

Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

Plumber, Steamfitter (Pipefitter), HVAC/R Service Tech, Pipe Fabricator

Work Zones in Preference Order:

Green Bay Area (Yellow), Appleton Area (Green)

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:

4-6

Welding Experience:

TIG - Some Knowledge

Tell us about any jobs where you've learned pipetrades relevant skills:

Over the past four years working on cell towers I've done ground work and tower work. The only correlation that might be there is working on piping electrical into the cabinets and shelters

Running digging EQ. To lay pipe and hand digging.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I enjoy working on toys, four wheelers, side by sides, cars. Any sort of issues I enjoy finding solutions and working on completing projects. Hunting fishing and pretty much anything outdoors.

Shift Availability:

Full-time, Overtime, 1st Shift (Days), 2nd Shift (Nights), Weekends

Post HS Education:

Other Relevant Courses & Certifications

Add'l Edu. Details:

Trade school, graduated NWTC in green bay with technical diploma. Telecommunications Field technician. I have gotten

What trades-related courses did you take in school?

Electrical Trades / Electronics, Automotive Technology

What construction software or technologies do you have training in?

AutoCAD

Any Safety Certificates:

First Aid / CPR, OSHA 10, OSHA 30

Add'l Details:
Why is an apprenticeship an attractive option to you?

Any new trade I need to learn, I'm confident I can learn and adapt quick. Working my way towards something bigger and better is great motivation for me. Starting off and learning from experienced mentors will be the best way to excel in any field.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Id like something new, I have been working on cell towers traveling for the past four years and I would like a more concrete future. Something with roots where I can really work towards a career.

Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

Pipe Fabricator, Steamfitter (Pipefitter)

Work Zones in Preference Order:

Appleton Area (Green)

Relevant Experience Level:

Some. I have worked for a plumber, steamfitter or HVAC/R contractor.

Years of Full-Time Work Experience:

4-6

Welding Experience:
Tell us about any jobs where you've learned pipetrades relevant skills:

My first technical job was a delivery driver and service technician for wide format printers where I was exposed to various contractors and blueprints. My last job was working as an HVAC technician doing primarily install, service, and some sales. Which gave me experience and skills in brazing, soldering, isometric drawing, sheet metal construction, pipe threading, and concrete drilling.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I am someone who is constantly researching and learning in order to improve and strive to become better at something than I was yesterday. I enjoy soldering electrical components on PCBs currently and am always observing what is happening in order to better my technique. I have also gotten into 3D printing and have slowly been learning how to use CAD software like FreeCAD.

Electrical Trades / Electronics, Building Trades / Construction, Math-Algebra

What construction software or technologies do you have training in?
Any Safety Certificates:

First Aid / CPR, OSHA 10

Add'l Details:
Why is an apprenticeship an attractive option to you?

I enjoy the idea of mentorship and being able to have someone who is more experienced and skilled than me to patiently guide me towards becoming someone skilled as well in that particular craft, in my case it would be Pipe Fabrication. I'm not someone who can just sit in a classroom and learn theory, but am willing to learn complex concepts when it comes to figuring out how to solve the problem in front of me. That's where I think an apprenticeship is for me because I am a hands on learner and enjoy being able to be part

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I am not someone who has welded before but have always had an interest in it due to my love for cars growing up, and wanted to know more about what a "Pipe Fabricator" job may entail because I enjoy hands on work, being in the field, and traveling, but don't really enjoy service work that much anymore in terms of fixing machines like HVAC. However I did enjoy sheet metal work, pipe threading, spot welding, and figuring how to measure and build things to get them to fit on the jobsite.

Full-time

Post HS Education:

Bachelor Degree, Other Relevant Courses & Certifications

Add'l Edu. Details:

Forklift / osha 10

What trades-related courses did you take in school?

Drafting and Design

Why is an apprenticeship an attractive option to you?

An apprenticeship is attractive to me because it gives me the opportunity to learn a skilled trade through hands-on training while working alongside experienced professionals. I am a hard worker, a quick learner, and I am willing to start from the beginning and put in the effort necessary to develop strong skills in pipefitting, fabrication, and welding.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I am interested in the building trades because I enjoy hands-on work, learning technical skills, and working in an environment where safety, teamwork, and hard work are important. I have experience in manufacturing and warehouse environments, operating forklifts and working around industrial equipment, and I am ready to build a long-term skilled career.

I am especially interested in the pipe trades because I want to learn pipefitting, fabrication, and welding. I am willing to start as an apprentice, learn from experienced professionals, work hard, and develop the skills necessary to become a highly qualified tradesperson.

What construction software or technologies do you have training in?

Add'l Details:

Why is an apprenticeship an attractive option to you?

Being able to work along side industry professionals with guidance, career insights, and mentorship. Building technical skills and industry knowledge while using on site tools. Real world experience which increases my workmanship.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I started technical school some years back at Nicolet Technical College. I had started with no knowledge in welding, once I started blue print reading, working the blue prints in the shop I began to learn over time how I was actually good at what I was doing & enjoyed completing and being able to see my work. I've always been a hands on person. It can be competitive which is also a plus although a more male dominated industry I was still wanting to go above and show I could do it too. Here I am years later, few credits away from what I started. I still have in the back of my mind this is what I want to do, I always talk to others about my interest in this industry. When I was younger I took a 180hr construction course, for college start the welding/fabrication course. I feel it's safe to say these industries have always had my attention.

Why is an apprenticeship an attractive option to you?

I would really love to continue learning and growing while also working and making money. I would like to have a company that I can work for and stick with and climb up and get better with my entire career life instead of going to college and then looking for different companies.

They just overall seem way more convenient for both the company and myself since I get to start working right away and just always have a place to work for while also going to

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Ever since I was young I always wanted a hands on job like this, and then when I got older and into high school I took some classes relating to these types of building/hands on trades and the plumbing unit stuck to me the most, but all of them were still good and I enjoyed them and did well.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I do tattoos in my free time which has helped me alot with learning how to have steady hands and to perfect my work. This helps me have skills to ensure that I have minimal mistakes in what I do and to do my best every time while paying attention to the small details.

I like to do alot of arts and crafts and to design different things. This also helps me pay attention to small details while being able to get creative. This has also taught me to

Why is an apprenticeship an attractive option to you?

It would help me out more financially to be able to earn while I learn and I believe it would help me gain more confidence in the trades as I gain more hands on experience.

I would also like to be able to work my way up as I gain more experience and I think an apprenticeship gives me a good opportunity for that and gives me a better understanding of the work environment ill be in while learning the trades.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I enjoy working hard and prefer to do more hands on work. Ive had some experience with welding and I found I enjoyed it alot. I like being able to overcome different types of challenges with working in the trades and I believe the trades have many opportunities for me.

After learning a bit about the trades and gaining some knowledge on welding, it felt like a career I was comfortable and confident in. I would enjoy continuing to learn more about these trades and to hopefully become independent someday.

Years of Full-Time Work Experience:

7-9

Welding Experience:

Flux Core- Skilled, MIG - Skilled, TIG - Skilled, Stick - Some Knowledge

Tell us about any jobs where you've learned pipetrades relevant skills:

I did a lot of stainless flux and tig at Fourinox where we built pressure vessels. I had some jobs where I put nozzles on the heads of tanks. I welded strategically and used an air gun to control the distortion. I then worked at Fox Valley Metal Tech and got very good at tig, particularly on aluminum. We often had only a 1/32nd tolerance.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I grew up and occasionally still build Lego sets. It requires the ability to follow visual instructions, organization, and attention to detail. I also do a bit of blacksmithing. It teaches me how metal behaves when it's hot, how to put a good finish on a metal product, and to really appreciate the art of metalwork. I put my heart into my work and I hate to do anything below standard. I fix the flaws instead of hiding them, so I can feel good about the work I do and feel good about myself, too.

Why is an apprenticeship an attractive option to you?

Due to rent and bills, it's not easy to try a new career. Being paid to learn is very attractive to me because then I can make sure my rent is paid while also working towards a REAL career with a real wage. I want to have a position that is in demand and will give me a sense of "job security"

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I have been working regular jobs since age 16, I am beginning to grow tired of the wages offered and would like to invest the time and energy into a real career in the trades. My dad has been in the Union for decades and I believe I am capable of picking up a skill set through an apprenticeship. I am lacking experience but I am eager to learn.

Why is an apprenticeship an attractive option to you?

apprenticeship is an attractive choice to me because it allows a person to earn money while learning a practical trade. I am looking for huge career growth. I get to Work with skilled mentors and hands on experience while I get paid.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

My cousin brought it up to me. I think it would be a good match for me career wise. I love to fix things and I don't like being stuck in one spot everyday doing the same continuous task and it would open a lot more opportunities for me.

The pipeline sparks my curiosity. I have friends that have jobs in the pipeline. They say they love it and I hear nothing but good news.

Veteran

Why is an apprenticeship an attractive option to you?

An apprenticeship is attractive to me because it gives me the chance to learn a trade hands-on while earning, and that's exactly the kind of path that fits my goals and interests. It allows me to build a career that provides financial stability and long-term freedom for my family, while also aligning with the things I naturally enjoy—working with my hands, solving problems, and building or repairing systems.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

My interest in the building trades comes from a lifelong pull toward working with my hands, solving real world problems, and being part of creating something that lasts. I've always been drawn to work where I can see the results of my effort where skill, precision, and craftsmanship matter.

Why is an apprenticeship an attractive option to you?

I have learned that I am a hands on learner. I learn faster with hands on training vs something written in a book. I have been told great things about an apprenticeship and I want to find my passion. I do like having more then 1 skill as well and I have heard this is the best place to get that knowledge.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I have always been a hands on worker and I really enjoy learning new things. I have seen my husband in the field and enjoy what he does and he has worked his way up the ladder. I want to be successful and learn along the way. I do have my GC license in construction but I am interested in learning something new. I am a hard worker and can't wait to see where life can take me.

Why is an apprenticeship an attractive option to you?

An apprenticeship is an attractive option to me because it offers the opportunities to learn through real world experience while developing practical skills I enjoy hands-on learning and believing working alongside experience professionals as one of the best ways to build confidence, improve my abilities and skills and gain a deeper understanding of the industry.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I am interested in a career in the building trades because I enjoy hands-on work, solving problems and seeing the results of my efforts. I like the idea of building and maintaining systems that are essential to homes, businesses and communities. I also value the opportunity to learn practical skills work as a team and continue developing my abilities through training and experience.

Why I'm specifically interested in the pipe trades? The variety of work from installing and maintaining plumbing piping and mechanical systems to troubleshoot complex problems, appeal to me. Pipes trade specifically because of the combined technical knowledge with skilled craftsmanship. A career in the pipe trades offers, long-term stability, opportunity for advancement, and the chance to contribute to projects that make a real difference in people's lives.

I was a cultural anthropology major with an archaeology minor and completed around 3 years of that.

What trades-related courses did you take in school?

Math-Algebra, Math-Geometry, Drafting and Design

Why is an apprenticeship an attractive option to you?

An apprenticeship is attractive to me because it allows me to learn through both hands-on experience and classroom instruction. I learn well by seeing how something is done, practicing it myself, and receiving feedback from experienced workers. I also like that I would be building useful skills while contributing on the job instead of waiting until after school to begin gaining experience. It also offers a clear path toward a stable, long-term career.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've become interested in the building trades because I enjoy hands-on work and want a career where I can continuously learn new skills while seeing the results of my work. I'm looking for a stable career with opportunities to grow, earn a good living, and take pride in doing quality work. I enjoy problem-solving, working with my hands, and challenging myself to learn technical skills.

Specifically, I'm interested in the pipe trades because the work combines precision, teamwork, and technical knowledge. I like that pipefitters work on a variety of projects and that every day can be different. I'm excited about the opportunity to learn from experienced tradespeople, develop a specialized skill set, and build a long-term career through an apprenticeship. I'm a dependable worker, eager to learn, and ready to put in the effort to succeed.

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:

0

Welding Experience:

Flux Core - Some Knowledge, Stick - Some Knowledge, MIG - Some Knowledge

Tell us about any jobs where you've learned pipetrades relevant skills:

N/A unfortunately. All my welding skills and knowledge stem from school and classes, I have yet to put them to use in the work force.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I am a mom, that never stops, so if I can be a mom, I can do anything. Additionally, I enjoy the gym, exercise, outdoor activities, and more. I just enjoy being active, and that ethic goes far beyond my hobbies. I'm an extremely productive and passionate individual.

Shift Availability:

Full-time, 2nd Shift (Nights)

Post HS Education:

Some 2-year college

Add'l Edu. Details:

I took a metal fabrication course in 2023 and learned SMAW, blueprint reading, and more.

What trades-related courses did you take in school?

Math-Algebra, Welding, Drafting and Design

What construction software or technologies do you have training in?

CNC

Any Safety Certificates:

Add'l Details:

Why is an apprenticeship an attractive option to you?

I've been to school before, and wanted to go back to further my education in the trades. However, if I could advance my education while earning money instead of having to take out loans to learn, that you be extremely beneficial to my life and financial future.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

The trades have always offered a level stability that to me is incredibly important. In addition to stability, I enjoy the idea of a career that is always growing and advancing so you never stop learning and improving your trade. Knowledge is power and careers that require you to continually educate yourself keep you the best version of yourself.

Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

Steamfitter (Pipefitter), Pipe Fabricator

Work Zones in Preference Order:

Green Bay Area (Yellow), Appleton Area (Green), Fond du Lac Area (Orange)

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:

1-3

Welding Experience:

Flux Core - Some Knowledge, MIG - Some Knowledge, TIG - Some Knowledge, Stick - Some Knowledge

Tell us about any jobs where you've learned pipetrades relevant skills:

I worked in a shop welding. I would have to make sure parts are square and level. I would have to read blueprints and then lay out and measure the pieces and where they went to build off of and continue to the next step. Also making sure the weld sizes are to the print and using the right filler metal for the job. I would also have to double check my work and make sure the measurements were right and the welds were good.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

One thing I enjoy is lifting weights and going to the gym. I think these can be similar because when I am lifting I always want to be better than I was the day before. Technique is important in lifting weights just as it is when welding. The preparation work to promote muscle growth with eating, sleep, hydration, and stretching can be compared to the preparation of completing a job. Such as making sure the materials and tools are there to complete the job.

Shift Availability:

Any Safety Certificates:

Add'l Details:

Why is an apprenticeship an attractive option to you?

An Apprenticeship interests me because I can work hands on and have some guidance a long the way. I have the opportunity to learn new things everyday and touch up on skills I may not have used in a while. I will get the opportunity to move around and travel. I will get to learn and work by experienced people in the trades

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

When I began welding in high school I started seeing videos of pipe welding and fitting and it was something that always interested me. Then when I went to college, some of the classes involved welding on pipe and it was challenging and something I enjoyed. Overtime a few people I met were in the trade and gave me some information about the career and how rewarding it is. They kept encouraging me to think about it and try it. I like to be challenged and learn new things and I am excited to see where the career will take me.

Add'l Details:

Why is an apprenticeship an attractive option to you?

I believe an apprenticeship would benefit me the most because I want to learn on the job and not in a classroom setting all the time, I also believe since I am so young that if I start this early in this field I would learn more than I would at school., I believe an apprenticeship will get me the on-the-job experience that no college or university ever will. I also like the idea of moving up in a company and lots of other companies you cannot like an apprenticeship.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I have always been in Trades classes during high school and loved doing it from the beginning. welding in particular was the one I love the most, I have found the most success from welding.

I have also done plenty of other trades like electrical work and framing. but welding was the one I found a passion for., I have always done welding in school, and I have family that is in the pipe trades that love it, so I plan to follow.

Add'l Edu. Details:

After highschool I went to college from auto collision. I never graduated but during that time, I did some basic welding

Why is an apprenticeship an attractive option to you?

Welding/fabrication is what I am very interested and attracted to because I like the art and creativity that goes into it.

What trades-related courses did you take in school?

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

In the building trade world has always amazed me because of the skill and art that goes into it. What amazes me the most is how someone can learn and really use their hands to make some of the most beautiful projects.

As a young kid growing up, I have seen a few trade work in person and done it myself. As years go by, what satisfies me the most is the final product of a piece from pipe welding. Not just the piece but the skill some people acquired make the weld seam to be extremely neat while still having it fully penetration both metals.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I enjoy gardening, working on projects around the house, and fixing things myself. If something breaks, I try to repair it before replacing it. I'll research the problem, watch videos, and learn what I need to get the job done. I've repaired a toilet, patched drywall, painted, and assembled furniture.

I grow vegetables in raised beds, grow raspberries, and take care of the yard. Gardening has taught me patience, planning, and persistence. I believe these experiences, along

Why is an apprenticeship an attractive option to you?

An apprenticeship is attractive because it fits my hands-on style and lets me provide for my five children. I excel in active environments where I can use my hands, solve physical problems, and stay moving. This path lets me apply my energy directly to a job site rather than a classroom.

Already having student loans makes the 'earn-while-you-learn' model essential. It allows me to build a career without adding debt, showing my kids what financial responsibility

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've always enjoyed hands-on work and would rather be actively doing something than sitting at a desk all day. I'm looking for a career that offers stability, good pay, and the opportunity to keep learning new skills.

The pipetrades caught my interest because of the welding and fabrication involved. The Fabricator (Welder) apprenticeship feels like the right fit because I learn best by doing. Earning a paycheck while learning from experienced tradespeople really appeals to me. My background in cosmetology taught me patience, steady hands, and attention to detail, which I believe will transfer well to welding. As I'm going through a divorce and currently the only parent working, I'm motivated to build a stable, long-term career that will allow me to support my five children.

Why is an apprenticeship an attractive option to you?

The apprenticeship is attractive option for me because I love to learn and doing stuff the right way. it's always something I've thought about doing.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Long story short, I Went to school for welding at NWTC after the military. I graduated in 2017. I then went to school for automotive at NTI/uti in North Carolina graduated in 2019. I've been pretty much focused on working on professional race teams ever since. The last few years I've been getting welding or machine shop jobs in the winter months to help coach high school wrestling then go back to Indiana when race season starts. I currently decided to do a permanent career change and stay out of working for race teams. I've always wanted to pursue the steamfitter or fabricator/welder apprenticeship route but I was living my childhood dream of working on professional race cars for a living.

Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

Plumber, Steamfitter (Pipefitter), HVAC/R Service Tech, Pipe Fabricator

Work Zones in Preference Order:

Appleton Area (Green), Fond du Lac Area (Orange)

Relevant Experience Level:

Some. I have worked for a plumber, steamfitter or HVAC/R contractor.

Years of Full-Time Work Experience:

1-3

Welding Experience:**Tell us about any jobs where you've learned pipetrades relevant skills:**

The one job I was doing that I have the most experience in was pipefitting, I would cut and fabricate 6 inch galvanized steel pipe and fit and install it at the job. I would also work with hand tools and use scissor lifts and ladders very often as well. I also know how to read blueprints and would work in hospitals so I would need to be mindful of others in the hospital.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I enjoy going boating on the water during summertime or jetskiing. For it you need to know how to operate a boat and have your boater safety and if you don't you could be a danger to others on the water. Its similar to construction because if you aren't certified or have your OSHA certification you could be a danger to others.

I also help out around my parents with random small jobs like pouring rock for the breakwall in the water, planting trees, and doing landscaping. I think that these help you get good with hand tools and just being able to work well with others too.

Shift Availability:

Full-time, 1st Shift (Days), Overtime, Weekends

Post HS Education:

Some 4-year college, Other Relevant Courses & Certifications

Add'l Edu. Details:

I have my OSHA 10 training card and aerial/scissor lift certification as well. I also was going to college for dentistry

What trades-related courses did you take in school?

Woodworking / Woodshop, Math-Geometry

Why is an apprenticeship an attractive option to you?

I think being able to have an apprenticeship will be able to open many doors and opportunities for myself to learn and become the best I can at the trade I'm interested in. There isn't anything else that I can think of that I would rather do and it's just one of my goals and something I've always wanted to get since I've started in construction.

What construction software or technologies do you have training in?**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

I started working for my parents for a little bit when I graduated high school. I realized after trying other careers that I only want to do construction because it is what I enjoy doing and I am good at it.

Any Safety Certificates:

OSHA 10, First Aid / CPR

Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

Pipe Fabricator

Work Zones in Preference Order:

Appleton Area (Green)

Relevant Experience Level:

None. Nothing even close-but I'm a hard worker and willing to learn!

Years of Full-Time Work Experience:

1-3

Welding Experience:

Tell us about any jobs where you've learned pipetrades relevant skills:

As a correctional officer I worked a lot with numbers and making calculations on a daily basis.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I don't have any specific hobbies or activities I do that could boost my skills however, I do enjoy fixing things and other problem solving related activities.

Shift Availability:

Full-time, Weekends, Part-time, Overtime, 1st Shift (Days)

Post HS Education:

Some 2-year college

Add'l Edu. Details:

Medical lab tech, Criminal justice, Biochemistry, Math and logic, written communication, Aed and CPR certification, etc.

Why is an apprenticeship an attractive option to you?

I'm most interested in learning as I work because I love doing both and would rather do them at the same time instead of putting one before the other.

What trades-related courses did you take in school?

Math-Algebra, Math-Geometry

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Job shadowing family members that work as fabricators inspired me to become one myself. I am both a hands-on and analytical worker and learner and feel that a career in the pipetrades will help me learn lifelong skills.

What construction software or technologies do you have training in?

Any Safety Certificates:

First Aid / CPR

CNC, AutoCAD

Any Safety Certificates:

First Aid / CPR

Add'l Details:
Why is an apprenticeship an attractive option to you?

I would like to be able to grow in a career, being in an apprenticeship allows me to learn and work hard, where i have expectations but im not afraid of challenging myself to further assist my abilities. i've always been very ambitious to learn, and the idea behind apprenticeships is learning.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

what interests me in this trade is the wide variety that it offers and it's always going to need workers, the world revolves around building. i currently work in a machine shop manufacturing custom endmills, and the ceiling for machinist are very low, and i want to be able to grow and continue to grow.

Add'l Details:

Why is an apprenticeship an attractive option to you?

An apprenticeship is attractive to me because it allows me to learn a skilled trade while working in the field and earning a wage at the same time. I prefer hands-on learning, and I value the opportunity to gain real experience under the guidance of trained journeymen rather than only learning in a classroom.

It also gives me a clear path for long-term career growth. I want to build a stable career

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I am interested in building a long-term career in the construction trades because I prefer hands-on work where I can develop real, practical skills and see the results of what I do each day. I am motivated by learning through training and experience, working in a team environment, and building a stable career with strong growth opportunities.

I am most interested in the pipe trades, including pipefitting and HVACR, because they offer structured apprenticeship programs, technical training, and a clear path toward becoming a skilled journeyman. I am open to related areas within the mechanical trades and willing to learn wherever needed, but my main goal is to build strong skills in piping systems, installation, and mechanical systems work.

Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

Pipe Fabricator

Work Zones in Preference Order:

Appleton Area (Green), Fond du Lac Area (Orange), Green Bay Area (Yellow)

Relevant Experience Level:

None. Nothing even close-but I'm a hard worker and willing to learn!

Years of Full-Time Work Experience:

4-6

Welding Experience:

Tell us about any jobs where you've learned pipetrades relevant skills:

In my current security position, I have learned to inspect IDs, BOLs and other forms of documents for any possible inconsistencies. In addition, I watch cameras/alarm systems, as well as taking physical patrols, being on alert for possible hazards/areas that need attention. I believe this could be applicable to properly reading blueprints, reading labels and noticing errors.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

When I get time, I work on physical DIY projects. I find it enjoyable to create things that I otherwise cannot find in a store. I enjoy the feeling of being accomplished and satisfied with my work. When I work on a project, I utilize power tools and hand tools, practicing safety and precision. With this, I also boost my ability to problem solve and use proper measurements, as I will run into situations that others may not have the answers for.

Shift Availability:

Full-time, 1st Shift (Days), 2nd Shift (Nights), Weekends, Overtime

Post HS Education:

No

Add'l Edu. Details:

What trades-related courses did you take in school?

What construction software or technologies do you have training in?

Any Safety Certificates:

Add'l Details:

Why is an apprenticeship an attractive option to you?

In my current situation, I wish to find a new job, specifically in the trades. To do so, I need to learn new skills. I do not have time to go to college, so I believe that an apprenticeship allows me to learn new things, hands-on, while also being on the job.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I am currently employed full time, but not receiving the 40 hours I need, which has led me to look for employment elsewhere. I have a family member who was a welder. In the job I currently am in, I speak with general contractors and occasionally watch them work. I find it to be interesting, as I am mainly at a desk job.

Disciplines of Interest:

Pipe Fabricator, Steamfitter (Pipefitter)

Work Zones in Preference Order:

Appleton Area (Green)

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience: 10+

Welding Experience:

Flux Core - Some Knowledge

Tell us about any jobs where you've learned pipetrades relevant skills:

Team industries I was in the loading bay. where I worked on and prepped pipe after coming out of the paint shop. I learned to drive forklift and tractor. Was also trained on the PSI testing of the pipes to ensure they held their pressure. At miller electric I learned and worked in the department of stator and Rotar. There I learned what gives the welder power to make the weld. I also learned some welding and grinding experience with this. I then moved into material handling and was operating forklift. Where I then enrolled in Industrial engineering class at FVTC.

Shift Availability:

Full-time, 1st Shift (Days)

Post HS Education:

Some 2-year college

Add'l Edu. Details:

Currently in school for Industrial Engineering threw FVTC

What trades-related courses did you take in school?

Engineering, Math-Algebra, Metals

What construction software or technologies do you have training in?
Any Safety Certificates:

First Aid / CPR

Add'l Details:
Tell us about any hobbies that have boosted pipetrade-relevant skills:

I am a hands on learner, i have operated forklifts/tractors, and have done some grinding and some level of spot welding

Why is an apprenticeship an attractive option to you?

I would like to learn a valuable trade or get in to the trade community.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I worked at miller electric and learned a lot about the welding community.

Post HS Education:

Other Relevant Courses & Certifications

Add'l Edu. Details:

I went to school for welding at NWTC, for a year.

What trades-related courses did you take in school?

Welding, Metals

What construction software or technologies do you have training in?
Any Safety Certificates:

First Aid / CPR

Add'l Details:
Why is an apprenticeship an attractive option to you?

I want to be on a jobsite, learning, growing, meeting new people. I don't like doing the same thing day in and day out every day of my life. But I will do anything at anytime. Work is work.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Right now I'm a Fabricator, and have been for a little over a year, I often find myself wanting more, more for myself, my future, and my family that succeeds me. I'm dedicated to learning more about the trades and then settling down later. I grew up in a trades family, father was construction, brother is an electrician, a few plumbers around the tree as well. This is something that has always interested me, and where I am at now career wise isn't as far as I'd like to be.

Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

Steamfitter (Pipefitter), Pipe Fabricator

Work Zones in Preference Order:

Appleton Area (Green)

Relevant Experience Level:

None. Nothing even close-but I'm a hard worker and willing to learn!

Years of Full-Time Work Experience:

10+

Welding Experience:

Tell us about any jobs where you've learned pipetrades relevant skills:

I believe that most of the jobs I've worked don't have transferable skills to this type of job. I've worked in positions that were a part of a team, so I believe that my position as a Sales Operations Manager at ThedaCare could be relevant to my future as a pipefitter. In addition, I've held positions in retail and in the Appleton Area School District that required very precise, detailed work with my hands.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I have 8+ years of experience in stagecraft. I did technical work on many theatre performances, which included welding, woodwork, electrical engineering and programming, and design. These shows included long hours, working with a team, and required a decent knowledge of a wide variety of technical skills.

Shift Availability:

Post HS Education:

Bachelor Degree

Add'l Edu. Details:

Bachelors degree in Digital Media, Minor in Film

What trades-related courses did you take in school?

What construction software or technologies do you have training in?

Any Safety Certificates:

First Aid / CPR

Add'l Details:

Why is an apprenticeship an attractive option to you?

I'm looking for stable, well paying work. I'd like a community that has my back, provides me with quality benefits, affords me intense, on-site training, and allows me to grow as an individual and as a member of a team

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've explored careers in many different fields: education, retail, sales, communications, but nothing has ever felt right. I'm looking for a career that will last me until retirement, that feels fulfilling, where I can work hard, learn from experienced tradesmen, and grow as a member of the team.

The pipetrades interested me most because of the growth opportunities, and because I've known people in the field who have sung the praises of the industry.

Why is an apprenticeship an attractive option to you?

Because it gives me the opportunities to learn and experience many things and doing hands on work has always attracted me more

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

What drew me to HVAC and pipe fabrication is the opportunity to work with my hands while learning valuable technical skills. I enjoy understanding how mechanical systems are installed and maintained, and I like the problem-solving and teamwork involved in the trade.

Pipe fabrication interests me because it requires precision, attention to detail, and hands-on work. I enjoy using tools and creating parts that are essential for industrial and commercial systems, and I look forward to building a career that offers growth, stability, and a sense of accomplishment.

Why is an apprenticeship an attractive option to you?

I am wanting out of life and what is out there to offer me and I know there is more to accomplish that. This apprenticeship will sharpen the current skills I already have and more to accomplish the goals I have set for myself and my family and our future. I love welding and making things so why not go further and make a good living doing what I enjoy on my free time.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I have always loved to weld and make things out of metal. I welded for about 3-3 1/2 years as a welder fabricator in Delta, Co. I currently work in the oil and gas industry in water transfer and I have also worked on the wellheads too. I have also worked with auto Cad and plasma tables. Ran a 2D demention breaker system to bend parts. Working on or with metal and building things is the way of life. It's solid, its structured, it's the American way,

Add'l Details:

Why is an apprenticeship an attractive option to you?

Honestly, having the hands on and experience welders, teaching me everything step-by-step being able to visually see it and physically do it.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've always loved welding when I attended high school. I took every class which is about five or six classes alpaca high school has a really good trade program. thought this was something I wanted to go through with after high school. I kind of started taking a different route with being a salesman and now I'm leading towards welding again.

CNC, Inventor, Laser Scanning

Any Safety Certificates:

Add'l Details:

Why is an apprenticeship an attractive option to you?

I just graduated high school and been wanting to find a welding job in the trades or a union and I fell as this is the correct choice, you always have to learn something new and this would be a great opportunity for me since school is boring to me and when I get sent to school for welding it won't be like a normal school and it will be something in my career.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I took a class in high school called intro to welding, the teacher was very new to welding and along the way we both were learning new things with basics like welding between MIG, Stick, and TIG. As the class kept going on I really started to fall in love with welding, it got so bad to where I would be welding non stop for the 3 hours I had with the shop teacher every day. With this being said it's a job that I really want to do and it follows with a good pay I just need to prove myself in the pipe trades to become something I could only imagine.

First Aid / CPR

Add'l Details:
Why is an apprenticeship an attractive option to you?

Because having years of experience in a skilled trade seems more useful to me.
And I'm not content with the money that I'm currently making as a Saw Operator.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've been working with steel for over a decade, as a warehouse worker, and CNC Cold Saw/ Band Saw Operator. So I already have some basic knowledge in various grades of steel quality.
I figured this would possibly help in providing a quicker path to becoming a Journeyman in one of these trades.
Of course I understand that I may be wrong in this theory, but that was my thought process behind taking a step in this direction.

I went to UW-Stout for 2 years for business administration but never finished

What trades-related courses did you take in school?**What construction software or technologies do you have training in?****Any Safety Certificates:****Add'l Details:****Why is an apprenticeship an attractive option to you?**

I'm married with 5 children. A mortgage, bills to pay. Being able to get paid while learning a new career is exactly for a guy like me so I can still support my family while I build new skills. Also I have been doing driving and warehouse jobs for most of my life. As my sons get older I think about them and I think I'd rather be able to say to them if whatever they wanna do doesn't work out they can come work for me and I wouldn't want them to be doing what I do now. Rather see them be in a trade like I'm trying to pursue

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I bought a house 3 years ago and I started fixing things and remodeling myself instead of hiring someone. I never really knew how much I liked to work with my hands until then. I have friends who are plumbers and pipefitters who enjoy their job and life so after asking them questions about the trade and what's involved in it I got really interested in trying to pursue that path

Current As Of:

10/12/2026 3:07 PM

Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

Plumber, Steamfitter (Pipefitter), HVAC/R Service Tech, Pipe Fabricator

Work Zones in Preference Order:

Green Bay Area (Yellow), Appleton Area (Green)

Relevant Experience Level:

Some. I have worked for a plumber, steamfitter or HVAC/R contractor.

Years of Full-Time Work Experience: 10+

Welding Experience:

Stick - Some Knowledge

Tell us about any jobs where you've learned pipetrades relevant skills:

Hardwood flooring - hand tools, power tools, equipment
Maintenance tech - plumbing repairs, plumbing fixture installs, welding, troubleshooting
Electrician - working on a job site. Observing pipetrade work being installed

Tell us about any hobbies that have boosted pipetrade-relevant skills:

My two main hobbies that take the most of my time outside of work are studio painting and weightlifting. Painting, and art in general transfer to the trades in many ways. Trusting the process, even when things look messy. Understanding the small details are just as important as the big picture. Taking time to trust yourself and knowing the final result is worth diligent work to be proud of. Pushing through the hard stuff to come out and achieve a goal. Consistency is the key, some projects and goals take years.

What construction software or technologies do you have training in?

AutoCAD

Any Safety Certificates:

First Aid / CPR

Add'l Details:
Why is an apprenticeship an attractive option to you?

On the job training. I very hands on and driven to learn as much as possible. Our daughter is growing up now and I have more time to focus on my career and education. I've been thinking about apprenticeship could work best for what I am looking for in a job and education, as well as goals for my family.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I have been working in the trades, mainly flooring and some electrical since 2013. Looking to get into a pipetrade union if possible for me and my family's future

What trades-related courses did you take in school?

Math-Algebra, Math-Geometry, Math-Calculus

What construction software or technologies do you have training in?**Any Safety Certificates:****Add'l Details:****Tell us about any hobbies that have boosted pipetrade-relevant skills:**

I do a lot of long distance bicycling to keep in shape. Averaging 25-30 miles per ride and I try to hit at least 5/6 rides a week. I think this speaks on how much discipline and physical stamina I have which I believe to be important in the construction trades. I really also enjoy cooking which involves a lot of hands on problem solving. In kitchens I've had to work with a team and make sure we put out a product that is consistent while working under pressure. I enjoy learning the process, multi tasking and improving my skills.

Why is an apprenticeship an attractive option to you?

The thing that's most attractive to me is the opportunity to learn a new skill! It is a huge bonus being able to make a wage while making learning. I am looking for something stable that offers real growth, something I can retire doing. I think the pipe trades meets all the things I've been wanting to do. I like to stay busy and I've always appreciated and respected the work people in this trade do

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

The thing that interests me the most is a chance to learn a new skill while working. I'm someone who likes physical work and would rather learn and get good at something rather than sitting at a desk somewhere.

I really really like that this trade offer room to grow and stability. I am interested in a long term career

Add'l Details:

Why is an apprenticeship an attractive option to you?

An apprenticeship is an attractive option because I want to master a craft. I really want to be able to go anywhere in that trade. I dont want to have to worry about getting laid off.

I want to get my journey card and pass information down to the younger generation. I want to teach people who are also interested in starting their apprenticeship.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Im interested in the building trades because I enjoy being apart of something meaningful. I enjoy working with a team aiming for one goal. Also, I enjoy learning new things and expanding my horizons.

Im interested in working at different shops and job sites. Im tired of working at the same place doing the same thing every day of the week and every month of the year. I want to be involved in different steps of the process from repair work to new installs. Finally, I want to see the county working in different areas whether it be indoors, outdoors, one town, or many different cities.

Agricultural Equipment Service Tech, And Currently A Licensed Teacher In Wi, For technology education.

Why is an apprenticeship an attractive option to you?

Paid to learn how to make a difference and no day is always the same, lots of variety in the trades.

What trades-related courses did you take in school?

Woodworking / Woodshop, Metals, Welding

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

The ability to help people and earn while you learn was a big draw for me. I come from a vast experience set. I worked in the Agriculture repair sector for the better part of ten years, then I ventured into education for a brief stint as a solution to a labor shortage. While in education I was a tech ed teacher and was pushing my students to consider the trades, After a few unsuccessful try's at continuing to become an educator, I decided to take my own advice and pursue another trade.

What construction software or technologies do you have training in?

Solidworks

Add'l Details:
Why is an apprenticeship an attractive option to you?

I view it as the next step to progress my career and goals. Ive done most of what I can in shops, I want to learn something new and challenging.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I love welding, have done it for many years. Ive done construction in both electrical and ironworker in a shop. Personally, im tired of working in shops, where youre just another number.

I feel like I've done most of what I can in a shop setting, and now I want to expand my knowledge and branch out to a more difficult side of welding. And earn a better wage for the future of my family.

Why is an apprenticeship an attractive option to you?

It's an attractive option for me because of the fact that you can get paid to learn about the field that I am working towards.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I recently developed an interest in the pipe trades during my stint in college. I have been working as a table games dealer in Iowa and came to the realization that I want to do something that I could be proud of.

I've always been a very hands on person. I started researching career paths for me and I landed on the pipe trade after talking about it with a few friends and it seemed like a great choice. Being able to see my work completed in front of me sounds amazing.

Add'l Details:

Why is an apprenticeship an attractive option to you?

An apprenticeship is attractive to me because I can earn while I learn and gain real hands-on experience instead of just classroom knowledge. I like the idea of learning and building skills on the job.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I'm interested in the trades because I like hands-on work and being able to see the results of what I do. I enjoy solving problems and working on projects that have a real purpose. Pipe trades stand out because it's not just physical work but you have to understand how systems work. It seems like a stable career that I can grow and take pride in my work.

Automotive Technology, Building Trades / Construction, Math-Algebra, Math-Geometry, Welding

What construction software or technologies do you have training in?

AutoCAD

Any Safety Certificates:
Add'l Details:
Why is an apprenticeship an attractive option to you?

Well because i've had apprenticeships before and they are such an amazing opportunity for me to learn new things such as welding trade as well as getting paid to learn and doing what i love such as welding, what more could i ask for! I think it's an attractive option to me because in the union and trade industry the opportunities are endless and you always have room to expand and grow no matter what.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Honestly 2 years ago i didn't have an interest in welding but for my senior year of high school i took a welding class , and i thought "great another pointless class for me" but not even a month in i fell inlove with the trade . The patience and the results of my welds made me love it even more, it's calm and easy to do for me

Have not had any jobs related to pipe trades

Tell us about any hobbies that have boosted pipetrade-relevant skills:

This past year I have been getting into firearms. I've been practicing shooting, cleaning and researching guns. I have learned that patience is huge when cleaning and researching about guns.

Only other activity I can think of that would transfer to construction would be reading the bible and praising God. So far in my journey I've been working on my dedication, humility and understanding of life. I like to think these things can benefit me in a trade because im willing to learn. I know I'll mess up sometimes. But that's just the process growing and

Getting to learn hands on. Get knowledge and wisdom from someone who is actively in the field. Not having the burden of a huge debt of going to school. Other than that you get to work toward a goal of becoming someone who can one day potentially teach someone of your own

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've been interested in the trades since I was young because I like putting things together. And it was always a nice feeling at the end of a project taking a step back and looking at what has been accomplished. I've had a soft spot for welding since I tried it in highschool. In recent years I have been thinking about something I can do potentially for the rest of my life and welding kept popping up in my thoughts. I was thinking of going to school to learn, but I was told by some people if you do better with hands on learning an apprenticeship is the way to go.

Why is an apprenticeship an attractive option to you?

It's a good startup to get into a career that can sustain my present and take care of my future, trade jobs are always needed and becoming an apprentice is the start to becoming a tradesman, I like the learn as you go approach and acquiring new skills is always something I'm interested in, I'm a very hands on learner so I like that majority of teaching and learning will be through hands on work

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I heard that learning a trade is a good way to find a great career that you won't have to worry about computers taking your jobs, plus learning trades will be useful for when I decide to buy a house so I can take care of problems there, Looking to start a career and build towards making a family with my lovely girlfriend. I've heard about trades being a good way to build a career without having to go get a degree and enroll in a full college course. Plumbing interests me because when I have a house I'd like to be able to take skills I've learned and put them to use in making my house as nice as possible and this could translate to helping with issues that come up at my house when I have one

Add'l Edu. Details:**What trades-related courses did you take in school?****Why is an apprenticeship an attractive option to you?**

Because I want to learn a trade I don't want

To be working these dead end jobs I have been since 2020 I feel that now I have to make a change I'm 23 now and I see a clear path ahead of me and I am pursuing it which is why I came across you guys, For me it's learning while working and making money and an apprenticeship gives me that opportunity unlike going to college to work for someone that's why I plan on going to college for trade welding technical diploma cause that's

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I'm interested in this trade because next year fall of 2026 I'm going to college to get my welding technical diploma and I want to have a job when I'm done and hopefully it benefits you guys but yeah I just want a good well paying career and I want to travel and I feel this road will help me achieve that and I'm hoping you guys are willing to take a chance on me., The building trades offer strong career opportunities, job stability, and the chance to keep learning new skills. I like that it's active work, not just sitting at a desk, and that effort and skill really matter and I plan on going to college next fall 2026 for welding and when I graduate hopefully it will benefit you guys and still have a job waiting for me when I go back cause my goal is to travel and I see a road and it's right Infront of me and with you guys I can make that become reality., I am interested in this trade because I enjoy working with my hands, solving problems, and building things that have a real purpose. Welding and pipefitting are skills that require precision, discipline, and continuous learning which are qualities I strive to develop in myself I am motivated by

Add'l Details:**Why is an apprenticeship an attractive option to you?**

apprenticeships are attractive because they offer an "earn while learn" model with paid, hands-on training, no student debt, and a clear path to well-paying jobs with benefits, providing immediate experience, mentorship from experts, and strong career advancement opportunities., i believe an apprenticeship is attractive option for me simply because of the opportunity to grow and learn and get paid while you get trained that's always nice.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I am interested in specifically (plumbing) trade and other trades like fabrication, pipefitting, because I want to better my life and learn something new and meet new people and learn different things., Always wanted to know more about the trade and the necessary skills to obtain that type of job.

Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

Plumber, Pipe Fabricator, Steamfitter (Pipefitter), Steamfitter (Pipefitter)

Work Zones in Preference Order:Green Bay Area (Yellow), Green Bay Area (Yellow), Green Bay Area (Yellow), Appleton Area (Green),
Green Bay Area (Yellow), Appleton Area (Green)**Relevant Experience Level:**experience, but I have general skills in construction or welding., A little. No specific trade
experience, but I have general skills in construction or welding. A little. No specific trade**Years of Full-Time Work Experience:**1-3, 1-3,
1 2 1 2**Welding Experience:****Tell us about any jobs where you've learned pipetrades relevant skills:**

I don't not have any past job experiences that would be applicable.

I've been a painter and have done masonry for 1-3 years., Maybe doing masonry, or working at mkinley paper mill, I've worked a few paper mill jobs, painted and done concrete work, I've been a painter out of high school, and then was a mason for awhile and then machine operator for a few different places.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I like building/ refurbishing or renovating things and making them new again.

Also like building my own things the way I want them or like them such as carpentry., Working on bikes, and trucks, Working on bikes, cars, trucks., I like motorcycles, cars, boats, and any time of machines.

Shift Availability:

Part-time, 1st Shift (Days), Full-time, Full-time, Full-time, Full-time

Post HS Education:

No, No, No, No, Other Relevant Courses & Certifications

Add'l Edu. Details:**What trades-related courses did you take in school?**

Woodworking / Woodshop, Math-Algebra, Woodworking / Woodshop, Woodworking / Woodshop, Woodworking / Woodshop, Math-Algebra, Building Trades / Construction

What construction software or technologies do you have training in?

Solidworks

Any Safety Certificates:**Add'l Details:****Why is an apprenticeship an attractive option to you?**

I would like to learn and make money at the same time given the fact I live on my own.

I also have a friend who is an apprentice through you guys and likes it., I'm a hands on learner, never did like learning everything straight from a textbook or online, so learning hands on and making money while doing so is the right thing for me, I like to work hands on, and make money while doing so. I think an apprentice ship is perfect for me because

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Have been a painter, and did masonry since high school, and have seen many trades online that I would like to learn/ work, and wanted to find a career that I enjoy and can work in for many years to come.

I have a friend that has gone through this company and has an apprenticeship and talked highly of it as well., I've done, masonry, painting, worked in paper mills, always been interested in finding a career that I can rely on and find stability in with always having work., Have a buddy my age, that has gone through this same apprenticeship and he said that it's a good place to start a career and I've been interested in finding myself a career for awhile now., I've done some research and think I'd be a good fit for me, I've been wanting to get into the trades and do an apprenticeship for a good amount of time now, and I have a couple people I know that do it and talk very good things about it.

4-6

Welding Experience:

Stick - Some Knowledge, MIG - Some Knowledge, MIG - Some Knowledge, Stick - Some Knowledge, IIG - Some Knowledge, Elux Corp. - Some Knowledge, MIG - Some Knowledge, TIC - Some Knowledge, Stick - Some Knowledge

Tell us about any jobs where you've learned pipetrades relevant skills:

Ironworker- I did a little bit of welding which is applicable. But mainly I'd say work ethic and construction knowledge were gained from the job., Construction related jobs I've worked as a carpenter/laborer, landscaper, built pools, and as an ironworker. These all taught me what hard work was and work ethic.

My most relatable job to the pipe trades was being an ironworker apprentice. I did do some stick welding on the job but nothing pipe related., I currently work as a welder

Shift Availability:

Full-time, 1st Shift (Days), Overtime, Full-time, Overtime, 1st Shift (Days), Full-time, Overtime, Weekends, 1st Shift (Days)
