Pre-Apprentice Candidate Pipefolio

MADISON

Status: Letter of Intro

Shift: Full-time

L.O.I. Received: 7/31/2026

County: Dane

Current As Of: 8/26/2026

Post HS Education:

Other Relevant Courses & Certifications

Software / Technology Training:

Safety Training Certificates:

First Aid / CPR, OSHA 30, OSHA 10

Add'l Edu. Details:

Welding certs, structural and 6g pipe, underwater certs, Dive supervisor certification, osha 40, hazwoper, CPR with O2 blood borne pathogens.

Years of Full-Time Work Experience: 10+

Relevant Experience Level:

A lot. Have completed a pipe trades apprenticeship and/or have at least 5 years

Pipe Welding Proficiency:

Flux Core- Skilled, Stick - Skilled, TIG - Skilled, MIG - Skilled

Tell Us About Any Relevant Jobs :

Marinette marine, Marinette, Wi. did some pipe welding there
Franklin fueling, Madison, Wi. All tig welding.
Mac Enterprise, Dutch Harbor, Ak. Ship husbandry/diving.
JF Brennan, La Crosse, Wi. Diving, welding, concrete, marine construction.

Why are you exploring an apprenticeship program?

I don't have a lot of experience in the plumbing trade and an apprenticeship is a good way to get the experience/education I need to succeed in the plumbing trade

Tell Us About Any Relevant Hobbies:

Enjoy being outdoors, working on older project like my jeep. Working on an older stuff even if it's new. Teaches you patience and I always say patience is a good trait to have in the construction trades

What Interested You in Plumbing?

I've been a commercial diver supervisor/forman pile driver for 10 years. Also have a lot of welding experience and certs. I've always enjoyed working with my hands and problem solving.

I've always been told plumbing is a good trade to get into and it's in demand. I think I'll enjoy its challenges.

Post HS Education:

No

Software / Technology Training:

None

Safety Training Certificates:

None

Add'l Edu. Details:

Years of Full-Time Work Experience:

1-3

Relevant Experience Level:

None. Nothing even close-but I'm a hard worker and willing to learn!

Pipe Welding Proficiency:

None

Tell Us About Any Relevant Jobs :

I have not any jobs that were toward or related to pipes trades. But I'm willing to learn

Tell Us About Any Relevant Hobbies:

My hobbies would be playing hockey and lacrosse. That has taught me a lot on how to work as a team and using commutation skills. I fix simple things at my house too. I've fixed curtain rods, railing, patching small holes. I have put together cat trees and desks and I also fixed a screen door. I also work at an ice arena and drive the Zamboni. I had the chance to help replace the water pump on the Zamboni. I have also helped fix what's called a snow breaker. Another thing I learned how to use was a tool disc grinder to grind down hockey netting posts. Working at the ice arena has taught me a lot about how to use certain tools. I have to basically have to problem solve everyday when driving the Zamboni. There was this one time where I got stuck on the ice because both gas tanks were empty. What if the temperature outside is too cold or too hot. I have adjust

What Interested You in Plumbing?

I want to become a plumber because I like working with my hands and problem solving. I'm not really the type of guy to sit at a desk all day and just work on a computer, instead I rather go out and problem solve, using my hands and mind to do so. The second reason I would want to go into plumbing is it pays well, so then I can live comfortably without having to stress about paying bills on time. Another major reason why I want to pursue into plumbing is that it's never going to be taken over by computers or robots. I think everyone is going to need a plumber at some point of their life and I want to be there to support customers with any issue they have. Whether that would be fixing a leak in their pipes or installing something new. I want to be that one person that the customer can count on. I know I'm going to make mistakes early but I'm willing to get better everyday.

Why are you exploring an apprenticeship program?

It's an attractive option to me because I get to learn from the best people, which are journeymen or master plumber. I would be gaining hands-on experience with them being there and learning what to do and what not to do. Even furthermore to that last response I would also get to ask questions. I believe asking questions would help me understand more on different problems solving skills. I truly believe learning on a job site under guidance from a certified plumber is one of the most effective ways to learn something new that you have no idea what you're doing. I would also say it gives me something new to look for every single day. I am very motivated to learn in the classroom, so then I can apply it on the work site. I would also be learning how to develop even better problem

I do art, which helps with spacial awareness, and with my perfectionist tendencies I want my work to be done well with high quality.

What Interested You in Plumbing?

Why are you exploring an apprenticeship program?

I want to get into plumbing in general. It genuinely seems fun to learn how to deal with pipes and to work with others to problem solve. I am not afraid of mistakes and learning from them. If I am wrong then I will learn from that.

I find working with my hands and mind very interesting. I love making things exact and I find plumbing to be very important to everyday living. I also would prefer to work under a union. Plumbing just seems fun, pays well, and it works well with who I am as a person.

I do tons of art, and during high school I did intro to trades. I take great pleasure in measuring, making things accurate, and making it look good. If this helps, I am already used to burning myself a lot in the kitchen, and grown used to hot spaces when work needs to be done.

Tell Us About Any Relevant Jobs :

None.

What Interested You in Plumbing?

Why are you exploring an apprenticeship program?

I think it would be beneficial for someone like me to learn the basics of plumbing and to problem solve in weird cases. I feel like I would mostly enjoy the learning process, and might want to make it to a journeyman.

I love working with my hands, and I appreciate the work that plumbers do. From what I know most people don't think about how clean water helps with hygiene and prevents infections and other ailments. I also love working with my hands, and I find it fascinating and interesting of the math and brain power it takes to do it right.

Tell Us About Any Relevant Hobbies:

I enjoy woodworking. I've made a few stools, tables, bird houses, etc. I enjoy working with my hands, and the sense of accomplishment that comes along with creating / fixing something.

Tell Us About Any Relevant Jobs :

Well, as a teacher I don't have any experience working in the pipe trades. However there have been many times where we are presented with problems that we need to find solutions to. And those are life skills, being able to work through adversity, solve problems and create solutions.

What Interested You in Plumbing?

Why are you exploring an apprenticeship program?

It allows me to begin my path in this career and I'm not expected to know it all as I'm just starting out. I get to learn in classes and on the job site as I'm increasing my knowledge of the trade.

I am 23 years old. I'm currently a Middle School teacher but have found out the past two years of teaching that I would rather do something else for my career. Although I don't have any experience, I have always enjoyed working with my hands. I have been thinking about the trades and after researching, plumbing is the trade I'm most interested in and want to dive into.

Pipe Welding Proficiency:

Tell Us About Any Relevant Hobbies:

I like to work on various projects with wood. I have built multiple things in shop classes at school or with my grandpa in his shop. Farming is one of my favorite hobbies and I feel that it transfers a lot to the trades. Through farming I have picked up skills about the trades from installing, repairing, or fixing anything around the farm. Additionally from farming I have learned how to operate machinery such as tractors and skid loaders.

Tell Us About Any Relevant Jobs :

none

What Interested You in Plumbing?

Why are you exploring an apprenticeship program?

It is my first option because I love the way that you learn. You get to learn on the job and see other people who know what they are doing work. Watching people that know what they are doing work is the most effective way of learning. I also love the opportunities for growth an apprenticeship offers.

I was interested in plumbing because I have always liked to build things and see them work. I have also loved to learn new things. I grew up living and working on our family dairy farm. Being on a dairy farm my whole life made me like working on various projects and different environments. Just like plumbing there are new projects all the time.

Additionally, I am greatly interested because of what I have heard from our close family friends. They both work for Ahearn and they both love their careers. Lastly I love the opportunities that plumbing gives, endless work, and being able to work your way up from the bottom to being a master plumber.

Tell Us About Any Relevant Jobs :

While my previous employment has been focused in non-trade roles, I am highly motivated to transition into a hands-on career. I have a strong work ethic, learn new physical processes quickly, and am eager to develop the mechanical skills required for the plumbing trade through this apprenticeship

Why are you exploring an apprenticeship program?

An apprenticeship is highly attractive to me because it bridges the gap between technical knowledge and real-world application through a structured, hands-on learning environment. While traditional classroom settings provide foundational concepts, nothing compares to mastering a trade under the direct mentorship of experienced professionals on active job sites. The opportunity to learn essential, highly skilled problem-solving techniques while actively contributing to tangible projects allows for a deeper, more practical understanding of the profession.

Furthermore, the "earn while you learn" model provides a sustainable and practical career pathway. Instead of accumulating substantial debt, an apprenticeship allows me to build

Tell Us About Any Relevant Hobbies:

My background in computer science and home networking has equipped me with a strong logical foundation that directly translates to the plumbing trade. Software development and network configuration are entirely about managing complex, interconnected architectures where data must flow seamlessly without bottlenecking or failing. This experience has trained me to read intricate technical schematics, approach problems with a rigorous step-by-step diagnostic mindset, and understand how individual components impact a larger system. Whether I am debugging code to fix a logical error or troubleshooting a network gateway, I rely on the same spatial awareness, precision, and analytical problem-solving that are essential for accurately interpreting blueprints and routing physical piping systems.

Tell Us About Any Relevant Hobbies:

In my free time, I enjoy working on home improvement projects, exercising, and learning new trade skills through videos and hands-on practice. These activities help me develop problem-solving, attention to detail, discipline, teamwork, and physical stamina, which are all important skills for a career in the construction trades.

Tell Us About Any Relevant Jobs :

I have plumbing experience in Africa and learned teamwork, problem-solving, safety, and strong work habits through jobs at Walmart, Janiking Cleaning, and a restaurant.

What Interested You in Plumbing?

I'm interested in the building trades because I enjoy hands-on work, solving problems, and learning practical skills that make a real difference. Plumbing stands out to me because it combines technical knowledge with physical work, and every day brings new challenges. I'm excited to build a long-term career where I can continue learning, take pride in quality workmanship, and help people by providing essential plumbing services.

Why are you exploring an apprenticeship program?

I want to earn while I learn, gain hands-on experience, and build a successful career as a plumber.

Add'l Edu. Details:
Associate degree in cybersecurity. Almost done with getting a bachelor's degree in English.

Years of Full-Time Work Experience: 7-9

Relevant Experience Level:
None. Nothing even close-but I'm a hard worker and willing to learn!

Pipe Welding Proficiency:
None

Tell Us About Any Relevant Jobs :
I've worked as an IT specialist installing workstations, routers, servers, switches, etc., and I've worked for a lawn care company (weed whacking, laying down mulch and rock, digging, etc.). I was also in the Army.

Tell Us About Any Relevant Hobbies:
Reading, writing, and exercise. Reading and writing specifically allow me to both learn fast and communicate clearly and concisely. Exercise allows me to stay in shape, which is especially important in a trade as physically demanding as plumbing.

Why are you exploring an apprenticeship program?
An apprenticeship appeals to me because it is 4-5 years of dedicated training to master a trade at a decent salary, which provides stability and a clear path forward.

What Interested You in Plumbing?
Overall, the idea of working with my hands really appeals to me. I worked for a lawn care company for one summer and to this day I consider it the best job I've had thus far. The results of my work were immediately tangible day-to-day, and I found this aspect satisfying in a way that I'd never felt before, which is what drew me to consider the trades. Plumbing specifically is more specialized, and I'm excited to learn a skill that I can take with me anywhere.

Tell Us About Any Relevant Hobbies:

I have never had to take any of my vehicles to a mechanic I always fix them myself. I have definitely dig myself into some deep deep holes doing this but I have never just given up and said I'll let the next guy figure it out I always stick it out and do anything to finish the project

Tell Us About Any Relevant Jobs :

I have been a carpenter for a year and a half and it has definitely taught me how to work hard and show up on time ready to go no matter what I have also had some time on the total station and I see the plumbers I work by using them a lot

What Interested You in Plumbing?

Plumbing interests me because I love working with my hands. I have worked 1.5 years as a carpenter and I do like it but every time I talk to the plumbers everything they were doing seems so interesting. Every plumber I have talked to has also said that they have a pretty strong union and that is something I would love to be apart of.

Why are you exploring an apprenticeship program?

I like that you are learning while on the job I am a far better learner whenever I can actually see somebody do it or just show it to me one time.

Relevant Experience Level:
Some. I have worked for a plumber, steamfitter or HVAC/R contractor.

Pipe Welding Proficiency:
Stick - Some Knowledge

Tell Us About Any Relevant Jobs :

I have worked for a small plumbing company all throughout high school I have slight experience running drain lines, water lines, and venting. I have also had experience taking apart old lines that need to be replaced. All of this work was residential.

Why are you exploring an apprenticeship program?

An apprenticeship would give me the opportunity to further develop my skills and learn as much about the plumbing trade as I can. I also like the idea of making money while I learn and believe the trades are the best way to do so.

Tell Us About Any Relevant Hobbies:

I was a part of a high school football team that was consistently went deep in the playoffs and a track relay team that medaled at state. These sports have taught me discipline, shown me what physically challenging work looks like, and how to always push through. I like to golf, hunt and, fish so used to being outdoors. I enjoy staying active and working out I don't see myself being stuck inside all day working at a desk I want to use my hands and fix things.

What Interested You in Plumbing?

I would like to express my strong interest in a Plumbing career. My grandfather and cousin are plumbers and have always thought plumbing has been very interesting. I have worked with them part time throughout high school and understand how the work can be very challenging but also very satisfying and rewarding. During this time, I have learned some of the fundamentals of the trade and am looking forward to further developing my skills. Although I enjoy working with my family, it is a very small business without an apprenticeship opportunity moving forward.

Pipe Welding Proficiency:

Flux Core - Some Knowledge

Tell Us About Any Relevant Jobs :

Specifically my work in building maintenance. I had to learn on the fly about basic plumbing to repair leaking faucets, leaking pipes in our mechanical spaces, or when doing boiler maintenance like isolating water and steam when replacing a conductivity sensor.

We also had Temperature Control Units that I had to design and build a fluid overflow system. As the propylene glycol solutions would heat up the fluid would expand and if the level got too high the TCUs would shutoff.

Why are you exploring an apprenticeship program?

Its a chance to learn new skills. Every skill i have picked up while in the field has translated to real work I have done at home or to help family and friends. Im hoping that continues through an apprenticeship.

The pay and job security also seem competitive. As someone who needs a place where he can put his head down and work, a union trade sounds like consistent and fair, challenging work for the long haul.

Tell Us About Any Relevant Hobbies:

I've worked as an automotive mechanic for the better part of a decade and have also worked for a bio-manufacturing plant as a facilities technician and an equipment repair tech.

What Interested You in Plumbing?

Plumbing is a vital part of our worlds infrastructure. Knowing more about plumbing would allow me to better understand the city I live in.

But more importantly, I'm done messing around with small jobs. I want a career that is gonna last until retirement.

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Pipe Welding Proficiency:

Stick - Some Knowledge, MIG - Some Knowledge

Tell Us About Any Relevant Jobs :

During my time in the Navy as a Hull Maintenance Technician, I gained hands-on experience working with plumbing systems, piping, and firefighting systems. I was responsible for maintenance, repairs, and troubleshooting, which required a strong understanding of how systems operate and how to diagnose and fix issues quickly. I also worked with welding, cutting, and brazing, which helped me develop precision, attention to detail, and the ability to work safely in demanding environments.

Why are you exploring an apprenticeship program?

After the Navy I continued building my skills through hands-on mechanical and welding. An apprenticeship is attractive to me because it offers the opportunity to learn a skilled trade through hands-on experience while building a long-term career. I value learning by doing, and I believe working alongside experienced professionals is the best way to develop real skills and confidence in the field. It also provides a structured path to grow, improve, and take on more responsibility over time.

I'm looking for more than just a job I want a career where I can continue to grow, build a strong skill set, and take pride in my work. An apprenticeship allows me to earn while I learn, gain valuable experience, and work toward becoming a highly skilled tradesman.

Local 75 Courses Completed:

Tell Us About Any Relevant Hobbies:

One of my main hobbies is training in MMA, which has helped me build discipline, consistency, and the ability to stay focused under pressure. Training regularly has taught me how to push through challenges, take coaching, and continuously improve, all of which carry over into the construction trades. It has also reinforced the importance of preparation, safety, and staying aware of my surroundings.

Outside of that, I enjoy working on hands-on projects around the house and staying active with mechanical-type work. I've always preferred working with my hands and figuring out how things operate and how to fix them when something goes wrong. These activities have helped me develop problem-solving skills, attention to detail, and a strong work ethic.

What Interested You in Plumbing?

I've always been drawn to hands-on work and problem solving, which is what led me toward the building trades. During my time in the Navy as a Hull Maintenance Technician, I worked directly with plumbing systems as well as firefighting systems on the ship. That experience gave me a strong foundation in mechanical work, troubleshooting, and understanding how critical these systems are when they fail. I also gained experience in welding and repairs, which taught me attention to detail and the importance of doing the job right the first time.

Plumbing specifically interests me because it builds on the experience I already have while offering a long-term career path where I can continue to grow my skills. I enjoy

I use to work for S&L sewer and water as a top man. I was doing a lot of the assembly work. Cutting the pipes putting fire hydrants together. We also did a lot of water mains and man holes.

Tell Us About Any Relevant Hobbies:

I tend to do a lot of cooking which teaches planning and time management, and the importance of following precise procedures. Brain teasers such as crossword puzzles and sudoku help strengthen your memory. It takes skill to remember where things go and by completing brain teasers, workers of all ages can bolster their memory and critical thinking. Physical ability far as working out. Which helps build stamina up for long hours days.

What Interested You in Plumbing?

Why are you exploring an apprenticeship program?

It offers an earn while you learn model, allowing individuals to gain industry recognized credentials and hands-on experience without accumulating student debt. Apprentices develop both practical skills and professional networking opportunities. Allowing them to advance their careers and increase their earning potential. Programs combine on-the-job training with classroom instruction is ensuring a balanced high quality learning experience.

I've always been good with my hands. I also like to see the end results of things that I've helped build or create. You also learn how to do a lot of problem solving which plumbing involves a lot of. Everyday could be different offering an alternative to a traditional office desk job. It's always job opportunities in plumbing due to high demand. Which means it's a lot of financial stability as well. I could earn the opportunity to get paid while I learn through an apprenticeship. Essentially becoming a journeyman and even more possibly starting my own business. A career in the pipe trades or plumbing is highly attractive due to high income potential.

Tell Us About Any Relevant Jobs :

I've generally worked in healthcare previously, so my direct experience isn't much. My direct experience is probably limited to repairs around my house or at my rental property. However, I have skills from my life and work that I do think will translate very well into the pipe trades:

- I am very competent when it comes to researching how to do new things, and thorough in my execution. For example, I have fixed clogs and basement floods at my rental property by looking up the problem and working through common solutions.

- I am methodical and careful when I plan how to do something.

Why are you exploring an apprenticeship program?
An apprenticeship is an attractive option for me because it allows me the opportunity to learn a new career while still earning income and having health insurance for myself and my daughter. I like the idea of showing my daughter that she can branch out, learn something new and increase her earning potential. I love my current job but I'm stuck in a situation where I earn the most that I can without going into middle management, which wouldn't be doing the job that I love to do. I've also always been a supporter of unions and I have joined them when I've had a chance to, at previous jobs. I think it would be amazing to be able to show my daughter that women can excel in the trades, and I think it would be great in general to get more than 5% female representation in plumbing, which is

Tell Us About Any Relevant Hobbies:

My hobbies are reading, weight lifting and biking. I also have a dog, who I consider a hobby because he guides a lot of the choices I make around how I spend my free time. I'm a single parent of a 9 year old, and I would say that her hobbies are also somewhat my hobbies, in the sense that I also end up spending time observing nature, coloring or writing stories with her. However, when I do get to engage in my own hobbies I enjoy reading novels - and I think my love of reading has allowed me to develop an imagination that lets me put myself into different roles in life, or make changes when I think I can achieve more or aim higher. I enjoy biking to stay active, and weight lifting. I think the skills and consistency I've gained from lifting has helped me realize that I am capable of not only showing up for others, but also of showing up for myself. The endurance,

What Interested You in Plumbing?

I currently work as a full time Spanish Medical Interpreter at UW Health, and while I love my job, I also realized that I am maxed out on skills and pay. As a single Mom to a 9 year old daughter, I think it would be incredible to show her that you can still learn, do new things and pivot later in life, and after having a successful career doing something else. I have been thinking about entering the trades for a few years now and I really feel like now is a good time to start - my best friend lives with me and can support me with childcare when needed, and I've gained some confidence in my abilities through being actively involved in fixing problems at my house and troubleshooting problems at my rental property. I'm proud of my skills and capability when I'm able to complete a project I set out to do, and I'm excited when I learn from someone else if I had to recruit help or

Tell Us About Any Relevant Jobs :

Having previously worked in drywall certain skills can be applicable to the pipe trades. Reading floor plans and layouts, understanding how different trades work together. Understanding tool safety, from using tools like, drills and impact drivers, ladders and hole saws. Drywall requires accurate measurements and planning as well as problem solving skills. Having worked as a drywaller accuracy and the ability to adapt are essential. Lifting drywall sheets and other heavy materials entails upper body strength and endurance. Being able to work in confined spaces is another skill that's transferable. Why are you exploring an apprenticeship program?

An apprenticeship is an attractive option for me because it involves hands on learning which is my style. The apprenticeship is a career not just a dead end job. There is opportunity to learn so much and I view it as an investment for the future of my family and I. I know I have the dedication to be a professional plumber, I will hold myself to a high standard to ensure I provide quality work. I am a team player, I have no problem taking constructive criticism and am willing to put in the work and time to best take advantage of the opportunity of an apprenticeship.

Tell Us About Any Relevant Hobbies:

A current hobby of mine as a new homeowner has been figuring out how to repair different things around the house. From easiest tasks like cleaning out the gutters, patching holes in the walls to tearing down walls and framing. Finding videos to follow as guides as well as pulling things apart and learning the functionality of them. Through these repairs I had to problem solve, prioritize safety and though the repairs are for my own home and not necessarily for a customer, I still wanted to ensure my work was done properly. Being open to guidance from videos when I did not know something and learning hands on are also skills I believe to be transferable to trades.

What Interested You in Plumbing?

I am interested in a lifetime career path for my family and I. Though I know it is a journey I am committed to putting forth the effort and am dedicated to the years of hands on learning. I do not have prior plumbing experience but I do have the drive to learn and become the plumber I strive to be. I have always been interested in the trades, plumbing especially interests me because as a new homeowner I now more than ever see the value in knowing how to repair and learn different skill sets. This is a career for me, not just a job. I am eager to demonstrate my commitment, reliability and integrity.

Pipe Welding Proficiency:
Flux Core - Some Knowledge, Stick - Some Knowledge, MIG - Some Knowledge

Tell Us About Any Relevant Jobs :
In my most recent job I worked as a service tech and installer for a HVAC contractor in Baraboo. Piping installation and maintenance is a huge part of HVAC work. We constantly work with PVC with furnaces whether it's in ventilation or drainage. We bend, braze, solder and pressure test copper pipe all of the time and then fill it with refrigerant. We install and maintain gas pipe- using pipe threaders, and mapping efficient paths to furnaces or propane tanks.

Why are you exploring an apprenticeship program?
I need a career that challenges my mind and my body. A life behind the desk isn't for me and a life that doesn't challenge my mind will never be fulfilling. Apprenticeships offer one of the few career paths that can provide both. I want to learn as much as I possibly can about Plumbing. I don't want to take any half-measures. I want to try and be the best and a path towards becoming a Journeyman is my best chance.

Tell Us About Any Relevant Hobbies:

I play Ultimate Frisbee and I'm a captain in a local league- I develop leadership and communication skills every week. I practice the development of a fun and engaging culture within the team by focusing on motivation with positive encouragement and constructive criticism. I enjoy trading sports cards at local card shows. I meet with others and develop business-level relationships with other and learn how to cultivate relationships involving money. Sales and negotiations are key skills in leadership positions within any business. I also enjoy doing work around the house. I'm currently redoing my Mom's deck at her house. I've spent time fixing refrigerator water lines, changing dryers/washers and their water lines, landscaping and replacing water heaters. Learning more about simple house

What Interested You in Plumbing?

At first, I attended UW-Madison as a direct admit into their business school. After three semesters I realized that I wasn't going to be happy unless I was on my feet working with my hands everyday. I spent two years working in property management and learned the basics about all of the different trades. Plumbing is what appealed to and interested me the most. I'm fascinated by the simple yet complicated movement of water and waste. After failing to find a plumbing apprenticeship in the Baraboo area, I was able to find an opportunity with an HVAC contractor. I enjoyed my year working in HVAC, but I'm moving to Madison in July, and I even more curious now about a career in plumbing. Even on job sites with my HVAC crew, I found my mind drawn back to plumbing over and over again. I'm willing to restart my spot on the pay scale to be able to pursue plumbing.

Relevant Experience Level:
A little. No specific trade experience, but I have general skills in construction or welding.

Pipe Welding Proficiency:
MIG - Some Knowledge

Tell Us About Any Relevant Jobs :

I worked a youth apprenticeship for UW housing in Madison and did maintenance on the apartments. I worked a little bit with pipes on my own but I also worked a little bit with the plumber at the company with a few more complicated and advanced plumbing issues.

Tell Us About Any Relevant Hobbies:

I have a small wood shop in my garage and I make small projects in my free time. This boosts my constructive and technical skills that I use at work everyday to complete my work.

What Interested You in Plumbing?

I love to work with my hands and to do technical work. I love to problem solve and learn with hands on activities. I worked in a youth apprenticeship and worked a little bit with the company plumber and i immediately gained interest in the plumbing trade.

Why are you exploring an apprenticeship program?

I want to learn about my trade while actually doing real world work while learning from experienced plumbers. I want to be able to work and learn at the same time. I love the idea of hands on work and being able to solve real world plumbing issues.

Tell Us About Any Relevant Hobbies:

In my free time I do a lot of DIY/ mini projects in my little shop in my garage and I fix appliances around my house and my neighbors when I'm not working. It all helps me get a overview into trade work and helps me learn to problem solve and grow my technical skills I use at work.

Tell Us About Any Relevant Jobs :

I worked as a maintenance technician in Madison at eagle heights for UW Housing and I learned how to do the simple piping in sinks and faucets and even worked a little bit with the company plumber on some bigger projects and water leaks.

What Interested You in Plumbing?

I worked a youth apprenticeship my senior year of high school as a maintenance technician to introduce myself to what it's like to work in the trades and I found plumbing to be my favorite thing to do and the most interesting part of my job and knew it was the career path I wanted.

Why are you exploring an apprenticeship program?

I know the apprenticeship program is perfect for me because I learn better with real world scenarios and real hands on work rather than sitting in a classroom all day and not seeing physical examples or being able to work with my hands.

Pipe Welding Proficiency:
None

Tell Us About Any Relevant Jobs :

I have experience working with CIP cleaning pipes and operating machinery to flip, repair, and remove pipes. This work required attention to detail, following safety procedures, and understanding how systems function to ensure proper cleaning and maintenance. As a machine operator, I was responsible for monitoring equipment, making adjustments as needed, and ensuring the job was completed efficiently and safely.

This experience strengthened my mechanical ability, problem-solving skills, and comfort working in hands-on environments — all of which directly relate to the plumbing and construction trades. Why are you exploring an apprenticeship program?
An apprenticeship is attractive to me because it allows me to earn while I learn and gain hands-on experience from skilled professionals. I value the opportunity to develop real-world skills, follow a structured path, and build a long-term career without taking on debt.

It also provides the discipline and growth I'm looking for, giving me the chance to steadily improve, take on more responsibility, and create a stable future for myself and my family.

Tell Us About Any Relevant Hobbies:

In my free time, I enjoy spending quality time with my fiancée and my son and daughter, which has strengthened my sense of responsibility and commitment. I also enjoy hands-on, practical activities like basic home repairs and small projects that require measuring, assembling, and troubleshooting. These experiences have helped me become comfortable using tools and solving problems efficiently.

I value staying active and continuously improving myself, whether through physical work, learning new skills, or setting personal goals. I approach challenges with discipline and accountability, which I believe directly translates to the construction trades where safety, precision, teamwork, and reliability are essential.

What Interested You in Plumbing?

I'm interested in a career in plumbing apprentice trades because I value hands-on work and learning a skill that has real, practical impact. Building trades offer the opportunity to earn while learning, gain specialized training, and build a long-term career without taking on unnecessary debt. I'm motivated by the idea of mastering a trade that requires discipline, problem-solving, and attention to detail. Specifically, plumbing stands out to me because it plays a critical role in public health and everyday life. Clean water, proper drainage, and safe gas systems are essential to every home and business. I respect that plumbing combines physical work with technical knowledge, blueprint reading, and code requirements. It's not just labor it's skilled, precise work that protects people and keeps communities running safely. An

Swinehart Plumbing. I just worked there for 2 months and learned a decent amount. I've learned how to use tools, nail plate, angle bracket, drilling (pipe and water fittings), along with being able to keep up and do the labor work. I just had problems with one of the journeymen because he would take things to far on top of being disrespectful.

Why are you exploring an apprenticeship program?

The benefits that come with it. Along with the pay to be able to save up for kids, trips, large future purchases and understanding problems like when getting a house and knowing the problems with it.

Tell Us About Any Relevant Hobbies:

I don't have any hobbies related to plumbing. But all of my hobbies include figuring things out and continuing on so I think they help in an aspect of getting stuff done and finding ways to understand the task at hand.

What Interested You in Plumbing?

Tired of looking for a job that will pay enough in the long run while starting a family. Also thought it would be nice learning multiple skills that can be used outside of work at home as well.

Tell Us About Any Relevant Jobs :

I was a hand under a contractor in Wyoming in 2017 for a little over 6 months, I helped him with plumbing, carpentry, electric, and masonry. He would buy and renovate condemned properties that were then reinserted to the market. While I could argue my maintenance at McDonalds counts I hardly agree it does.

Why are you exploring an apprenticeship program?

I love the feel of tools in my hand and satisfaction of completing a project. While software support is rewarding it is not as great as seeing your physical work complete. There are also many more growth opportunities that are actionable compared to my corporate career.

Tell Us About Any Relevant Hobbies:

I like repairing my car and or residence regardless of the task, I also like to refurbish electronics and other hardware. How does this translate, these hobbies let me stay physically fit and keeps my ability to handle complex or physical tasks fresh.

What Interested You in Plumbing?

I have done work in Wyoming under a general contractor not associated with a union, I love working in the trades but have not had the opportunity to do so until recently. As far as plumbing I want to go with medical plumbing as a specialty but would more than happy to do generalized work even after getting the medical gas certification. I also would like to add I miss the physicality of the trades versus the sit down hands off experience of corporate jobs I have been doing in recent years.

Tell Us About Any Relevant Jobs :

In my previous jobs, I developed several skills that apply to the pipe trades. As a direct support professional, I learned responsibility, patience, and how to stay calm while handling challenging situations and ensuring the safety of others. Working as a custodian helped me build a strong work ethic, attention to detail, and the ability to complete physical tasks efficiently. As a cashier, I developed communication skills and reliability while working as part of a team. These experiences helped me build responsibility, problem-solving skills, and a strong work ethic that would carry over well into the pipe trades.

Why are you exploring an apprenticeship program?
An apprenticeship is attractive to me because it provides the opportunity to learn valuable skills through hands-on experience while working alongside experienced professionals. I like the idea of learning the trade in a real work environment rather than only in a classroom. An apprenticeship also allows me to earn a wage while developing the skills and knowledge needed to build a long-term career. It seems like the best way to gain practical experience, improve over time, and become highly skilled in the trade.

Tell Us About Any Relevant Hobbies:

I have several hobbies that have helped me develop skills that transfer well to the construction trades. I enjoy working with computers and troubleshooting technical issues, which has helped me build strong problem-solving skills and patience when diagnosing problems and finding solutions. This type of logical thinking and attention to detail is similar to the process of identifying and fixing issues in plumbing systems. I also stay active through bike riding and weightlifting, which help me maintain the physical fitness and endurance needed for hands-on work and physically demanding environments. In addition, playing the saxophone has taught me discipline, focus, and the value of consistent practice to improve a skill over time. These hobbies have helped me develop persistence, attention to detail, and a strong work ethic that I believe will help me

What Interested You in Plumbing?

I'm interested in a career in the building trades because I like the idea of doing hands-on work that produces something real and useful. I enjoy solving practical problems, working with tools, and learning skills that have a clear impact on people's daily lives. Plumbing in particular interests me because it's a critical part of every building and requires both technical knowledge and problem-solving. The work is varied, and there's always something new to learn, whether it's installing systems, troubleshooting issues, or improving efficiency. I'm also attracted to the stability and long-term career opportunities in the trade, as well as the ability to continue developing skills and eventually become highly skilled in the field.

Tell Us About Any Relevant Jobs :

For a summer job in between years in school, I worked at a monument dealer and installation company. I learned how to operate a forklift and bond and seal certain things together with very heavy-grade glues and putties. I also would often use large tools that would require me to drill and/or shape the monuments. In school I also had some classes that involved home maintenance, where I learned how to install, replace, and clean out things like a P-trap. I also had classes in the metal shop and wood shop, where I learned a lot about tools and how to properly and safely use them.

Why are you exploring an apprenticeship program?

Because it allows me to earn while I learn, and it can teach me how to become a great plumber that can help me have a successful career in this line of work.

Tell Us About Any Relevant Hobbies:

I am an outdoorsman, and I do a lot of fishing and hunting, where I encounter lots of different elements and challenges that I overcome. For example, I own an older boat that is prone to having problems, and I have had to learn and apply new skills into fixing it and making it water-capable, like rebuilding the entire deck on the boat and installing a bilge pump and livewell system into the boat. I am also inclined to do woodworking and metalworking. I have taken many classes in school that placed me into the shop, where I've made many projects, and out of school, I have made many of my own projects, such as my boat's front deck and repairs to the trailer. I enjoy sports as well. I did some sports in school such as football, baseball, and wrestling. And I have also continued those out of school and also took on some new ones like golf.

What Interested You in Plumbing?

I initially became interested in the trades because I don't want to spend thousands of dollars on college. I chose plumbing because the work I would be doing is something I am confident that I can complete for the rest of my career without having second thoughts.

Add'l Edu. Details:

Years of Full-Time Work Experience: 10+

Relevant Experience Level:
None. Nothing even close-but I'm a hard worker and willing to learn!

Pipe Welding Proficiency:
None

Tell Us About Any Relevant Jobs :
None really, sorry! I operated heavy machinery in a parmesan production plant almost 15 years ago, but nothing involving pipes.

Tell Us About Any Relevant Hobbies:

I don't know about directly transferrable. I've got a smattering of woodworking experience with a fair number of tools for it, but have never made anything more complicated than a cabinet. I do like solving problems with construction related issues around the house, but usually have to call someone in if it's going to take more than a few hours.

Otherwise, I'm very physically healthy and plenty strong for the work. I'm quick with simple mathematics and a plenty apt reader and writer. I believe I'll pick things up with some grit and a good teacher.

What Interested You in Plumbing?

I've been interested in the trades for quite a few years but was just afraid to leave my comfort zone and take the leap, especially since I didn't live in areas with good apprenticeship opportunities until recently.

As for plumbing specifically, I've got an especially strong tolerance to foul odors, but more importantly, it just seems like an enjoyable career to me. Working with pipes always seemed like physical puzzle solving in a way, and on the occasions I've had to call in a plumber and they were more than happy to talk, everything about it felt right up my alley. At least in residential plumbing!

Why are you exploring an apprenticeship program?
It wasn't for the longest time, because I thought apprenticeships were treated like school, and I wasn't ready for even a year long commitment where I wouldn't be earning an income at any point in my life. Not to mention the lack of opportunities again. I've had a single career path which has holed me in for well over a decade, and I was comfortable with that.

But recently I was bitten by curiosity. I decided to look it up finally, after seeing union trade buildings all over, and within a few moments I realized how ridiculous it was to be so apprehensive. Apprenticeship looks like a fantastic opportunity at this point in my life.

Tell Us About Any Relevant Jobs :

I've worked in roofing, and while the materials are different, First, it proved I have the physical grit and stamina for this line of work. Roofing is demanding labor in all kinds of weather, and it taught me how to work hard and stay productive through long, grueling shifts. On the technical side, roofing taught me the value of precise measurement and layout. We had to measure carefully to ensure everything lined up and shed water perfectly.

Why are you exploring an apprenticeship program?

I'm looking for more than just a job; I'm looking for a professional foundation. The plumbing trade provides the opportunity to gain a mastery that leads to consistent work and the ability to provide a great life for myself. An apprenticeship is attractive to me because I'm a hands-on learner who wants to build a long-term career, not just get a degree. I want to learn the right way to do things directly from experts on the job site.

Tell Us About Any Relevant Hobbies:

On the mechanical side, I do my own basic automotive maintenance, like changing my car's oil, swapping out brake pads, and rotating tires. That's taught me a lot about tool safety, how mechanical systems operate, and how to methodically troubleshoot a problem when things don't go perfectly right away. To stay in shape, I hit the gym consistently and play soccer. The trades are incredibly demanding physically, Ultimately, I'm happiest when I'm doing hands-on work and figuring out how things fit together, and I want to bring that work ethic and mechanical mindset to the job site every day.

What Interested You in Plumbing?

Since I was 12 years old, I've known that my future was in the trades, I am fully committed to the rigors of an apprenticeship. I want to learn the technical codes and advanced systems from the best in the business to ensure I become a top-tier technician. Plumbing is vital to public health and safety. I take pride in the idea of being the person called upon to solve complex problems for people in my community, ensuring their homes and businesses are running correctly."

Relevant Experience Level:
None. Nothing even close-but I'm a hard worker and willing to learn!

Pipe Welding Proficiency:
None

Tell Us About Any Relevant Jobs :

My experience in landscaping has given me a foundation that transfers directly to the pipe trades. Assisting the foreman and crew on residential and commercial projects taught me how to follow instructions, support a team, and keep the job moving—skills that are essential on a plumbing job site. Hauling rock, pavers, and other materials built the physical strength and endurance needed for tasks like carrying pipe, setting fixtures, and working in tight or awkward spaces. Digging trenches for drain tile gave me experience with grade, layout, and understanding how water needs to move—concepts that apply directly to underground plumbing and drainage work.

Why are you exploring an apprenticeship program?
My interest in the skilled trades began last summer while working for Western Landscape, where I learned that I genuinely enjoy hands-on, physically demanding work. The job required hauling materials, digging trenches, installing landscape beds, and supporting the crew in whatever was needed. The emphasis on quality workmanship, communication, and teamwork showed me how rewarding it is to contribute to a project that must be done correctly. That experience made it clear that I'm motivated by work where effort, reliability, and skill directly impact the final result—exactly the environment found in the trades.

Tell Us About Any Relevant Hobbies:

My hobbies line up naturally with the demands of the trades because they push me to stay disciplined, consistent, and physically capable. Through weightlifting and running, I've built strength, endurance, and the ability to work through discomfort while staying focused. Lifting keeps me stable and strong for tasks like carrying materials, moving equipment, and working overhead. Running builds the stamina and mental toughness needed to stay sharp through long days. These habits show that I'm already preparing both my body and mindset for the physical side of construction.

I also enjoy doing car maintenance with my dad and working toward my motorcycle

What Interested You in Plumbing?

My interest in the skilled trades began last summer through my employment with Western Landscape. The experience confirmed that I enjoy hands-on, physically demanding work and take pride in producing quality results. As a new employee, my responsibilities included hauling rock and pavers, spreading mulch, laying sod, installing landscape beds, digging trenches for drain tile, and assisting crew leaders as needed. The company emphasized customer satisfaction and quality workmanship, which required clear communication, attention to detail, teamwork, and physical endurance. Although demanding, the work was rewarding, and I found satisfaction in seeing each job completed correctly.

A little. No specific trade experience, but I have general skills in construction or welding.

Pipe Welding Proficiency:

None

Tell Us About Any Relevant Jobs :

I really have not had any jobs applicable to pipe trades. I worked at a salvage yard from 18-23 and at a factory from 23-present. I am however a quick learner and catch on pretty easily.

Tell Us About Any Relevant Hobbies:

I like to work with my hands. I've done some minor plumbing at my home, such as swapping out leaky valves and clearing clogs in the pipes in my house.

What Interested You in Plumbing?

Why are you exploring an apprenticeship program?

I figure I have to start somewhere and with little to no experience in the trades/construction becoming an apprentice would be my best option for changing my career to something more sustainable.

I've been looking into a career path change. I currently work at a factory in the receiving department. I chose plumbing because it seems to be more of an "independent" trade and I prefer working alone but can also work in a team environment. Also I like the opportunity of increasing wages. I would some day like to run my own plumbing business in the future.

Tell Us About Any Relevant Jobs :

I worked at a construction company and did a little bit of plumbing. I also worked at an underground electrical company and ran duct and fiber underground. I started working on a dairy farm when I was 11 and that taught me time management and work ethic. I learned how the milk gets ran through the pipes there too.

What Interested You in Plumbing?

I am a very hard worker and I like to work with my hands and a new environment. I enjoy working with other people with common interests as me.

Why are you exploring an apprenticeship program?
To get ahead in my career without taking on college debt. Also learn my lifelong career right out of high school with hands on training.

Pipe Welding Proficiency:
Stick - Some Knowledge, TIG - Some Knowledge

Tell Us About Any Relevant Jobs :

Skills I've learned that are applicable to pipe trades is the current job I have now. I have done a some underground plumbing when I was a concrete working setting up drains for a residential at a different company. I have learned a lot at the company I'm at and would like to follow this pipe trade as my career.

Why are you exploring an apprenticeship program?
This apprenticeship is an attractive option for me because it is a way for me to grow in this career while learning at the same time. It will help me to master my skills while doing something I am passionate about. I feel this would be a big opportunity for me and allow me to reach my goals as well.

Tell Us About Any Relevant Hobbies:

Some of the hobbies I enjoy include building guns, wood working, and hunting. I feel that these hobbies help improve me in my work for many reasons. For example, when building guns you need to be educated on that specific build and know what parts to use. Wood working helps me be more precise with cutting as well as paying attention to detail. Lastly, hunting takes strategy and patience. I strongly believe these hobbies will give me skills to help improve in my trade.

What Interested You in Plumbing?

I am interested in this career because I've enjoyed working in the trades from a young age. I have always been a hands on learner and can easily adapt to new environments and learn new skills. I am dedicated to learning more about plumbing and one day mastering the trade.

I have had experience with basic underground plumbing with PVC as well as doing mechanical rooms, and reading blueprints. I am eager to learn different areas of plumbing to grow my skills. I am confident this is a great career choice for me as I've have done a variety of trades and enjoyed this one the most. This would be an amazing opportunity for me to grow and learn, as well as improving the company.

Add'l Edu. Details:

Years of Full-Time Work Experience: 1-3

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Pipe Welding Proficiency:

Stick - Some Knowledge, MIG - Some Knowledge

Tell Us About Any Relevant Jobs :

I have worked at ETC and D&S, where I developed skills that are applicable to the pipe trades. At ETC, I worked in manufacturing on an assembly line, which taught me how to use tools safely and maintain consistency in my work. It also helped me understand the importance of quality control and working efficiently as part of a team.

At D&S, I worked in a maintenance role, where I gained hands-on experience with repairs and maintaining equipment and facilities. This job strengthened my mechanical skills, problem-solving abilities, and attention to safety.

Why are you exploring an apprenticeship program?

An apprenticeship is attractive to me because it allows me to learn a skilled trade hands-on, giving me real experience instead of just classroom instruction. I also like that I can earn while I learn and build a long-term career without taking on college debt. An apprenticeship feels like the right path for me because it leads to a skill set that's valuable and in demand.

Tell Us About Any Relevant Hobbies:

In my free time, I'm always working on my own car, which has helped me develop mechanical skills and patience when diagnosing and fixing issues. I've also taken many shop classes, including welding, construction, and small engines, which gave me hands-on experience with tools, measurements, safety practices, and following detailed procedures. I enjoy building things for fun, I also help my family on the farm, where I've learned the value of hard work, teamwork, and reliability. All of these activities have helped build skills that transfer to the trades, such as tool use, mechanical understanding, problem-solving, and a strong work ethic.

What Interested You in Plumbing?

What interested me in a career in the trades is that I grew up around blue-collar work. Many people in my family have worked hands-on jobs, and being around that environment made me appreciate skilled trades early on. I've always liked working with my hands and learning how things function rather than sitting at a desk. Plumbing interests me because I'm curious about how systems work behind the scenes. I like that plumbing is both physical and technical, and that it requires problem-solving. It feels like a trade where skill, experience, and hard work really pay off.

Tell Us About Any Relevant Hobbies:

I've helped my dad in the building of different structures around my family home, such as a garage/shed, backyard deck, sidewalks, and retaining walls. With these, I've done a fair bit of manual labor and learned some bits of carpentry, welding, electrical wiring, and simple building construction.

Tell Us About Any Relevant Jobs :

I believe the only job that's applicable is where I worked for a summer at Gates Corporation in Iola, KS where I worked on the production line as a 200' hose length tester. Not a whole lot of relevant skills except it was a full-time job with manual labor.

What Interested You in Plumbing?

I've been interested in trade work for a while now because I want to build useful skills for both work and life. What got me interested in plumbing in particular is that my parents have had numerous recent issues with the house's drain and sewer systems to the point of flooding, so I wanted to gain the skills to help them and others out with their issues.

Why are you exploring an apprenticeship program?

I appreciate the idea of learning as I work, acquiring the skills of the trade instead of being expected to already have them right off the bat. I also like that I can learn by working with more experienced people, which is something that I haven't really gotten in other jobs I've worked.

Years of Full-Time Work Experience: 4-6 Tell Us About Any Relevant Hobbies:

Relevant Experience Level: None. Nothing even close-but I'm a hard worker and willing to learn! Outside of my professional work, I am automotive enthusiast. I perform my own vehicle maintenance, such as brake repairs and engine diagnostics. This hobby has sharpened my mechanical aptitude, my ability to use precision tools, and my troubleshooting skills—all of which are directly transferable to the technical demands of plumbing and pipefitting.

Pipe Welding Proficiency: Stick - Some Knowledge Tell Us About Any Relevant Jobs : Additionally, I enjoy fishing and playing team sports like football. These activities have taught me the importance of patience, preparation, and collaboration. Whether I am analyzing a complex mechanical issue in a car or working as part of a team on the field, I apply a disciplined and detail-oriented mindset that ensures tasks are completed safely and efficiently on a construction site.

Why are you exploring an apprenticeship program? I have a deep appreciation for the "how" and "why" behind infrastructure, but I believe that true expertise is only achieved by combining that theory with hands-on experience in the field. This model allows me to learn from seasoned professionals while immediately contributing to the construction projects that support the Wisconsin community. Also the "earn-while-you-learn" aspect of an apprenticeship is vital, isn't just a job me; it is an intentional investment and my commitment to my family and for my long-term goals. What Interested You in Plumbing? My passion for construction began at a young age while working alongside my grandfather, where I first learned the value of hard work and craftsmanship. This early exposure inspired me to pursue a Civil Engineering degree in my birth country Ecuador, where I completed over four years of rigorous technical training. During my university career, I discovered a profound interest in Fluid Mechanics and Hydraulics, which provided me with a deep understanding of the physics and design principles behind complex piping systems. Currently, I am living in Loganville, WI, and attending Madison College to formalize my engineering background within the U.S. system. I am eager to transition into a plumbing career because it allows me to apply my advanced theoretical knowledge to hands-on, field-based challenges. My goal is to build a stable and successful

Tell Us About Any Relevant Jobs :

I haven't had any jobs in which I learned skills that would be applicable to the pipe trades. I guess with my sales experience, some roles required basic math skills. My time in the army expanded my knowledge of teamwork and also required me to learn how to be a leader.

Why are you exploring an apprenticeship program?

The fact that I can learn an in demand skill, with other like minded individuals, while getting paid versus spending thousands more to pursue a new career path.

Tell Us About Any Relevant Hobbies:

I enjoy golf. That requires a lot of mental focus and endurance to do well over 18 holes. You have to be able to learn from mistakes. I work out which keeps me in shape and requires self discipline to make it to the gym even on days I do not feel like it. With both of these I have a natural curiosity about how to get better and both of these hobbies which transfers into other parts of my life. I don't any hobbies that have developed skills that are directly transferable to construction trades other than the skills of learning and a desire to learn new things.

What Interested You in Plumbing?

I've spent about 5 years in sales and have realized it's not a career path I enjoy. I'd like to learn a skill that is in high demand. It's work I can be proud of and I've heard from friends that are plumbers that plumbing had been a great career for them.

OSHA 10, First Aid / CPR

Add'l Edu. Details:

Years of Full-Time Work Experience: 0

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Pipe Welding Proficiency:

None

Tell Us About Any Relevant Jobs :

I have not had any jobs where I learned skills applicable to the pipe trades yet. I am graduating from high school this spring. I have worked in construction trades through a program in school with some exposure to the pipe trades, but it was not a job. Also, I have worked at Klondike Cheese Company part-time during high school (and full-time during the summer), but it was not applicable to the pipe trades.

Why are you exploring an apprenticeship program?

An apprenticeship is an attractive option because I learn best while doing. I would rather learn at a job site than in a classroom most of the time (although I realize that some classroom time is necessary). I love to be active and solving problems while keeping my body busy. I also love working with people and being around others. Additionally, I get along with all types of people easily and enjoy meeting new people.

Tell Us About Any Relevant Hobbies:

Sports have always kept me busy but especially playing football. I was senior captain of the high school football team. This shows that I am able to work together with a team but also my leadership skills. These skills are transferrable to construction trades because it is crucial to work well with others and communicate well to get jobs done correctly. Being chosen as a captain also means that I showed up to all practices on time and maintained good rapport with the entire team as well as coaches. Again, these are qualities that will aid in the construction trades.

In addition to maintaining great grades and being active in sports during high school, I also worked a part-time job at Klondike Cheese Company. I am willing to work hard and

What Interested You in Plumbing?

Throughout high school, I took many courses that introduced me to the trades. I also had the opportunity to be part of a Launch Program my final year of high school that specialized in the skilled building trades. We were fortunate enough to build a new home for the Monroe community in this program. It was the process of building the home that solidified my interest in the trades and more specifically plumbing. Furthermore, I like to stay busy and learn best while working. I also love to be outdoors. An apprenticeship would allow me to advance my skills while working in different environments and learn while doing. The field of plumbing is like a puzzle which I find interesting. It keeps my mind busy while also working my body.

AA Degree and courses related towards an elementary
education degree

Years of Full-Time Work Experience:

7-9

Relevant Experience Level:

None. Nothing even close-but I'm a hard worker and willing to learn!

Pipe Welding Proficiency:

None

Tell Us About Any Relevant Jobs :

Honestly, my previous work experience does not apply much towards the pipe trades. I
have worked for United Airlines for 3 years to learn a bit about Unions, but thats about it.

Tell Us About Any Relevant Hobbies:

I have a hobby where I construct small projects. Assembling props for skits, lanterns
made of scrap and wax, that sort of thing.

What Interested You in Plumbing?

I take a great deal of pride in fixing things. Partner that with an aptitude for following
procedure, a weakened sense of smell, and a clear future career in the industry, and that
explains my rational.

Why are you exploring an apprenticeship program?

An apprenticeship is a great way for me to learn the skills needed for the job as well as a
way to support myself too. A fear of going back to school is the stagnation of my financial
obligations, so earning a livable wage as well as learning and growing as a professional
sounds optimal.

Years of Full-Time Work Experience:

10+

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Pipe Welding Proficiency:

None

Tell Us About Any Relevant Jobs :

Working in restaurants and retail, most buildings I worked in were historic with old plumbing systems and I had to learn to fix them.

Tell Us About Any Relevant Hobbies:

I continue to learn new skills in construction trades: woodworking, plumbing, electrical, flooring, tiling, masonry, roofing, etc. Last summer, I had to learn how to install a faulty control board in a Fulgor Milano built in refrigerator. Currently, I am renovating a 1950s era home that requires all wood cabinetry and trim to be stripped of numerous layers of paint and refinished, numerous bathroom tile renovations and new floating plank flooring to be installed. I am learning about record keeping, project management and building a network to finish this project on time and on budget. I work out regularly and balance running with weight lifting and cycling to stay healthy and disciplined.

What Interested You in Plumbing?

Why are you exploring an apprenticeship program?

My preferred learning style is hands on and on the job. I like to learn by solving real world problems and gain experience while supplementing with educational opportunities. Simply put-to learn from experts while being guided with time for reflection and theory in the classroom.

As a homeowner who has learned to repair, update and replace plumbing in homes from the late 1880s, 1950s-1970s and modern buildings, I became interested in plumbing due to how essential it is to modern society. I enjoy learning new and useful skills that involve physical and mental capacity. After completing a gut renovation of a shower that required new fittings, I became intrigued to make a career change. I am a people person and enjoy the team environment of construction. My father was a machinist and I have become inspired to learn the trade of plumbing. Geothermal systems and material innovations fascinate me. I hope to learn hydronic heating systems if selected as a plumbing apprentice.

Tell Us About Any Relevant Hobbies:

I like to fix things in my home when you are not functioning properly. I also like to update things such as pipes and connection pieces as they age and don't work as well. I have a 3D printer and I work a lot with printing specific part and pieces for home improvements. I use the online program for designing creation and printing files.

Tell Us About Any Relevant Jobs :

At my current job I work with a lot of animal feces and bodily fluids. I know plumbing does entail working with those elements but I know it's not all what the job is about. At my job I am in charge of fixing laboratory equipment when it malfunctions and I enjoy doing it. I am always up for a challenge and learning new ways to fix things.

What Interested You in Plumbing?

I have always had an interest in plumbing I just never pursued it until now. I would say I have a basic knowledge of plumbing but I am very excited to learn more. When something in my personal home is not functioning properly, whether it be the toilet or the kitchen sink not draining, I will take things apart and fix it myself. I don't look at it as a chore rather than a fun project. That's how I know I have an interest in the plumbing field and I am very interested in learning more and expanding my knowledge.

Why are you exploring an apprenticeship program?

I am very interested in plumbing and have always wanted to pursue this career path. At my current job as a Veterinary Technician I work with a lot of feces and bodily fluids so I know that doesn't bother me. I have the Lead Veterinary technical at my current job and I oversee multiple technicians and assistants. I love working with other people especially in group settings and I tend to be a leader but I am able to appreciate and respect other leaders.

Relevant Experience Level:
Some. I have worked for a plumber, steamfitter or HVAC/R contractor.

Pipe Welding Proficiency:
Stick - Skilled, MIG - Skilled, TIG - Some Knowledge

Tell Us About Any Relevant Jobs :

I was a boilermaker and we did a lot of tube work. I learned many skills blueprints, Welding, Pipe installation, alignments, and most important, I learned how to work safe and watch for hazards before doing the job. I did a lot of rigging and working with lots of equipment. I believe that working in this industry taught me a lot to adapt to the pipe trades.

Why are you exploring an apprenticeship program?
Its attractive to me because its a good way to learn all of the basics and knowledge while going to work and getting paid. An apprenticeship will teach you so many things as you do many hands on projects and you learn from skilled professionals. Its also building a future for your retirement and have some of the best benefits to ensure your health. I think that an apprenticeship is the best option for anyone who is looking towards the construction careers.

Tell Us About Any Relevant Hobbies:

I work landscaping sometimes on the side and we do a lot of running water pipes through the ground and I think there's a lot of skills in this that are transferrable to the construction trades because its physical work and endurance. Working in this requires heavy lifting working in different conditions and get used to long hours of work.

What Interested You in Plumbing?

I am interested in building a career close to home with lots of work throughout the year. Building trades interested me because its a opportunity to learn new skills and work with professionals that will teach you how to get the job done. Building careers is a good option because you make money while going to school and its a door opener for someone trying to make a living for themselves especially right out of school.

I enjoy hands on work like painting houses and home repairs for my family and friends, its taught me that it is important to pay attention to detail and take pride in every job I do. I also am a very active person which I feel with help with the physical side that comes with plumbing.

Tell Us About Any Relevant Jobs :

Working in retail has taught me better communication, team work and problem solving while under pressure/fast environment, Its taught me how important is to communicate with the co-workers I had and even the customers that would come through. Being in the warehouse taught me how well I am able to handle physical work task all while remaining safely with the equipment. Lastly becoming a father has made me more responsible and ready to handle any unexpected challenges that can come my way.

Why are you exploring an apprenticeship program?

I am willing to start from the bottom and work my way into a real career. I also enjoy the educational aspects that comes with an apprenticeship.

What Interested You in Plumbing?

What interests me the most about building trades and a career in plumbing in general is I'm tired of the dead end jobs that offer no real challenges. I love to work with my hands and practical work which is the most rewarding to me. I chose plumbing because its a mix of problem solving and physical labor which is right up my ally. Plumbing is an essential to everyday life and I like the idea of learning a trade where I can see the results of my work, also providing for my family while building a stable career.

Years of Full-Time Work Experience:

1-3

Relevant Experience Level:

Some. I have worked for a plumber, steamfitter or HVAC/R contractor.

Pipe Welding Proficiency:

None

Tell Us About Any Relevant Jobs :

After high school, and throughout college, I worked three internships that helped shape my interest in construction and the trades. At 1901 Inc., I got hands-on experience in a commercial plumbing and HVAC environment, where I saw how systems are installed from the ground up; from underground rough-ins to mechanical rooms and final fixtures. I worked alongside plumbing and HVAC designers, drew the plans in Autodesk software, and observed the planning and coordination it takes to keep a job running smoothly. That experience gave me a deep respect for the trade and showed me how essential plumbing is to every project. It also made me realize I enjoyed being out in the field more than sitting in a classroom.

An apprenticeship is attractive to me because it offers the best of both worlds: hands-on learning in the field and structured education in the classroom, all while getting paid to grow. I really value the fact that I'm building skills through real experience, not just textbooks, and earning while I learn makes it even more rewarding. I also like the clear path of progression that an apprenticeship provides. There's always something new to learn, and each phase of the training pushes you to level up your knowledge and ability.

The five-year program gives me a long-term goal to work toward. I'm motivated by the idea that every year I'll be improving, gaining more responsibility, and becoming more

Tell Us About Any Relevant Hobbies:

I like to workout which helps the physical nature of the profession. I love basketball too, and learning the game helps me understand the small details of the game which helps make me a very detail-oriented person. This helps me to see "between the lines" and make sure things are done accurately and particular in everything that I do. Playing sports has also helped me to develop a strong work ethic that has helped me in all areas of my life. Although I don't pursue architecture anymore, working and studying in that industry has taught me very helpful construction knowledge that has carried over in the trades.

What Interested You in Plumbing?

I originally began my journey in architecture because I liked design, building concepts, and working on creative projects. But over time, I realized I wanted something more physical and hands-on — where I could actually build the things I was drawing. That's what drew me toward the trades. I wanted to be involved in real-world projects from the ground up, and I liked the idea of gaining skills that would always be in demand. Plumbing stood out to me because of the mix of problem-solving, physical work, and the impact it has on every type of building.

Since getting started in plumbing, I've really enjoyed the challenge and variety of the work. I've been on jobs where I used tools like a bandsaw, Super Hawks, power drills, etc,

Tell Us About Any Relevant Jobs :

I currently work for Menards since October 2024 in the Hardware Section. Some of the tasks I routinely complete are as follows: stocking and categorization of merchandise, keeping the store tidy and organized, responding to customer inquiries, reviewing inventory, disassembling waste, freight, and organizing returns, and transporting heavy and awkward loads. Formerly, I worked at Monk's Bar and Grill, a fast-paced environment. Being a former host, I effectively communicated with coworkers and guests to create a welcoming atmosphere.

Why are you exploring an apprenticeship program?

An apprenticeship is an attractive option for me for a variety of reasons. One being I value the end of work done with my own hands. I appreciate helping sustain the basic needs of our communities. Additionally, seeing my work become more than solely a task and transform into something affecting someone's home and life in a positive way.

Tell Us About Any Relevant Hobbies:

My hobbies consist of a diverse range of activities that combine physical fitness and problem-solving elements. I enjoy engaging in regular workouts, hiking, and running. Additionally, I find Sudoku and video games that emphasize critical thinking skills to be intellectually stimulating. Furthermore, I cherish my time spent with my family, engaging in activities such as playing cards and board games.

What Interested You in Plumbing?

As a senior at Sun Prairie West High School, I am committed to pursuing a career in plumbing. Since my sophomore year, I have engaged in construction classes that have broadened my knowledge base, encompassing interior and exterior construction, as well as collaborative projects with Tim O'Brien on home construction. After observing subcontractors on house sites, plumbing became an area of particular interest to me. I am eager to pursue a career that combines the benefits of working as part of a team known for its speed, professionalism, friendliness, and expertise.

Currently, I work weekends at Menards, where I have well rounded my customer service skills and developed the ability to interact effectively with individuals in diverse

Pipe Welding Proficiency:

None

Tell Us About Any Relevant Jobs :

Throughout my last jobs, I say I have acquired a lot and learned many skills. How I say they incorporate with the pipe trades is as an online shopper for both Woodman's and Walmart, I worked and work in a fast-paced environment where organization is an important key factor. Not only do I have to be organized, but I also have to be fast to meet production requirements. I say these experiences have taught me the importance of managing time, paying attention to detail, and adapting quickly, all important skills when working in the pipe trades.

Why are you exploring an apprenticeship program?

The reason why an apprenticeship is an important option for me is that I like the idea of earning while learning. Also, building my skills directly at the job instead of sitting inside a classroom. The approach of an apprenticeship gives me the chance to understand how the trade works in a real situation and helps me develop the confidence that comes from actually doing the work. Another reason why I like and value this attractive option is how it provides a clear pathway for growth. I know that throughout the training and experience, I can learn a lot, I'll be able to build a strong foundation, and eventually grow toward becoming fully licensed. It's beneficial and motivating to know the effort I put in during my apprenticeship will set me up with a stable and lifetime career. With

One of my main hobbies is going to the gym. I am and I have been, very dedicated to this, going from being 200 pounds overweight. I stay motivated to go every day. The discipline I have built in the gym translates well into the trades because it demonstrates how I stay disciplined, how I face the challenges, and put in hard work to see results, no matter how I am feeling that day. Another one of my favorite hobbies is when I am free or off, I help out at my church. which has given me a great chance to work with others, and it has taught me the importance of respecting others. also, I've learned how important it is to communicate with others, support others, and contribute to a shared purpose. These experiences have shown me how I work well with other people and have made me value teamwork qualities that I know are essential in the construction trades, where jobs

What Interested You in Plumbing?

What really interests me the most about this career is the ability to learn a skill that is always in high demand and provides me with the chance to work with my hands and problem solve and see the results of my work right away and be proud of what I did. Also, what stands out to me more is that everywhere I go, every business needs plumbing, and that really puts it into perspective on how important this trade is and how the community depends on it. I also like the opportunity it provides as a career on the stability in this career, and how it gives me the chance to get licensed and hope to have my business one day.

Years of Full-Time Work Experience: 1-3

Relevant Experience Level:
None. Nothing even close-but I'm a hard worker and willing to learn!

Pipe Welding Proficiency:
None

Tell Us About Any Relevant Jobs :
Over the course of eight years in landscaping and three years in property maintenance, I've gained valuable hands-on experience that aligns well with the core demands of the pipe trades. These roles taught me how to work with tools, problem-solve in physical environments, and stay focused in challenging conditions. I've become comfortable with manual labor, following safety procedures, and contributing to team-based projects—skills that I believe are directly applicable to success in the pipe trades.

Why are you exploring an apprenticeship program?
An apprenticeship is an ideal path for someone like me because I thrive in environments that are physically engaging and hands-on. Sitting in a classroom never matched the way I absorb knowledge, but I learned how to do that while graduating from college in December, and working directly with tools, machines, and experienced professionals is where I learn best. As a former college student-athlete, I'm no stranger to discipline, time management, and pushing through adversity. I know how to take coaching, adapt quickly, and give consistent effort every single day. That mindset translates perfectly into an apprenticeship, where I can build real skills while contributing to a team and growing into a dependable, hardworking professional.

Local 75 Courses Completed:

Tell Us About Any Relevant Hobbies:

As a former football player and team captain, I gained leadership, teamwork, and communication skills that directly apply to the construction trades, where timing and trust are essential. My dedication to lifting and staying fit reinforces the discipline and physical strength needed for hands-on work. Hunting and fishing have sharpened my patience, attention to detail, and commitment to safety—qualities vital on a job site. Golf has taught me focus, persistence, and composure under pressure, while watching sports fuels my understanding of strategy, roles, and collective success. Altogether, these passions help me bring grit, awareness, and a team-first mindset into any challenging environment.

What Interested You in Plumbing?

My interest in the building trades stems from a passion for hands-on work, problem-solving, and the sense of fulfillment that comes from seeing tangible results. All qualities I relied on as a student athlete at UW-Whitewater, where I balanced football and academics to earn a 3.0 GPA. Working in landscaping and property maintenance gave me firsthand experience with the physical demands and technical precision the trades require, and plumbing especially caught my attention for how essential it is to people's everyday lives. I'm drawn to the challenge of recognizing and fixing systems that impact health, comfort, and safety, and I believe my strong work ethic, coachability, and team-oriented mindset make me well-suited for a career where every day presents an opportunity to learn and contribute meaningfully.

As a construction laborer for landscaping and concrete work I have skills with many different hand and power tools. I have a lot of experience with earth moving and operating trenchers. Some experience installing drains and operating mini excavator.

Why are you exploring an apprenticeship program?
It gives me an opportunity to properly learn a trade I will turn into a lifelong career. It also introduces me into a network of professionals working towards similar goals. What Interested You in Plumbing?
I have some experience in the building trades as a laborer and carpenter for a concrete company, I found a lot of enjoyment in building something that will serve others and was built to last for a long time. I am interested in joining the plumbing trade because I see it as one of the most important trades our communities rely on.

Pipe Welding Proficiency:

Stick - Some Knowledge

Tell Us About Any Relevant Jobs :

I've worked in construction with my grandpa on sidewalks, stairs, and driveways, which taught me how to use tools and work hard in tough conditions. I've also done yardwork and was a lifeguard, which gave me some experience with pool systems and water safety. All of this built my physical strength, problem-solving, and ability to work as part of a team—skills that transfer well to plumbing.

Why are you exploring an apprenticeship program?

An apprenticeship is an attractive option to me because it gives me the chance to learn by doing. I've always preferred hands-on work over sitting in a classroom, and I know I learn best when I can actually apply what I'm being taught. With an apprenticeship, I get to build real skills, earn while I learn, and be mentored by experienced professionals who know the trade inside and out. That kind of training feels more meaningful and practical to me than just reading from a textbook.

It also gives me a clear path forward. I want a career where hard work pays off, where there's room to grow, and where I can take pride in what I do. The trades—especially plumbing—offer that. I like the idea of doing something essential. where every day I'm

Tell Us About Any Relevant Hobbies:

I've developed a range of transferable skills that apply well to the construction trades. My experience in construction with my grandpa taught me how to work with tools, follow directions, and stay focused on quality and safety while doing things like sidewalks, driveways, stairs, and walls. Being a track athlete and lifting weights has built my physical strength, endurance, and discipline important traits for physically demanding work. As a lifeguard and sales associate, I learned how to stay alert, communicate clearly, and work well with others. Yardwork and hands-on tasks have always come naturally to me, and finishing a year of college shows I'm capable of staying committed and learning new things. I'm ready to bring that energy and work ethic into a plumbing apprenticeship.

What Interested You in Plumbing?

I've always been interested in working with my hands and solving practical problems, which is why the trades appeal to me. Plumbing, in particular, stands out because it combines technical skill, problem-solving, and the ability to make a real impact in people's daily lives. I like the idea of learning a skill that's always in demand, offers long-term career stability, and gives me the chance to see the results of my work every day. I'm eager to learn the trade from the ground up and eventually become a skilled professional that others can rely on. I'm drawn to the trades because they offer a clear path to learning valuable, real-world skills without needing a traditional office job. Plumbing, in particular, interests me because it involves technical knowledge, precision, and the ability to troubleshoot in different environments. I like that no two jobs are
