Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

HVAC/R Service Tech

Work Zones in Preference Order:

Fond du Lac Area (Orange)

Relevant Experience Level:

None. Nothing even close-but I'm a hard worker and willing to learn!

Years of Full-Time Work Experience:

4-6

Welding Experience:

Tell us about any jobs where you've learned pipetrades relevant skills:

In my current job working with my cdl for alro steel, I have learned the importance of communication, working safely and problem- solving. Everyday is vastly different in where I am delivering so it is important that I take the most efficient routes. It is also very important that I maintain my safety while delivering steel to working job sites. All day I communicate back to my manager and customers to make sure all orders are fulfilled.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I have spent the past year renovating my first home and learning the skills from family and friends around me. I have enjoyed the hands on work and problem solving that comes especially with an old home.

Shift Availability:

Full-time, 1st Shift (Days), Overtime, Weekends

Post HS Education:

Other Relevant Courses & Certifications

Add'l Edu. Details:

CDL

What trades-related courses did you take in school?

What construction software or technologies do you have training in?

Any Safety Certificates:

First Aid / CPR

Add'l Details:

Why is an apprenticeship an attractive option to you?

I like that it gives you the opportunity to work alongside an experienced individual while having hands on experience. I think I learn best while physically doing things rather than strictly learning from a classroom. I also like that there are tiers you move up each year and this will resemble your progress through the program.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Out of high school I was not sure exactly what I wanted to do for a career. I ended up getting my CDL which I had now for 4 years. Recently I bought my first home and renovated it with the help of family. I saw how beneficial knowing a trade is and how rewarding it is to see your own work. I have also realized there is little growth with my CDI and I want a job that has a variety of job opportunities.

Add'l Details:

Tell us about any hobbies that have boosted pipetrade-relevant skills:

One of my hobbies I have is working on my car whenever an issue comes up. I enjoy taking the time to diagnose and solve the issue. Either its something simple that I have knowledge at or sometimes even looking up a youtube video on how to do it. Working on my car has definitely helped me develop patience, very close attention to detail and using tools properly.

I believe this hobbie is transferable to the construction trades and HVAC because it requires problem solving, attention to detail and it requires mechanical knowledge. I

Why is an apprenticeship an attractive option to you?

An apprenticeship is an attractive option to me because I learn best by being hands on and applying what I learn to real situations. I like the idea of being able to work along side experienced professionals. I get to learn from them and develop new skills while gaining real world experience.

I see an apprenticeship as an opportunity to build a stable long term career in HVAC. It will help me develop skills that I can continue to use and improve throughout my career. I

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I became interested in the building trades because I am looking for a long term career that combines hands on work, problem solving and technical skills. I like solving problems, using my knowledge and technical skills to figure out how things work and how to fix them. Trades offer an opportunity to develop value skills. I also like working in environments where I can continue learning and improving.

I am particularly interested in HVAC because it combines hands on work, troubleshooting, and mechanical systems. I want to develop a strong understanding of heating, cooling and ventilation systems. I want to build the skills necessary to become a qualified HVAC technician. I am willing to work hard, learn from others, and put in the effort necessary to develop a successful career.

Any Safety Certificates:

Add'l Details:

Why is an apprenticeship an attractive option to you?

It helps me learn while I can maintain a healthy balance between school and on site work as a student.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I started learning about specific trades in high school which started my interest in it. It started with woodworking back in CA but as I moved over here it became a general knowledge on construction work. Something that I'd like to know more about because I'm very interested and passionate about working hands on with stuff like this to help build and repair. It doesn't have to be a specific trade but to start off I'd try with HVAC because I was informed it's a less straining field compared to the others.

My main reason for picking pipe trades is to learn a new trade and to broaden my knowledge on the different paths I could take if I continue to pursue this. As well as to try my hand at something completely new that I never had the chance to do before in school. Something that can be a lifelong learning experience for me to use whenever

Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

HVAC/R Service Tech

Work Zones in Preference Order:

Green Bay Area (Yellow)

Relevant Experience Level:

None. Nothing even close-but I'm a hard worker and willing to learn!

Years of Full-Time Work Experience:

7-9

Welding Experience:

TIG - Some Knowledge, MIG - Some Knowledge

Tell us about any jobs where you've learned pipetrades relevant skills:

My job history doesn't all contain transferable skills as I'd like to admit. But I have worked two different jobs that has shown me that I love to get my hands dirty and I want to learn more. I have worked with Lake Air Products as an Assembly worker. I worked with manufacturing, wiring and assembling lawn mowers. Previously I have worked as a Furniture Mover/Account manager at Get It Now in Fond Du Lac, WI. I used to hook up washers/dryers/Fridges and electronical devices. Which has lead me to work with wire/tubes/tools/wood/refurbishing.

First Aid / CPR, OSHA 10

Add'l Details:

Tell us about any hobbies that have boosted pipetrade-relevant skills:

My hobbies include, hiking/working out, longboarding, painting/clay making, playing drums, refurbishing furniture, playing card games/console games, traveling to nearby cities/states.

Why is an apprenticeship an attractive option to you?

The idea of working through an apprenticeship is a goal of mine because it gives me a higher rate of happiness in my working success. That type of information would help me in three ways, learning information is key to me, transferable skills into personal life, "personal growth", and being able to become apart of a true team of hard respectable workers, which is very important.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

What interests me in the career in pipe trades specifically is being able to actually use my hands for a change. As for example, going into people's homes and changing others lives with my own hands. I am a very big people's person so, learning a trade like a Service Technician would round that out completely, skill wise, teaching, and applying into personal life.

I have a strong skill set in wires overall and smaller appliances, and I will find a way to challenge myself for my future. I am a hard worker, quick learner and I take pride in the work that I do. I have been looking for a really strong career for quite a while now, I have taken interest into welding on my personal time, meaning I have proficient hand to eye coordination, I love to create and maintain. I want to challenge myself with what I know I am good at!

Add'l Details:

Why is an apprenticeship an attractive option to you?

I would really love to continue learning and growing while also working and making money. I would like to have a company that I can work for and stick with and climb up and get better with my entire career life instead of going to college and then looking for different companies.

They just overall seem way more convenient for both the company and myself since I get to start working right away and just always have a place to work for while also going to

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Ever since I was young I always wanted a hands on job like this, and then when I got older and into high school I took some classes relating to these types of building/hands on trades and the plumbing unit stuck to me the most, but all of them were still good and I enjoyed them and did well.

OSHA 10

Add'l Details:

Tell us about any hobbies that have boosted pipetrade-relevant skills:

A lot of the activities I enjoy involve being outdoors and working with my hands. I like taking on responsibilities that challenge me. Working my way up to a Crew Leader has helped me develop leadership, communication, and teamwork skills. I have learned that construction is not just about working hard, but also about working well with other people and taking pride in the finished product. I want to continue building on these skills as I pursue a long-term career in the trades and use what I learn to help improve the infrastructure around me.

Why is an apprenticeship an attractive option to you?

An apprenticeship is attractive to me because it would give me the opportunity to continue gaining hands on experience in the trades I already have experience working in, such as a Laborer and Crew Leader. I know that I enjoy construction and working with my hands. I have worked in construction, carpentry, roofing, and concrete coatings, which has helped me realize that I want to make the trades a long-term career. An apprenticeship would allow me to build on the experience I already have while learning

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I want to get into the building trades because I want to do hands-on work that has a meaningful impact on my community. I like the idea of being part of projects that help build, repair, and maintain the infrastructure that people rely on every day. I want to develop practical skills that I can use to contribute to improving the places where people live and work.

I am especially interested in pursuing the pipetrades because I see it as an opportunity to build a strong foundation for a long-term career. I want to learn a skilled trade, continue developing my abilities, and take pride in the work that I do. My goal is to grow within the trade, gain experience, and eventually become someone who can make a real difference through the work I perform.

Why is an apprenticeship an attractive option to you?

For my future. I want to eventually start my own business with plumbing and my knowledge of water restoration.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

When I started my career as a water restoration technician I was exposed to all type of plumbing, construction, and hard labor and I was more and more interested in it as I worked. Worked as a water restoration technician for about 2 years and learned tons about it and now I want to expand my knowledge and pick up a new skill. I feel plumbing is best for me since I do want to start a water restoration business of my own. I believe incorporating plumbing and water restoration could be a successful plan.

If I get the opportunity to become a plumber I know I'll work hard to learn as much as I possibly can. This chance could help with my business in the long run, as well as giving me many opportunities. I want it all. The connections, the knowledge, the money, everything.

Add'l Edu. Details:

Associates in Health Sciences Currently was working on a BS in Marine Sciences.

What trades-related courses did you take in school?

Math-Algebra

Why is an apprenticeship an attractive option to you?

An apprenticeship is an attractive option to me because it provides me the opportunity to learn a skilled trade through a combination of hands-on experience and structured education. My time in the Marine Corps taught me that I learn best by receiving instruction and then applying what I have learned in a real working environment. I also value teamwork and learning from others and being able to teach others what I know while I develop my skills.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I want to build a career where I can work with my hands, develop a skill, and see the results of the work I have accomplished. After my time in the Marines I am looking for a career that offers structure, teamwork, and continuous learning and opportunities to teach others on what I have learned.

I am particularly interested in plumbing and pipefitting because these are skills that are needed in many different industries and can provide a strong long-term career. I also like the idea of learning a trade that has practical value outside of work. My interest in plumbing originally grew from conversations about pursuing marine and conservation-related work, where understanding plumbing, pumps, piping, and water systems can also be valuable.

What construction software or technologies do you have training in?

Add'l Details:

Tell us about any hobbies that have boosted pipetrade-relevant skills:

Growing up on a homestead has given me a number of useful tools that I believe directly apply. I learned problem solving through regular repairs and projects that we took on. I learned teamwork through working alongside my 7 brothers constantly all varying in ages and abilities. I learned discipline in doing the "mundane" things and important details that can be overlooked. My father also consistently instructed us in martial arts and physical education allowing me to form a strong discipline for pushing myself physically.

Why is an apprenticeship an attractive option to you?

An apprenticeship is attractive to me because I learn best through hands-on experience. I want the opportunity to work alongside professionals who can teach me the trade correctly while allowing me to apply what I learn in real situations. Being able to earn a living while developing valuable skills and receiving structured training makes an apprenticeship especially appealing to me. I also like that an apprenticeship provides a clear path forward. As an ambitious person I work best knowing there is a end goal that I

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I grew up working with my hands and problem solving daily on my parents' homestead, which gave me appreciation for practical skills and hard work. The building trades have always interested me because they offer the opportunity to develop valuable skills while doing challenging, hands-on work. I enjoy having to think through problems, adapt to different situations, and see the physical results of my work. Plumbing specifically appeals to me because it combines all those things while providing a stable and rewarding career. I also am a very ambitious person and want a career where I can always improve and work towards a higher level of responsibility and skill.

Add'l Details:
Tell us about any hobbies that have boosted pipetrade-relevant skills:

One of my biggest hobbies is working out and staying active. I've also been involved in sports and enjoy doing hands-on and outdoor work. These activities have taught me discipline, consistency, teamwork, and how to keep working when something is physically challenging. I'm comfortable being on my feet, working with others, and putting in physical effort to get a job done.

I think these skills transfer well to the construction trades because the work requires reliability, physical endurance, attention to what you're doing, and a willingness to learn.

Why is an apprenticeship an attractive option to you?

An apprenticeship is attractive to me because I learn best by actually doing the work and gaining hands-on experience. I like the idea of being able to learn directly from experienced professionals while developing skills that I can use throughout my entire career. I also like that an apprenticeship allows me to earn a living while learning instead of taking on significant debt for school.

I'm looking for more than just a job. I want a long-term career where my knowledge,

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I became interested in the building trades because I enjoy hands-on work and want a career where I can learn practical skills, stay active, and see the results of the work I put in. I'm looking for a career that gives me the opportunity to continually improve, take on more responsibility, and build a stable future for myself.

The pipetrades specifically interest me because of the combination of physical work, problem-solving, and technical skill involved. I like that it is a career where there is always more to learn and where becoming highly skilled can lead to greater opportunities over time. I'm ready to work hard, learn from experienced people in the trade, and build a long-term career that I can be proud of.

What construction software or technologies do you have training in?

AutoCAD, CNC

Any Safety Certificates:

Add'l Details:

Why is an apprenticeship an attractive option to you?

An apprenticeship is attractive to me because I like the idea of learning on the job instead of only sitting in a classroom. I learn better when I can see someone do something and then try it myself. I also like that an apprenticeship can cost little to nothing compared to going to trade school, while I can still get paid while I learn. I think it would be a good way to start my career, gain real experience, and get benefits that can help me in the future.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I am interested in a career in the union because it has good benefits and can help me build a good future. I chose the building trades because I like hands-on work, fixing things, and figuring out problems. I like being able to see what I am working on instead of just sitting at a desk.

I am also more of a visual learner, so I learn better when I can watch someone do something and then try it myself. I like learning on the job and gaining real experience. I think being in a union would give me a good chance to learn new skills while working with people who have more experience.

Add'l Details:
Why is an apprenticeship an attractive option to you?

This apprenticeship is attractive to me because it offers the opportunity to earn while I learn and develop a skilled trade that can provide a stable, long-term career. I'm at a point in my life where I want to learn a new trade/skill that is applicable anywhere. My current career is stable but the attractiveness of continued growth and pay in our region is exciting.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I'm interested in a profession with real world skills with a service and direct impact to help those in our community. I am interested in pursuing a career in the pipefitting trades because I am looking for a long-term career that provides opportunities for growth, stability, and I enjoy hands-on work and the idea of developing a specialized skill set that I can build on throughout my career.

The idea of an actual career vs a job and building something that I'm proud of.

Why is an apprenticeship an attractive option to you?

Due to rent and bills, it's not easy to try a new career. Being paid to learn is very attractive to me because then I can make sure my rent is paid while also working towards a REAL career with a real wage. I want to have a position that is in demand and will give me a sense of "job security"

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I have been working regular jobs since age 16, I am beginning to grow tired of the wages offered and would like to invest the time and energy into a real career in the trades. My dad has been in the Union for decades and I believe I am capable of picking up a skill set through an apprenticeship. I am lacking experience but I am eager to learn.

Why is an apprenticeship an attractive option to you?

I like the idea of learning from experienced professionals and developing skills that I can use throughout my career. An apprenticeship would give me the opportunity to build a strong foundation in the pipetrades while gaining real-world experience. It also offers a clear path toward a stable and rewarding career.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I became interested in a career in the building trades because I enjoy working with my hands, solving problems, and seeing the results of my work. I like the idea of having a career where I can learn practical skills, The building trades also offer opportunities to build a stable future while doing work that is important to communities.

Specifically, I am interested in the pipetrades because they require skill, precision, and problem-solving. I like the idea of working with different tools and equipment while learning how piping systems are installed, maintained, and repaired. A career in the pipetrades would allow me to develop valuable skills, take pride in my work,

I enjoy cooking and hiking in my free time. Cooking has taught me to pay attention to detail, follow a process, stay organized, and work efficiently under pressure. Hiking has helped me build endurance, enjoy being outdoors, and appreciate the importance of preparation and perseverance.

I believe these hobbies have strengthened skills that transfer well to the construction trades, including patience, problem-solving, discipline, and the ability to stay focused

Why is an apprenticeship an attractive option to you?

An apprenticeship is attractive to me because it allows me to earn a living while learning a skilled trade from experienced professionals. I value hands-on learning and believe I learn best by applying what I'm taught on the job.

I'm looking for a long-term career, not just a job. An apprenticeship provides the training, experience, and opportunities for growth that will allow me to build a stable future and

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've always enjoyed hands-on work and being part of a team. My experience in construction, manufacturing, quality control, and insurance has helped me realize that I enjoy staying active, solving practical problems, and learning new skills. I'm looking for a career that offers stability, growth, and the opportunity to build something I can be proud of.

The pipe trades interest me because they combine teamwork, technical skills, and long-term career opportunities. I'm ready to work hard, learn from experienced tradespeople, and continue developing my skills. My goal is to build a career where I can grow, contribute, and take pride in the quality of my work.

Tell us about any jobs where you've learned pipetrades relevant skills:

As an Aviation Structural Mechanic – Safety Equipment in the Navy, I've developed skills that translate directly into the pipe trades. The role requires precise mechanical work, strict adherence to safety standards, and the ability to troubleshoot complex systems—skills that are essential for an apprentice. I'm used to following detailed technical manuals, working with specialized tools, and completing repairs that must meet exact specifications.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I stay active with landscaping, home repairs, and my work as an environmental control technician on the F/A-18. Landscaping builds practical outdoor skills, home repairs strengthen hands-on problem-solving, and my Navy role develops technical precision. Together, they give me strong, transferable skills for the construction and pipe trades.

Add'l Edu. Details:**What trades-related courses did you take in school?**

Automotive Technology

Why is an apprenticeship an attractive option to you?

An apprenticeship is attractive to me because it gives me the chance to learn a trade hands-on while earning, and that's exactly the kind of path that fits my goals and interests. It allows me to build a career that provides financial stability and long-term freedom for my family, while also aligning with the things I naturally enjoy—working with my hands, solving problems, and building or repairing systems.

What construction software or technologies do you have training in?

AutoCAD

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

My interest in the building trades comes from a lifelong pull toward working with my hands, solving real world problems, and being part of creating something that lasts. I've always been drawn to work where I can see the results of my effort where skill, precision, and craftsmanship matter.

First Aid / CPR, OSHA 10

Add'l Details:

Why is an apprenticeship an attractive option to you?

Because it lets me learn the trade and be able to make money. It avoids collage debt and gives a good path for a career. It also is a good option for me because I would be learning from a master so I know I would learning it the right way. That is why an apprenticeship is an attractive option for me.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

What interest me in a career in the building trades is that. I like doing hands on work and seeing the projects come together. I am also picking the trades for my career option because I want a good stable job. This is why I think a building trade is for me.

What interests me about the pipe trades is that I find the systems they use interesting. I would really like to learn the ways on how all the different things are put together from start to finish. I also would like to learn the different types of work in the pipetrades. That is why I think the pipe trades would be a good fit for me.

Why is an apprenticeship an attractive option to you?

I have learned that I am a hands on learner. I learn faster with hands on training vs something written in a book. I have been told great things about an apprenticeship and I want to find my passion. I do like having more then 1 skill as well and I have heard this is the best place to get that knowledge.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I have always been a hands on worker and I really enjoy learning new things. I have seen my husband in the field and enjoy what he does and he has worked his way up the ladder. I want to be successful and learn along the way. I do have my GC license in construction but I am interested in learning something new. I am a hard worker and can't wait to see where life can take me.

What construction software or technologies do you have training in?

AutoCAD, Revit, Revit, CNC, AutoCAD, Inventor

Any Safety Certificates:

First Aid / CPR

Add'l Details:**Why is an apprenticeship an attractive option to you?**

I believe an apprenticeship would benefit me the most because I want to learn on the job and not in a classroom setting all the time, I also believe since I am so young that if I start this early in this field I would learn more than I would at school., I believe an apprenticeship will get me the on-the-job experience that no college or university ever will. I also like the idea of moving up in a company and lots of other companies you cannot like an apprenticeship.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I have always been in Trades classes during high school and loved doing it from the beginning. welding in particular was the one I love the most, I have found the most success from welding.

I have also done plenty of other trades like electrical work and framing. but welding was the one I found a passion for., I have always done welding in school, and I have family that is in the pipe trades that love it, so I plan to follow.

Add'l Details:

Why is an apprenticeship an attractive option to you?

An apprenticeship is appealing to me because it allows me to learn from experienced professionals, earn a paycheck while training, and build a strong foundation in a skilled trade

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I became interested in the HVAC trade because I am looking for a career where I can continue using my construction experience while building a long-term future. I have worked in several areas of construction, including framing, concrete, and commercial roofing, which has given me a strong work ethic, experience working with tools, and the ability to handle physically demanding jobs. Those experiences have taught me the importance of attention to detail, problem-solving, teamwork, and showing up ready to work every day. HVAC stood out to me because it combines hands-on work with technical knowledge and allows me to continue challenging myself while developing a skilled trade

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:

1-3

Welding Experience:

Stick - Some Knowledge, MIG - Some Knowledge

Tell us about any jobs where you've learned pipetrades relevant skills:

While working for Michels I have learned a lot about a variety of different trades, one being the pipe trades. The pipetrades I have learned is a lot of math mixed with a couple of other trades such as electrical. I know that the HVAC techs a lot of the time are doing general maintenance on chillers for example. I know that you have to have some knowledge in working with technology, so you are able to read codes for HVAC systems.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

Growing up I have always had an interest in sports. In high school I played three sports all throughout my four years of high school. Along with that I also have played one year of college football. Playing sports and all the lifting that comes with it has taught me so many different things. From the consistency to the adversity, there was always something I had to overcome or be consistent with while playing sports. The consistency aspect correlates perfectly with the construction trades; you have to be consistent and show up every day and give 100% effort every day.

Shift Availability:

Full-time, Overtime, Weekends, 1st Shift (Days)

Post HS Education:

Some 4-year college

Add'l Edu. Details:

I have done one full year of college for a bachelor's degree in construction management at UW-Stout.

Why is an apprenticeship an attractive option to you?

The apprenticeship program is attractive to me because I would love to learn more about HVAC and use my soft skills to eventually become a journeyman. Also, I have job shadowed an apprentice and journeyman and the work being done during that day seemed interesting to me.

What trades-related courses did you take in school?

Math-Algebra, Math-Calculus, Construction Technology, Woodworking / Woodshop, Math-Precalculus / Trigonometry

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

There are multiple reasons on why I am interested in building trades in general and specifically the pipetrades. The reason I am interested in the building trades is because I always have loved to be hands on. Another reason is the job security; in this world we are always building so the trades are in such a high demand right now. Lastly, while currently working for Michels as an intern construction manager I have opened my eyes to so many different opportunities that are in the trades that caught my eye.

What construction software or technologies do you have training in?

Revit, AutoCAD, Bluebeam

Now the reason I am interested specifically in the pipetrades is because I love that you have multiple different trades built into one. What I mean is you have HVAC, Electrical, welding, and ect. I feel like the pipetrades fits my enjoyment for working with my hands. Overall, I love the different aspects you get from the pipetrades.

Add'l Details:

Why is an apprenticeship an attractive option to you?

An apprenticeship interest me because I like learning by actually doing the work instead of just sitting in a classroom. I think getting hands-on experience while learning from people who have been in the trade for years is the best way to build my skills.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I'm especially interested in HVAC because I think it's interesting to figure out what's wrong with heating and cooling systems and fix them. I like that every day can be different, and you're helping people stay comfortable in their homes or at work. I want to learn from experienced people, get better at the job, and make a career out of it.

Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

HVAC/R Service Tech

Work Zones in Preference Order:

Green Bay Area (Yellow)

Relevant Experience Level:

None. Nothing even close-but I'm a hard worker and willing to learn!

Years of Full-Time Work Experience:

10+

Welding Experience:

Tell us about any jobs where you've learned pipetrades relevant skills:

Just work I've done myself in my home and rental homes I've owned

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I have owned my own homes and rental homes for more than 20 years and have always done all of my own maintenance. I'm good with my hands and can usually figure out how to make things work. I find I'm most at piece when working on these projects. I've always said if I could do it all over I would go into the trades. Life has now afforded me the opportunity to start that second career.

Shift Availability:

Full-time, Overtime, Weekends, 1st Shift (Days)

Post HS Education:

Bachelor Degree

Add'l Edu. Details:

I have an undergraduate degree in Marketing and a Masters degree in Business Administration

What trades-related courses did you take in school?

Math-Algebra

Why is an apprenticeship an attractive option to you?

I'm looking to start a career that better suits me as a person. I'm not afraid to work hard and have built a career on dependability and accountability. This is what I've always wanted to do but when I was younger traditional college was pushed harder as the path.

I've now gotten to a point in my life where work life balance and being able to leave work at work is more important. This is not something I can enjoy on my current path.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've been sitting behind a desk for 25 years in a leadership role in the business of healthcare. I'm burnt out and need a change. I'm looking for something that will provide a variety of work environments, problem solving and away from the stresses of corporate leadership.

My son started a pre apprenticeship in HVAC and is encouraging me to go into that field. Everything he has said and experienced sounds very appealing to me. Ive not worked in the trades before but am good with my hands and have great problem solving skills. Everything seems to be lining up to this.

What construction software or technologies do you have training in?

Other Relevant Courses & Certifications

Add'l Edu. Details:

I have completed my OSHA course during high school, and I also have my EPA certification from the company I currently work at.

What trades-related courses did you take in school?

Building Trades / Construction, Electrical Trades / Electronics, Math-Algebra, Math-Geometry, Metals, Woodworking / Woodshop, Welding, Automotive Technology

What construction software or technologies do you have training in?

Any Safety Certificates:

OSHA 10

Add'l Details:

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I enjoy snowmobiling, jet skiing, going to the gym and working on my truck and other recreational vehicles. Maintaining and fixing my own vehicles has helped me become more mechanically inclined and taught me how different systems work together. It has also strengthened my problem solving skills, attention to detail, and confidence while using tools, which are all valuable in the trades. I also enjoy staying active and challenging myself. Going to the gym has taught me discipline, consistency and the importance of setting goals and working to achieve them.

Why is an apprenticeship an attractive option to you?

An apprenticeship is an attractive option to me because I learn best through hands on experience. Over the last year and a half of working HVAC, I have realized how much I enjoy learning new skills by applying them on the job while working alongside experienced workers.

I also like that an apprenticeship provides a path to building a long term successful career. I want a profession where I can continue to grow, take on more responsibility and

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I have worked in HVAC over the last year and a half, and it has showed me how rewarding the trades can be. I really like working with my hands, solving problems, and seeing the final result of a job. Every project that I have worked on at my current place of employment has given me the opportunity to learn new skills, work as part of a team and take pride in my work. I also like that the building trades give a career where dedication and a willingness to learn are recognized.

My experience in HVAC has made me interested in the pipe trades because I enjoy installing and working with mechanical systems that are essential to a buildings operation. I want to continue to build my skills through the unions training program while learning from experienced workers. My goal is to make a long term career in the pipe trades and become more skilled

Add'l Details:
Why is an apprenticeship an attractive option to you?

It's the desire to learn and inherit whats been passed through generations. It would nice to learn hands on & in the classroom about skills that will always be needed in America or around the world. My friend has gone through apprenticeships before, he had said they are a good experience and there's lots of opportunities for jobs through these programs.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

As I got out of high school I was told about the trades and opportunities it brings to the table. Not just money wise but I believe America was brought up on journeymen & craftsman's as I see it & plays a big role and will continue to grow and expand. I would like to be a part of the trades because it's something that will never die and it's skills & education will be something that can be passed through generations. I am very interested in the HVAC program you guys offer or the welding as I have more experience in welding & a technical degree on it.

Disciplines of Interest:

Plumber, Steamfitter (Pipefitter), HVAC/R Service Tech, Pipe Fabricator

Work Zones in Preference Order:

Appleton Area (Green), Fond du Lac Area (Orange)

Relevant Experience Level:

Some. I have worked for a plumber, steamfitter or HVAC/R contractor.

Years of Full-Time Work Experience:

1-3

Welding Experience:**Tell us about any jobs where you've learned pipetrades relevant skills:**

The one job I was doing that I have the most experience in was pipefitting, I would cut and fabricate 6 inch galvanized steel pipe and fit and install it at the job. I would also work with hand tools and use scissor lifts and ladders very often as well. I also know how to read blueprints and would work in hospitals so I would need to be mindful of others in the hospital.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I enjoy going boating on the water during summertime or jetskiing. For it you need to know how to operate a boat and have your boater safety and if you don't you could be a danger to others on the water. Its similar to construction because if you aren't certified or have your OSHA certification you could be a danger to others.

I also help out around my parents with random small jobs like pouring rock for the breakwall in the water, planting trees, and doing landscaping. I think that these help you get good with hand tools and just being able to work well with others too.

Shift Availability:

I have an array of interests and hobbies. My main hobby that I enjoy is wildlife photography. I mainly photograph birds, owls are my favorite, but I enjoy all wildlife. I also enjoy reading, watching sports, and occasionally playing video games

I think these skills can be transferrable to a trade. For example, wildlife photography has taught me to carefully pay attention to my surroundings taught has helped hone the sharpness of my mind. While you're out in the field and you hear a call. It's up to you to

Why is an apprenticeship an attractive option to you?

An apprenticeship is an attractive option to me because I strongly desire to find a career that I am passionate about and can be proud of. Both of these things mean a lot to me, and I feel like I haven't been making the most of myself up to this point. I want to challenge myself more.

To me, an apprenticeship is the best way to go. There's classwork involved, which I have

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Within the last year, I moved to Wisconsin to begin a life with my girlfriend, and I had interest in finding a new career for myself. I no longer desired to work manufacturing jobs; I wanted to make something more of myself. I wanted to find a career that I could be proud of, one that could support the both of us and eventually a family. To achieve that goal, I turned my attention to learning a trade.

I educated myself about some of the potential trades that I could be interested in and talked to one of my friends who also works a trade and union job. He couldn't recommend enough to me that I was making the right decision for myself. After doing more in-depth research, about the potential jobs and what could be potential match in location, I came to the conclusion that I think a pipetrade would be a good match.

What construction software or technologies do you have training in?

Any Safety Certificates:

First Aid / CPR

Add'l Details:

Why is an apprenticeship an attractive option to you?

I have finally decided that I need to have a career, and I know a career where I have a very useful hands-on skill like plumbing (though I considered electrical), and keeps me physically active is what will make me happiest. Plus I know that tradesmen make an amount of money that would make me feel secure in life.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I started a "Women Work" program in WV in 2020 but ended up not finishing because of covid. I liked the subject. Also, I managed a farm for two years and have found that working with my hands is what makes me happiest. Plus I am drawn to the long-term security of working in a trade. I don't know why, but plumbing has always stood out to me as my preference, even though I have no experience with it.

What construction software or technologies do you have training in?

Any Safety Certificates:

First Aid / CPR

Add'l Details:

Why is an apprenticeship an attractive option to you?

An apprenticeship is attractive to me because it allows me to learn a skilled trade while working in the field and earning a wage at the same time. I prefer hands-on learning, and I value the opportunity to gain real experience under the guidance of trained journeymen rather than only learning in a classroom.

It also gives me a clear path for long-term career growth. I want to build a stable career

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I am interested in building a long-term career in the construction trades because I prefer hands-on work where I can develop real, practical skills and see the results of what I do each day. I am motivated by learning through training and experience, working in a team environment, and building a stable career with strong growth opportunities.

I am most interested in the pipe trades, including pipefitting and HVACR, because they offer structured apprenticeship programs, technical training, and a clear path toward becoming a skilled journeyman. I am open to related areas within the mechanical trades and willing to learn wherever needed, but my main goal is to build strong skills in piping systems, installation, and mechanical systems work.

Welding Experience:

Tell us about any jobs where you've learned pipetrades relevant skills:

I have worked at Pick 'n Save, St. Adalbert, and St. Ann Center for Intergenerational Care, where I developed skills that I believe will help me succeed in the pipe trades. At Pick 'n Save, I learned the importance of being dependable, working efficiently in a fast-paced environment, providing good customer service, and working as part of a team. Through my work at St. Adalbert and St. Ann Center, I strengthened my communication skills, responsibility, and ability to work with people from different backgrounds. These experiences taught me to be punctual, hardworking.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

Some of my hobbies include working on my car, going to the gym, and learning about tools and mechanical systems. Working on my car has helped me develop problem-solving skills, attention to detail, and patience while following steps to complete repairs or upgrades correctly. Going to the gym has taught me discipline, consistency, and the importance of staying physically fit, which are all valuable in the construction trades. I also enjoy learning new skills and taking on hands-on projects, which has strengthened my work ethic and willingness to keep improving.

Why is an apprenticeship an attractive option to you?

An apprenticeship is attractive to me because it allows me to earn a paycheck while learning a skilled trade from experienced professionals. I like the opportunity to gain real-world, hands-on experience instead of only learning in a classroom. It also provides a clear career path with opportunities to grow, earn industry-recognized certifications, and build a stable, long-term career. I'm motivated to work hard, continue learning, and become a skilled journeyman in the pipe trades.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

You could answer it like this:

I became interested in a career in the building trades because I enjoy hands-on work, solving problems, and creating things that have a lasting impact. The idea of working on projects that help build homes, schools, businesses, and other important structures is rewarding to me. I also like that the trades offer opportunities to learn new skills, earn a good living, and continue growing throughout my career.

Specifically, I am interested in the pipe trades because I enjoy working with mechanical systems and learning how plumbing and piping keep buildings functioning safely and efficiently. I like the combination of technical knowledge and physical work, and I want to develop skills that are always in demand. I'm looking forward to building a long-term career where I can take pride in the quality of my work.

What trades-related courses did you take in school?**What construction software or technologies do you have training in?****Any Safety Certificates:****Add'l Details:****Why is an apprenticeship an attractive option to you?**

An apprenticeship is an attractive option for me because it lets me learn a skilled trade through hands on experience while earning a wage. I like the idea of learning directly from experienced tradespeople in a structured program that builds real in demand skills and leads to a long term stable career

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've been interested in the building because I like work that is hands on and practical. I'm drawn to careers where I can see the results of my effort every day and projects that serve people. I also value the idea of building a long term skill set that's in demand and can support a reliable career. What specifically interested me in the pipe trades is the combination of problem solving and technical skill. Not just the physical work but you also have to understand systems, measurements, safety standards and how every fits together.

Why is an apprenticeship an attractive option to you?

An apprenticeship is an attractive option to me because it is a really nice way to get valuable learning and skills without all the 4 year degree and college experience that I'm not too fond of. It also helps me build my networking and communication skills and I have a very good chance of getting a job. I also like the strong community aspect of it and the chance for me to strengthen my future.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

After graduating high school I tried the college route of life and decided it wasn't for me. I also joined the Army national guard and just recently got off a year long deployment and don't think I want to go active duty military, so I decided I want to go trades. I have quite a few friends and military leadership that work in the trades and they told me I'd do well getting an apprenticeship and job within the trades. HVAC was also recommended to me among other options by some people and after doing a little research and digging I decided that is the route I would like to try and go.

I do not mind school but something like a 4 year college is not something that interests me. I learn and understand things better being shown face to face and learning as I go. A profession like this also lets you work and earn a living at the same time

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

The people I looked up to in my adolescence were generally in trades type jobs. They were hard working individuals and I looked up to them because of it. I originally was interested in building houses. However, on my path through doing related classes in high school, construction, metal work and CAD type classes, I ended up getting a job in machining and continuing my education by completing my associates degree in tool & die and receiving journeyman's card. I have 11 years experience in this field, but recently I've had a desire to expand my skill set. I have been looking into several construction related fields and this one looked the most interesting because it will set me up with skills that will be beneficial throughout time.

Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

HVAC/R Service Tech

Work Zones in Preference Order:

Appleton Area (Green), Green Bay Area (Yellow)

Relevant Experience Level:

Some. I have worked for a plumber, steamfitter or HVAC/R contractor.

Years of Full-Time Work Experience:

0

Welding Experience:

Flux Core - Some Knowledge, MIG - Some Knowledge, TIG - Some Knowledge, Stick - Some Knowledge

Tell us about any jobs where you've learned pipetrades relevant skills:

I have worked maintenance jobs that have taught me how to use hand tools, power tools, and do pm's on many different types of equipment. Also, going to HVAC school has taught me how to do pm's on exhaust fans, motors, mini splits, boilers, furnaces, condenser units, and air handlers. When I worked at the factory, I was a machine operator. I had to use different math calculations to calibrate the machine, be able to maintain care of my machine, and follow many safety codes. In all my jobs, I've had to have great communication skills and listening skills.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I enjoy spending time with friends and family. I like to watch sporting events such as football, basketball, UFC, and baseball. I was always active in high school with sports. I played football and wrestled, so I like to stay active. I am in the gym about 5 days a week. I really enjoy lifting weights and pushing my limits. In the trades, you can form strong bonds with other coworkers and create an almost family-like friendship. In my time in sports, I have created those long-lasting, impactful relationships. I have been a leader on the mat or on the field; it is great to be

Post HS Education:

Associate Degree, Other Relevant Courses & Certifications

Add'l Edu. Details:

I have an associate's degree in Fire Medic. I am currently enrolled in Lakeshore College to be an HVAC Installation

What trades-related courses did you take in school?

Math-Algebra, Math-Geometry, Welding, Electrical Trades / Electronics

What construction software or technologies do you have training in?

Any Safety Certificates:

First Aid / CPR

Add'l Details:

Why is an apprenticeship an attractive option to you?

I am able to learn and improve my skills. I will be able to work, learn, and earn on the job. I will be able to get hands-on training on the jobsite and at the training center, which to me I care about a lot. It will help me be able to be the best employee I can be. I am also able to work my way up and learn from my peers.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Ever since high school and just out of high school, I have worked maintenance jobs and a factory job. Having an office job was not for me. I graduated from college with an associate's degree in firefighting/paramedic, but that was not for me. I have always enjoyed working with my hands and being active. That is why I enrolled back into school to be an HVAC technician. The pipetrades attracted me because I like to use critical thinking skills to complete a job/project. I take pride in my work and enjoy the feeling of satisfaction after completing a job/project. I have wanted a career where determination, hard work, and skill matter. The pipetrades also offer a vast number of opportunities for a career.

Add'l Details:
Why is an apprenticeship an attractive option to you?

Because the ability to be paid while going to school to learn the trade you plan on working for while learning on the job sounds like a win-win-win. I also believe a big 4 year college is not for me and likely would result in myself regretting going to said college.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I toured the Fox Valley Technical College, and I found the only room that interested me was the pipe trades room. Maybe it's because I didn't get to explore the whole building, but with other family friends and relatives talking the business up, it only made me want to explore it further.

I golf which seems like it wouldn't translate but it is a really good networking system for connecting with people. Another hobby I have is working out, my body is physically healthy and a good fit for construction trades making it easier to carry pipe, or just do physical labor work in general. I also like to read and learn on my own how things work. Constantly learning helps me when I'm in situations where I need to learn new things and it seems to help me when I need to learn something foreign to me., I Golf which helps with connections. I like to fix random things whenever I get the chance and do random

Why is an apprenticeship an attractive option to you?

An apprenticeship is something that I like because it is mainly hands on learning. I like to learn by having actual real hands on experience. It also allows me to see a stable progression of what my career will progress to if I continue to work hard and show up with a good attitude., I want to learn while I work in a structured manner while staying in the pipe trades. I just want something more structured and with a backbone. I like to learn practical skills as well as I want to specialize in something I already have a bit of

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I love to do hands on work, it makes the day go by faster. I like to know how things work and why they work. I've been working at a non-union restricted plumbing company which I really enjoy. I don't really see the long term outlook of working for that. I like how the union has a good backbone for long term careers. Overall I'm just looking to work and work hard., I like working with my hands and taking pride in something that has meaning and that I do. Seeing a project come together is a very rewarding thing and I gravitate towards things that I can use my skills for. I am detail oriented and currently work as a non-union POWTS installer and want to do something more detail oriented and more long term. I also like something that is stable and a service to people at the same time.

Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

Plumber, HVAC/R Service Tech

Work Zones in Preference Order:

Appleton Area (Green)

Relevant Experience Level:

None. Nothing even close-but I'm a hard worker and willing to learn!

Years of Full-Time Work Experience:

1-3

Welding Experience:

Tell us about any jobs where you've learned pipetrades relevant skills:

I currently work as a machine operator. A lot of my job requires me to plan ahead to make sure things don't go wrong. I work with other employees to make sure everyone understands what they're doing and can work safely. The machines i work on are very old so things break frequently. My job often requires me to problem solve either by myself, with a lead, or with maintenance to find out what has gone wrong with the machine. I'm used to working long hours on my feet. I work 12 hour days and frequently work overtime. Last year I worked between 60 to 80 hours every week.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I go to the gym constantly and get better all the time. I enjoy hard work and I love working towards long term goals. This has helped me at my current job when I'm lifting things or running up and down stairs. I'm physically fit and will be able to handle the physical challenges that this job throughs at me. I also do bjj which requires me to be coachable and disciplined.

Why is an apprenticeship an attractive option to you?

I've always enjoyed working with my hands. After high school I got a job working in a mill. My job mostly consists of troubleshooting, helping newer employees, and working with our maintenance crew. Our maintenance crew has often tried to convince me to apply but there is no room for me to apply. After talking to my family, friends, and looking around online plumbing and hvac interested me the most.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I have always liked working with my hands so when I graduated I started working in a mill. I currently work on a machine and often have to work with maintenance to troubleshoot. Which was how I became interested in getting into a trade. The maintenance guys often talked to me about applying for maintenance but there is no room for me to apply. I really enjoy troubleshooting and would like more of an opportunity to grow. After taking to my family and looking around online plumbing and hvac interested me the most.

Why is an apprenticeship an attractive option to you?

An apprenticeship is an attractive option to me because it gives me the opportunity to learn valuable skills while gaining real hands-on experience. I like the idea of learning directly from experienced workers and building knowledge that will help me succeed in a long term career. It also allows me to grow professionally while preparing for a stable future.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I am interested in a career in the building trades because I want a stable future and the opportunity to build a successful career. I like the idea of working with my hands, learning practical skills, and being part of projects that make a difference in people's lives. The building trades offer good opportunities to grow, earn a strong income, and develop skills that can last a lifetime.

What trades-related courses did you take in school?**What construction software or technologies do you have training in?****Any Safety Certificates:****Add'l Details:****Why is an apprenticeship an attractive option to you?**

I'm married with 5 children. A mortgage, bills to pay. Being able to get paid while learning a new career is exactly for a guy like me so I can still support my family while I build new skills. Also I have been doing driving and warehouse jobs for most of my life. As my sons get older I think about them and I think I'd rather be able to say to them if whatever they wanna do doesn't work out they can come work for me and I wouldn't want them to be doing what I do now. Rather see them be in a trade like I'm trying to pursue

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I bought a house 3 years ago and I started fixing things and remodeling myself instead of hiring someone. I never really knew how much I liked to work with my hands until then. I have friends who are plumbers and pipefitters who enjoy their job and life so after asking them questions about the trade and what's involved in it I got really interested in trying to pursue that path

OSHA 10, First Aid / CPR

Add'l Details:
Why is an apprenticeship an attractive option to you?

I could afford to work & go to classes with one.

It also lets me work directly under a journeyman so I can have the support of a knowledgeable individual or team until I show the same competency. I want to learn, but also be accountable for what I know.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I have always been interested in a job that is skilled and needed. To have experience in an industry that both maintains and pushes our society forward. I had dived into the IBEW (electric) side of the trades and have come to realize I like to work with my hands more than just the paperwork and recordkeeping of ensuring the electrical grid works.

I'm excited to learn about an industry that I believe is just as important as the electric side of the trades. With a more hands-on job, I think that is a better fit and a motivator to keep up to date and learn not just my own portion of the pipe trade, but expand my base knowledge.

I do a lot of long distance bicycling to keep in shape. Averaging 25-30 miles per ride and I try to hit at least 5/6 rides a week. I think this speaks on how much discipline and physical stamina I have which I believe to be important in the construction trades. I really also enjoy cooking which involves a lot of hands on problem solving. In kitchens I've had to work with a team and make sure we put out a product that is consistent while working under pressure. I enjoy learning the process, multi tasking and improving my skills.

Why is an apprenticeship an attractive option to you?

The thing that's most attractive to me is the opportunity to learn a new skill! It is a huge bonus being able to make a wage while making learning. I am looking for something stable that offers real growth, something I can retire doing. I think the pipe trades meets all the things I've been wanting to do. I like to stay busy and I've always appreciated and respected the work people in this trade do

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

The thing that interests me the most is a chance to learn a new skill while working. I'm someone who likes physical work and would rather learn and get good at something rather than sitting at a desk somewhere.

I really really like that this trade offer room to grow and stability. I am interested in a long term career

Welding

What construction software or technologies do you have training in?

Any Safety Certificates:

Add'l Details:

Tell us about any hobbies that have boosted pipetrade-relevant skills:

One of my main hobbies is working on hands-on projects, like fixing things, doing small repairs, and improving spaces at home. I also enjoy activities like fishing and working with tools, which require patience, focus, and attention to detail.

These hobbies have helped me develop skills that transfer well into the construction trades, such as problem-solving, mechanical thinking, and working safely with tools. They've also taught me the importance of being consistent, staying focused on a task, and

Why is an apprenticeship an attractive option to you?

An apprenticeship is attractive to me because it offers the opportunity to earn while learning and gain real hands-on experience in the field. I value being able to develop practical skills under the guidance of experienced professionals while building a strong foundation in the trade.

It also provides a clear path for long-term career growth, allowing me to continuously

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've always been interested in hands-on work and understanding how mechanical systems function. My experience working with refrigeration and HVAC systems has shown me how important skilled trades are in keeping operations running efficiently and safely.

The building trades offer a stable career where I can continue learning and improving my skills. I'm especially interested in the pipetrades because they relate directly to systems I already have experience with, like piping, heating, and cooling. I enjoy working with tools, solving problems, and being part of a team that builds and maintains essential systems.

Why is an apprenticeship an attractive option to you?

Well because i've had apprenticeships before and they are such an amazing opportunity for me to learn new things such as welding trade as well as getting paid to learn and doing what i love such as welding, what more could i ask for! I think it's an attractive option to me because in the union and trade industry the opportunities are endless and you always have room to expand and grow no matter what.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Honestly 2 years ago i didn't have an interest in welding but for my senior year of high school i took a welding class , and i thought "great another pointless class for me" but not even a month in i fell inlove with the trade . The patience and the results of my welds made me love it even more, it's calm and easy to do for me

Why is an apprenticeship an attractive option to you?

Because my family member say that u give people opportunities to grow and make them feel someone in life, Apprenticeship is an attractive option to me because it offers a unique blend of hands-on experience and theoretical knowledge, allowing me to learn directly from industry professionals while applying my skills in real-world settings. This practical approach not only enhances my understanding of the trade but also builds a strong professional network, making me more competitive in the job market. Additionally,

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

The thing that interest me in this trade would be because my family works for local 400 and he said it gives lots of people chances to learn more about the trade and gives you job and opportunities to grow, What interests me in HVAC is that it plays a crucial role in maintaining indoor comfort and air quality. The technology behind heating, ventilation, and air conditioning is constantly evolving, which presents exciting opportunities for innovation and efficiency improvements. Additionally, the impact of HVAC systems on energy consumption and environmental sustainability is significant, making it a vital field for addressing climate change. I am eager to explore how advancements in HVAC can lead to smarter, more sustainable buildings and improve the quality of life for occupants., What interests me in HVAC is the crucial role it plays in enhancing the quality of life by ensuring thermal comfort and indoor air quality in residential and commercial spaces. The intricate interplay of mechanics, thermodynamics, and fluid dynamics in heating, ventilation and air conditioning systems fascinates me as these systems not only

It's a good startup to get into a career that can sustain my present and take care of my future, trade jobs are always needed and becoming an apprentice is the start to becoming a tradesman, I like the learn as you go approach and acquiring new skills is always something I'm interested in, I'm a very hands on learner so I like that majority of teaching and learning will be through hands on work

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I heard that learning a trade is a good way to find a great career that you won't have to worry about computers taking your jobs, plus learning trades will be useful for when I decide to buy a house so I can take care of problems there, Looking to start a career and build towards making a family with my lovely girlfriend. I've heard about trades being a good way to build a career without having to go get a degree and enroll in a full college course. Plumbing interests me because when I have a house I'd like to be able to take skills I've learned and put them to use in making my house as nice as possible and this could translate to helping with issues that come up at my house when I have one

Add'l Edu. Details:**What trades-related courses did you take in school?****Why is an apprenticeship an attractive option to you?**

Because I want to learn a trade I don't want

To be working these dead end jobs I have been since 2020 I feel that now I have to make a change I'm 23 now and I see a clear path ahead of me and I am pursuing it which is why I came across you guys, For me it's learning while working and making money and an apprenticeship gives me that opportunity unlike going to college to work for someone that's why I plan on going to college for trade welding technical diploma cause that's

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I'm interested in this trade because next year fall of 2026 I'm going to college to get my welding technical diploma and I want to have a job when I'm done and hopefully it benefits you guys but yeah I just want a good well paying career and I want to travel and I feel this road will help me achieve that and I'm hoping you guys are willing to take a chance on me., The building trades offer strong career opportunities, job stability, and the chance to keep learning new skills. I like that it's active work, not just sitting at a desk, and that effort and skill really matter and I plan on going to college next fall 2026 for welding and when I graduate hopefully it will benefit you guys and still have a job waiting for me when I go back cause my goal is to travel and I see a road and it's right Infront of me and with you guys I can make that become reality., I am interested in this trade because I enjoy working with my hands, solving problems, and building things that have a real purpose. Welding and pipefitting are skills that require precision, discipline, and continuous learning which are qualities I strive to develop in myself I am motivated by

Add'l Details:**Why is an apprenticeship an attractive option to you?**

apprenticeships are attractive because they offer an "earn while learn" model with paid, hands-on training, no student debt, and a clear path to well-paying jobs with benefits, providing immediate experience, mentorship from experts, and strong career advancement opportunities., i believe an apprenticeship is attractive option for me simply because of the opportunity to grow and learn and get paid while you get trained that's always nice.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I am interested in specifically (plumbing) trade and other trades like fabrication, pipefitting, because I want to better my life and learn something new and meet new people and learn different things., Always wanted to know more about the trade and the necessary skills to obtain that type of job.

What construction software or technologies do you have training in?**Any Safety Certificates:****Add'l Details:****Why is an apprenticeship an attractive option to you?**

An apprenticeship is an attractive option to me because I find school not very interesting, and I also find it much easier to just learn by doing things instead of reading books and studying for tests., An apprenticeship option is attractive to me because it allows me to be hands on! Being hands on is very important to me and the easiest, fastest, and most enjoyable way for me to learn things.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I have seen many videos on YouTube by people such as HVACR Videos, which demonstrate what it is like to work as a refrigeration technician or a plumber. To me the work looks very interesting and fun, and I am looking for a new job that I can take seriously and work hard every day at., I have always enjoyed hands on work as well as problem solving and fault finding, and would consider myself technically oriented. A career in HVACR involves all of these things, as well as being something that is always in demand! I have seen videos from Youtubers such as HVACR videos and always thought the workflow seems interesting and challenging, which is what I want in a job.

Why is an apprenticeship an attractive option to you?

I'm looking to get experience in hvac and become the best I can possibly be in my trade, An apprenticeship is an attractive option for me because it give me a goal to hit. Something to strive for. I believe there's always something to learn and to be taught.

If I can at least learn one thing a day I feel accomplished. The ability to do something like that and know how it works amazes me.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

It interests me because your consistently learning new things, I currently work as a maintenance technician in a food plant. I do a little of everything such as welding, fabricating, troubleshooting, plumbing, hvac etc.

Everything I get to dabble in plumbing or plumbing related things I really enjoy it. We have outside contractors such as GLM and they talk about how amazing you guys are. So I became really interested in what you guys do.
