades-related courses did you take in school?**

Math-Algebra, Math-Geometry, Math-Precalculus / Trigonometry, Math-Calculus

**What construction software or technologies do you have training in?**

**Any Safety Certificates:**

**Add'l Details:**

**Why is an apprenticeship an attractive option to you?**

Apprenticeships have always intrigued me, as well as the trades. While going through school and working at some other jobs a lot of the 'recourses' they give you to do your job were digital, I'm much more of a hands on learner.

I've talked with some people about the trades and they have recommended me just based of the work ethic I have, the willingness to learn and grow, and my overall attitude when

**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

After high school I jumped right into work, due to moving farther north. As I worked the last couple of years I've been wanting to come back into the schooling side of work and be able to learn something new and broaden my knowledge and skills.

With the job I'm at now they offer little to no chances to move up, and learn, and expand your skill sets. I'm soon going to be moving and have been thinking of finding something new, that's going to keep me learning.

**Disciplines of Interest:** Steamfitter (Pipefitter), Pipe Fabricator

**Work Zones in Preference Order:** Green Bay Area (Yellow)

**Relevant Experience Level:** Some. I have worked for a plumber, steamfitter or HVAC/R contractor.

**Years of Full-Time Work Experience:** 4-6

**Welding Experience:** Stick - Some Knowledge

**Tell us about any jobs where you've learned pipetrades relevant skills:**

I have been a laborer for a roofing company for several years, contracted labor work and operating for Eagle Mine near the Big Bay Mi side, was a supervisor at a lentil plant in North Dakota. During my years of roofing I have taken apart roofs completely from the 2x6 beams to the cap tacked in when I am finished. I did many things while I was helping out at Eagle, I was spraying chemicals to keep dust down, helping lay pipe across new ground, operating loaders, skidsteers, telehandlers. In North Dakota I ran a group of six guys that would bag, pack, load then ship the seed

**Tell us about any hobbies that have boosted pipetrade-relevant skills:**

I love to bow hunt, I climb up and down trees all day to cut limbs, set stands, saddles, cameras, etc. Working in tight spaces with limited movement.

**Shift Availability:** Full-time, 1st Shift (Days), 2nd Shift (Nights), Overtime, Weekends

**Post HS Education:** Other Relevant Courses & Certifications

**Add'l Edu. Details:** Certifications in Forklift, industrial sized saws, cpr and a few other non-applicable certifications from my current career. I

**What trades-related courses did you take in school?**

Building Trades / Construction, Math-Algebra, Math-Geometry, Woodworking / Woodshop

**What construction software or technologies do you have training in?**

**Any Safety Certificates:** First Aid / CPR, OSHA 10

**Add'l Details:**

**Why is an apprenticeship an attractive option to you?**

This will be the start to my career. Everything it offers is what I am looking for. The pay is attractive, days off to do things, having likeminded individuals to interact with every day, new skill to pick up and master eventually. I love challenges and ways to problem solve them. I also enjoy travelling and see things so if in the future If the oppertunity comes to move around to different jobs I would enjoy it.

**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

My friend that is currently employed with your company has said nothing but great things about the pay, benefits, and scheduling. I have worked in construction and operating machinery since high school but have been in law enforcement for four years now and would love to get back to working with my hands. The days go by faster, the pay is better, I can stay on my feet and active which is what I am looking for. I do not have much experience welding pipe, but I would love to learn. I am 24 years old, reside in Menominee, MI. I originally moved here from Marquette MI. I am a hard worker and love to learn new things. I can commute however far it is to help me learn this skill and advance. Thank you for reading and considering me for an apprenticeship.

# Pre-Apprentice Candidate Pipefolio

**Disciplines of Interest:** Pipe Fabricator, Steamfitter (Pipefitter)

**Work Zones in Preference Order:** Appleton Area (Green), Fond du Lac Area (Orange)

**Relevant Experience Level:** A little. No specific trade experience, but I have general skills in construction or welding.

**Years of Full-Time Work Experience:** 1-3

**Welding Experience:** Flux Core - Some Knowledge, MIG - Skilled, Stick - Some Knowledge

**Tell us about any jobs where you've learned pipetrades relevant skills:**

I currently work at Oshkosh defense doing hardwire MIG, I've had to use both regular steel wire along with stainless wire.

**Tell us about any hobbies that have boosted pipetrade-relevant skills:**

I like to work on cars and there's some welding to be done there such as exhausts that carry similarity to pipe welding, but it also has other skills like schematics and blueprint reading that o often refer to.

**Shift Availability:** Full-time

**Post HS Education:** Other Relevant Courses & Certifications

**Add'l Edu. Details:** Not much of a degree but, FVTC Basic GMAW Welding certification from my current job

**What trades-related courses did you take in school?**

Welding, Drafting and Design

**What construction software or technologies do you have training in?**

AutoCAD, Inventor

**Any Safety Certificates:**

**Add'l Details:**

**Why is an apprenticeship an attractive option to you?**

I would like to go into this apprenticeship because I know that I've just touched the tip of the iceberg and there's a lot more to get to know besides just making stringers look clean. I know that a lot of the senior people can teach me better than anything.

**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

What interests me in the pipe trades is the welding and the necessity of the job. I see welding as a form of art and try to make my beads look the best that I can. Welding is also critical to all of our infrastructure and AI isn't taking away the trades anytime soon.

# Pre-Apprentice Candidate Pipefolio

**Disciplines of Interest:** HVAC/R Service Tech, Plumber, Steamfitter (Pipefitter), Pipe Fabricator

**Work Zones in Preference Order:** Appleton Area (Green)

**Relevant Experience Level:** A little. No specific trade experience, but I have general skills in construction or welding.

**Years of Full-Time Work Experience:** 4-6

**Welding Experience:** Flux Core - Some Knowledge, MIG - Some Knowledge, TIG - Some Knowledge, Stick - Some Knowledge

**Tell us about any jobs where you've learned pipetrades relevant skills:**

My first Job was at A to Z Machine. At this job I would machine and weld parts. The welding and metal fabrication would help with pipe welding and threading. I would also have to measure and inspect parts we made.
Also at Jets Pizza I learned a lot of communication skills that would help with any job. I've worked with distributors, and customers. I've learned how to relay important information to finish the job, and what needs to get done between coworkers. I've managed to communicate across to different shifts with work that needs to be done.

**Tell us about any hobbies that have boosted pipetrade-relevant skills:**

Some of my hobbies involve music and home renovation projects. I play trombone, and to play trombone it requires a lot of hand eye coordination and ability to read sheet music. Hand eye coordination and reading are both important skills to have while working with tools.
Home renovation has a lot of skills that transfer to the trades. I've worked a ton with power tools and hand tools. I've pulled wires through walls, framed rooms, replaced doors, floors, outlets and more. In the trades I'll be working with a ton of tools, and all the

**Shift Availability:** 1st Shift (Days), 2nd Shift (Nights), Weekends, Full-time, Overtime, Part-time

**Post HS Education:** Some 2-year college

**Add'l Edu. Details:** I have certificates related to electricial engineering. I've taken classes using PLCS, programming, AC and DC Circuits. I'm one

**What trades-related courses did you take in school?**

Electrical Trades / Electronics, Drafting and Design, Math-Precalculus / Trigonometry, Metals

**What construction software or technologies do you have training in?**

AutoCAD, CNC, Inventor, Solidworks

**Any Safety Certificates:**

**Add'l Details:**

**Why is an apprenticeship an attractive option to you?**

An apprenticeship is an attractive option to me because it's an education without the debt. School cost a lot of money, on top of taking up a ton of time where I don't get paid. An apprenticeship would allow me to make money, get an education, and work experience. An apprenticeship would also allow me to build a successful career while gaining the required skills.

**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

The thing that interest me in the trades is the apprenticeship program. I want to learn and pursue an education, wether it's a journey man card or degree, without the debt and being able to build on the skills I learn while I work. I also enjoy the hands on work of welding/ construction.
I don't know a ton about the pipe trades. I decided to look into them since I have experience with metal fabrication, and some experience with construction.

# Pre-Apprentice Candidate Pipefolio

**Disciplines of Interest:** Steamfitter (Pipefitter), Pipe Fabricator

**Work Zones in Preference Order:** Fond du Lac Area (Orange)

**Relevant Experience Level:** A little. No specific trade experience, but I have general skills in construction or welding.

**Years of Full-Time Work Experience:** 4-6

**Welding Experience:** Flux Core - Some Knowledge, MIG - Some Knowledge, TIG - Some Knowledge, Stick - Some Knowledge

**Tell us about any jobs where you've learned pipetrades relevant skills:**

My background is mostly in the restaurant industry, but I have learned valuable skills in teamwork, hard work, and deadlines. In those jobs, I dealt with algebra and other related math applications. I have also learned valuable people and teamwork skills.

**Tell us about any hobbies that have boosted pipetrade-relevant skills:**

I love to hike, fish, and hunt. I think all those skills transfer to the trades, as with hiking and hunting, I am used to hard conditions and perseverance. Also, that being said, I do not mind being dirty or working hard to obtain something I want.

**Shift Availability:** Full-time, 1st Shift (Days), 2nd Shift (Nights)

**Post HS Education:** Other Relevant Courses & Certifications, Some 4-year college

**Add'l Edu. Details:** CPR, Intro to Pipe welding, Advance Pipe 1, Industrial Measurement and Prints, Multi-positional welding 1 &2, Intro to

**What trades-related courses did you take in school?**

Math-Algebra, Welding, Math-Geometry, Math-Precalculus / Trigonometry

**What construction software or technologies do you have training in?**

AutoCAD

**Any Safety Certificates:** First Aid / CPR

**Add'l Details:**

**Why is an apprenticeship an attractive option to you?**

I have learned a lot in school but want to define my skills. I like the idea of learning more about steamfitting/ pipefitting and getting paid to do so.

**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

I am interested in the trade because I enjoy working with my hands and building something attainable. I enjoy doing math and love welding. I enjoy working in various conditions and places, and not behind a desk.

The program I am currently completing is a structural program with a huge emphasis on the pipe trades. I have loved learning the math and processes of welding associated with the trades.

# Pre-Apprentice Candidate Pipefolio

**Disciplines of Interest:** Plumber, Steamfitter (Pipefitter), HVAC/R Service Tech, Pipe Fabricator

**Work Zones in Preference Order:** Fond du Lac Area (Orange)

**Relevant Experience Level:** A little. No specific trade experience, but I have general skills in construction or welding.

**Years of Full-Time Work Experience:** 10+

**Welding Experience:** MIG - Some Knowledge, TIG - Some Knowledge

**Tell us about any jobs where you've learned pipetrades relevant skills:**

Wabash (3 years)- tig, mig, and robotic welding, blueprint reading.

Leeco Steel (1 year)- overhead crane, plasma and oxy cutting, and blueprint reading

Regal Rexnord (current employer)- custom steel fabrication, mig and tig welding, blueprint reading.

**Tell us about any hobbies that have boosted pipetrade-relevant skills:**

I greatly enjoy spending time with my family and when I'm not with them I like to lift weights, golf, and spend time hiking, camping, hunting, or kayaking. Being active and enjoying the outdoors is beneficial when working in construction because the jobs tend to demand acclimation to the elements and to be able to perform under any condition.

**Shift Availability:** Full-time, Overtime, Weekends, 1st Shift (Days), 2nd Shift (Nights)

**Post HS Education:** Some 4-year college

**Add'l Edu. Details:** Attended Northern Michigan University from 2006 to 2011 and majored in Criminal Justice with a Psychology minor.

**What trades-related courses did you take in school?**

Math-Algebra, Math-Geometry, Woodworking / Woodshop

**What construction software or technologies do you have training in?**

**Any Safety Certificates:** First Aid / CPR

**Add'l Details:**

**Why is an apprenticeship an attractive option to you?**

I'm primarily interested because I'm to the point where I feel like I want more from my career and myself. I want to master my craft and become a valued member of a workforce. I love being a student and really dogging into the "why's" and "how's" things work and I believe an apprenticeship is the best path forward for me.

**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

I've been involved in metal fabrication for a few years now and I've found that I greatly enjoy welding, working with my hands, and the challenge of figuring out complex problems on the fly. There's only so much formal instruction in a shop though and I'd like to truly master a craft and better support my family.

**What construction software or technologies do you have training in?**

**Any Safety Certificates:**

**Add'l Details:**

**Why is an apprenticeship an attractive option to you?**

I want to get into the trade right away, I have no experience in the trade thus far, but an apprenticeship gives me the ability to learn while working hands-on, and get credentials that actually mean something when I'm done.

And I'm realistic about where I'm at, I'm not a tradesman, I'd rather spend five years learning properly than spend ten years figuring it out the hard way. I'm also an adult with

**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

I currently work in the world of digital marketing, but find the work unfulfilling. I've always enjoyed working with my hands and doing hard work, I'm fortunate to own a home and some of the most rewarding things about the home have been completing renovations. I think it's great to look back at the project you've done after it's completed and see what you've accomplished.

Plumbing, steam fitting, HVAC appeal to me because it requires problem-solving, strategical thinking, and of course physical labor.

**Add'l Details:**

**Why is an apprenticeship an attractive option to you?**

An apprenticeship is attractive to me because it allows me to learn real skills while working in the field and gaining hands-on experience. I like the idea of being able to learn directly from experienced professionals while also earning a paycheck. It's a practical way to build a career because you're developing skills that are directly connected to the job, instead of only learning in a classroom.
I'm also interested in an apprenticeship because it provides a clear path for growth and

**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

Working in the building trades interests me because I like hands-on work and learning skills that I can actually use in the real world. I enjoy work where you can see the results of what you've done at the end of the day. The trades also offer a stable career, good opportunities to grow, and the chance to keep learning while working on projects that are important for the community.
I'm especially interested in the pipetrades because the work is technical and requires problem-solving, but it's still very hands-on. Systems like plumbing and piping are essential for buildings to function properly, and I think it's interesting to learn how those systems are installed and maintained. I would like to build a long-term career where I can develop those skills and take pride in the work I do.

# Pre-Apprentice Candidate Pipefolio

**Disciplines of Interest:** Steamfitter (Pipefitter), HVAC/R Service Tech

**Work Zones in Preference Order:** Green Bay Area (Yellow), Appleton Area (Green)

**Relevant Experience Level:** A little. No specific trade experience, but I have general skills in construction or welding.

**Years of Full-Time Work Experience:** 4-6

**Welding Experience:**

**Tell us about any jobs where you've learned pipetrades relevant skills:**

Working for Miron, I see August winters around a lot. I assist in getting the holes ready so they can install their pipes. Doesn't look like there's too many differences from carpenter work, just different end goals but similar tools.

**Tell us about any hobbies that have boosted pipetrade-relevant skills:**

I spend time with my son & hang out with co workers. I get along with practically everyone on a job site. Have built many friendships working trades & I truly enjoy working in the construction industry.

**Shift Availability:** Full-time, 2nd Shift (Nights)

**Post HS Education:** No

**Add'l Edu. Details:**

**What trades-related courses did you take in school?**

Math-Algebra, Math-Geometry

**What construction software or technologies do you have training in?**

**Any Safety Certificates:**

**Add'l Details:**

**Why is an apprenticeship an attractive option to you?**

I've seen many pipefitters & plumbers around our job sites. I work for Miron, & I just need a change of scenery. Would love to learn more about what goes into plumbing, pipe fitting, etc. The hourly wage is also very appealing.

**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

Currently in the laborers union & want to learn more.

**Contact Information:**

# Pre-Apprentice Candidate Pipefolio

**Disciplines of Interest:** Plumber, HVAC/R Service Tech, Steamfitter (Pipefitter)

**Work Zones in Preference Order:** Green Bay Area (Yellow), Appleton Area (Green)

**Relevant Experience Level:** A little. No specific trade experience, but I have general skills in construction or welding.

**Years of Full-Time Work Experience:** 10+

**Welding Experience:**

**Tell us about any jobs where you've learned pipetrades relevant skills:**

I was a plumbing department manager at Menards in which I learn the basics of plumbing and pipes. I now work as a system operator at American Wood Fibers and do quality control.

**Tell us about any hobbies that have boosted pipetrade-relevant skills:**

**Shift Availability:** Full-time, 1st Shift (Days), Weekends, Overtime

**Post HS Education:** Some 4-year college

**Add'l Edu. Details:** Political science, environmental studies, accounting, geography/GIS

**What trades-related courses did you take in school?**

Math-Calculus, Math-Precalculus / Trigonometry, Math-Geometry, Math-Algebra

**What construction software or technologies do you have training in?**

**Any Safety Certificates:** First Aid / CPR

**Add'l Details:**

**Why is an apprenticeship an attractive option to you?**

The biggest draw is that while learning and doing classes I will still be working and getting a paycheck.

**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

I'm looking for a career that has job security while also paying more with experience. I have a general knowledge about plumbing from selling plumbing materials and projects in retail. I want to learn more so I can do more and be valuable.

# Pre-Apprentice Candidate Pipefolio

**Disciplines of Interest:** Plumber, Steamfitter (Pipefitter), HVAC/R Service Tech

**Work Zones in Preference Order:** Green Bay Area (Yellow)

**Relevant Experience Level:** A little. No specific trade experience, but I have general skills in construction or welding.

**Years of Full-Time Work Experience:** 1-3

**Welding Experience:** TIG - Some Knowledge

**Tell us about any jobs where you've learned pipetrades relevant skills:**

I've learned many stills working with tools, following detailed instructions asking questions when needed, a lot of roles required me to be dependable be on time and be able to meet deadlines.

**Tell us about any hobbies that have boosted pipetrade-relevant skills:**

Some of my hoodies are hates on working with tools fixing things around the house hands on projects while trying to problem solve. Learning how to fix things aw well as taking notes on how to put it back together

**Shift Availability:** Full-time, Overtime, 1st Shift (Days)

**Post HS Education:** No

**Add'l Edu. Details:**

**What trades-related courses did you take in school?**

Math-Algebra, Math-Geometry, Metals, Welding, Woodworking / Woodshop

**What construction software or technologies do you have training in?**

Bluebeam

**Any Safety Certificates:**

**Add'l Details:**

**Why is an apprenticeship an attractive option to you?**

Being able to learn while working is the biggest thing that I'm drawn to, ive never been a huge fan of collage and always knew I wanted to do something hands on and being able to have the opportunity to revive an apprenticeship would be exactly what I've been looking for.

**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

I've always had an interest in doing hands on work and making a long term impact, the trades always stuck out to me while growing up and I knew I always wanted to get into trade work. I'm also motivated by the opportunity to work hard and learn the skill this trade brings.

# Pre-Apprentice Candidate Pipefolio

**Disciplines of Interest:** Pipe Fabricator, Plumber, Steamfitter (Pipefitter), HVAC/R Service Tech

**Work Zones in Preference Order:** Appleton Area (Green), Fond du Lac Area (Orange), Green Bay Area (Yellow)

**Relevant Experience Level:** None. Nothing even close-but I'm a hard worker and willing to learn!

**Years of Full-Time Work Experience:** 1-3

**Welding Experience:**

**Tell us about any jobs where you've learned pipetrades relevant skills:**

I have not had any career where I have learned skills applicable to the pipe trades.

**Tell us about any hobbies that have boosted pipetrade-relevant skills:**

I work at Kwik Trip [Appleton Wisconsin Franklin Street] currently and I lift heavy things and I put some things back together in the kitchen, I work in hot [100+ degrees Fahrenheit] or cold [32 minus degrees Fahrenheit] environments and I'm looking for a long term trade job.

**Shift Availability:** Full-time, Part-time, Overtime, Weekends, 1st Shift (Days), 2nd Shift (Nights)

**Post HS Education:** No

**Add'l Edu. Details:**

**What trades-related courses did you take in school?**

**Why is an apprenticeship an attractive option to you?**

This apprenticeship is attractive to me because I want to learn a trade the right way from experienced people while working hands-on. I'm looking for a long-term skilled trade career.

**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

I don't have hands-on welding experience yet, but I was exposed to welding through a Miller Electric VR welding simulator when I was younger and scored 92%, which sparked my interest in the trade.

**What construction software or technologies do you have training in?**

**Any Safety Certificates:**

# Pre-Apprentice Candidate Pipefolio

**Disciplines of Interest:** Steamfitter (Pipefitter), Pipe Fabricator, HVAC/R Service Tech

**Work Zones in Preference Order:** Green Bay Area (Yellow)

**Relevant Experience Level:** None. Nothing even close-but I'm a hard worker and willing to learn!

**Years of Full-Time Work Experience:** 10+

**Welding Experience:**

## Tell us about any jobs where you've learned pipetrades relevant skills:

I've worked at a plastics factory assisting the Automation and Maintenance departments in a variety of tasks including electrical, mechanical, and safety. There I performed some drafting and design work in AutoCAD, as well as working with an automation technician to build, maintain, and prepare training documentation for automated equipment.

I've also worked as a slot technician both in-house at a casino as well as field-service

## Tell us about any hobbies that have boosted pipetrade-relevant skills:

One hobby I enjoy is assembling/painting models and miniatures. It requires precision, patience, a very steady hand, and a lot of attention to detail. All of which I think are good skills to have in any trade.

I also enjoy strength training. So even for simple everyday tasks involving picking things up and putting them back down somewhere else, I know how to carry out those movements while minimizing any risk of injury.

**Shift Availability:** Full-time, Overtime, Weekends, 1st Shift (Days), 2nd Shift (Nights), Part-time

**Post HS Education:** Some 4-year college

**Add'l Edu. Details:** Completed two years of study toward a BS in Electrical Engineering

## What trades-related courses did you take in school?

Engineering, Math-Precalculus / Trigonometry, Electrical Trades / Electronics, Drafting and Design, Math-Algebra, Math-Calculus

## What construction software or technologies do you have training in?

AutoCAD, Bluebeam

**Any Safety Certificates:** First Aid / CPR

**Add'l Details:**

## Why is an apprenticeship an attractive option to you?

There are very few employers and industries willing to train new employees and many solid careers are gated behind a requirement of already having experience to get an entry-level position. An apprenticeship seems like a great way to gain necessary work experience in a good trade.

## What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've had a few different jobs over the years and I find that jobs where I'm making something, or working with my hands frequently, are often more enjoyable than jobs where I'm sitting at a desk all day. Additionally, my aunt was a union pipefitter until she retired and she always seemed to have stable employment and enjoyed her work well enough.

# Pre-Apprentice Candidate Pipefolio

**Disciplines of Interest:** Steamfitter (Pipefitter)

**Work Zones in Preference Order:** Appleton Area (Green), Fond du Lac Area (Orange)

**Relevant Experience Level:** A little. No specific trade experience, but I have general skills in construction or welding.

**Years of Full-Time Work Experience:** 0

**Welding Experience:** Flux Core - Some Knowledge, MIG - Some Knowledge, TIG - Some Knowledge, Stick - Some Knowledge

**Tell us about any jobs where you've learned pipetrades relevant skills:**

I did a short apprenticeship at Enstrom Helicopter in Menominee, Michigan. They let me practice a little TIG in my free time. Other than that none.

**Tell us about any hobbies that have boosted pipetrade-relevant skills:**

I like helping where I can. Cleaning and organizing my living space as well as helping others do the same for themselves. I often like to pick up side tasks to help out neighbors like yard work and such.

**Shift Availability:** 1st Shift (Days), Full-time, Weekends, Overtime

**Post HS Education:** Some 2-year college

**Add'l Edu. Details:** I am not sure on the specifics but I am scheduled to receive some certificates for classes I have completed in May.

**What trades-related courses did you take in school?**

Automotive Technology, Welding, Woodworking / Woodshop

**What construction software or technologies do you have training in?**

**Any Safety Certificates:**

**Add'l Details:**

**Why is an apprenticeship an attractive option to you?**

I have a hard time balancing school and work life so combining them would help me mentally. I wouldn't have to worry about falling behind or choosing work over school.

**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

I love working with my hands and welding in general. I've heard pipe is one of the harder trades to excel in and I would love to be challenged in the workplace.

**Disciplines of Interest:** Steamfitter (Pipefitter), Pipe Fabricator

**Work Zones in Preference Order:** Green Bay Area (Yellow)

**Relevant Experience Level:** A little. No specific trade experience, but I have general skills in construction or welding.

**Years of Full-Time Work Experience:** 1-3

**Welding Experience:** MIG - Some Knowledge

**Tell us about any jobs where you've learned pipetrades relevant skills:**

Well looking to get training to do the job but just got a mig set up in my garage

**Tell us about any hobbies that have boosted pipetrade-relevant skills:**

My hobby in woodworking has taught me technical precision and how to safely handle power tools like drills and saws. I understand the "measure twice, cut once" rule and have experience following plans to build solid, accurate structures from scratch.
Through gardening and landscaping, I've built the physical stamina needed for a full day of outdoor labor. I'm comfortable working in all weather conditions, handling heavy materials, and staying on my feet until the job is done. I'm a reliable, hands-on learner ready to jump in and help the crew.

**Shift Availability:** Full-time

**Post HS Education:** No

**Add'l Edu. Details:**

**What trades-related courses did you take in school?**

Automotive Technology, Building Trades / Construction, Electrical Trades / Electronics, Math-Algebra, Math-Geometry, Welding, Woodworking / Woodshop

**What construction software or technologies do you have training in?**

Laser wood burner

**Any Safety Certificates:**

**Add'l Details:**

**Why is an apprenticeship an attractive option to you?**

An apprenticeship is attractive to me because I learn best by doing. My experience with woodworking and landscaping has shown me that I am at my best when I am working with my hands, following a plan, and seeing a physical project through to completion. I'm looking for a career, not just a job. This opportunity allows me to build a solid foundation by learning directly from experienced professionals while I put in the hard work on-site to master the trade.

**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

I like welding, I have my own welder, I would like to do pipefitting

# Pre-Apprentice Candidate Pipefolio

**Disciplines of Interest:** HVAC/R Service Tech, Steamfitter (Pipefitter)

**Work Zones in Preference Order:** Appleton Area (Green), Fond du Lac Area (Orange)

**Relevant Experience Level:** Some. I have worked for a plumber, steamfitter or HVAC/R contractor.

**Years of Full-Time Work Experience:** 1-3

**Welding Experience:**

**Tell us about any jobs where you've learned pipetrades relevant skills:**

I worked for about 2 1/2 years for Best Buy appliance installation. We loaded in a box truck and delivered/installed electric ranges, refrigerators, washers and dryers, TVs.

I worked for 8 months at Van's Heating & Cooling, I trained with skilled residential HVAC installers and technicians. I installed packages and single heating or cooling units with 1 or 2 other co-workers. I earned my EPA universal certification and did system maintenance and repairs for a few months during fall and winter.

**Tell us about any hobbies that have boosted pipetrade-relevant skills:**

I like to go fishing during the warm months. I like to play video games using the computer I built. Fishing has taught me patience and what how being patient can pay off in a big way. Building my own computer has taught me the satisfaction of building or installing something on your own and being able to feel accomplished.

**Shift Availability:** Full-time, 1st Shift (Days), Overtime

**What trades-related courses did you take in school?**

Math-Geometry, Robotics, Math-Algebra

**What construction software or technologies do you have training in?**

**Any Safety Certificates:**

**Add'l Details:**

**Why is an apprenticeship an attractive option to you?**

To have a set path for the next few years of my life that is mostly guaranteed. I like the idea of seeing what's ahead for me, knowing what I'm working towards. I am very much looking for a steady career to provide for me and my family.

**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

I was interested in learning HVAC to use my brain and hands to complete job and feel good about it. I am interested in having a steady career that will provide for me and my family.

# Pre-Apprentice Candidate Pipefolio

**Disciplines of Interest:** Pipe Fabricator, Steamfitter (Pipefitter)

**Work Zones in Preference Order:** Green Bay Area (Yellow), Appleton Area (Green), Fond du Lac Area (Orange)

**Relevant Experience Level:** A little. No specific trade experience, but I have general skills in construction or welding.

**Years of Full-Time Work Experience:** 1-3

**Welding Experience:** TIG - Some Knowledge, Stick - Some Knowledge, Flux Core - Some Knowledge, MIG - Skilled

**Tell us about any jobs where you've learned pipetrades relevant skills:**

I'm currently working at American custom metal fabrication and have been for a little over a year. I've gained hands-on experience measuring, cutting, fitting, and welding metal. This has strengthened my precision, attention to detail, and ability to read blueprints and follow specifications — all skills that directly apply to the pipe trades. I understand the importance of proper fit-up and clean welds to ensure strength and quality.
I've also developed strong safety habits, teamwork, and time management skills in a

**Tell us about any hobbies that have boosted pipetrade-relevant skills:**

Outside of work and school, I'm involved in golf and I also enjoy hands-on metal projects and welding in my free time. Golf has helped me develop patience, focus, and consistency — skills that directly transfer into construction and welding. Just like in the trades, small adjustments and attention to detail make a big difference in the final result. It has also taught me discipline and mental toughness, which are important when working long hours or solving problems on a job site

**Shift Availability:** Part-time

**Post HS Education:** Other Relevant Courses & Certifications

**Add'l Edu. Details:** I'm currently finishing up my welding certificate at NWTC which I will finish in May of 2026

**What trades-related courses did you take in school?**

Math-Algebra, Math-Geometry, Metals, Welding, Woodworking / Woodshop

**What construction software or technologies do you have training in?**

Solidworks

**Any Safety Certificates:** First Aid / CPR

**Add'l Details:**

**Why is an apprenticeship an attractive option to you?**

An apprenticeship is an attractive option to me because it allows me to continue learning while gaining real, hands-on experience in the field. I learn best by doing, and being able to work alongside experienced professionals while developing my skills is something I value. It gives me the opportunity to build confidence, improve my technical knowledge, and understand how the trade operates on real job sites rather than just in a classroom setting.

**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

I currently work at American Custom Metal Fabrication and I'm looking to branch out and find a new path in welding as well as finishing up at NWTC for my welding certification. Working in a fabrication shop has given me real hands-on experience and has strengthened my skills.
As I complete my certification at NWTC, I'm motivated to grow beyond what I already know and challenge myself in a more specialized trade like the pipe trades. I'm interested in expanding my technical knowledge, reading blueprints at a higher level, and apply my knowledge to new experiences. As well as pushing myself to the best of my ability everyday.

# Pre-Apprentice Candidate Pipefolio

**Disciplines of Interest:** Plumber, Steamfitter (Pipefitter), HVAC/R Service Tech

**Work Zones in Preference Order:** Appleton Area (Green)

**Relevant Experience Level:** A little. No specific trade experience, but I have general skills in construction or welding.

**Years of Full-Time Work Experience:** 10+

**Welding Experience:** Flux Core - Some Knowledge, MIG - Some Knowledge

**Tell us about any jobs where you've learned pipetrades relevant skills:**

My knowledge base is more about exposure or working beside the pipefitters rather than directly. I tended to work in commercial medical new construction or within hospitals in Green Bay in relation to the hospitals audits. As pipes were run through different fire-barriers, I would work on repairing or fitting the pipes with devices to restore the fire rating in relation to state requirements. As a Foreman, I'd work with the crews as a liason with the super and my crew to make sure we address their needs in regards to regulations and the building phase.

**Tell us about any hobbies that have boosted pipetrade-relevant skills:**

I still have most of my old firestopping gear, but I like to keep busy. I build sneak boats for duck hunting, decoys, and some leatherworking. Basically, I like detailed work, and keep busy learning new plans and skill sets, and all of it can apply to the construction trades. To be honest, I probably inherited from my time in construction, not vice-versa.

Patience and attention to detail always come in handy, and learning to read different schematics is just like studying the plans for each new site we might be working on. In

**Shift Availability:** Full-time, Weekends, Overtime, 1st Shift (Days), 2nd Shift (Nights)

**Post HS Education:** Bachelor Degree

**Add'l Edu. Details:** Clinical psychology (Degree), Transportation and Logistics(CDL and certification), Wiring and climbing certs through time with

**What trades-related courses did you take in school?**

Welding, Math-Algebra, Woodworking / Woodshop

**What construction software or technologies do you have training in?**

AutoCAD, Bluebeam

Procore , excel

**Any Safety Certificates:** First Aid / CPR, OSHA 10

**Add'l Details:**

**Why is an apprenticeship an attractive option to you?**

An apprenticeship appeals because I know there is a lot I don't know, and you have to work in the field to really learn the trade. In addition, an apprenticeship gives your mentors and co-workers time to get to know you, and time for you to learn the company's culture and the groups you work with. I'm leaning into a Union apprenticeship, as I think it will give me more access to commercial-type construction, which appeals more than working in residential. However, I'm just leaning into what I know,

**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

I've worked for several years as a Firestopper in Green Bay with a lot of new construction in partnership with IEI, Shue, Boldt, and Miron most often. I made it to foreman, but got tempted to go into office work. Honestly, I miss working with my hands and need a career I can retire from. I'm just starting some classes in welding.

# Pre-Apprentice Candidate Pipefolio

**Disciplines of Interest:** Pipe Fabricator, Steamfitter (Pipefitter), Plumber

**Work Zones in Preference Order:** Appleton Area (Green)

**Relevant Experience Level:** Some. I have worked for a plumber, steamfitter or HVAC/R contractor.

**Years of Full-Time Work Experience:** 10+

**Welding Experience:** TIG - Some Knowledge, MIG - Skilled, Flux Core- Skilled, Stick - Skilled

**Tell us about any jobs where you've learned pipetrades relevant skills:**

In my past jobs, I've done a lot of work in automotive mechanics, welding, and custom fabrication. I've had to read and follow technical blueprints, cut and fit metal with precision, and make sure everything is aligned and sealed correctly—skills that transfer directly into pipefitting and pipe welding.

I've also worked in environments where safety, teamwork, and showing up every day ready to work were just part of the job. I've used a variety of tools and materials,

**Tell us about any hobbies that have boosted pipetrade-relevant skills:**

In my free time, I enjoy working on cars, doing custom fabrication projects, and building or fixing anything mechanical. I've always had a strong interest in how things work, and I like taking on hands-on projects that challenge me to think critically and solve problems.

These hobbies have helped me develop skills that carry over into the construction trades —like precision, patience, and the ability to read blueprints or technical diagrams. I also spend time welding and fabricating metal for small builds or repairs, which has given me

**Shift Availability:** Weekends, Full-time, Overtime, 1st Shift (Days), 2nd Shift (Nights)

**Post HS Education:** No

**Add'l Edu. Details:**

**What trades-related courses did you take in school?**

**What construction software or technologies do you have training in?**

**Any Safety Certificates:**

**Add'l Details:**

**Why is an apprenticeship an attractive option to you?**

An apprenticeship is attractive to me because it gives me the chance to keep learning while earning a living. I've already spent a lot of time working with my hands—welding, fabricating, building, and fixing things—and I know that real skills come from real experience. What I appreciate about the apprenticeship model is that I'd be learning directly from skilled tradespeople on the job, not just in a classroom.

**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

What interested me in the building trades is my passion for working with my hands and building things that serve a real purpose. I've spent years in the automotive and fabrication world—welding, reading blueprints, and fixing or fabricating metal components. That hands-on work gave me a deep respect for craftsmanship and the satisfaction of seeing something solid and functional come together through skill and precision.

# Pre-Apprentice Candidate Pipefolio

**Disciplines of Interest:** Steamfitter (Pipefitter), HVAC/R Service Tech

**Work Zones in Preference Order:** Green Bay Area (Yellow), Appleton Area (Green)

**Relevant Experience Level:** A little. No specific trade experience, but I have general skills in construction or welding.

**Years of Full-Time Work Experience:** 1-3

**Welding Experience:**

**Tell us about any jobs where you've learned pipetrades relevant skills:**

Through my work at a woodworking company and machine shop, I have developed a strong attention to detail and hands-on technical skills.

I have experience safely operating power tools and performing basic fabrication tasks. I am also adaptable to changing job functions and production demands, and I work safely while communicating effectively with team members and supervisors.

**Tell us about any hobbies that have boosted pipetrade-relevant skills:**

My hobbies include hunting, fishing, hiking, and being outdoors, all of which have helped me develop skills that are transferable to construction trades.

These activities require attention to detail, patience and physical endurance. They also strengthen my problem-solving skills and the ability to work safely.

**Shift Availability:** Full-time, 1st Shift (Days), Overtime

**Post HS Education:** No

**Add'l Edu. Details:**

**What trades-related courses did you take in school?**

Building Trades / Construction, Metals, Woodworking / Woodshop, Welding

**What construction software or technologies do you have training in?**

**Any Safety Certificates:**

**Add'l Details:**

**Why is an apprenticeship an attractive option to you?**

I feel an apprenticeship is a good option for me because it provides the opportunity to learn a skilled trade utilizing hands-on experience from someone skilled in the trade.

It allows me to further my education while developing skills in a specific trade.

**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

In high school, I completed several courses in construction, wiring, metals and woodworking. I've also gained hands-on experience working for a woodworking company, as well as a machine shop.

I've always enjoyed working with my hands and staying busy, which has led me to develop a strong interest in learning a skilled trade. My brother-in-law, is a steamfitter and greatly enjoys his work, and hearing about his experiences, has made the field appealing to me. I am interested in the fabrication and installation of piping systems and the satisfaction of seeing a completed job.

# Pre-Apprentice Candidate Pipefolio

**Disciplines of Interest:** Steamfitter (Pipefitter)

**Work Zones in Preference Order:** Green Bay Area (Yellow)

**Relevant Experience Level:** Some. I have worked for a plumber, steamfitter or HVAC/R contractor.

**Years of Full-Time Work Experience:** 10+

**Welding Experience:** TIG - Skilled, Stick - Some Knowledge, MIG - Skilled, Flux Core- Skilled

**Tell us about any jobs where you've learned pipetrades relevant skills:**

I have been a pipe welder at marinette marine for 3 years. I welded a lot of aluminum tubing and steel tubing for score boards for professional sport teams.

**Tell us about any hobbies that have boosted pipetrade-relevant skills:**

I love to build decor out of different metals at home that I sell or donate locally at a second hand store . I love fishing as well but I does not help me much in my career path

**Shift Availability:** 2nd Shift (Nights), 1st Shift (Days), Overtime, Full-time, Weekends, Part-time

**Post HS Education:** Other Relevant Courses & Certifications

**Add'l Edu. Details:** Maritime osha 10 and pipe welding course at the NWTC technical school

**What trades-related courses did you take in school?**

**What construction software or technologies do you have training in?**

**Any Safety Certificates:** OSHA 10

**Add'l Details:**

**Why is an apprenticeship an attractive option to you?**

The apprenticeship would allow me to learn every aspect of the trade not just welding. After completing the apprenticeship my value in the workforce would be much higher and I would be more in demand

**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

I believe being a steam fitter / pipe welder is the best of all welding careers. Working in a union like the 400 is the best career path I can take after welding for 13 years. I feel like the pipe trade is the most respectful out of all the trades. I see a bright future and stable work in the steamfitters union

# Pre-Apprentice Candidate Pipefolio

**Disciplines of Interest:** Plumber, Steamfitter (Pipefitter), Pipe Fabricator, HVAC/R Service Tech

**Work Zones in Preference Order:** Green Bay Area (Yellow), Appleton Area (Green)

**Relevant Experience Level:** None. Nothing even close-but I'm a hard worker and willing to learn!

**Years of Full-Time Work Experience:** 10+

**Welding Experience:**

**Tell us about any jobs where you've learned pipetrades relevant skills:**

I have worked for Charter Spectrum for the last 6-7 years which was mostly IT and desk work so currently I do not have any experience besides basic in home stuff such as cleaning or replacing sink PVC pipes.

**Tell us about any hobbies that have boosted pipetrade-relevant skills:**

The ability and will to learn; I picked up a guitar and decided I would one day play it and start to learn songs, all self taught. Fast forward a few years I play religiously and can play several songs if needed at a campfire. Playing guitar doesn't correlate to a trade job but what does is the will to learn and pursue growth.

I am also competitive, in a healthy manner I will compare my self to a senior member of any kind of activity and ask myself "How can I get better? What can I do different?". I am

**Shift Availability:** Full-time

**Post HS Education:** Some 2-year college, Associate Degree, Other Relevant

**Add'l Edu. Details:** I was majoring in computer science and only need a few classes to technically get my associates. I will be starting back up this

**What trades-related courses did you take in school?**

Drafting and Design, Math-Algebra

**What construction software or technologies do you have training in?**

AutoCAD, Solidworks

**Any Safety Certificates:**

**Add'l Details:**

**Why is an apprenticeship an attractive option to you?**

An apprenticeship allows me to learn gradually how to properly be the best professional I can possibly be in my role and to my peers. It allows growth and opportunity to further expand on that knowledge such as becoming a journeyman or eventually a master.

Apprenticeships are key opportunities that help shape me or anyone really, to get started in a trade and focus on that as a career moving forward.

**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

As I got older, more mature, I realized having real world skills that can benefit the community and/or my family longevity wise is better than sitting at a desk all day that doesn't contribute to anything other than a salary. I see trades as irreplaceable and also beneficial to the community paid for or not.

I currently sit at a desk and while I'll admit it was nice when I was "younger" I find my lifestyle more active and more willing to learn. I am very ambitious and will achieve my goals. I see trades as a career opportunity of growth and the ability to put back into the community.

**What construction software or technologies do you have training in?**

CNC

Mastercam

**Any Safety Certificates:** OSHA 10

**Add'l Details:**

**Why is an apprenticeship an attractive option to you?**

I believe that apprenticeships are a great way to enter a field. With little to no experience I went into the Manufacturing industry and completed an apprenticeship. In this instance, with my experience, I believe an apprenticeship would give me the experience I need to become a journeyman.

**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

I attended Hobart Welding Institute and have been glued to the fact that I can go out and work in that field. I learned so much already at the school although i'm willing to learn as much as possible to get further into the trade. In my high school education we did not have the opportunity to learn welding, fabrication, or any trades of any sort.

My goal in getting into this field is to get as much on the job experience as possible so eventually I could start my own fabrication business. Welding to me is a new opportunity with every company, part, and weld.

# Pre-Apprentice Candidate Pipefolio

**Disciplines of Interest:** Steamfitter (Pipefitter)

**Work Zones in Preference Order:** Fond du Lac Area (Orange)

**Relevant Experience Level:** A little. No specific trade experience, but I have general skills in construction or welding.

**Years of Full-Time Work Experience:** 4-6

**Welding Experience:** MIG - Some Knowledge, TIG - Some Knowledge

**Tell us about any jobs where you've learned pipetrades relevant skills:**

In my time working for Wabash in Fond du Lac, Wisconsin, I gained hands-on experience that directly applies to the pipe trades. As a welder, I worked with both steel and aluminum, welding plates and pipes used in the construction of ladders and walkways for bottle trucks. This role required precision, the ability to read and follow blueprints and weld symbols, and a strong understanding of proper fit-up and joint preparation to ensure structural integrity and safety.

**Tell us about any hobbies that have boosted pipetrade-relevant skills:**

In my down time I go to the gym. This seems transferable as the trades can be taxing on your body.

**Shift Availability:** Full-time, 1st Shift (Days), Overtime

**Post HS Education:** Other Relevant Courses & Certifications

**Add'l Edu. Details:** Welding Certification

**What trades-related courses did you take in school?**

Welding, Math-Geometry, Math-Precalculus / Trigonometry, Math-Algebra

**What construction software or technologies do you have training in?**

AutoCAD, Solidworks

**Any Safety Certificates:**

**Add'l Details:**

**Why is an apprenticeship an attractive option to you?**

An apprenticeship is an attractive option to me because it offers the opportunity to continue building a long-term career through hands-on training while learning directly from experienced professionals in the trade. At 27, I am at a point where I am focused on developing mastery, stability, and pride in my work rather than short-term positions. I value structured learning combined with real-world application, and the steamfitter apprenticeship provides exactly that balance.

**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

I went through a course to receive a welding certificate and worked as a welder for almost a year. This apprenticeship seems like the next step in my career journey.

# Pre-Apprentice Candidate Pipefolio

**Disciplines of Interest:** Steamfitter (Pipefitter), Pipe Fabricator

**Work Zones in Preference Order:** Appleton Area (Green)

**Relevant Experience Level:** A little. No specific trade experience, but I have general skills in construction or welding.

**Years of Full-Time Work Experience:** 4-6

**Welding Experience:**

**Tell us about any jobs where you've learned pipetrades relevant skills:**

N/A

**Tell us about any hobbies that have boosted pipetrade-relevant skills:**

I've done small basic construction and landscaping I also weld at home with a E71T-11, and E90C-K3 H4 wire

**Shift Availability:** 2nd Shift (Nights), Overtime, Weekends

**Post HS Education:** Some 2-year college

**Add'l Edu. Details:** Working on my 2 year associate degree

**What trades-related courses did you take in school?**

Welding

**What construction software or technologies do you have training in?**

**Any Safety Certificates:**

**Add'l Details:**

**Why is an apprenticeship an attractive option to you?**

Helps me learn and grow

**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

The reason why I choose to join the pipe trade is because it's good money and I enjoy welding. Apologies I was never great at writing impactful paragraphs.

# Pre-Apprentice Candidate Pipefolio

**Disciplines of Interest:** Steamfitter (Pipefitter)

**Work Zones in Preference Order:** Green Bay Area (Yellow), Appleton Area (Green)

**Relevant Experience Level:** A little. No specific trade experience, but I have general skills in construction or welding.

**Years of Full-Time Work Experience:** 1-3

**Welding Experience:** Stick - Skilled, TIG - Some Knowledge

**Tell us about any jobs where you've learned pipetrades relevant skills:**

I don't have any job experience or any hands on help. Only way I've learned and have hood time in pipe welding is going to school, when I've already graduated from trade school, and when I wasn't working, I was showing up whenever they had booths open and material available for me to use and practiced all day and learned as much as I could on my own. I didn't have much help from my instructors so I kept practicing time after time again trying to fine tune my errors and become proud of my work. I've always tried to perfect my work, but help would've been greatly appreciated

**Tell us about any hobbies that have boosted pipetrade-relevant skills:**

I don't see my welding job as a job. It feels like a hobby and i enjoy doing it. Before moving to Wisconsin for the shipyard in hopes of becoming a pipe welder, I used to go to the gym which helped me push myself to my limit each and everytime, forcing me to present, eveything I do, the absolute best that I can accomplish and be able accept that it'll be my best work presented each and everytime

**Shift Availability:** Full-time, 2nd Shift (Nights), 1st Shift (Days)

**Post HS Education:** Other Relevant Courses & Certifications

**Add'l Edu. Details:** Went to trade school for 9 months and learned the basics of Mig, Flux-Core, Stick, and Tig along with learning how to weld

**What trades-related courses did you take in school?**

Welding

**What construction software or technologies do you have training in?**

**Any Safety Certificates:**

**Add'l Details:**

**Why is an apprenticeship an attractive option to you?**

Being able to join the pipe Union will help me accomplish my dreams of becoming a combo welder and working offshore in the oil fields. This means a lot to me because I want to be able to successfully provide financial stability for my family and take care of the debts we carry. I don't come from a family with money so being able to accomplish this as an individual will help provide my family the absolute best that I can do and I will do whatever it takes to accomplish this

**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

I really enjoy the art of welding, and once I was introduced to pipe welding using SMAW, I enjoyed the fact that I'll be able to weld in all positions each time I attempt a pass. I enjoy stick welding and the art of completing a Tig pass. Which is leading me to want to be able to become a combo welder. A goal i will do my best to accomplish is to be able to work offshore and bring my skills as a combo/pipe welder to be able to support my family to the best of my ability and willing to do whatever it takes to be able to accomplish that goal

# Pre-Apprentice Candidate Pipefolio

**Disciplines of Interest:** Steamfitter (Pipefitter)

**Work Zones in Preference Order:** Green Bay Area (Yellow)

**Relevant Experience Level:** A little. No specific trade experience, but I have general skills in construction or welding.

**Years of Full-Time Work Experience:** 1-3

**Welding Experience:** Stick - Skilled, MIG - Skilled, TIG - Some Knowledge, Flux Core - Some Knowledge

**Tell us about any jobs where you've learned pipetrades relevant skills:**

My current job is at a chemical plant so all day I'm working with pipes containing chemicals, inspecting flanges, ensuring check valves work, I often do line breaks exchanging gaskets or rerouting the pipe, I sometimes have to make my own fittings using a mill to make the threads then threading the pipe together, experience working with high pressure steel pipes, steam pipes, pvc pipes and often running hoses from those pipes to a destination

**Tell us about any hobbies that have boosted pipetrade-relevant skills:**

I just recently graduated high school, I played 3 sports so those were my hobbies year round, they wouldn't boost my skills in trades but since I stayed busy every day with practices it gave me somthing to work towards every day and instilled a strong work ethic in me, giving me a desire to succeed in anything I do. While it also built my body strong to prepare for any physical work that will come my way

**Shift Availability:** Part-time

**Post HS Education:** No

**Add'l Edu. Details:**

**What trades-related courses did you take in school?**

Math-Algebra, Math-Geometry, Welding

**What construction software or technologies do you have training in?**

**Any Safety Certificates:**

**Add'l Details:**

**Why is an apprenticeship an attractive option to you?**

I want an apprenticeship because I need to work towards somthing, I can't go work in a store or a restaurant. I understand this is a 4-5 year process but it's what I need because that certification will stick with me my whole life, giving me a stable high paying job while I'm still young gives me confidence that I'll be able to provide for a family when the time comes

**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

I am searching for a good long term career, I feel if I can become certified in a trade like this it gives me a stable job for the rest of my life while also being able to stay loyal to one company and excelling in my position moving up the totem pole

# Pre-Apprentice Candidate Pipefolio

**Disciplines of Interest:** Steamfitter (Pipefitter), HVAC/R Service Tech, Pipe Fabricator, Plumber

**Work Zones in Preference Order:** Appleton Area (Green)

**Relevant Experience Level:** A little. No specific trade experience, but I have general skills in construction or welding.

**Years of Full-Time Work Experience:** 0

**Welding Experience:** Stick - Some Knowledge, MIG - Some Knowledge, TIG - Some Knowledge

**Tell us about any jobs where you've learned pipetrades relevant skills:**

I do not have work experience in this area.

**Tell us about any hobbies that have boosted pipetrade-relevant skills:**

I really enjoy doing any physical activity. Whether it is running or playing any sport, I like to push myself to be the best that I can. I believe that even though I currently only have a little experience with welding and metal working that my lifelong love of pushing myself to always be better will help me in the construction trades. I have built a very strong work ethic throughout the years.

**Shift Availability:** Full-time, Overtime, Weekends, 1st Shift (Days)

**Post HS Education:** Some 4-year college

**Add'l Edu. Details:** I majored in industrial engineering, however I only attended for one semester before I realized it was not the correct career

**What trades-related courses did you take in school?**

**What construction software or technologies do you have training in?**

**Any Safety Certificates:**

**Add'l Details:**

**Why is an apprenticeship an attractive option to you?**

I am very intrigued by the structure of the apprenticeship program. I like how you start at the bottom as a pre apprentice and have to earn your spot to become an apprentice. I am also attracted to the year after year of progression of becoming more skilled and earning more benefits. The guarantee that you will earn your journeyman license as long as you are working hard and make progess in your skills and education is what I am so interested in.

**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

I am very excited about how the apprenticeship program works. I am willing to work hard for my chance to earn an apprenticeship position and I like how the system works by allowing you to progress year after year. Right out of high school I decided to try attending the University of WI Platteville to become an engineer, however after one semester I decided that a traditional university was not the right path for me to follow. Now I am interested in the trades because of the structure and stability of the program.

# Pre-Apprentice Candidate Pipefolio

**Disciplines of Interest:** Steamfitter (Pipefitter)

**Work Zones in Preference Order:** Green Bay Area (Yellow), Appleton Area (Green)

**Relevant Experience Level:** A little. No specific trade experience, but I have general skills in construction or welding.

**Years of Full-Time Work Experience:** 7-9

**Welding Experience:**

**Tell us about any jobs where you've learned pipetrades relevant skills:**

I've worked four years as a commercial finish carpenter on offices, hotels, hospitals, and labs—framing studs, hanging drywall, installing ceilings, casework, doors, and trim. I read blueprints daily and coordinated with mechanical drawings, laying out walls and chases around ducts, sprinklers, plumbing, and medical gas lines. That taught me the clearances pipe systems need and how to use lasers and levels for dead-accurate work to tight tolerances, skills that'll help me run pipe.

**Tell us about any hobbies that have boosted pipetrade-relevant skills:**

I do a fair bit of woodworking, building furniture, decks for friends, that kind of thing. It's all about reading plans, cutting accurate angles, and making strong joints that'll hold up over time. The precision with levels, squares, and layout tools is basically the same as what I use hanging pipe or setting equipment. Plus, you learn how materials behave under load, which helps when you're rigging heavy pipe or figuring supports in the field. When the weather's decent, I'm out hiking, hunting, or kayaking

**Shift Availability:** 1st Shift (Days), Full-time

**Post HS Education:** Other Relevant Courses & Certifications

**Add'l Edu. Details:** Northeastern Wisconsin Technical College Fire Fighter I - NFPA 1001 Hazardous Materials Operations - NFPA 1072 Entry Level

**What trades-related courses did you take in school?**

Building Trades / Construction

**What construction software or technologies do you have training in?**

**Any Safety Certificates:** First Aid / CPR, OSHA 10

**Add'l Details:**

**Why is an apprenticeship an attractive option to you?**

steam fitter

**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

I got into the building trades because I wanted a job where I could actually see what I'd done at the end of the day. There's something satisfying about finishing a shift and looking at a wall that wasn't there before, or a system that's now running because of the work you put in. I like using my hands, solving problems on the spot, and not being stuck behind a desk. Plus, the trades pay well without piling on a ton of college debt, and the work's always there if you're good at it.

What pulls me toward pipe trades in particular is how much variety and real skill is involved. You're dealing with everything from water lines to steam systems in big plants or hospitals, figuring out blueprints, welding, and making sure it all fits perfectly under pressure.

Math-Algebra, Math-Geometry

**What construction software or technologies do you have training in?**

**Any Safety Certificates:** First Aid / CPR

**Add'l Details:**

**Why is an apprenticeship an attractive option to you?**

I have worked since I was 13 years old, and trades have come up for years. I have never been able to find the time until now to pursue it. I would love to do something where I can work, learn, and earn at the same time. As an adult with big bills, it is necessary to find something where I can earn and learn at once. There are many trades, but welding catches my eye by a mile. My brother is a lineman and went to tech college, and I have already been through the ropes of student loans, and I do not need any more of those. So,

**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

I have a college bachelor's degree in Exercise Sports Science. Although I am female, I have always had a passion for working hard regardless of what it entails. I grew up with 2 older brothers and a very hard working, determined father who taught me the ropes of independence and resilience. All three work in the trades, and I went straight to college to play college hockey. My eldest brother is the handy man of the family, and I have always looked up to him. Soon after graduated college, I learned that I wanted to do something where I can work independently or with a team, while also earning a good income so that I can afford the life that I want. I did a little bit of research, and I found that welding would possibly be a great fit. I have a very steady hand and the right mindset. I know that it won't be easy, but I am willing to work.

No skills yet till I go to college in fall of 2026, Having had any jobs relating to this but I am so willing to learn

**Tell us about any hobbies that have boosted pipetrade-relevant skills:**

Don't really have any hobbies if I'm being honest I don't really go out much I'm either working or sometimes at the gym or if not that then I'm hanging out with my buddies, No Hobbies per say but I do like going to gym every now and then and if I'm not doing that I'm either out having fun with my buddies but other than that I don't do much.

**Shift Availability:** Part-time, Full-time, Overtime, 1st Shift (Days), Full-time, Overtime, 1st Shift (Days)

**Post HS Education:** No, No

**Add'l Edu. Details:**

**What trades-related courses did you take in school?**

**What construction software or technologies do you have training in?**

**Any Safety Certificates:**

**Add'l Details:**

**Why is an apprenticeship an attractive option to you?**

Because I want to learn a trade I don't want
To be working these dead end jobs I have been since 2020 I feel that now I have to make a change I'm 23 now and I see a clear path ahead of me and I am pursuing it which is why I came across you guys, For me it's learning while working and making money and an apprenticeship gives me that opportunity unlike going to college to work for someone that's why I plan on going to college for trade welding technical diploma cause that's

**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

I'm interested in this trade because next year fall of 2026 I'm going to college to get my welding technical diploma and I want to have a job when I'm done and hopefully it benefits you guys but yeah I just want a good well paying career and I want to travel and I feel this road will help me achieve that and I'm hoping you guys are willing to take a chance on me., The building trades offer strong career opportunities, job stability, and the chance to keep learning new skills. I like that it's active work, not just sitting at a desk, and that effort and skill really matter and I plan on going to college next fall 2026 for welding and when I graduate hopefully it will benefit you guys and still have a job waiting for me when I go back cause my goal is to travel and I see a road and it's right Infront of me and with you guys I can make that become reality.

# Pre-Apprentice Candidate Pipefolio

**Disciplines of Interest:** Steamfitter (Pipefitter), Plumber, Pipe Fabricator

**Work Zones in Preference Order:** Green Bay Area (Yellow)

**Relevant Experience Level:** A little. No specific trade experience, but I have general skills in construction or welding.

**Years of Full-Time Work Experience:** 7-9

**Welding Experience:** Flux Core - Some Knowledge, MIG - Some Knowledge, TIG - Some Knowledge

**Tell us about any jobs where you've learned pipetrades relevant skills:**

As a shipfitter at Marinette marine I have become skilled in torch cutting , grinding, and blueprint reading. My job was to install electrical, hot work and foundation to specific navy standards. I've worked with the pipe trade in order to install pipe hangers to suit pipe systems and know my way around a blueprint.

**Tell us about any hobbies that have boosted pipetrade-relevant skills:**

As a husband and father of two I enjoy being around my family and traveling. I am also bilingual. Fluent in both English and Spanish this would be an asset in the trades due to an ever growing industry encountering people that speak both languages like myself. A strong work ethic has always been the base of my childhood and adulthood, a trade needed to work in an ever growing and expanding industry like pipe.

**Shift Availability:** Full-time, 1st Shift (Days)

**Post HS Education:** Other Relevant Courses & Certifications

**Add'l Edu. Details:** Mig certificate OSHA 10 Overhead crane certified

**What trades-related courses did you take in school?**

Welding

**What construction software or technologies do you have training in?**

**Any Safety Certificates:** OSHA 10

**Add'l Details:**

**Why is an apprenticeship an attractive option to you?**

An apprenticeship would help build on the experience I have already accumulated over the last couple of years in the industry. Learning about proper pipe fit up's and weld procedures would greatly benefit my skills and ability to achieve my full potential as a trade worker.

**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

I've worked in the maritime industry as a shipfitter for the last three years I, I've enjoyed the daily challenges involved in the industry and am looking for a stable future. Everyone that I've spoken to in regards to local 400 has had a positive experience and nothing but good things to say about it. Working as a shipfitter has exposed me to the pipe industry and its challenges as a trade. I already have experience in blueprint reading as well as some weld experience.

# Pre-Apprentice Candidate Pipefolio

**Disciplines of Interest:** Steamfitter (Pipefitter), Steamfitter (Pipefitter), Pipe Fabricator

**Work Zones in Preference Order:** Appleton Area (Green), Green Bay Area (Yellow), Appleton Area (Green), Fond du Lac Area (Orange)

**Relevant Experience Level:** A little. No specific trade experience, but I have general skills in construction or welding., A little. No specific trade experience, but I have general skills in construction or welding

**Years of Full-Time Work Experience:** 1-3, 1-3

**Welding Experience:** TIG - Some Knowledge, Stick - Some Knowledge, Stick - Some Knowledge, TIG - Some Knowledge

## Tell us about any jobs where you've learned pipetrades relevant skills:

I work for a closet installation company, we install closets in large complexes such as apartments building and hotels. It is seen as a fairly simple process but there is a fair amount the goes into it, it really isn't related to the pipe trade but on the jobs I get to see majority of the process of building these complexes. I don't enjoy the work I do currently because it is very simple and doesn't require me to gain more Knowledge and problem solve, I would like to learn a new skills preferably in the welding/pipe fitting industry. I have very basic welding knowledge, I've only ever worked for a family

## Tell us about any hobbies that have boosted pipetrade-relevant skills:

I like to fix stuff my way even if it isn't "the right way". Hobbies I like riding my motorcycle and attempting household projects, I accomplish most of them, Outside of work i like to learn. I'm very into cars and motorcycles, and I spend a lot of time learning to be my own mechanic. I also like to take on projects around the house. I really like to watch and learn about building and remodeling homes, with dreams to eventually remodel and flip a home of my own, and hopefully someday build my own home. I really love that each trade has their owns skills, and I would like to have experience in pretty

**Shift Availability:** Full-time, Weekends, Overtime, 1st Shift (Days), 2nd Shift (Nights), Full-time, Overtime, Weekends, 2nd Shift (Nights), 1st Shift (Days)

**Post HS Education:** No, No

**Add'l Edu. Details:**

## What trades-related courses did you take in school?

Building Trades / Construction, Metals, Math-Geometry, Math-Precalculus / Trigonometry, Building Trades / Construction, Woodworking / Woodshop, Electrical Trades / Electronics, Metals, Math-Geometry, Construction Technology, Drafting and Design

## What construction software or technologies do you have training in?

Inventor, AutoCAD

Took a Computer aided design class a while ago

**Any Safety Certificates:** First Aid / CPR, OSHA 10, OSHA 10, First Aid / CPR

**Add'l Details:**

## Why is an apprenticeship an attractive option to you?

The biggest reason I want to start an apprenticeship is to have the opportunity to meet new people and come across new opportunities. I am also young and have time to learn and work my way up. I really have no major responsibilities right now so I would like to work somewhere where I can work long days learning and working hands on. I have nothing tying me down to my location either, therefore I could work just about anywhere, I would like to start an apprenticeship to get paid while I learn and also be able to learn

## What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I could never work behind a desk. I work well with my hands and don't have the patients to sit and look at a screen all day. I know there is good money to be made in the this trade and I'm willing to work very hard to work my way towards that money, I am most interested in being paid while I learn, but I also just love to create. I fell in love with the trades in high school and work alongside many of them in my current job, and am ready to make a move to a company that is better for me. I am specifically interested in the pipe trades because I've been advised there is lots of money to be made in them, but I don't necessarily have my heart set on them. I'm pretty much open to anything and would like to learn more about it.

**Any Safety Certificates:** OSHA 10, OSHA 10

**Add'l Details:**

**Why is an apprenticeship an attractive option to you?**

Gives me the chance to learn what I need to know to benefit the contractors and myself, Between a apprenticeship or training contract would be best

**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

My interest with the trades began my senior year in high school. I was a third year welding student at the dickinson iron tech/vocational center that's when I decided my career choice college wasn't the answer for me the trades was what I was going to pursue., I have worked in the trades most of my career. Not to mention college debt. Getting paid to learn.

**Years of Full-Time Work Experience:**

**Welding Experience:**

**Tell us about any jobs where you've learned pipetrades relevant skills:**

I haven't had any jobs related to pipe trades but I have been to a school where they took me to learn about pipe trades

**Tell us about any hobbies that have boosted pipetrade-relevant skills:**

I stay active and enjoy activities that require physical endurance and teamwork, which has strengthened my work ethic and reliability. Whether it's working with others on a project or staying committed to finishing a task, these experiences have helped me develop strong communication skills, time management, and the ability to work safely and efficiently. All of these skills are directly transferable to construction trades, where cooperation, consistency, and accountability are essential.

**Shift Availability:**

**Post HS Education:** No

**Add'l Edu. Details:**

**What trades-related courses did you take in school?**

**What construction software or technologies do you have training in?**

**Any Safety Certificates:**

**Add'l Details:**

**Why is an apprenticeship an attractive option to you?**

An apprenticeship is an attractive option to me because it allows me to learn a skilled trade through a combination of hands-on experience and classroom instruction while earning an income at the same time. I learn best by doing, and an apprenticeship provides real-world training under experienced professionals, which helps build confidence, strong technical skills, and safe work habits from the start.

**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

I am interested in pursuing a career in the pipe trades because it offers hands-on work, problem-solving, and the opportunity to build skills that are in high demand. I enjoy working with my hands and seeing the direct results of my effort, whether it's installing systems, maintaining equipment, or troubleshooting issues. The pipe trades appeal to me because they combine technical knowledge with practical experience, allowing me to continuously learn while contributing to essential infrastructure that people rely on every day.

**Years of Full-Time Work Experience:** 4-6

**Welding Experience:** Flux Core - Some Knowledge, Stick - Some Knowledge

## Tell us about any jobs where you've learned pipetrades relevant skills:

When I was an Aviation Electrician 2nd Class Petty Officer in the US navy, while the majority of my job's focus was on the electrical side of things, the systems that I worked on more often than not crossed over and converged with the mechanical side of things. Just about everything in the systems that I worked on from the airframes to the flight controls to the digital engine control that controls the throttle to the engine is controlled and operated by wires and that comes with the territory of needing to have an extensive background knowledge in the mechanical systems.

## Tell us about any hobbies that have boosted pipetrade-relevant skills:

Working on cars and motorcycles or anything with an engine. This is useful skill for the construction trades because it requires knowledge about how the gasoline and oils lines flow and how they convert the chemical energy in the fuel into mechanical energy used to do work.

I also enjoy weightlifting and running which is provides obvious benefits to one in the construction trades as most trades require strenuous labor and the repetitive lifting of

**Shift Availability:** Full-time, Part-time, Overtime, 1st Shift (Days), Weekends

**Post HS Education:** Other Relevant Courses & Certifications

**Add'l Edu. Details:** Certified Aviation Electrician for the Navy

## What trades-related courses did you take in school?

Electrical Trades / Electronics

## What construction software or technologies do you have training in?

**Any Safety Certificates:** First Aid / CPR

**Add'l Details:** Veteran

## Why is an apprenticeship an attractive option to you?

While I did enjoy my time in the navy as an aircraft electrician, I've always been more interested in the mechanical side of things than the electrical.

Apprenticeship is an attractive option for me not only because you are employed from day one and the training is flcompensated, but also because on-the-job training is the most effective way for me to learn.

## What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've always wanted to learn how to weld. I've always been very interested in fluid dynamics and all the engineering that goes into constructing pipe systems.

**Disciplines of Interest:** Pipe Fabricator, Steamfitter (Pipefitter)

**Work Zones in Preference Order:** Fond du Lac Area (Orange), Appleton Area (Green), Green Bay Area (Yellow)

**Relevant Experience Level:** A little. No specific trade experience, but I have general skills in construction or welding.

**Years of Full-Time Work Experience:** 0

**Welding Experience:** TIG - Some Knowledge, Stick - Some Knowledge, MIG - Some Knowledge, Flux Core - Some Knowledge

**Tell us about any jobs where you've learned pipetrades relevant skills:**

I currently work at Bemis Manufacturing, I am an assembly line operator and injection mold press operator. My job requires teamwork, fast pace work, time management, testing and measuring, detailed instructions, and organization.

**Tell us about any hobbies that have boosted pipetrade-relevant skills:**

One of my main hobbies is car repair and customization. This hobby involves diagnosing, uninstalling, fixing, reinstalling, and testing my vehicles. This process alone teaches me how to troubleshoot or diagnose problems I may have in the real world, carefully listen or read and follow instructions, stay organized, maintain self control, and persevere, which all correlate to skills needed in the trades. Customizing also adds a bit of creativity.

**Shift Availability:** Full-time, 1st Shift (Days)

**Post HS Education:** Some 2-year college

**Add'l Edu. Details:** Throughout high school I took four years of metal/fabrication/welding classes. I am currently finishing up

**What trades-related courses did you take in school?**

Welding

**What construction software or technologies do you have training in?**

CNC

**Any Safety Certificates:**

**Add'l Details:**

**Why is an apprenticeship an attractive option to you?**

I would love to learn more about the pipeline and steamfitting careers and further my education on welding. I would also like to meet professionals with lots of work experience. Another reason would be lack of income because I still live with my parents due to attending full-time Technical College, only allowing me to work a part-time job while also paying some bills and other expenses

**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

I am interested in building trades in general because I have realized that hands-on is the best way for me to learn, and it is the type of work I enjoy the most. I am specifically interested in the pipetrades because I really enjoy welding and building or creating things.

# Pre-Apprentice Candidate Pipefolio

**Disciplines of Interest:** Steamfitter (Pipefitter), Steamfitter (Pipefitter), Pipe Fabricator

**Work Zones in Preference Order:** Fond du Lac Area (Orange), Appleton Area (Green), Green Bay Area (Yellow)

**Relevant Experience Level:** A little. No specific trade experience, but I have general skills in construction or welding., A little. No specific trade experience, but I have general skills in construction or welding

**Years of Full-Time Work Experience:** 4-6, 1-3

**Welding Experience:** TIG - Some Knowledge, Stick - Some Knowledge, TIG - Skilled, TIG - Some Knowledge, Stick - Some Knowledge, Stick - Skilled

**Tell us about any jobs where you've learned pipetrades relevant skills:**

Have not had one yet. Al tho I did learn a lot about pipe fitting and pipe welding in school in Wyoming, Helped a mobile welder around town learned some things from him

**Tell us about any hobbies that have boosted pipetrade-relevant skills:**

Practice welding in my free time, spend time with family, hunting of all kinds also helped my dad with construction, such as building houses from the ground up. Have done full remodels on houses., Welding is a hobbie of mine. I enjoy the outdoors, hunting, traveling. I also help my dad and others with weekend work they need help with. Construction, roof work

**Shift Availability:** Full-time, Full-time

**Post HS Education:** Other Relevant Courses & Certifications, Other Relevant

**Add'l Edu. Details:** Graduated form western welding academy in Gillete Wyoming. Stick out 2 inch cert, tig combo cert, tig out cert, tig out

**What trades-related courses did you take in school?**

Math-Algebra, Building Trades / Construction, Metals, Welding, Metals, Welding

**What construction software or technologies do you have training in?**

**Any Safety Certificates:** OSHA 10, OSHA 30, OSHA 10, OSHA 30

**Add'l Details:**

**Why is an apprenticeship an attractive option to you?**

To gain more experience in real life scenarios and focus on the opportunity to learn and grow in welding from experienced professionals. I have wanted to weld as a career since I was younger. I want a career in welding and this position will help me get my foot in the door., To learn more from other people and get my foot in somewhere to learn more skills

**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

Welding, I'm interested in a career in the operates because I enjoy hand on work and solving real world problems. I like the idea of building and maintaining systems that individuals rely on every day. I'm also drawn to the stability's and opportunities in the trade.

# Pre-Apprentice Candidate Pipefolio

**Disciplines of Interest:** Steamfitter (Pipefitter)

**Work Zones in Preference Order:** Appleton Area (Green)

**Relevant Experience Level:** A little. No specific trade experience, but I have general skills in construction or welding.

**Years of Full-Time Work Experience:** 4-6

**Welding Experience:**

**Tell us about any jobs where you've learned pipetrades relevant skills:**

I was a carpenter in remodeling and I feel like measuring and finding correct angles for my cuts would be something towards the pipe trades.

**Tell us about any hobbies that have boosted pipetrade-relevant skills:**

I'm always tinkering on my vehicles or with my motorcycle when I get the chance too. I also do carpentry on the side, always building little projects/ remodeling

**Shift Availability:** Full-time, 1st Shift (Days)

**Post HS Education:** No

**Add'l Edu. Details:**

**What trades-related courses did you take in school?**

**What construction software or technologies do you have training in?**

**Any Safety Certificates:** OSHA 10

**Add'l Details:**

**Why is an apprenticeship an attractive option to you?**

I see an apprenticeship as a building block for my future and great way to learn a lot of experience head on.

**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

I have worked construction since ive been out of highschool. I have worked on cars/ motorcycles since I've been 16. My experience Ranges from construction material testing, carpentry, soil drilling and being a blaster. I have an interest in this path because it seems like a good career to be hands on in and a lot I can learn.

# Pre-Apprentice Candidate Pipefolio

**Disciplines of Interest:** Pipe Fabricator, Steamfitter (Pipefitter)

**Work Zones in Preference Order:** Green Bay Area (Yellow), Appleton Area (Green)

**Relevant Experience Level:** A little. No specific trade experience, but I have general skills in construction or welding.

**Years of Full-Time Work Experience:** 10+

**Welding Experience:** MIG - Some Knowledge, Flux Core - Some Knowledge, Stick - Some Knowledge

**Tell us about any jobs where you've learned pipetrades relevant skills:**

At my current employer there is need to understand drawings and schematics for electrical assemblies. I am also certified to operate a forklift.

**Tell us about any hobbies that have boosted pipetrade-relevant skills:**

My main hobby would be a small hobby farm. Some of skills I have that would transfer over would be accountability, chores need to be done everyday. Problem solving is another transferrable skill, everything isn't going to go exactly to plan and you need to be able to solve problems and figure things out. I also do some light welding on equipment when it breaks. These would be some of the skills I feel a future employer would find transferrable to construction trades.

**Shift Availability:** Full-time, 1st Shift (Days), Overtime

**Post HS Education:** No

**Add'l Edu. Details:**

**What trades-related courses did you take in school?**

Welding, Metals

**What construction software or technologies do you have training in?**

AutoCAD

**Any Safety Certificates:**

**Add'l Details:**

**Why is an apprenticeship an attractive option to you?**

The apprenticeship is attractive to me for the fact that it is on the job training as well as in the classroom. I feel I am better able to learn by having hands on experience as well as in the classroom.

**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

I have been in manufacturing for the past 14 years. I am looking to learn a skill. I took welding classes in high school but didn't pursue it after graduation. I am looking to join a trade where I can learn new skills and abilities. Welding and Fabrication is a skill that I would like to learn to proficiently.

# Pre-Apprentice Candidate Pipefolio

**Disciplines of Interest:** Plumber, Steamfitter (Pipefitter), HVAC/R Service Tech

**Work Zones in Preference Order:** Green Bay Area (Yellow), Appleton Area (Green), Fond du Lac Area (Orange)

**Relevant Experience Level:** None. Nothing even close-but I'm a hard worker and willing to learn!

**Years of Full-Time Work Experience:** 1-3

**Welding Experience:**

**Tell us about any jobs where you've learned pipetrades relevant skills:**

Working alongside my handyman father, he has worked residential plumbing jobs in which i have watched and helped him problem solve and complete these jobs

**Tell us about any hobbies that have boosted pipetrade-relevant skills:**

My dad is a self employed handyman in the area. Growing up I have always tagged along on different types of jobs he was tasked with. This has helped me get a basic understanding of construction trades.

**Shift Availability:** Full-time, 1st Shift (Days), Overtime, Weekends

**Post HS Education:** Some 4-year college

**Add'l Edu. Details:**

**What trades-related courses did you take in school?**

Math-Algebra

**What construction software or technologies do you have training in?**

**Any Safety Certificates:**

**Add'l Details:**

**Why is an apprenticeship an attractive option to you?**

As I previously mentioned, being that my father is a handyman I have always been in work environments where I don't know exactly what to do but i'm open and eager to learn. An apprenticeship requires you to do the same and I find that to be a good option for me.

The work while learning aspect of an apprenticeship is also an attractive reason for me. Being able to help my family out financially while also expanding my knowledge off and on the job site is honestly very important to me.

**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

I have always had a passion for learning and physical work

# Pre-Apprentice Candidate Pipefolio

**Disciplines of Interest:** Steamfitter (Pipefitter), Pipe Fabricator

**Work Zones in Preference Order:** Green Bay Area (Yellow), Appleton Area (Green)

**Relevant Experience Level:** A little. No specific trade experience, but I have general skills in construction or welding.

**Years of Full-Time Work Experience:** 0

**Welding Experience:** Flux Core - Some Knowledge, TIG - Some Knowledge, Stick - Some Knowledge, MIG - Skilled, MIG - Some Knowledge

**Tell us about any jobs where you've learned pipetrades relevant skills:**

Worked in a sign shop as a metal fabricator for 9 months and improved my proficiency in MIG welding, fabrication, and blueprint reading.

**Tell us about any hobbies that have boosted pipetrade-relevant skills:**

I enjoy working out which will help me with heavy lifting which is sure to be encountered in the trades. I make small MIG and stick welding projects on the side as a hobby which could boost my skills in fabrication and welding

**Shift Availability:** Part-time, Full-time

**Post HS Education:** Other Relevant Courses & Certifications

**Add'l Edu. Details:** Currently enrolled in welding program at NWTC

**What trades-related courses did you take in school?**

Welding

**What construction software or technologies do you have training in?**

Solidworks

**Any Safety Certificates:**

**Add'l Details:**

**Why is an apprenticeship an attractive option to you?**

Hands on training is 100% my style and the fact that most of the apprenticeship is on the job training was really enticing. Being paid to learn also helps and is more motivating to me than paying for classes.

**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

I am interested in a career in the building trades because I enjoy working with my hands and making quality work that I can be proud of. I also like the benefits the trades offer.

**Welding Experience:** Stick - Some Knowledge, Flux Core - Some Knowledge

**Tell us about any jobs where you've learned pipetrades relevant skills:**

Was a gen laborer for tradesmen international on and off for about 2 years doing various clean up demo jobs helping with whatever was needed. Working at bergstrom helped me solve problems better and more efficiently

**Tell us about any hobbies that have boosted pipetrade-relevant skills:**

I love figuring out how things work and putting them together. Puzzles,lego etc brain teasers. Love to learn and doing things that keep my mind working

**Shift Availability:** Full-time, Overtime, 1st Shift (Days)

**Post HS Education:** No

**Add'l Edu. Details:**

**What trades-related courses did you take in school?**

Welding, Woodworking / Woodshop, Metals, Drafting and Design, Automotive Technology, Math-Geometry

**What construction software or technologies do you have training in?**

AutoCAD

**Any Safety Certificates:**

**Add'l Details:**

**Why is an apprenticeship an attractive option to you?**

Being able to learn while working is what I look forward to the most

**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

Being able to work with my hands and brain is something I've always tried to find. Love being able to drive by an old site and know that I helped build that. Always trying to continue learning and gaining skills that are universal. My father was in the trades and I always looked up to him as a role model (iron worker) hopefully one day I can be someone's role model.

# Pre-Apprentice Candidate Pipefolio

**Disciplines of Interest:** Steamfitter (Pipefitter)

**Work Zones in Preference Order:** Fond du Lac Area (Orange)

**Relevant Experience Level:** A little. No specific trade experience, but I have general skills in construction or welding.

**Years of Full-Time Work Experience:** 7-9

**Welding Experience:**

**Tell us about any jobs where you've learned pipetrades relevant skills:**

Large scale chemical operations. Operating systems with steam, glycol, organic and aqueous systems, and pyrophoric materials.

**Tell us about any hobbies that have boosted pipetrade-relevant skills:**

Like I said, 3 years in chemical operations, some of which involved directly operating steam-filled pipes, glycol lines, as well as working with fluid that could spontaneously combust on exposure to oxygen (pyrophoric materials.) My attention to detail and history of preventing leaks should translate well. I also once replaced my showerhead.

**Shift Availability:** Full-time, 1st Shift (Days), 2nd Shift (Nights), Weekends, Overtime

**Post HS Education:** Some 4-year college

**Add'l Edu. Details:** I'm a college flunky, studied chemistry for 4 years.

**What trades-related courses did you take in school?**

Math-Algebra, Math-Calculus, Math-Geometry, Math-Precalculus / Trigonometry

**What construction software or technologies do you have training in?**

AutoCAD

**Any Safety Certificates:** First Aid / CPR

**Add'l Details:**

**Why is an apprenticeship an attractive option to you?**

1 on 1 training from a Master Plumber is appealing as I feel it's a good way to learn. Specifically, being able to ask questions and get answers in real time is huge for me. I like to ask questions on why one system would work and why specific alternatives would or would not work.

Additionally, a proven and well-established system of classroom teaching via a union feels

**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

I've worked 3 years as a large-scale Chemical Operator and have some familiarity with pipe systems, liquid flow, and siphons. The field has interested me ever since, and drives me towards the behind-the-scenes hardware work.

More importantly, I seek a career where I have a long-term goal of mastery. Many career fields are simply a job with no meaningful growth, whereas a trade has clearly-defined growth and a path for learning.

**Any Safety Certificates:** First Aid / CPR, First Aid / CPR

**Add'l Details:**

**Why is an apprenticeship an attractive option to you?**

There's a lot of growth to learn and see different things as my future goes on, I like to learn new things and try and learn as much as i can while i have the opportunity. I also know how well the pay can be for a professional tradesmen., It gives me the opportunity to learn and grow while working at the same time. I always wanted something where it has endless options and this would best suite that.

**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

Where i currently work we work we are a fabrication place and i enjoy building things, fixing things and dealing with angles and measurements. We work on dairy products and running dairy tubes and such and it interest me to be on diffrent jobs working on different said jobs., What most intrest me is the ability to do and or make something and it be meaningful. I take pride in my work and nothing better suited that then something that everyone needs in a day to day basis. I'm also a very hands on person and i've always liked doing stuff with my skills wether it be building something, fixing it and or learning about something new and trying it.

**Welding Experience:** Flux Core - Some Knowledge, Mig - Some Knowledge, Stick - Some Knowledge, Flux Core - Some Knowledge, Mig - Some Knowledge, Stick - Some Knowledge

## Tell us about any jobs where you've learned pipetrades relevant skills:

I currently work in sewer and water so I have experience in grade and slope work associated with pipe. Along with the general pipe cutting and prep work associated with any kind of pipe., I have worked sewer and water for a little over a year now and am constantly working with a team. Communication is a huge key when doing open cut work because if you are not communicating work slows down. And safety is at risk. I learned how to read plans and have experience with flow and pitch on pipes.

## Tell us about any hobbies that have boosted pipetrade-relevant skills:

I love to hunt and fish. These teach me how important patience and preparation is for success. If I don't scout or prepare for a hunt. Chances are that hunt won't be as good as it could have been if I would have taken the time and effort to prepare., I love spending time in the outdoors. From hunting to fishing I find enjoyment and comfort when I am outside in nature. Hunting and fishing specifically have taught me a lot that can transfer over to the trades such as learning from mistakes, asking questions, problem solving and planning. And realizing somtimes there's more then one solution to problems.

**Shift Availability:** Overtime, Full-time, 1st Shift (Days), 2nd Shift (Nights), Full-time, Overtime, Weekends, 2nd Shift (Nights), 1st Shift (Days)

## What trades-related courses did you take in school?

Building Trades / Construction, Engineering, Math-Algebra, Math-Geometry, Metals, Welding, Woodworking / Woodshop, Drafting and Design, Automotive Technology, Woodworking / Woodshop, Welding, Metals, Math-Algebra, Engineering, Building Trades / Construction, Automotive Technology

## What construction software or technologies do you have training in?

CNC, Revit, Inventor, Revit, CNC, Inventor

**Any Safety Certificates:** OSHA 10, First Aid / CPR, OSHA 10

**Add'l Details:**

## Why is an apprenticeship an attractive option to you?

For me it's about job security and having a bright future to be able to provide for my future family. And a apprenticeship allows that to happen for many., I want to progressively grow my skills and knowledge day after day and I feel an apprenticeship does just that. By then end of my 5 years I want to look back at everything I was taught and be able to teach that to more young, and new employees.

## What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I want to be apart of something where I can look at my work when all done and say "I helped build that". I've worked in the trades for a little bit now and haven't found passion in the work I do. So I want something where I can have a bright, rewarding future., I have always wanted a job that I can turn into a life long career. Something that will always be in demand and that I enjoy doing. A career that supports both me and my future family so we won't have to worry about bills, or losing a job to a robot. Ever since I was a kid driving around seeing buildings go up from start to finish. I have tried other jobs but none of these have given me the strong feeling I have with the building trades. Specifically in being a steam fitter.

**Why is an apprenticeship an attractive option to you?**

Get paid while I learn and the benefits that it will provide for my future, An apprenticeship is attractive to me because it lets me earn a living while learning a skilled trade the right way, instead of taking shortcuts or just guessing in the field. I learn best by doing the work hands-on alongside experienced journeymen who know the trade and can pass that knowledge down. The combination of classroom training and real jobsite experience makes sense to me, and I respect that the apprenticeship holds people to a

**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

what interest me in a career in the pipe trades is the benefits, and I have always enjoyed constructing things and welding, I want to get into HVAC because I like working with my hands and fixing real problems, not sitting behind a desk. I've always been the type of person who wants to understand how things work and why they fail, and HVAC is a trade where you're constantly troubleshooting mechanical and electrical systems that people depend on every day. I enjoy physical work, using tools, and taking something that isn't working and making it right again. In a place like Wisconsin, heating and cooling isn't a luxury — it's a necessity — and I take pride in the idea of doing work that keeps people safe and comfortable.

Welding, Math-Algebra, Math-Geometry, Welding

**What construction software or technologies do you have training in?**

**Any Safety Certificates:**

**Add'l Details:**

**Why is an apprenticeship an attractive option to you?**

I believe this apprenticeship is great way to start on something I am interested in. Learning as I go while getting paid. I have also heard great things about apprenticeships. I will be building on my skills. An apprenticeship also gives many more opportunities. I'm interested in gaining experience hands on., Im attracted to an apprenticeship because it allows me to learn while getting hand on experience and builds on the skills I already have.

**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

I have heard great thing about the company. Welding is something that I find very interesting. I enjoy hand on work and problem solving. The variety of projects in pipe trades is what interested me., I've always been drawn to the building trades because I like hands-on work and seeing the results of my effort. I have three years of welding experience, including shipbuilding in Sturgeon Bay.

I'm interested in the pipe trades because it builds on my welding skills. I enjoy the mix of physical work and problem-solving, and I'm motivated to grow through the apprenticeship and become a skilled journey person.

**Add'l Details:**

## Why is an apprenticeship an attractive option to you?

I am interested in pursing and building a career in welding! My girlfriend suggested I look into an apprenticeship program because her grandfather, dad and brother all started their electrical careers through apprenticeship in the union! I want to build my skill and knowledge and be able to work well doing it!, I want to learn and gain experience., I want to be the best welder I can be. Experience different ways to weld.

## What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I worked in Bay Shipping Marina in Sturgeon Bay doing basic welding. I am interested in Pursing a career in welding., I've worked for agency called PDS in Green Bay, Wi that gave me work for Fincantieri Bay Shipbuilding (FBS). For the times I've worked for the shipyard I did some steel fitting work like torching and welding parts and I enjoyed. Only thing I didn't like about it was that it's a temporary job since it's through an agency. I'd like to take the next step and to try to make it a career.
I have my high school diploma from Preble High School in Green Bay, Wi. If I can have a opportunity to get an apprenticeship I will make the most of it to make a good career as a steamfitter or pipe fabrication. Thank you., I find it interesting

**Years of Full-Time Work Experience:**

**Welding Experience:** Stick - Some Knowledge, MIG - Some Knowledge, Stick - Some Knowledge

**Tell us about any jobs where you've learned pipetrades relevant skills:**

When it comes to jobs. Nothing. I haven't worked a job that dealt with pipe trades., I've been in manufacturing for as long as I can remember. I have done sandblasting, worked with sand cores and plastics. I don't think those would applicable to the pipe trades. And then on the side I've worked vehicles. So for skills, the main big one would have to be attention to detail.

**Tell us about any hobbies that have boosted pipetrade-relevant skills:**

I'll help my father weld once in a while we're not the best but it's definitely a learning experience. Same goes for when he needs help building or adding additions to the house or yard., One of my main hobbies is working on cars. I've spent a lot of time doing my own repairs, upgrades, and modifications — everything from installing intakes and exhaust systems to troubleshooting mechanical issues. Working on vehicles has helped me build skills that transfer directly into the construction trades.

**Shift Availability:**

**Any Safety Certificates:** First Aid / CPR, First Aid / CPR

**Add'l Details:**

**Why is an apprenticeship an attractive option to you?**

The apprenticeship is an attractive opportunity to me since the schooling needed to become a Journeyman is quite expensive and would be hard to accomplish while working., I think it is the perfect opportunity to grow myself as a welder.

**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

There are multiple reasons as to why I am pursuing a career in pipetrades. The main reason I want to join is I enjoy challenging myself and I feel as though this career will give me many new challenges. Another reason for my interest is the benefits and pay are quite appealing., Welding in general is a very challenging career that is very hands on and requires a lot of skill to excel in. This challenge is what I strive for and what keeps me loving the trade.

I honestly feel as though I am plateauing in my welding career and would really appreciate a new challenge and I think that the pipetrades is the perfect opportunity to expand my craft and provide the challenge that I am looking for.

**Welding Experience:** Knowledge, MIG - Some Knowledge, TIG - Some Knowledge, Stick - Some Knowledge, Flux Core - Some Knowledge, MIG -

## Tell us about any jobs where you've learned pipetrades relevant skills:

I was a welder/fitter at Burger Boats in Manitowoc, WI where i was responsible for fitting up and welding various arrangements and items for an aluminum yacht project. Every weld i did had to be either pressure tested or pen-dye tested. I was also in charge or performing repairs on welds in the boats water and oil tanks. I was required to use grinders, band saws, files, die grinders, brake presses, etc to make parts fit properly.

After that i went to work as a fabricator at Phil's Pumping & Fabrication in Chilton, WI.

## Tell us about any hobbies that have boosted pipetrade-relevant skills:

My current hobbies have no correlation with my career/job at the moment., Most of my hobbies are in no correlation with my career choice. The only hobby of mine that is would be working on vehicles or tinkering with them. I believe that boosts problem solving skills and critical thinking skills., I am a very outdoorsy person but i do not think any of my hobbies transfer skills to construction trades

**Shift Availability:** Full-time, 1st Shift (Days), Full-time, Full-time, Overtime, Weekends, 1st Shift (Days), 2nd Shift (Nights)

AutoCAD, CNC, AutoCAD, Inventor, CNC, AutoCAD, CNC, Inventor

**Any Safety Certificates:** First Aid / CPR, First Aid / CPR

**Add'l Details:**

## Why is an apprenticeship an attractive option to you?

I would like to further my education while also making a good wage doing so while getting great benefits., i would like to expand my skills and further my knowledge of my current trade while making a competitive wage at the same time., Because it opens the door to earn more money and learn more skills

## What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I just enjoy welding and fabricating, I've always taken an interest in building things and doing things with my hands. In high school i took a basic welding class and started to really enjoy it so i looked farther into it. I then went to a trade school for welding and really enjoyed the pipe course i had taken., I am currently a shop fabricator but have always wanted to get into pipe welding/fabrication and start making more money.

**Any Safety Certificates:**

**Add'l Details:**

**Why is an apprenticeship an attractive option to you?**

It's a wonderful career , all the trades are interesting , I want to learn something I can use forever and learn it the right way, Learning and earning, Like I said I want a stable line of work to provide for my family . I have worked in asphalt industries my whole life and it just lacks consistency and ability to progress .. I'm excited to move into a field that offers them things to me.

**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

I have working in asphalt maintenance basically my whole life since I was a boy with my pa. I'm ready to learn something new and creat a steady source of income to provide for my wife and children ., Long term steady work and good benefits for my family, I love working with my hands . I want to secure a job that's not under threat from ai and automation. I know a few people in the trades and they seem to enjoy their jobs.
