Youth Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

HVAC/R Service Tech

Work Zones in Preference Order:

Appleton Area (Green)

High School:

Kaukauna High School

Relevant Experience Level:

Some. I have worked for a plumber, steamfitter or HVAC/R contractor.

Years of Full-Time Work Experience:

Welding Experience:

MIG - Some Knowledge, TIG - Some Knowledge, Stick - Some Knowledge, Flux Core - Some Knowledge

Shift Availability:

Full-time, summer employment

Tell us about any jobs where you've learned pipetrades relevant skills:

I have worked in a non union residential hvac company

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I like to work on my car

What trades-related courses did you take in school?

Welding, Electrical Trades / Electronics

Why is an apprenticeship an attractive option to you?

Because it will provide me with all of the education that I would need free of charge

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Because it's the kind of work where your rarely sitting down and always doing something.

What construction software or technologies do you have training in?

Solidworks

Any Safety Certificates:

OSHA 10

Add'l Details:

Contact Information:

To speak with candidate #1256978, access your Candidate Request Tool at <https://pipetradecareers.com/contractors/candidates/WI400>

Youth Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

Pipe Fabricator, Plumber

Work Zones in Preference Order:

Appleton Area (Green)

High School:

Seymour community high school

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:**Welding Experience:**MIG - Skilled, TIG - Some Knowledge, Stick - Some Knowledge, Flux
Core - Some Knowledge**Shift Availability:**

Full-time, summer employment

Tell us about any jobs where you've learned pipetrades relevant skills:

I've mainly worked as farm help, my main role is dairy cow milking, if needed, field work such as hay cutting, chopping, and corn planting, combining, and filling silo bags, all of this had greatly increased my productivity and ability to stay on a single task while still maintaining the dual purpose of multi-tasking

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I ride multiple power sports equipment such as and not limited to, motorcycles, four wheelers, dirt bikes, being on these power sports I have increased my hand eye coordination and helping my steadiness while doing something intricate. I enjoy working on my own vehicles, which have helped me learn the value of patience and personal responsibility, making sure I'm always prepared and never to take the short cuts

What trades-related courses did you take in school?

Automotive Technology, Building Trades / Construction, Drafting and Design, Engineering, Math-Geometry, Math-Algebra, Metals, Welding

Why is an apprenticeship an attractive option to you?

I'm in love with the idea of learning more and more about how I can approve as a person but as a hard working individual, while also getting paid to end up debt free after my hard work. I also feel the flexibility of everything would help me greatly with growing skills in and out of school

What construction software or technologies do you have training in?

CNC, Acorn, AutoCAD

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

My interest in the line of pipe trades is that I'm being held to a high standard for a reason, I can be looked up upon as a roll model for hard work and dedication, it has the high power of job security knowing what ever is in the future I'll always be needed and not pushed aside. The feeling of passing by something and saying I did that, or that I know how it's done and watching your work make the world go around.

Part-time, school year employment

Tell us about any jobs where you've learned pipetrades relevant skills:

I have worked for my dads tent company, "Tents By Tellock", since I was about 10 years old. I was doing physical labor and learned how to develop a strong work ethic early. I learned how to do many hands-on projects and build things together. I also worked with others while on the job, so I am able to communicate with people very well. I worked as a front desk/concession stand clerk at my local pool the past summer aswell. I learned more about working with others and built stronger communication skills throughout my time there.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I have always played sports growing up which has kept me very fit and active allowing me to work in various conditions. Playing sports has also taught me how to be a leader and work with others in order to reach a common goal. This skill can be translated to construction trades when working in team settings on a project. I also enjoy working outside side and with my hands, and often spend my free time doing just that. Having enjoyment in doing this, I have built a strong work ethic for myself.

What trades-related courses did you take in school?

Welding, Math-Algebra

Why is an apprenticeship an attractive option to you?

I have always been interested in a work-study style education program so I can learn on the job. The idea of being able to learn while doing hands on work makes me feel very confident in being able to learn productively. In addition, being able to start a career early has always been a huge goal for me. I have high expectations for myself after high school and an apprenticeship would assist me in meeting those expectations.

What construction software or technologies do you have training in?

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I have always been interested in a career in the building trades because I prefer doing hands on work. I am a very fast learner, and I am a visual learner who excels at taking verbal instruction and quickly applying them to physical tasks. I have been exploring other careers in the trades, and the pipe trades stuck out to me because it is an opportunity to involve blueprint reading, basic math, welding, and other skilled trades together in one job. It is also a job where each day is a little different and not the same thing every day. I find interest in working outside, with tools, and other heavy equipment. I also have distant family that owns a plumbing company, which has also brought some of my interest to persue a career in the pipe trades.

Any Safety Certificates:

First Aid / CPR

Work Zones in Preference Order:Appleton Area (Green) **High School:** Appleton East Highschool**Relevant Experience Level:**

None. Nothing even close-but I'm a hard worker and willing to learn!

Years of Full-Time Work Experience:**Welding Experience:****Shift Availability:**

Full-time, summer employment, Part-time, school

Tell us about any jobs where you've learned pipetrades relevant skills:

I have not any applicable skills that relate to pipe trades. I have worked Kohls, and I'm currently employed at Walmart. Although both of these don't have any applicable skills to the pipe trades, they have taught me time management skills, and how it feels to work in a fast paced environment which both are applicable skills that would be benefit me.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I'm an active person, I regularly go to the gym and go on runs. Both of these have helped me build strength and discipline which are both transferable skills in the trades. I'm used to pushing myself and staying consistent.

What trades-related courses did you take in school?

Math-Algebra, Math-Geometry, Drafting and Design

Why is an apprenticeship an attractive option to you?

I'm currently in a youth apprenticeship program called GPSED, and it's made for kids like myself who are more hands on. This program lets me get out of school at 11am and earn work credits while still learning all the basic math and reading skills. This apprenticeship interested me so much because GPSED is currently not having many apprenticeships available. I would be able to commit my time to this apprenticeship and learn real world experience that would jump start my career which is exactly what I'm looking for right

What construction software or technologies do you have training in?

I'm looking for a stable career that can set me up for the future.

Any Safety Certificates:**Add'l Details:****Contact Information:**To speak with candidate #914665, access your Candidate Request Tool at <https://pipetradecareers.com/contractors/candidates/WI400>**Additional Information:**If you have questions on candidates or the Pipefolio process, please contact: Career@UA400.org**Contractor Notes:**

Tell us about any jobs where you've learned pipetrades relevant skills:

While working at C&R Pumping, I learned skills that relate to pipe trades such as how to use equipment safely, handled hoses, and making sure everything runs properly on the job site. the job requires me to pay attention, follow directions, and work safely around equipment and other workers.

I've built a great work ethic and got used to physical labor, working outside, and being part of a team. I learned how important safety is and how work efficiently to Get the job done. these skills will help me succeed in the pipe trades.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I like working with my hands fixing or building something. I've done car maintenance such as oil changes, small repairs and help out if something is broken at home. During those repairs it has helped me get better with tools and following directions more carefully. It all so taught me to not rush thing and to pay more attention, so the job is done well.

I also like to stay active and like working on projects that require teamwork, problem solving, and work ethic. I've done sports for most of my life and teamwork really comes

What trades-related courses did you take in school?

Automotive Technology, Math-Algebra, Math-Geometry, Robotics, Woodworking / Woodshop

Why is an apprenticeship an attractive option to you?

An apprenticeship is a good option for me because I can learn while doing the job with a professional. I can learn better outside of the classroom with hand-on experience, so I understand the assignment better. I also like that I can make money while learning so that I can become independent.

it gives me a good path into my career and the chance to learn form people with

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

what interested me to get into the trade is I always liked working with my hand and figuring out how things work. I have spent time working on engines in and out of school, which got me interested into the trades. I prefer working while being active and doing hands on activates better than sitting at a desk. I enjoy learning how new things work and seeing how far I've come from while seeing my efforts are put to good use.

The reason I want a career in the pipe trades is I have a few family members who work in HVAC and told me it was a solid choice to consider if you want to go into the trades. I'm also interested into how heating and cooling systems work, how to install them and fix them. I think it's an important job so that buildings can run properly and gives me a chance to learn useful skills while building my career.

What construction software or technologies do you have training in?

intro to computer science

Tell us about any jobs where you've learned pipetrades relevant skills:

When I was cart running I learned about hard work and I developed a hard work ethic

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I really like to weld and I am good at it too. Any time I am given an opportunity to weld I take it because I think it is fun.

What trades-related courses did you take in school?

Engineering, Math-Algebra, Math-Geometry, Metals, Welding

Why is an apprenticeship an attractive option to you?

I really want a youth apprenticeship because of the experience it brings and how it looks good on a resume. I also like how it gives me long term opportunities. I once I graduate high school I can start off with a good career path

What construction software or technologies do you have training in?

Solidworks

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Ever since I was in my freshman year of high school I knew I wanted to be a welder. I wanted a career in welding because I took up a welding class and I really enjoyed it. After some research I found out that welders made good money and that that Wisconsin needed welders so that guaranteed good job security. I also wanted to be in the building trades because I am good at physical work. The only problem was that I didn't know what kind of welder I wanted to be. So I asked one of my friends for help and they recommended a career in the pipe trades. When I looked into it I was interested and I learned that some of the companies that offer work in pipe trades gave youth apprenticeships opportunities. So I went to the youth apprenticeship fair at NWTC and then I found out about ua400. That convinced me to go into the pipe trades.

Tell us about any jobs where you've learned pipetrades relevant skills:

I work a seasonal job doing dock work at a company called Gowey Docks. At this job I have learned basic skills for using tools like ratchets and sockets, impacts, and wrenches. I've also learned to work with a team and get jobs done efficiently and in a timely manor. I also currently work at Dairy queen as both a cook and a cashier taking orders. This job has helped me with costumer service, working with a team, and handling money/ other responsibilities wisely and appropriately.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I like to work on my own car and help my mother with hers, I enjoy fixing things mechanically and understanding the concepts and theory behind how they work. I feel these skills are transferable because they are mechanical and trades related as well as getting comfortable with different basic tools and being in a hands on setting. I also enjoy helping my father with projects of his like renovating our home to learn and see the building process of many things first hand like framing walls, putting in headers and using many tools like a miter saw, drill, sawzall ect.

What trades-related courses did you take in school?

Automotive Technology, Math-Algebra, Electrical Trades / Electronics, Building Trades / Construction, Construction Technology, Math-Geometry, Metals, Welding

Why is an apprenticeship an attractive option to you?

Apprenticeship is a very attractive option to me because I like the idea of working with journeymen of a trade who can help and correct me on active job sites. I also like the idea of apprenticeship because it gives me an opportunity to test the waters on a trade without diving head first so I can work on smaller fundamentals of a trade young and see how I enjoy things. Finally I like the idea of getting involved in an apprenticeship because I hate the idea of student debt and this gives me an opportunity to get paid while I learn.

What construction software or technologies do you have training in?

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I have taken interest in the pipe trades mainly plumbing. I say this because I have found myself working with my hands and enjoying much of the work in shop classes. I also want a steady job and to learn valuable skills like plumbing or HVAC while I'm young to maximize opportunities for my future. Another thing I'm passionate about is owning a house and when this time comes I want to be able to fix my own home as a handy man and create/ work on my own projects. I know that learning these valuable skills while I'm young will not only help me with being my own handy man and worker but also help with getting a steady and well paying job.

Full-time, summer employment

Tell us about any jobs where you've learned pipetrades relevant skills:

I have worked at Walmart as an online shopper. I would pick orders for people and once they arrived at the store I would take them out. I had to quit my job as they wouldn't work around my college hours.

I also worked Dairy Queen and SandBar at the same time. At Dairy Queen I took orders and prepared the order and worked drive thru. At the Sand Bar which I am still employed with I am a good runner. I help prepare the food that is ordered and deliver it to the table.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

Taking apart things and putting them back together, building birdhouses, and playing with power tools. I think it boosts my hand eye coordination and helps me be able to use my hands for long periods of time.

What trades-related courses did you take in school?

Welding

Why is an apprenticeship an attractive option to you?

An apprenticeship will give me the ability to try what I have worked hard on. I have had my mind set on this and would love to gain work experience from it. I know a lot of employers look for experience and it's hard to gain that experience if you can't be hired without it. An apprenticeship will provide me the experience I need to become successful!

What construction software or technologies do you have training in?**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

I have always learned better when I was able to work with my hands. I would put together tinker boxes from this subscription that my parents signed me up for and I fell in love with them. Once I got older I knew I needed a job that didn't have me sitting behind a desk and one that I could be using my hands.

Once I got into High School I took automotive and fell in love. My parents pushed me to look into more things in the trade field and I took welding and I fell in love with it.

Years of Full-Time Work Experience:**Welding Experience:**

MIG - Some Knowledge

Shift Availability:

Full-time, summer employment, Part-time, school

Tell us about any jobs where you've learned pipetrades relevant skills:

I have not held any official jobs other than helping my neighbors with shoveling and landscaping. I know how to dig, move materials and work outdoors. I learned the importance of showing up on time and finishing what I started. These jobs also taught me how to pay attention to detail, follow directions and work safely. Working for neighbors has helped me develop a strong work ethic and a positive attitude that are important for learning from experienced workers and being successful in a youth apprenticeship.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I enjoy playing football and weightlifting because they build physical ability and mental toughness. Weightlifting helps me to build strength, stability and endurance, which are important for lifting materials, using tools and working in physically demanding positions. Football teaches me to stay disciplined, push through discomfort and remain consistent. I think these skills will help me to handle long hours, challenging conditions and the demands of a job site. I know how to listen, accept feedback so I can improve and communicate clearly to work toward a common goal.

What trades-related courses did you take in school?

Math-Algebra, Math-Geometry, Woodworking / Woodshop, Building Trades / Construction

Why is an apprenticeship an attractive option to you?

A youth apprenticeship is an attractive option because it will let me gain real world experience while earning money. I have never seen myself working in an office. I like to move, learn by doing and interact with experienced professionals who can teach me how to follow in their footsteps. I like that the trades can offer good pay, job security and opportunities to advance so I can provide for myself. I like being able to create with my hands and be part of building something that others can use.

What construction software or technologies do you have training in?

I am interested in the building trades because I enjoy working with my hands and learning by doing. Through my school's ACE Academy I got the chance to try a little of everything from masonry to landscaping. Out of everything I tried I liked plumbing the best. I liked the welding and pipe fitting and learning from visiting plumbers about what they do. In my school's shop classes I learned how to use hand and power tools, follow instructions, and work safely.

Any Safety Certificates:

First Aid / CPR

Add'l Details:

One time at home I found a leaking pipe under the sink that left water at the bottom of the cabinet. I loved getting the tool to reattach and tighten it and run the water for a few seconds to make sure it was fixed. I liked taking what I learned at school and following the steps to fix something for my family. That's when I really thought about plumbing as a career.

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:

Welding Experience:

TIG - Some Knowledge, Flux Core - Some Knowledge, Stick - Skilled,
MIG - Some Knowledge

Shift Availability:

Full-time, summer employment

Tell us about any jobs where you've learned pipetrades relevant skills:

i have worked at Faulks brothers cons. in Waupaca for 2 years as a diesel mechanic / fabricator and have learned a lot about preventative maintenance and out of placement welding on different equipment under trailers and on excavator arms dump truck bed repairs and repairing buckets on skid steers and front end loaders i learned the importance of cleaning and good preparation before you weld and how important weld roots and having good fusion is.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

i build mud trucks and different cars i have to fabricate and think of ways to be able to turn an old trucks stock frame driveshafts transmission and engine to be able to be structurally sound and be able to handle the abuse and preform the way the operator expects it to.

What trades-related courses did you take in school?

Math-Algebra, Welding, Woodworking / Woodshop, Robotics, Metals, Engineering, Math-Geometry

Why is an apprenticeship an attractive option to you?

because I would be able to weld and figure it out some myself but also have mentors and teachers show me what i did wrong and how i could do better and show me the correct way of doing different welds or tasks. and being able to weld and work outside the classroom and having to deal with real world problems with the help of more experienced welders or fabricators to be there to show you how to fix the problem and learn from it. I really like working with people who are more knowledgeable than i am so i can learn

What construction software or technologies do you have training in?

i have been taking a welding college welding class in high school and really enjoy it. i have also been working in a mechanic shop and have gotten to weld a quite a bit there and i love to weld and fabricate different parts for conveyors and different mining equipment but i don't get to weld that much and i would like to do it more and i was recommended welding in the 400 by a friend of mine that works in the 400. and i have been prepping and welding pipe in my shop class a lot and i enjoy it a lot i am not the best at it but i would really like to learn and become better at welding in general and doing it for work. The hours and pay also interested me i like working overtime and having plenty of hours and work to go around.

Tell us about any jobs where you've learned pipetrades relevant skills:

I have experience working in hands-on environments where I developed strong work ethic, reliability, and attention to detail. Through my work and daily responsibilities, I have become comfortable using tools, following instructions, and working efficiently in physically demanding situations. I understand the importance of safety, teamwork, and staying focused on the job.

In addition, I am highly motivated to learn a skilled trade and build a long-term career. I enjoy working with my hands, solving problems, and improving my skills every day. I am

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I enjoy working out and staying active, which builds discipline, consistency, and physical endurance qualities important in the construction trades.

I also like hands-on tasks and learning new skills, which helps me stay focused, detail oriented, and comfortable working with tools and problem solving on the job.

What trades-related courses did you take in school?

Building Trades / Construction

Why is an apprenticeship an attractive option to you?

An apprenticeship is attractive to me because I can learn real skills while working and gaining hands-on experience. I prefer learning by doing rather than only being in a classroom.

It also gives me the opportunity to earn money while building a stable career, improving my skills, and growing in a trade with long-term opportunities.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I'm interested in hands on work and building real skills. The pipetrades stand out to me because they offer a strong career path, stability, and the chance to work on essential systems.

What construction software or technologies do you have training in?**Any Safety Certificates:****Add'l Details:****Contact Information:**

Full-time, summer employment, Part-time, school

Tell us about any jobs where you've learned pipetrades relevant skills:

Last summer I worked as an electrician assistant for Enterprise Electric. Where I helped on job sites, carried materials, and assisted with installations. That experience taught me how to work safely, use tools, and be a part of a team. It also made me interested in skilled trades, which is why I want to pursue welding.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I enjoy working with my hands and building things. I like mechanical projects, fixing things, and learning how to put things together.

What trades-related courses did you take in school?

Automotive Technology, Math-Algebra, Welding, Woodworking / Woodshop

Why is an apprenticeship an attractive option to you?

An apprenticeship is appealing to me because I learn best by working hands on. I like the idea of gaining real life experience and knowledge while earning money and learning from skilled professionals. It seems like a great way to build skills and start a career in the trades.

What construction software or technologies do you have training in?

Solidworks

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I am interested in welding because I like hands on work and the challenge of building something. I am currently taking a welding class at Kaukauna High School. I like working with tools, problem solving, and seeing the finished product of my work.

Years of Full-Time Work Experience:**Welding Experience:****Shift Availability:**

Full-time, summer employment, Part-time, school

Tell us about any jobs where you've learned pipetrades relevant skills:

I have worked as a youth apprentice with a local plumber as a part of the state program while in high school. I mostly work on new construction while spending some time on remodel work or repairs. I have helped install water heaters, sinks, toilets, and showers. I have done manual labor. At my youth apprenticeship while attending school, I work every weekday. This has taught me commitment to the job and responsibility.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I enjoy lifting weights in my free time. I have taken multiple weight training classes in high school. I believe weight lifting helps in the construction trades because I challenges you physically and mentally.

I have enjoyed my technical education classes in high school. I have taken introductory classes and am taking metals/welding to end my senior year. I believe this will help me in my futue career as a plumber.

What trades-related courses did you take in school?

Math-Geometry, Math-Algebra, Drafting and Design, Metals, Woodworking / Woodshop, Welding

Why is an apprenticeship an attractive option to you?

My youth apprenticeship experience while in high school has helped me to decide a plumbing apprenticeship is my choice for my future career. My work experience while in high school has prepared me for this next step.

I enjoy active learning. An apprenticeship allows me do a majority of my learning on the job. I have learned through my youth apprenticeship experience that I learn best on the

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I am interested in pursuing a career in the trades because I enjoy hands on work and the oppurtunity to build skills. Working with tools, solving problems, and seeing the results of my work is rewarding to me. The trades offer strong career potential and opportunities for growth. Being able to develop a craft is something I find meaningful and exciting.

My experience in plumbing has confirmed this is the trade I want to pursue. I currently work as a youth apprentice with a small, non-union plumbing business, where I have gained valuble experience. I will be graduating from high school in May, and my time in the youth apprenticeship program has solidified my interest in plumbing as a career. I am OSHA 10 and first aid certified and feel prepared to take the next step in my career in the plumbing trades.

What construction software or technologies do you have training in?**Any Safety Certificates:**

First Aid / CPR, OSHA 10

Youth Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

Steamfitter (Pipefitter), Pipe Fabricator

Work Zones in Preference Order:

Appleton Area (Green)

High School:

Kimberly High School

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:**Welding Experience:**

MIG - Some Knowledge, TIG - Some Knowledge, Stick - Some Knowledge

Shift Availability:

Full-time, summer employment, Part-time, school

Tell us about any jobs where you've learned pipetrades relevant skills:

My current job as car wash attendant is not directly applicable to the pipe trades as far as specific skills. However, attention to detail and making sure the customer is satisfied is an important aspect of the job. Being a dependable and responsible employee is something that I have established and will carry into my future career and learning experiences. My supervisor has asked me to help other newer employees to make sure they are doing things correctly, and I will bring that reliability to my eventual work experience within the pipeline trades.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I am an avid fisherman and hunter, and I like to be outdoors as much as possible. I currently play high school lacrosse and will play football and lacrosse next year. I have been involved with sports since I was three years old, which has taught me discipline and coachability. I am used to receiving feedback and trying to improve my skills, and I am very interested and dedicated to the strength and conditioning program at my high school.

I started working at my first job in October, and I'm currently still there as a car wash

What trades-related courses did you take in school?

Building Trades / Construction, Math-Algebra, Math-Geometry, Metals, Welding

Why is an apprenticeship an attractive option to you?

An apprenticeship is a goal for me because I like to work. The idea of being able to learn while earning is something I am looking forward to with the youth apprenticeship program that I will begin soon, and I want that to continue after graduation. I learn best with hands on experiences and learning from others that have experience, and an apprenticeship would allow me to do both. I believe an apprenticeship allows me to get started with my eventual career.

What construction software or technologies do you have training in?

I have known since 5th grade that I want to pursue a career within the welding field. I enjoy working with my hands and want to have variety in the work that I do on a daily basis. I enjoy projects, being on the move and outdoors, and a career where I can continue to improve and advance .

I would ultimately like to pursue union pipe welding and have a goal of a union apprenticeship upon graduation from high school. I've considered traveling welding perhaps in my future and don't envision myself tied down to one location specifically. I have prepared a resume and cover letter for youth apprenticeship next school year.

Welding Experience:

MIG - Skilled, Stick - Skilled, TIG - Some Knowledge, Flux Core - Some Knowledge

Shift Availability:

Full-time, summer employment

Tell us about any jobs where you've learned pipetrades relevant skills:

I worked summer help at a golf course and learned how important it is to show up on time, work hard, and do the job right even when no one is watching. It taught me responsibility, how to follow directions, and how to work outdoors. Currently, I'm in a youth apprenticeship program working for Drexel Building Supply doing indoor framing, sheeting, and installing Tyvek. This job has helped me get comfortable using tools, staying on task, and working as part of a crew. I'm learning the importance of job site safety and how each step of the process affects the whole project.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I like playing baseball, hunting deer and turkey, fishing, woodworking and welding. Baseball has taught teamwork, listening to coaches, and showing up ready to work hard. Hunting and fishing have helped me learn patience and focus. Woodworking has helped me get better at using tools and paying attention to details so things are done right. Welding has taught me that small mistakes can affect the whole project, so I take my time and do quality work. I think all of these hobbies have helped me build a strong work ethic and skills that would transfer well into the trades.

What trades-related courses did you take in school?

Drafting and Design, Math-Algebra, Welding, Building Trades / Construction, Math-Geometry, Woodworking / Woodshop, Metals, Construction Technology

Why is an apprenticeship an attractive option to you?

An apprenticeship is the path for me because I learn best by actually doing the work, not just sitting in a classroom. I've always known that college isn't for me. I prefer hands-on learning where I can build real skills and see the results of my work. I did well in math and shop class, and I enjoy applying what I learn to real situations. I also like the idea of earning money while I learn and gaining real job experience from the start. An apprenticeship gives me the chance to work alongside experienced tradespeople, keep

What construction software or technologies do you have training in?

AutoCAD, Inventor, CNC

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've always been drawn to hands-on work and the fulfillment that comes from building and fixing things myself. The trades appeal to me because I can see the physical results of my work. I like the idea of working on different job sites, being outdoors, and not being stuck behind a desk. I enjoy solving problems, thinking through how things fit together, and paying close attention to detail to make sure the job is done right. The pipe trades interest me because plumbing is work that people rely on every day. It takes skill, precision, and critical thinking to install and maintain systems properly, and I take pride in doing quality work that will last. I'm motivated by the challenge of learning a trade that combines physical work with technical knowledge, and I'm eager to build a career where I can continue developing my skills.

Years of Full-Time Work Experience:**Welding Experience:****Shift Availability:**

Part-time, school year employment, Full-time,

Tell us about any jobs where you've learned pipetrades relevant skills:

N/a

Tell us about any hobbies that have boosted pipetrade-relevant skills:

Some hobbies I enjoy are working on cars and small engines. When I help fix things or learn how different parts connect, it teaches me how systems work together and how to follow step-by-step instructions.

I also like doing hands-on projects around the house, like helping with repairs or putting things together. These activities help me build patience, problem-solving skills, and pay attention to detail.

What trades-related courses did you take in school?

Welding, Woodworking / Woodshop, Math-Algebra, Math-Geometry

Why is an apprenticeship an attractive option to you?

A plumbing apprenticeship is an attractive option I wish to pursue because it lets me learn more about plumbing. It will allow me to get hands-on experience working with tools, installing pipes, and fixing problems while being guided by experienced plumbers.

I also like that an apprenticeship allows me to earn money while hopefully avoiding debt for education. I can gain experience, and work toward becoming a licensed plumber

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**What construction software or technologies do you have training in?**

Working with my hands

Years of Full-Time Work Experience:**Welding Experience:**

MIG - Skilled, TIG - Some Knowledge, Stick - Some Knowledge

Shift Availability:

Part-time, school year employment, Full-time,

Tell us about any jobs where you've learned pipetrades relevant skills:

The job on the farm I have learned skills applicable to pipe trades by welding there as well as high school. I have done repairs on the milking pipeline. I have a basic understanding of welding and pipes.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

Right now I am playing lacrosse, football, and working on a farm. Playing lacrosse boosts precision, awareness, and team coordination. Having these is useful for hand eye-coordination and quick decision making. Playing football builds physical strength, trust, and reliability. Having these can help coworkers depend on me, and I can face mental blocks if needed. Working on a farm uses hands on tool usage, early morning and long days, and understanding machinery. Having these can help me prepare for any challenges that may come like tool challenges and taking on challenges.

What trades-related courses did you take in school?

Math-Algebra, Welding, Building Trades / Construction, Math-Geometry, Metals, Electrical Trades / Electronics

Why is an apprenticeship an attractive option to you?

It is an attractive option to me because I will be able to learn more about different jobs. As well as gain knowledge and skills of this job at a higher level and continue to grow as I learn.

What construction software or technologies do you have training in?

Revit

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

What interested me in a career in building trades generally is multiple characteristic skills such as hands on problem solving meaning a practical skill that requires critical thinking. Then next the pride and legacy of working there, gaining satisfaction of contributing to the company. Then specifically speaking pipe trades the high responsibility work meaning maintaining the public health safely. Then learning the complex systems to gain technical knowledge.

Years of Full-Time Work Experience:**Welding Experience:****Shift Availability:**

Part-time, school year employment

Tell us about any jobs where you've learned pipetrades relevant skills:

Landscaping has allowed me to learn problem solving skills. If something doesn't go right where I need to re-calculate needed materials or measurements, I have the confidence to allow myself to fix what is needed without stressing about it. As stated earlier I have developed good communication skills.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

My work ethic would come from football and my small landscaping business. Football has given me the hardworking skills that allow me to handle pressure and not give up. It has also given me the skill of being able to do physical work. Similarly, landscaping has also put me in a position where I gained similar skills. Landscaping has also provided me with great people skills, allowing me to have the confidence to put myself out there. Along with that it has allowed me to be able to take constructive criticism to learn from my mistakes and furthermore better myself.

What trades-related courses did you take in school?

Math-Algebra, Math-Geometry

Why is an apprenticeship an attractive option to you?

It would allow me to set up a secure future for my post grad life, where I would be learning real world skills as well as doing something I'd enjoy. It would also give me the confidence that I am making the right decision rather than going to college and spending money on something I'm not sure I'm truly all in for.

What construction software or technologies do you have training in?**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

This career path interests me as I am a hard worker who is willing to go beyond the normal tasks to help set me apart from others. It is also a hands on job which is something I am interested in and would enjoy as I would like to do something where I am moving around and not stationary like a desk job. I have been doing landscaping as a job for the past few years. As I am coming up on my last year of highschool and looking to find a career that I enjoy. I have been talking with my uncle who is a steam fitter, and he really enjoys his work. His explanation of his day-to-day work, is something that I would excel in and truly enjoy.

Years of Full-Time Work Experience:**Welding Experience:**

MIG - Some Knowledge

Shift Availability:

Full-time, summer employment, Part-time, school

Tell us about any jobs where you've learned pipetrades relevant skills:

Not specifically to the pipe trades but I have gone on quite a few side jobs with my brother to help out with electrical work.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I currently work at Menards as a cart pusher/cashier and being around, and stocking, pipes, pvc, appliances, etc. has made me familiar with many tools and equipment I would most likely be working with in this line of work. Also on an unrelated note I have a very strong passion for snowboarding.

What trades-related courses did you take in school?

Math-Algebra, Math-Geometry, Metals, Welding, Woodworking / Woodshop

Why is an apprenticeship an attractive option to you?

Mostly because of the fact that I can get on site training, in class learning, and so much more while getting paid, completely eliminating student debts, job searching and other things that typically come with traditional schooling.

What construction software or technologies do you have training in?

AutoCAD, Inventor

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

From my understanding the trades in general are a dying career with most teen and adults around my age not wanting to put in the work ethic to get into one of the most important roles in our community. We rely on the trades to have a complete and sturdy community. I simply want to be apart of what most people my age have nothing to do with. I have a very strong work ethic and am willing to put in what it takes. The plumbing side of the trades interests me the most because my brother is an electrician, and instead of following in his footsteps directly I want to go down a slightly different path.

I have not had a job in the trades as of yet.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I took welding as a sophomore and will be taking machining as a senior. I have also taken a construction class every year of highschool so far, as well as senior year.

What trades-related courses did you take in school?

Welding, Building Trades / Construction, Construction Technology, Math-Algebra, Math-Geometry, Math-Precalculus / Trigonometry, Woodworking / Woodshop, Metals

Why is an apprenticeship an attractive option to you?

I can get paid while I learn, but in college I would have to pay to learn.

What construction software or technologies do you have training in?**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

I know that those jobs are in high demand and I want to contribute. I have always been a hands on learner and I know that the trades are a high paying, but also have high employee value.

Pipe Fabricator

Work Zones in Preference Order:

Appleton Area (Green)

High School:

Luther L Wright High School

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:**Welding Experience:**

MIG - Some Knowledge, TIG - Some Knowledge

Shift Availability:

Full-time, summer employment

Tell us about any jobs where you've learned pipetrades relevant skills:

I have had some side jobs welding I have messed with some piping on trailers.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I have grown up around cars, working on them and building them. It has taught me a lot about making things work and learning how things work. Also sometimes having to fabricate your own stuff to get the job done. Very similar to how it can be in construction trades.

What trades-related courses did you take in school?

Welding, Woodworking / Woodshop, Metals, Math-Geometry, Math-Algebra

Why is an apprenticeship an attractive option to you?

Because I'd like to be able to earn while I learn. Also I believe it is well suited for me.

What construction software or technologies do you have training in?

CNC, Inventor

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I ended up getting into welding when I was younger, and I want to further my experience with welding and fabrication. With welding and fabrication something I enjoy very much and have been working on for a few years now.

Any Safety Certificates:

OSHA 10

Years of Full-Time Work Experience:**Welding Experience:**

Stick - Skilled, TIG - Skilled, MIG - Skilled

Shift Availability:

Part-time, school year employment

Tell us about any jobs where you've learned pipetrades relevant skills:

I worked Landscaping that thought me a lot. That gave me my work ethic experienced in working non stop and hard work. I've also been in fence working that thought me working with equipment/machines.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I live on a farm so I work every single day if that giving the animals food, fixing tractors and welding when the fence breaks also I work with my dad in his landscaping business. That gives me the work ethic and living with my boss just makes me work harder.

What trades-related courses did you take in school?

Welding, Math-Algebra, Math-Geometry

Why is an apprenticeship an attractive option to you?

An apprenticeship is an attractive option for me because I love to work hands on. Also I like to plan for my future and I feel like join a youth apprenticeship would set me up for success. I want to be a welder when I grew up so I would get more practice in something I wanna do.

What construction software or technologies do you have training in?

welding

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I'm interested in building trades because I like learning with my hands and I feel like a learn better with my hands. I love seeing the end result when I work so hard on a project. I want to be apart of something that gets me to where I wanna be in life.

Pipe Fabricator, Steamfitter (Pipefitter)

Work Zones in Preference Order:

Appleton Area (Green)

High School:

Link2Learn Virtual Charter School

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:**Welding Experience:****Shift Availability:**

Full-time, summer employment

Tell us about any jobs where you've learned pipetrades relevant skills:

I've worked at Cafe Nutrition for 4 years where I developed teamwork skills, time management skills, and reliability. The job has required me to work to the best of my ability, show up on time, work at a fast pace efficiently, and communicate with coworkers. Though the job is not trade specific it helped me develop a good work ethic, the ability to keep the workspace clean, and work safely.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

A main hobby I have right now is working on my car, it's helped me by learning how to use many different tools and provide skills involving hands on work and my ability to problem solve, and be patient when i have too. Through the trial and error working on my car has taught me how important it is to get things right the first time, and to resolve problems if they do show up. It's helped me build skills mechanically and mentally.

I'm also taking classes at Fox Valley Technical College where I just completed GMAW 1,

What trades-related courses did you take in school?

Welding, Math-Algebra, Math-Geometry, Metals

Why is an apprenticeship an attractive option to you?

An apprenticeship is attractive to me because it would allow me to learn through hands on work with experienced trade workers. I learn best through hands on teaching styles and an apprenticeship would give the opportunity to develop skills the right way while being provided feedback and work.

What construction software or technologies do you have training in?**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

I'm interested in a career in the building trades because I've always loved hands on work where, seeing finishing results, and oppurtunities to learn and improve my skills. I have ADHD which influences my love for work that involves hands on skills, and using tools rather than sitting behind a desk.

The pipetrades interest me because of the combination of the fabrication, welding, and problem solving throughout the whole process. The idea of working from drawings, welding/fitting pipe, and being apart of big projects also interest me . I'm looking for a way I can continue to grow my welding and fabrication skills while building a stable future for myself as well.

None. Nothing even close-but I'm a hard worker and willing to learn!

Years of Full-Time Work Experience:**Welding Experience:****Shift Availability:**

Part-time, school year employment, Full-time,

Tell us about any jobs where you've learned pipetrades relevant skills:

I have worked at Rent-A-Tent setting up and taking down tents, which has taught me physical work, teams work, following instructions and job-safety. I have also driven salt truck, where I learned responsibility, attention to surroundings, and working in changing conditions.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

My hobbies are hunting, shooting trap, tractor pulling, and recreational vehicles. These things have taught me to follow rules, procedures, and safety hazards. It has also built patience to stay calm under pressure and attention to detail. I have built understanding of engines and equipment. I am comfortable working in all conditions, indoor and out.

What trades-related courses did you take in school?

Math-Algebra, Math-Geometry, Engineering, Woodworking / Woodshop

Why is an apprenticeship an attractive option to you?

It allows me to learn hands-on skills while earning money and gaining real work experience. This opportunity allows me to stay engaged, build responsibility, and start developing skills that will prepare me for a long-term career.

What construction software or technologies do you have training in?

CNC, AutoCAD, Inventor

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I am interested in the pipe trades because I enjoy hands-on physical work and learning practical skills that have real-world value. Through summer work I've learned that I work best in environments where I can see the results of my work. I'm interested in learning more to lead to a long-term career opportunities.

Tell us about any jobs where you've learned pipetrades relevant skills:

I have participated in the UA 400 Rocket Stove Competition. I am currently doing a Youth Apprenticeship at Metko in New Holstein, WI. There, I weld both MIG and TIG processes on Carbon Steel, Stainless, and Aluminium

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I am a captain of my high school's soccer and basketball teams. I am in the National Honor Society, and I have earned my Eagle Scout in Boy Scouts. All of these contribute to my leadership skills. I am also currently doing a welding apprenticeship. This has allowed me to grow my skills in welding with welding on Aluminium, Stainless Steel, and Carbon Steel with TIG and MIG processes. I have also learned how to overcome challenges and change while working.

What trades-related courses did you take in school?

Math-Algebra, Math-Geometry, Math-Calculus, Welding, Math-Precalculus / Trigonometry

Why is an apprenticeship an attractive option to you?

I like the idea of how much I can grow and learn through an apprenticeship. It seems like there is so much to learn in any apprenticeship you do.

What construction software or technologies do you have training in?**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

I took the welding classes that my high school had to offer and earned college credit through Lakeshore College. I have participated in the UA400 rocket stove competition twice and have found a liking for pipe welding, especially with TIG welding.

None. Nothing even close-but I'm a hard worker and willing to learn!

Years of Full-Time Work Experience:**Welding Experience:**

Stick - Some Knowledge, MIG - Some Knowledge

Shift Availability:

Full-time, summer employment, Part-time, school

Tell us about any jobs where you've learned pipetrades relevant skills:

I haven't had any jobs that work with pipe trades but I have had a summer Custodial position which makes you on your feet and moving the whole day and having to squeeze into positions to clean stuff. Also it taught me discipline and hard work ethic to be able to come in every day of the summer except weekends and give 100%.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I am currently in show choir in high school which focuses on teamwork and confidence to be able to perform. It also makes you work hard and push yourself to become better which can transfer over into the trades. I worked during the past two summers as custodial helper and it built discipline and a hard work ethic to come in every day of the work week and put in 8 hours of work. I also lift as a hobby to keep me active and my body healthy to be able to transfer that into the trades later on in life.

What trades-related courses did you take in school?

Math-Geometry, Welding, Math-Algebra

Why is an apprenticeship an attractive option to you?

It is attracting me because you get on the job experience with a professional to teach you the basics to help decide if that career is for you. I want to do an apprenticeship to learn if this career is for me.

What construction software or technologies do you have training in?**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

I am currently in a welding class and I really like it and I visited the Local 400 to see my opportunities after High school. It made me think why not combine something I like into a career and keep learning new things. Plus the pay is good to be able to support my family when I am older. I read more into steamfitters and it was really interesting so that is why I want a career in the pipe trades.

Automotive Technology, Woodworking / Woodshop, Math-Algebra, Math-Geometry, Electrical Trades / Electronics, Construction Technology

Why is an apprenticeship an attractive option to you?

Because I don't have the money to really buy for school so like it'll be good to have it paid for and be able to learn about what I'm trying to go for.

What construction software or technologies do you have training in?

I always see myself in trades and as I progress more thought out highschool it just caught me attention even more and it's good money I wanna be able to help out my parents with that to after I get my left settled first. Life just been rough lately everything going good then boom just off track pretty fast and it sucks so I'm trynna start my career early right out of highschool and get started

Tell us about any jobs where you've learned pipetrades relevant skills:

I've done renovation of duplex's doing woodwork and some small plumbing jobs. I've added additions to our house one plumbed the bathroom., I work at Truck Equipment Inc. although its not completely piped welding or plumbing, I run hydraulic line fairly often and weld almost everyday, I have welded pipes for water trucks and oil trucks.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I've built houses and don't the plumbing work for our houses and bathrooms. Other hobbies is hunting and fishing along with football, I play football and hunt and fish, I also work on snowmobiles and cars with with my dad and grandpa, this transfers to the trades to show commitment and team work, and also give me all around knowledge of hard work and dedication.

What trades-related courses did you take in school?

Automotive Technology, Building Trades / Construction, Electrical Trades / Electronics, Math-Algebra, Math-Geometry, Math-Precalculus / Trigonometry, Metals, Welding, Woodworking / Woodshop, Automotive Technology, Math-Algebra, Welding, Woodworking / Woodshop, Construction Technology, Building Trades / Construction, Electrical Trades / Electronics, Engineering

Why is an apprenticeship an attractive option to you?

I want to learn as I go, along with getting paid. Reading from a book dosent really help me so when I'm doing it I pick it up a lot fast. I'm also looking to get out of school for work and gain experience in the trade., I want the option to get paid to learn while I work, and be able to get out of school to get more hours in. And this program is a great way to do it.

What construction software or technologies do you have training in?

Inventor, Revit, AutoCAD, CNC, Revit, Inventor, AutoCAD

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've always know I've wanted to do some sort of welding. I've taken many classes through our High school , I've also done the field goal competition for ua400 this year. I find plumbing interesting because I like to use my hands and tools and it involves welding so it's best of both worlds., I like to work with my hands, and with doing remodeling basements I liked the plumbing side of it. I also really like to weld, I've taken all of the classes my school offers and I competed in the goal post competition at UA 400 last year.

Currently working at the Culver's of little chute and working there has taught me how to interact with guest and meet their needs which pushed me out of my comfort zone, this could translate to the pipe trades by not being afraid to try new things and potentially not be the best at it right away but I will put time in to get better at it., I have not yet had the opportunity to work in the trades. I do feel that there are many skills that I have learned while working and going to school. I have learned and can demonstrate good time management, be a team player or work independently, I am always willing to expand my knowledge to do things I did not know before, and know

Tell us about any hobbies that have boosted pipetrade-relevant skills:

Competitive clay shooting (sporting clays, and skeet) I've don't this for a few years now and over those years I've learned to listen to the coaches since they have more experience so I can learn from them also have learned to put in extra time outside of practice to improve I go back out to the course at least one other time a week besides the weekly practice. This would transfer to a working environment by I would listen to peers since they would have more work experience so I could learn lots from them and the I could practice welding outside of work at home in our shop, I am a golfer and a competition clay shooter. These are both hobbies that help me in different ways. I

What trades-related courses did you take in school?

Math-Algebra, Math-Geometry, Math-Precalculus / Trigonometry, Metals, Welding, Drafting and Design, Welding, Drafting and Design

Why is an apprenticeship an attractive option to you?

Since I enjoy welding and I would like to try a new variation of welding., I have friends who are active members of the Local 400 who spoke very highly of the program. I feel that what I have heard from them and what was presented to me when I came and toured the facility with my high school welding class emphasized everything even more so.

I want to learn more about how to succeed in my chosen trade. I have a goal to master a

What construction software or technologies do you have training in?

Inventor, Revit, Bluebeam, Inventor, Bluebeam, Revit, CNC

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I personally enjoy welding a lot have taken two welding classes through school and am planning to take another one next year. I know someone that I doing steam fitting currently at Great Lakes mechanical and he's had an influence on that path that I want to go with welding. Haven't had a lot of experience welding on pipe but, I'm willing to learn how to., I have taken multiple welding courses throughout high school. I enjoy the trade because it is something a little different every time I weld, and I really thrive on the challenge.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

i don't enjoy working in retail or food service and my dad is a welder at the power plant in Manitowoc. i want to follow his steps, i want to follow my dad's foot steps and become a welder when i'm older. i have been welding in the garage for as long as i can remember, I am interested in working in the trades as a welder and pipe fitter because I value hands-on work that produces real results. I enjoy seeing a project come together through skill, precision, and teamwork. I understand Welding and pipe fitting require problem-solving, attention to detail, and technical skill—qualities I am motivated to develop and apply in a challenging, real-world environment.

Why is an apprenticeship an attractive option to you?

I want the experience of a job I plan to do out of high school so I'm prepared. I have family who did and they did not regret doing it., I love learning new things and my whole family all the way to my Grandpa have been in the union. I think the best way for me to find a career and learn a career is through a union apprenticeship.

What construction software or technologies do you have training in?

AutoCAD, Acorn, Laser Scanning, CNC

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I grew up with my father working in the trades doing framing. I was surrounded by this work and this is what I'd want to do in the future. I wanted to be a plumber my whole life because it is something I could wake up and do every morning., I currently have been working wood framing construction for my uncle and I like the work a lot but always wanted to get into plumbing. Even though I have no experience in plumbing it's always been the trade I wanted to get into.
