Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

Plumber

Work Zones in Preference Order:

Green Bay Area (Yellow), Appleton Area (Green), Fond du Lac Area (Orange)

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:

0

Welding Experience:

MIG - Some Knowledge, TIG - Some Knowledge, Stick - Some Knowledge

Tell us about any jobs where you've learned pipetrades relevant skills:

Working at Sure-Dry LLC has helped me gain hands-on experience in the construction trades. Being on a WaterGuard crew has taught me how to work with drainage systems, use different tools, measure accurately, and follow safety procedures. I've also learned the importance of teamwork, problem-solving, and working hard to get the job done right. These skills will help me as I start a career in the pipe trades.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I love to go to the gym and stretch and meditate which keeps my body and mental prepared and I work on my car in my free time which helps with problem solving and learning new things

Shift Availability:

Full-time

Post HS Education:

No

Add'l Edu. Details:

What trades-related courses did you take in school?

Welding

What construction software or technologies do you have training in?

CNC

Any Safety Certificates:

Add'l Details:

Why is an apprenticeship an attractive option to you?

An apprenticeship is a good option for me because I can earn money while learning new skills and gaining hands-on experience. I like being able to learn from experienced workers instead of just sitting in a classroom. It also gives me the opportunity to build a stable career, improve my skills.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

What interests me about the building trades is being able to work with my hands, learn new skills, and build things that are important. I enjoy physical work and being part of a team. I also like that the trades offer opportunities to grow and build a stable career.

I'm interested in a career in the pipe trades because I want to learn how to install, repair, and maintain piping systems. I enjoy learning new things and solving problems. I'm willing to work hard, learn from experienced workers, and improve my skills so I can have a successful future in the trade.

Disciplines of Interest:

Plumber, HVAC/R Service Tech

Work Zones in Preference Order:

Appleton Area (Green)

Relevant Experience Level:

None. Nothing even close-but I'm a hard worker and willing to learn!

Years of Full-Time Work Experience:

1-3

Welding Experience:

Tell us about any jobs where you've learned pipetrades relevant skills:

Well I've worked at Amcor as a press operator for 2 years and skills I could bring to the pipe trade from there could be, blueprint reading, precision measurement, tool usage, heavy equipment use. And handling all sorts of different materials and new jobs for change overs every week.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I workout and hit the gym a lot, I go hiking, I travel, and spend time with family and friends. Gym and hiking can be transferable to trades because I assume you are lifting heavy equipment a lot and gotta be in somewhat good shape and going to gym almost every day brings a sense of responsibility and commitment I can bring to the job site.

Why is an apprenticeship an attractive option to you?

Because it can help me get my career started, I wanna be able to have a career in the trades I'm proud of and be able to come home to my family and provide for them. And like most people I want a job with great pay and great benefits. I just wanna be able to be proud to go to work everyday.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

It looks like it's a great place to get started for a long term career, with great pay, great benefits and something I can be proud to do. Plumping and HVAC is something I've been interested in since high school and I'm finally getting the chance to see what it's all about. I wanna be able to provide for my family while making them proud at the same time.

Add'l Details:
Tell us about any hobbies that have boosted pipetrade-relevant skills:

In my free time I enjoy coaching basketball, working out, and spending time with my family. Coaching has helped me build leadership, communication, patience, and teamwork skills because I have to work with different personalities and help people improve. Working out has also taught me discipline, consistency, and how to push through challenges even when something is difficult.

I think these skills would transfer well into the construction trades because the work

Why is an apprenticeship an attractive option to you?

An apprenticeship is attractive to me because I would be able to learn a skilled trade through hands-on experience while also earning an income. I learn best by actually doing the work, asking questions, and learning from people who already have experience in the field.

I also like that an apprenticeship gives me a clear path to build a long-term career. I'm

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I'm interested in the building trades because I want a career where I can work with my hands, learn valuable skills, and build something I can be proud of. I'm looking for a long-term career that offers stability, opportunities to grow, and the ability to support my family. I also like the idea of learning through hands-on experience instead of sitting behind a desk all day. I'm better with hands on.

I'm especially interested in the pipetrades because it takes skill, precision, problem solving, and a strong work ethic. I'm ready to learn from experienced professionals, work hard, and become dependable in the trade. My goal is to build a career that I can continue growing in for many years and eventually become highly skilled in my field.

Add'l Details:

Why is an apprenticeship an attractive option to you?

An apprenticeship is an attractive option because it would allow me to focus on learning the skill while being able to provide for myself which is something that some struggle with when they go to a traditional technical college or join the workforce through other means.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I took some plumbing classes in highschool but never got good hands on classes, I then took intro to diesel technology at Fox Valley Technical College and realized I didn't want to work in diesel and I am excited to put effort into the plumbing and steam fitting trade as I enjoy helping people, I am not afraid to do hard work and I think learning is lifelong and not limited to school.

It is a viable option for me because I can get paid while I learn a new career and skill set. Being paid to sit in school and learn is also a bonus.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

As a 34 year old father of 4 I want a job that is protected from AI, and something more fulfilling. The trades to me is a path to that fulfillment and a path towards financial success. I currently work in manufacturing and have capped out my pay. Success to me is being able to financially provide and take care of my family and that is what my goal for entering the trades will be. Ultimately gaining my Journeyman card and hopefully one day pursuing a master plumber license.

Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

Plumber

Work Zones in Preference Order:

Green Bay Area (Yellow), Appleton Area (Green), Fond du Lac Area (Orange)

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:

7-9

Welding Experience:

Stick - Some Knowledge

Tell us about any jobs where you've learned pipetrades relevant skills:

As a Ready mix driver I learned some skills related to the pipe trades in that concrete floors for warehouses and new construction homes needed to be poured right after pipes were installed for buildings. Awareness of where pipes were installed needed to be considered to avoid running over pipes. I dont have too many job related experiences that related directly to plumbing. I have had to fix leaking sinks plumbing appliances in a non job related setting. I have always had a desire to learn plumbing.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

Fixing breaks, bearings, and struts on my personal vehicles. I have a desire to learn how to install and work on hot water heaters, as I have had to perform fixes on one's that I have owned in the past.

I believe that my military background has adapted me with the type of attitude to be a good apprentice and learn the trade from a skilled journeyman. I personally believe that I have the type of personality that is couchable and I am easy to train.

Shift Availability:

Full-time, Overtime, Weekends, 1st Shift (Days), 2nd Shift (Nights)

Post HS Education:

Some 4-year college

class A CDL

What trades-related courses did you take in school?

Math-Algebra, Math-Precalculus / Trigonometry

What construction software or technologies do you have training in?

AutoCAD

Any Safety Certificates:

Add'l Details:

Veteran

Why is an apprenticeship an attractive option to you?

I feel that it is attractive to me because I have a natural desire to value solving plumbing related problems for people and it gives me great feeling of gratification from helping people who are experiencing plumbing related issues.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I am interested in a carrer in the pipe trades because I am a former ready mix driver that enjoyed working on construction jobsites. It has been my goal to belong to a trade. I have a natural ability to work with tools and solve problems that require an ability to solve mechanical issues.

I have a desire to belong to a union. I was currently a member of the teamsters in Minnesota. They dont have the presence in Wisconsin as they do in Minneapolis. I feel that joining a trade is the only way forward for me.

Why is an apprenticeship an attractive option to you?

For my future. I want to eventually start my own business with plumbing and my knowledge of water restoration.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

When I started my career as a water restoration technician I was exposed to all type of plumbing, construction, and hard labor and I was more and more interested in it as I worked. Worked as a water restoration technician for about 2 years and learned tons about it and now I want to expand my knowledge and pick up a new skill. I feel plumbing is best for me since I do want to start a water restoration business of my own. I believe incorporating plumbing and water restoration could be a successful plan.

If I get the opportunity to become a plumber I know I'll work hard to learn as much as I possibly can. This chance could help with my business in the long run, as well as giving me many opportunities. I want it all. The connections, the knowledge, the money, everything.

What trades-related courses did you take in school?

Math-Algebra

Why is an apprenticeship an attractive option to you?

An apprenticeship is an attractive option to me because it provides me the opportunity to learn a skilled trade through a combination of hands-on experience and structured education. My time in the Marine Corps taught me that I learn best by receiving instruction and then applying what I have learned in a real working environment. I also value teamwork and learning from others and being able to teach others what I know while I develop my skills.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I want to build a career where I can work with my hands, develop a skill, and see the results of the work I have accomplished. After my time in the Marines I am looking for a career that offers structure, teamwork, and continuous learning and opportunities to teach others on what I have learned.

I am particularly interested in plumbing and pipefitting because these are skills that are needed in many different industries and can provide a strong long-term career. I also like the idea of learning a trade that has practical value outside of work. My interest in plumbing originally grew from conversations about pursuing marine and conservation-related work, where understanding plumbing, pumps, piping, and water systems can also be valuable.

What construction software or technologies do you have training in?

Add'l Edu. Details:

What trades-related courses did you take in school?

What construction software or technologies do you have training in?

Any Safety Certificates:

Add'l Details:

Tell us about any hobbies that have boosted pipetrade-relevant skills:

Growing up on a homestead has given me a number of useful tools that I believe directly apply. I learned problem solving through regular repairs and projects that we took on. I learned teamwork through working alongside my 7 brothers constantly all varying in ages and abilities. I learned discipline in doing the "mundane" things and important details that can be overlooked. My father also consistently instructed us in martial arts and physical education allowing me to form a strong discipline for pushing myself physically.

Why is an apprenticeship an attractive option to you?

An apprenticeship is attractive to me because I learn best through hands-on experience. I want the opportunity to work alongside professionals who can teach me the trade correctly while allowing me to apply what I learn in real situations. Being able to earn a living while developing valuable skills and receiving structured training makes an apprenticeship especially appealing to me. I also like that an apprenticeship provides a clear path forward. As an ambitious person I work best knowing there is a end goal that I

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I grew up working with my hands and problem solving daily on my parents' homestead, which gave me appreciation for practical skills and hard work. The building trades have always interested me because they offer the opportunity to develop valuable skills while doing challenging, hands-on work. I enjoy having to think through problems, adapt to different situations, and see the physical results of my work. Plumbing specifically appeals to me because it combines all those things while providing a stable and rewarding career. I also am a very ambitious person and want a career where I can always improve and work towards a higher level of responsibility and skill.

Welding Experience:
Tell us about any jobs where you've learned pipetrades relevant skills:

My main work experience that relates to the trades has been in landscaping and window cleaning. Both jobs taught me how to work hard physically, be dependable, work outdoors in different conditions, and pay attention to detail.

I don't have much direct experience with the pipetrades yet, and I know I have a lot to learn. That is actually one of the reasons I'm interested in an apprenticeship. I'm willing to start from the beginning, listen to experienced workers, ask questions, and put in the effort to develop the skills needed to become successful in the trade.

Post HS Education:

Some 4-year college

Add'l Edu. Details:

I went for one year to uw Milwaukee for radiology technician.

What trades-related courses did you take in school?

Math-Algebra, Math-Geometry, Math-Precalculus / Trigonometry, Math-Calculus

What construction software or technologies do you have training in?
Any Safety Certificates:

First Aid / CPR

Add'l Details:
Tell us about any hobbies that have boosted pipetrade-relevant skills:

One of my biggest hobbies is working out and staying active. I've also been involved in sports and enjoy doing hands-on and outdoor work. These activities have taught me discipline, consistency, teamwork, and how to keep working when something is physically challenging. I'm comfortable being on my feet, working with others, and putting in physical effort to get a job done.

I think these skills transfer well to the construction trades because the work requires reliability, physical endurance, attention to what you're doing, and a willingness to learn.

Why is an apprenticeship an attractive option to you?

An apprenticeship is attractive to me because I learn best by actually doing the work and gaining hands-on experience. I like the idea of being able to learn directly from experienced professionals while developing skills that I can use throughout my entire career. I also like that an apprenticeship allows me to earn a living while learning instead of taking on significant debt for school.

I'm looking for more than just a job. I want a long-term career where my knowledge,

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I became interested in the building trades because I enjoy hands-on work and want a career where I can learn practical skills, stay active, and see the results of the work I put in. I'm looking for a career that gives me the opportunity to continually improve, take on more responsibility, and build a stable future for myself.

The pipetrades specifically interest me because of the combination of physical work, problem-solving, and technical skill involved. I like that it is a career where there is always more to learn and where becoming highly skilled can lead to greater opportunities over time. I'm ready to work hard, learn from experienced people in the trade, and build a long-term career that I can be proud of.

Add'l Details:
Why is an apprenticeship an attractive option to you?

This apprenticeship is attractive to me because it offers the opportunity to earn while I learn and develop a skilled trade that can provide a stable, long-term career. I'm at a point in my life where I want to learn a new trade/skill that is applicable anywhere. My current career is stable but the attractiveness of continued growth and pay in our region is exciting.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I'm interested in a profession with real world skills with a service and direct impact to help those in our community. I am interested in pursuing a career in the pipefitting trades because I am looking for a long-term career that provides opportunities for growth, stability, and I enjoy hands-on work and the idea of developing a specialized skill set that I can build on throughout my career.

The idea of an actual career vs a job and building something that I'm proud of.

I like that an apprenticeship allows me to build a career while I am learning instead of having to spend years in school before entering the workforce. I am looking for a long-term career where I can continue developing my skills, and I believe an apprenticeship is a great way to build a strong foundation in the trade.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I am interested in a career in the building trades because after working primarily in office jobs, I have realized that I am happiest when I am working with my hands and can see the results of my work. I enjoy being able to work through a problem, accomplish something tangible, and know that the work I did had a direct result. I am looking for a career where I can continue developing practical skills and take pride in what I accomplish each day.

What construction software or technologies do you have training in?

Any Safety Certificates:

First Aid / CPR

Why is an apprenticeship an attractive option to you?

I also like that an apprenticeship provides a clear path toward a long-term career. I am willing to work hard, learn from experienced tradespeople, and start from the ground up to become highly skilled in my trade. The combination of training, real-world experience, and earning a living while learning makes an apprenticeship the ideal opportunity for me.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

My interest in the building trades started during my time in the Army, where I had the opportunity to participate in a five-month welding program and earn over 540 contact hours in Structural Welding. That experience introduced me to the satisfaction of working with my hands, following detailed plans and procedures, and producing quality work that serves a real purpose.

Add'l Details:
Why is an apprenticeship an attractive option to you?

I like the idea of learning from experienced professionals and developing skills that I can use throughout my career. An apprenticeship would give me the opportunity to build a strong foundation in the pipetrades while gaining real-world experience. It also offers a clear path toward a stable and rewarding career.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I became interested in a career in the building trades because I enjoy working with my hands, solving problems, and seeing the results of my work. I like the idea of having a career where I can learn practical skills, The building trades also offer opportunities to build a stable future while doing work that is important to communities.

Specifically, I am interested in the pipetrades because they require skill, precision, and problem-solving. I like the idea of working with different tools and equipment while learning how piping systems are installed, maintained, and repaired. A career in the pipetrades would allow me to develop valuable skills, take pride in my work,

Why is an apprenticeship an attractive option to you?

"An apprenticeship is the ideal path for me because it pairs rigorous technical instruction with immediate, practical application on the job site. The ability to learn directly from experienced journeypersons gives me a level of mentorship and real-world problem-solving experience that a classroom alone cannot match.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I was drawn to the building trades because I thrive in hands-on, problem-solving environments where you can see the tangible results of your labor at the end of every day. Rather than working behind a desk, the trades offer the opportunity to master a practical craft, solve complex physical challenges, and build infrastructure that communities depend on. The combination of strong long-term security, continuous technical training, and the pride of building lasting structures made a career in the skilled trades an obvious choice.

My specific interest in the pipetrades stems from the high level of technical precision and critical importance the field demands. I am motivated by the analytical challenge

Why is an apprenticeship an attractive option to you?

An apprenticeship is attractive to me because it gives me the chance to learn a trade hands-on while earning, and that's exactly the kind of path that fits my goals and interests. It allows me to build a career that provides financial stability and long-term freedom for my family, while also aligning with the things I naturally enjoy—working with my hands, solving problems, and building or repairing systems.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

My interest in the building trades comes from a lifelong pull toward working with my hands, solving real world problems, and being part of creating something that lasts. I've always been drawn to work where I can see the results of my effort where skill, precision, and craftsmanship matter.

Solidworks

Any Safety Certificates:

First Aid / CPR, OSHA 10

Add'l Details:
Why is an apprenticeship an attractive option to you?

Because it lets me learn the trade and be able to make money. It avoids collage debt and gives a good path for a career. It also is a good option for me because I would be learning from a master so I know I would learning it the right way. That is why an apprenticeship is an attractive option for me.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

What interest me in a career in the building trades is that. I like doing hands on work and seeing the projects come together. I am also picking the trades for my career option because I want a good stable job. This is why I think a building trade is for me.

What interests me about the pipe trades is that I find the systems they use interesting. I would really like to learn the ways on how all the different things are put together from start to finish. I also would like to learn the different types of work in the pipetrades. That is why I think the pipe trades would be a good fit for me.

Why is an apprenticeship an attractive option to you?

Being able to get paid while you learn is a huge draw for me. The pay scale is also great as well as benefits! Learning a valuable skill is very important to me.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I have been working as a plumbing helper for a bit and I it seems to be a very good career to pursue. I hear union is the way to go!

Add'l Details:

Why is an apprenticeship an attractive option to you?

An apprenticeship is the best way for me to learn because I gain real experience while building skills I can use for the rest of my career. I like the opportunity to earn a living, learn from experienced workers, and grow into a dependable tradesperson.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've always enjoyed hands-on work and want a career where I can build useful skills and see the results of my work every day. The pipetrades interest me because they combine problem-solving with practical work and offer the chance to build a stable, long-term career.

Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

Plumber, Steamfitter (Pipefitter), HVAC/R Service Tech, Pipe Fabricator

Work Zones in Preference Order:

Appleton Area (Green), Fond du Lac Area (Orange)

Relevant Experience Level:

Some. I have worked for a plumber, steamfitter or HVAC/R contractor.

Years of Full-Time Work Experience:

1-3

Welding Experience:**Tell us about any jobs where you've learned pipetrades relevant skills:**

The one job I was doing that I have the most experience in was pipefitting, I would cut and fabricate 6 inch galvanized steel pipe and fit and install it at the job. I would also work with hand tools and use scissor lifts and ladders very often as well. I also know how to read blueprints and would work in hospitals so I would need to be mindful of others in the hospital.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I enjoy going boating on the water during summertime or jetskiing. For it you need to know how to operate a boat and have your boater safety and if you don't you could be a danger to others on the water. Its similar to construction because if you aren't certified or have your OSHA certification you could be a danger to others.

I also help out around my parents with random small jobs like pouring rock for the breakwall in the water, planting trees, and doing landscaping. I think that these help you get good with hand tools and just being able to work well with others too.

Shift Availability:

Full-time, 1st Shift (Days), Overtime, Weekends

Post HS Education:

Some 4-year college, Other Relevant Courses & Certifications

Add'l Edu. Details:

I have my OSHA 10 training card and aerial/scissor lift certification as well. I also was going to college for dentistry

What trades-related courses did you take in school?

Woodworking / Woodshop, Math-Geometry

Why is an apprenticeship an attractive option to you?

I think being able to have an apprenticeship will be able to open many doors and opportunities for myself to learn and become the best I can at the trade I'm interested in. There isn't anything else that I can think of that I would rather do and it's just one of my goals and something I've always wanted to get since I've started in construction.

What construction software or technologies do you have training in?**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

I started working for my parents for a little bit when I graduated high school. I realized after trying other careers that I only want to do construction because it is what I enjoy doing and I am good at it.

Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

Plumber, HVAC/R Service Tech, Steamfitter (Pipefitter)

Work Zones in Preference Order:

Appleton Area (Green)

Relevant Experience Level:

None. Nothing even close-but I'm a hard worker and willing to learn!

Years of Full-Time Work Experience: 10+

Welding Experience:

Tell us about any jobs where you've learned pipetrades relevant skills:

I worked in a factory making wire mesh for 12 years before moving to Wisconsin. At this particular factory, I was considered a specialist, and I learned multiple jobs and was a valued member of the team. I worked well with others and different processes throughout my time. I learned to be versatile and I was constantly thinking. I had to know a lot of information because I worked multiple jobs. I became a good problem solver because of the experiences I learned from good people. I am easy to work with because I've worked with an array of different people.

Shift Availability: Full-time, 1st Shift (Days)

Post HS Education: Associate Degree

Add'l Edu. Details: I have an Associates of Arts degree with a major in History. My particular interest was 20th century history, however I did

What trades-related courses did you take in school?

Math-Algebra, Math-Geometry

Add'l Details:

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I have an array of interests and hobbies. My main hobby that I enjoy is wildlife photography. I mainly photograph birds, owls are my favorite, but I enjoy all wildlife. I also enjoy reading, watching sports, and occasionally playing video games

I think these skills can be transferrable to a trade. For example, wildlife photography has taught me to carefully pay attention to my surroundings taught has helped hone the sharpness of my mind. While you're out in the field and you hear a call. It's up to you to

Why is an apprenticeship an attractive option to you?

An apprenticeship is an attractive option to me because I strongly desire to find a career that I am passionate about and can be proud of. Both of these things mean a lot to me, and I feel like I haven't been making the most of myself up to this point. I want to challenge myself more.

To me, an apprenticeship is the best way to go. There's classwork involved, which I have

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Within the last year, I moved to Wisconsin to begin a life with my girlfriend, and I had interest in finding a new career for myself. I no longer desired to work manufacturing jobs; I wanted to make something more of myself. I wanted to find a career that I could be proud of, one that could support the both of us and eventually a family. To achieve that goal, I turned my attention to learning a trade.

I educated myself about some of the potential trades that I could be interested in and talked to one of my friends who also works a trade and union job. He couldn't recommend enough to me that I was making the right decision for myself. After doing more in-depth research, about the potential jobs and what could be potential match in location, I came to the conclusion that I think a pipetrade would be a good match.

Why is an apprenticeship an attractive option to you?

I have finally decided that I need to have a career, and I know a career where I have a very useful hands-on skill like plumbing (though I considered electrical), and keeps me physically active is what will make me happiest. Plus I know that tradesmen make an amount of money that would make me feel secure in life.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I started a "Women Work" program in WV in 2020 but ended up not finishing because of covid. I liked the subject. Also, I managed a farm for two years and have found that working with my hands is what makes me happiest. Plus I am drawn to the long-term security of working in a trade. I don't know why, but plumbing has always stood out to me as my preference, even though I have no experience with it.

Add'l Details:

Why is an apprenticeship an attractive option to you?

An apprenticeship is attractive to me because it allows me to learn a skilled trade while working in the field and earning a wage at the same time. I prefer hands-on learning, and I value the opportunity to gain real experience under the guidance of trained journeymen rather than only learning in a classroom.

It also gives me a clear path for long-term career growth. I want to build a stable career

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I am interested in building a long-term career in the construction trades because I prefer hands-on work where I can develop real, practical skills and see the results of what I do each day. I am motivated by learning through training and experience, working in a team environment, and building a stable career with strong growth opportunities.

I am most interested in the pipe trades, including pipefitting and HVACR, because they offer structured apprenticeship programs, technical training, and a clear path toward becoming a skilled journeyman. I am open to related areas within the mechanical trades and willing to learn wherever needed, but my main goal is to build strong skills in piping systems, installation, and mechanical systems work.

Add'l Details:

Tell us about any hobbies that have boosted pipetrade-relevant skills:

Some of my hobbies include working on my car, going to the gym, and learning about tools and mechanical systems. Working on my car has helped me develop problem-solving skills, attention to detail, and patience while following steps to complete repairs or upgrades correctly. Going to the gym has taught me discipline, consistency, and the importance of staying physically fit, which are all valuable in the construction trades. I also enjoy learning new skills and taking on hands-on projects, which has strengthened my work ethic and willingness to keep improving.

Why is an apprenticeship an attractive option to you?

An apprenticeship is attractive to me because it allows me to earn a paycheck while learning a skilled trade from experienced professionals. I like the opportunity to gain real-world, hands-on experience instead of only learning in a classroom. It also provides a clear career path with opportunities to grow, earn industry-recognized certifications, and build a stable, long-term career. I'm motivated to work hard, continue learning, and become a skilled journeyman in the pipe trades.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

You could answer it like this:

I became interested in a career in the building trades because I enjoy hands-on work, solving problems, and creating things that have a lasting impact. The idea of working on projects that help build homes, schools, businesses, and other important structures is rewarding to me. I also like that the trades offer opportunities to learn new skills, earn a good living, and continue growing throughout my career.

Specifically, I am interested in the pipe trades because I enjoy working with mechanical systems and learning how plumbing and piping keep buildings functioning safely and efficiently. I like the combination of technical knowledge and physical work, and I want to develop skills that are always in demand. I'm looking forward to building a long-term career where I can take pride in the quality of my work.

Why is an apprenticeship an attractive option to you?

One of the reasons I have would be learning from someone with experience. I mean by that is learning that specific persons little tricks of the trade. Becoming more confident into my ability in doing that task besides just a toss into the job perhaps two to three days of "training" and there you go.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Need to get my hands dirty I have never been a fan of the assembly factory jobs. Doing the same thing and day out maybe changing models but same concept. I'm needing different work to do where quality is truly more important than quantity. I've built deer stands, Welded on the farm and for some side projects, built greenhouses for my cousin.

I grew up knowing my tools there's never a question on that. On today's date of myself writing this 6/25/26 I've just finished half of the wiring needed for my fathers new machine shed. I've not realized how much time had past but when I saw how far along I was it made myself proud of the work I've done. I truly believe but sad to say is that in general in today's age not many people take pride in their work. Call me old fashion if you'd like but, I take pride in anything I do so it's done right.

Why is an apprenticeship an attractive option to you?

An apprenticeship is an attractive option for me because it lets me learn a skilled trade through hands on experience while earning a wage. I like the idea of learning directly from experienced tradespeople in a structured program that builds real in demand skills and leads to a long term stable career

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've been interested in the building because I like work that is hands on and practical. I'm drawn to careers where I can see the results of my effort every day and projects that serve people. I also value the idea of building a long term skill set that's in demand and can support a reliable career. What specifically interested me in the pipe trades is the combination of problem solving and technical skill. Not just the physical work but you also have to understand systems, measurements, safety standards and how every fits together.

Why is an apprenticeship an attractive option to you?

The ability to learn and grow in a field I have loved since I was 16 . The on the job training and the fast paced hands on environment . All the different people I will meet .and the room for growth and improvement not just in the career but as a person as well

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I fell in love with plumbing in high school , as I had a plumbing class at central college in Iowa and I've been hooked ever since . I love the problem solving ,the ability to work with my hands and meet new people . I was drawn to construction because the idea of being trapped in an office all day sounds like my own personal hell . And I wanted to create and see meaningful change for myself and others . I have always wanted to help people in some way or another . I love a good challenge and I've always been elbow deep in a tool box so a career in the trades just makes sense

Why is an apprenticeship an attractive option to you?

An apprenticeship is attractive to me because it provides the opportunity to earn a paycheck while learning the skills I need from skills experienced professionals. An apprenticeship also offers a clear career path, opportunities for advancement, and the chance to develop expertise in a skilled trade.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've always enjoyed working with my hands, solving problems, and seeing the results of my work. The building trades interest me because they offer the opportunity to build and maintain things that people rely on every day while developing valuable skills. I'm excited about the opportunity to learn from experienced professionals and build a long-term career in the trade.

Building Trades / Construction

Why is an apprenticeship an attractive option to you?

Great pay right out the gate and the immense amount of knowledge I could gain to move up in my career., I can get paid a good wage, while actively supporting my career and my family simultaneously. On the job paid, in paid school classes. It's a win win for a father of two, Full time hours, paid classes, out the gate awesome wages. I can provide for my family while providing a career for myself simultaneously. Healthcare isn't enough to support my family anymore and I have to think bigger

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I am a hardworking father of 2 and healthcare isn't the end all I thought it was. Low hours, constantly struggling to pay bills, my children don't deserve that. I am an extremely diligent worker, and I know my work ethic will outshine others. I just want to provide for my family and make them proud, To be able to work hard and provide for my family, and learn a valuable trade I can pass on to my kids. My current role in healthcare is just stagnant and I want to give my family a better living, To be able to provide for my family, learn a valuable skill I can pass along, and have a structured, 40 hour or more work week, so I can be a provider for my family. I'm a workhorse and healthcare just doesn't have enough hours for me

I do not mind school but something like a 4 year college is not something that interests me. I learn and understand things better being shown face to face and learning as I go. A profession like this also lets you work and earn a living at the same time

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

The people I looked up to in my adolescence were generally in trades type jobs. They were hard working individuals and I looked up to them because of it. I originally was interested in building houses. However, on my path through doing related classes in high school, construction, metal work and CAD type classes, I ended up getting a job in machining and continuing my education by completing my associates degree in tool & die and receiving journeyman's card. I have 11 years experience in this field, but recently I've had a desire to expand my skill set. I have been looking into several construction related fields and this one looked the most interesting because it will set me up with skills that will be beneficial throughout time.

Double major in Psychology and Democracy and Justice Studies

What trades-related courses did you take in school?

Math-Calculus

Why is an apprenticeship an attractive option to you?

I decided to leave my job pertaining to my college degree to pursue work in construction field. I believe the best course is to get an apprenticeship in skilled trades. It provides enjoyable work, a clear course of training and education, and promises a good career.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I got my college degree and began working in the field I had my degree in. I ended up not enjoying it so I began doing renovation and maintenance work for property management companies. I always had an interest and had helped do that type of work growing up and I ended up extremely enjoying the work. Throughout my time doing this, despite being ok where I am, I wanted to continue advancing in my career path so I looked into trades. Plumbing caught my attention right away and I think it will be a great path to pursue for my career.

What construction software or technologies do you have training in?

Any Safety Certificates:

Add'l Details:

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I enjoy learning new things, working out, and helping around the house when I can. Sometimes I'll find myself sinking hours into informational readings/videos online about topics I'm passionate about. Any opportunity I can get to learn something new, or do something hands on- I take.

Staying physically fit is important to me so that I can engage in intense and hard tasks easier, as well as maintain my physical health as I get older. I enjoy climbing by myself

Why is an apprenticeship an attractive option to you?

An apprenticeship is an attractive option to me as I value hard work, continuous learning and skill. I'm looking to build a long term career in a skilled trade where I can help my community from its roots.

Throughout my work experience I have developed a reputation for being dependable, punctual, and willing to learn and take on challenging new tasks. I enjoy hands-on work,

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've always enjoyed hands on work, where at the end of the day I can see the progress I've made. Working with various family members over the years on small-scale construction projects has given me an appreciation for the trades, and a desire to learn and know more. Despite being heavily overlooked, the trades are foundational to our society and crucial for normal life. Being able to help build/maintain that structure excites me, because it means I can better serve my community.

I am seeking an apprenticeship so I can build a long term career in a skilled trade where hardworking, craftsmanship and continuous learning is valued. I know there are many different trades you can become proficient in. While I might not have much experience in pipe trades now, it is by far the most intriguing one to me, and I am eager to learn more about it.

What trades-related courses did you take in school?

Why is an apprenticeship an attractive option to you?

An apprenticeship is attractive to me because I get to earn while I learn, as well as learn from industry professionals that have spent their career problem solving and working in the trade I am passionate about. It also gives me the chance to learn hands on and absorb the knowledge through performing tasks. The apprenticeship also gives me incentive to reach for goals to accomplish. It also allows me to have a network of peers that I will be learning with and can ask them for help and see if they encounter a similar problem that

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I enjoy working with my hands and being able to solve problems in the field using what I have learned and what I am about to learn. As well as being able to have a skill that can help solve problems for people and provide them with safe drinking water and dispose of sanitary water safely. I also like the satisfaction of being able to look back at my work at the end of the day and see progress. In addition to that I like to be tired at the end of the day and know that I put in a hard days work. It's more than the pay for me as I like to help people and know that I will do the most quality job and be detailed. Another reason I am interested in the trades is because I grew up shoveling, running equipment, and problem solving.

What construction software or technologies do you have training in?

Another hobby I have is working out, my body is physically healthy and a good fit for construction trades making it easier to carry pipe, or just do physical labor work in general. I also like to read and learn on my own how things work. Constantly learning helps me when I'm in situations where I need to learn new things and it seems to help me when I need to learn something foreign to me., I Golf which helps with connections. I like to fix random things whenever I get the chance and do random

Why is an apprenticeship an attractive option to you?

An apprenticeship is something that I like because it is mainly hands on learning. I like to learn by having actual real hands on experience. It also allows me to see a stable progression of what my career will progress to if I continue to work hard and show up with a good attitude., I want to learn while I work in a structured manner while staying in the pipe trades. I just want something more structured and with a backbone. I like to learn practical skills as well as I want to specialize in something I already have a bit of

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I love to do hands on work, it makes the day go by faster. I like to know how things work and why they work. I've been working at a non-union restricted plumbing company which I really enjoy. I don't really see the long term outlook of working for that. I like how the union has a good backbone for long term careers. Overall I'm just looking to work and work hard., I like working with my hands and taking pride in something that has meaning and that I do. Seeing a project come together is a very rewarding thing and I gravitate towards things that I can use my skills for. I am detail oriented and currently work as a non-union POWTS installer and want to do something more detail oriented and more long term. I also like something that is stable and a service to people at the same time.

Add'l Details:

Why is an apprenticeship an attractive option to you?

Learning under someone is the best because although you can learn by the book, the person your training under can show you ideas and learned habits that have helped them be successful in said trade that they've learned over the years.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

My grandfather was a plumber, and honestly the pay.

Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

Plumber, HVAC/R Service Tech

Work Zones in Preference Order:

Fond du Lac Area (Orange)

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:

4-6

Welding Experience:

MIG - Some Knowledge, Stick - Some Knowledge

Tell us about any jobs where you've learned pipetrades relevant skills:

I worked some construction for a spring and summer season, so I have some experience with power tools.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I enjoy building projects. Power and hand tools are not unfamiliar to me. I'm an avid outdoorsman too. I love being outside, whether it's for work, hunting, fishing, or anything else.

Shift Availability:

Full-time, 1st Shift (Days), Overtime

Post HS Education:

No

Add'l Edu. Details:

What trades-related courses did you take in school?

Building Trades / Construction, Math-Algebra, Math-Geometry, Welding

What construction software or technologies do you have training in?

Any Safety Certificates:

Add'l Details:

Why is an apprenticeship an attractive option to you?

I would have to say plumbing and HVAC. I feel like they provide skills I can use to be more self sufficient while offering a "future proof" job and a rewarding career.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I want a rewarding career with earning potential. I like hands on work. I took some shop classes in high school and really enjoyed them.

Relevant Experience Level:

None. Nothing even close-but I'm a hard worker and willing to learn!

Years of Full-Time Work Experience:

1-3

Welding Experience:

Tell us about any jobs where you've learned pipetrades relevant skills:

I currently work as a machine operator. A lot of my job requires me to plan ahead to make sure things don't go wrong. I work with other employees to make sure everyone understands what they're doing and can work safely. The machines i work on are very old so things break frequently. My job often requires me to problem solve either by myself, with a lead, or with maintenance to find out what has gone wrong with the machine. I'm used to working long hours on my feet. I work 12 hour days and frequently work overtime. Last year I worked between 60 to 80 hours every week.

Shift Availability:

Full-time, Overtime, 1st Shift (Days)

Post HS Education:

No

Add'l Edu. Details:

What construction software or technologies do you have training in?

Any Safety Certificates:

Add'l Details:

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I go to the gym constantly and get better all the time. I enjoy hard work and I love working towards long term goals. This has helped me at my current job when I'm lifting things or running up and down stairs. I'm physically fit and will be able to handle the physical challenges that this job throughs at me. I also do bjj which requires me to be coachable and disciplined.

Why is an apprenticeship an attractive option to you?

I've always enjoyed working with my hands. After high school I got a job working in a mill. My job mostly consists of troubleshooting, helping newer employees, and working with our maintenance crew. Our maintenance crew has often tried to convince me to apply but there is no room for me to apply. After talking to my family, friends, and looking around online plumbing and hvac interested me the most.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I have always liked working with my hands so when I graduated I started working in a mill. I currently work on a machine and often have to work with maintenance to troubleshoot. Which was how I became interested in getting into a trade. The maintenance guys often talked to me about applying for maintenance but there is no room for me to apply. I really enjoy troubleshooting and would like more of an opportunity to grow. After taking to my family and looking around online plumbing and hvac interested me the most.

Automotive Technology, Welding, Woodworking / Woodshop, Building Trades / Construction

What construction software or technologies do you have training in?**Any Safety Certificates:****Add'l Details:****Why is an apprenticeship an attractive option to you?**

An apprenticeship is an attractive option to me because it gives me the opportunity to learn valuable skills while gaining real hands-on experience. I like the idea of learning directly from experienced workers and building knowledge that will help me succeed in a long term career. It also allows me to grow professionally while preparing for a stable future.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I am interested in a career in the building trades because I want a stable future and the opportunity to build a successful career. I like the idea of working with my hands, learning practical skills, and being part of projects that make a difference in people's lives. The building trades offer good opportunities to grow, earn a strong income, and develop skills that can last a lifetime.

What trades-related courses did you take in school?**What construction software or technologies do you have training in?****Any Safety Certificates:****Add'l Details:****Why is an apprenticeship an attractive option to you?**

I'm married with 5 children. A mortgage, bills to pay. Being able to get paid while learning a new career is exactly for a guy like me so I can still support my family while I build new skills. Also I have been doing driving and warehouse jobs for most of my life. As my sons get older I think about them and I think I'd rather be able to say to them if whatever they wanna do doesn't work out they can come work for me and I wouldn't want them to be doing what I do now. Rather see them be in a trade like I'm trying to pursue

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I bought a house 3 years ago and I started fixing things and remodeling myself instead of hiring someone. I never really knew how much I liked to work with my hands until then. I have friends who are plumbers and pipefitters who enjoy their job and life so after asking them questions about the trade and what's involved in it I got really interested in trying to pursue that path

I do a lot of long distance bicycling to keep in shape. Averaging 25-30 miles per ride and I try to hit at least 5/6 rides a week. I think this speaks on how much discipline and physical stamina I have which I believe to be important in the construction trades I really also enjoy cooking which involves a lot of hands on problem solving. In kitchens I've had to work with a team and make sure we put out a product that is consistent while working under pressure. I enjoy learning the process, multi tasking and improving my skills.

Why is an apprenticeship an attractive option to you?

The thing that's most attractive to me is the opportunity to learn a new skill! It is a huge bonus being able to make a wage while making learning. I am looking for something stable that offers real growth, something I can retire doing. I think the pipe trades meets all the things I've been wanting to do. I like to stay busy and I've always appreciated and respected the work people in this trade do

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

The thing that interests me the most is a chance to learn a new skill while working. I'm someone who likes physical work and would rather learn and get good at something rather than sitting at a desk somewhere.

I really really like that this trade offer room to grow and stability. I am interested in a long term career

MIG - Skilled, TIG - Some Knowledge, Stick - Some Knowledge

Tell us about any jobs where you've learned pipetrades relevant skills:

I am a welder for John Deere and will be celebrating 3 years in october

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I enjoy welding and working with my hands, I also like hiking which keeps me in good shape for a career in the trades. I've helped my dad fix various things in the house including the water heater

Shift Availability:

Full-time, Overtime, Weekends, 1st Shift (Days)

Post HS Education:

Some 2-year college

Add'l Edu. Details:

I have some 2 year credits from high school but never did a two year degree

What trades-related courses did you take in school?

What construction software or technologies do you have training in?

AutoCAD

Any Safety Certificates:

Add'l Details:

Why is an apprenticeship an attractive option to you?

Being able to earn while you learn is pretty attractive to me, also the fact that I'll be learning from experienced journeymen sounds very interesting to me. I want to learn from the best so I can be the best

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've been a welder for the last 3 years at John Deere and would like to broaden my horizons, I've always been interested in the pipe trades and I have finally gotten the courage to start applying for the apprenticeships, the pay, benefits and problem solving in the career really peaked my interest

Associate Degree, Some 2-year college

Add'l Edu. Details:

Agricultural Equipment Service Tech, And Currently A Licensed Teacher In Wi, For technology education.

Why is an apprenticeship an attractive option to you?

Paid to learn how to make a difference and no day is always the same, lots of variety in the trades.

What trades-related courses did you take in school?

Woodworking / Woodshop, Metals, Welding

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

The ability to help people and earn while you learn was a big draw for me. I come from a vast experience set. I worked in the Agriculture repair sector for the better part of ten years, then I ventured into education for a brief stint as a solution to a labor shortage. While in education I was a tech ed teacher and was pushing my students to consider the trades, After a few unsuccessful try's at continuing to become an educator, I decided to take my own advice and pursue another trade.

What construction software or technologies do you have training in?

Solidworks

Any Safety Certificates:**Add'l Details:****Contact Information:**

Disciplines of Interest:

Plumber

Work Zones in Preference Order:

Appleton Area (Green), Green Bay Area (Yellow)

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:

1-3

Welding Experience:

Tell us about any jobs where you've learned pipetrades relevant skills:

I have not had any jobs applicable to pipe trades

Tell us about any hobbies that have boosted pipetrade-relevant skills:

Most of my hobbies are outdoor activities, like sports. Throughout my life I've always been a team player and disciplined, and so when I play a sport like football, it's trained me over the years to be coachable, take accountability, and accept criticism to become better at what I do.

Shift Availability:

Full-time, Overtime

Post HS Education:

No

Add'l Edu. Details:

What trades-related courses did you take in school?

Math-Algebra, Math-Geometry

Why is an apprenticeship an attractive option to you?

An apprenticeship is an attractive option to me because of what comes along with it. The pay while you learn, and progressively as the years go on in my apprenticeship I'll be able to earn more and learn more things. Compared to a college or other learning areas where I wouldn't benefit from years of schooling, or I would end up paying large amounts for schooling.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

What's interested me in the trades is the huge growth of work opportunities over the years. I appreciate that trade work is a type of work that will always have a high demand, and will always be needed. I'm specifically intrigued in a job in the pipe trades because of the amazing opportunities to learn new things and encounter a wide variety of different types of work and challenges.

What construction software or technologies do you have training in?

Add'l Details:

Why is an apprenticeship an attractive option to you?

I would love to learn as much as possible about plumbing as I can, and an apprenticeship seems like the best way to go about that. In my opinion, working with a mentor is the best way to learn, and being able to do that, as well as plenty of hands-on learning, is my ideal way of getting into the trade.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I have always enjoyed working with my hands, I spent my first year of post high-school schooling going for an unrelated degree and realized it wasn't for me. A career in the pipetrades interested me because the thing I value most when it comes to a job is consistent work. Having done a few projects within my home, as well as projects for friends and family, plumbing was what I enjoyed the most.

Any Safety Certificates:**Add'l Details:****Why is an apprenticeship an attractive option to you?**

Well because i've had apprenticeships before and they are such an amazing opportunity for me to learn new things such as welding trade as well as getting paid to learn and doing what i love such as welding, what more could i ask for! I think it's an attractive option to me because in the union and trade industry the opportunities are endless and you always have room to expand and grow no matter what.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Honestly 2 years ago i didn't have an interest in welding but for my senior year of high school i took a welding class , and i thought "great another pointless class for me" but not even a month in i fell inlove with the trade . The patience and the results of my welds made me love it even more, it's calm and easy to do for me

Add'l Details:

Why is an apprenticeship an attractive option to you?

The reason why an apprenticeship is an attractive option for me is because The opportunity of learning the skills and going to school to learn more about the job is exciting to me. Meeting new trainers and get to know them as a friend and being able to learn the skill to teach others the skills I learned. training and helping people learn something that I am passion about and would like to be the one teaching someone.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

The reason that I am interested in plumbing and the pipe trades is because it's a career path that I have been looking at trade careers since 2022. I am always interested in helping communities and new buildings with waste treatment. Learning new skills and teaching others with the materials that I learned for other trainers. Over the years I have been looking and getting directed in many trades. I took a tour of most of the fox valley trade programs like welding tour an electrical tour and plumbing tour. But throughout me looking at videos and articles plumbing was the way I wanted to go. I took the test to get my letter of introduction. I want to take this career as I am ready to learn and grow I know it's a long process but I know I can work in this field of work. The main goal for me and working and learning as must as possible.

Welding Experience:

Tell us about any jobs where you've learned pipetrades relevant skills:

I worked at Dean Distributing delivering beverages to businesses, where I learned to be reliable, on time, and work efficiently. The job was physically demanding, so I'm comfortable with lifting and long days. I also built communication and teamwork skills, which I think carry over well to the pipe trades.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I stay pretty active in my free time. I work out regularly and played college baseball, so I'm used to staying in good physical shape and pushing myself. Baseball also taught me a lot about teamwork, communication, and staying focused under pressure. Between that and working out, I've built a strong work ethic, discipline, and the ability to stay consistent. I think those skills carry over well into the construction trades, especially when it comes to working with a team, handling physical work, and staying motivated throughout long days.

Add'l Details:

Why is an apprenticeship an attractive option to you?

An apprenticeship is attractive to me because I like the idea of learning by actually doing the work instead of just sitting in a classroom. I think I learn best hands-on, and being able to gain real experience while getting paid is a big plus. I also like that there's a clear path to build skills and grow into a long-term career. It seems like a great way to learn from experienced people and become confident in the trade over time.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've always been interested in hands-on work and doing something where I can actually see the results at the end of the day. The building trades stood out to me because it's a stable career with good opportunities to grow. Plumbing specifically caught my interest because it's something people always need, and I like the idea of learning a skilled trade that I can build a long-term career in. I'm motivated to work hard, learn from experienced people, and eventually become really skilled at what I do.

Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

Plumber, HVAC/R Service Tech

Work Zones in Preference Order:

Appleton Area (Green), Fond du Lac Area (Orange), Green Bay Area (Yellow)

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:

1-3

Welding Experience:

Flux Core - Some Knowledge

Tell us about any jobs where you've learned pipetrades relevant skills:

N/A

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I work on motorcycles and assist my dad with minor household repairs. I've also helped uninstall and install electronic equipment at my uncle's business. In my free time, I enjoy going to the gym and lifting weights, which helps me stay strong and maintain a healthy mindset.

Shift Availability:

Full-time, Overtime, Weekends, 1st Shift (Days)

Post HS Education:

Other Relevant Courses & Certifications

Add'l Edu. Details:

Plumbing Principles Certificate

What trades-related courses did you take in school?

Woodworking / Woodshop, Math-Geometry, Math-Algebra

What construction software or technologies do you have training in?

Any Safety Certificates:

OSHA 30

Add'l Details:

Why is an apprenticeship an attractive option to you?

I need to develop my skills to become a licensed plumber. Eventually I would like to become a master plumber and to own a plumbing company.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I enjoy working with my hands. I'm interested in learning the skills and just knowing how to fix things that I can use on my own house one day. My dad and peers always suggested plumbing to me. I took classes for my plumbing principles certificate and I really enjoyed using all of the tools.

Add'l Details:**Why is an apprenticeship an attractive option to you?**

It's a good startup to get into a career that can sustain my present and take care of my future, trade jobs are always needed and becoming an apprentice is the start to becoming a tradesman, I like the learn as you go approach and acquiring new skills is always something I'm interested in, I'm a very hands on learner so I like that majority of teaching and learning will be through hands on work

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I heard that learning a trade is a good way to find a great career that you won't have to worry about computers taking your jobs, plus learning trades will be useful for when I decide to buy a house so I can take care of problems there, Looking to start a career and build towards making a family with my lovely girlfriend. I've heard about trades being a good way to build a career without having to go get a degree and enroll in a full college course. Plumbing interests me because when I have a house I'd like to be able to take skills I've learned and put them to use in making my house as nice as possible and this could translate to helping with issues that come up at my house when I have one

Why is an apprenticeship an attractive option to you?

apprenticeships are attractive because they offer an "earn while learn" model with paid, hands-on training, no student debt, and a clear path to well-paying jobs with benefits, providing immediate experience, mentorship from experts, and strong career advancement opportunities., i believe an apprenticeship is attractive option for me simply because of the opportunity to grow and learn and get paid while you get trained that's always nice.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I am interested in specifically (plumbing) trade and other trades like fabrication, pipefitting, because I want to better my life and learn something new and meet new people and learn different things., Always wanted to know more about the trade and the necessary skills to obtain that type of job.

What construction software or technologies do you have training in?**Any Safety Certificates:****Add'l Details:****Why is an apprenticeship an attractive option to you?**

An apprenticeship is an attractive option to me because I find school not very interesting, and I also find it much easier to just learn by doing things instead of reading books and studying for tests., An apprenticeship option is attractive to me because it allows me to be hands on! Being hands on is very important to me and the easiest, fastest, and most enjoyable way for me to learn things.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I have seen many videos on YouTube by people such as HVACR Videos, which demonstrate what it is like to work as a refrigeration technician or a plumber. To me the work looks very interesting and fun, and I am looking for a new job that I can take seriously and work hard every day at., I have always enjoyed hands on work as well as problem solving and fault finding, and would consider myself technically oriented. A career in HVACR involves all of these things, as well as being something that is always in demand! I have seen videos from Youtubers such as HVACR videos and always thought the workflow seems interesting and challenging, which is what I want in a job.

Why is an apprenticeship an attractive option to you?

I think an apprenticeship would be great to help me learn a new trade that interests me, while maintaining an income. I have children, so my free time to attend school is limited., I want to learn and succeed in a trade that can make lives better for people in my community and my own family.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I have been working in the metal industry as a laser operator for 12 years. I'm looking for a more financially fulfilling career and I think I would enjoy plumbing. At the end of the day I want to create the best life for my kids/ family., I have been considering a plumber apprenticeship for over 2 years. I recently found out that the metal plant that I work in is shutting the doors and outsourcing all product lines. Now is the time for me to take the leap into an apprenticeship!

What construction software or technologies do you have training in?**Any Safety Certificates:****Add'l Details:****Why is an apprenticeship an attractive option to you?**

Because I get to learn on the job instead of having to sit in class in a college and have debt., Because I dont have to pay into the apprenticeship I get to prove to my future employer that I have what it takes to get my apprenticeship, I put reason in prior form, I want to earn my way to be qualified to do something I like and while I work. In the long run of this job I want to have myself covered when something goes wrong as to being laid off or worse, I can have someone looking out for me to have a job.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I would like to learn how to become a plumber because of the benefits that are held in the future as in myself doing the plumbing so then I can save later in life., I am more hands on than I thought I and I like being in a open space unlike when I worked in a factory. The factory i worked at was nice but I just felt like I needed something that used my brain more so I decided to become a carpenter since then I like the fact I get to use my brain but I believe I need something different, something that is more different than the other people because you dont need a certificate to do carpentry but you do when it comes to being a plumber it would give me more help outside of work because I would become licensed to do so, I put reason in prior form, I have always had the thought about being a plumber and I wanted to see other trades that are around plumbers so I decided to be a carpenter for a bit and theres nothing wrong with carpentry but my heart still sits with it being right to be a plumber

MIG - Some knowledge, STICK - Some knowledge, MIG - Some knowledge, MIG - Skilled, STICK - Skilled, STICK - Some
Knowledge

Tell us about any jobs where you've learned pipetrades relevant skills:

I'm currently a maintenance technician and have been in the rave for about 2 years right out of school, The past 4 years right when I graduated highschool I became a maintenance technician and gradually worked my way up to learning everything I know now.

As a maintenance technician you dabble in a little bit of everything. They say that we are the jack of all trades master of none. Which I do believe but I wish to master one

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I like working on things such as my vehicles and helping family around there shops and businesses, I really just like to work with my hands. If family needs helping building something around their house I'm the first to volunteer to help.

I love rebuilding things, just in general anything outdoors or working with tools.

Why is an apprenticeship an attractive option to you?

I'm looking to get experience in hvac and become the best I can possibly be in my trade, An apprenticeship is an attractive option for me because it give me a goal to hit. Something to strive for. I believe there's always something to learn and to be taught.

If I can at least learn one thing a day I feel accomplished. The ability to do something like that and know how it works amazes me.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

It interests me because your consistently learning new things, I currently work as a maintenance technician in a food plant. I do a little of everything such as welding, fabricating, troubleshooting, plumbing, hvac etc.

Everything I get to dabble in plumbing or plumbing related things I really enjoy it. We have outside contractors such as GLM and they talk about how amazing you guys are. So I became really interested in what you guys do.

I would like to learn and make money at the same time given the fact I live on my own.

I also have a friend who is an apprentice through you guys and likes it., I'm a hands on learner, never did like learning everything straight from a textbook or online, so learning hands on and making money while doing so is the right thing for me, I like to work hands on, and make money while doing so. I think an apprentice ship is perfect for me because

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Have been a painter, and did masonry since high school, and have seen many trades online that I would like to learn/ work, and wanted to find a career that I enjoy and can work in for many years to come.

I have a friend that has gone through this company and has an apprenticeship and talked highly of it as well., I've done, masonry, painting, worked in paper mills, always been interested in finding a career that I can rely on and find stability in with always having work., Have a buddy my age, that has gone through this same apprenticeship and he said that it's a good place to start a career and I've been interested in finding myself a career for awhile now., I've done some research and think I'd be a good fit for me, I've been wanting to get into the trades and do an apprenticeship for a good amount of time now, and I have a couple people I know that do it and talk very good things about it.

Add'l Details:

Why is an apprenticeship an attractive option to you?

It's a wonderful career , all the trades are interesting , I want to learn something I can use forever and learn it the right way, Learning and earning, Like I said I want a stable line of work to provide for my family . I have worked in asphalt industries my whole life and it just lacks consistency and ability to progress .. I'm excited to move into a field that offers them things to me.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I have working in asphalt maintenance basically my whole life since I was a boy with my pa. I'm ready to learn something new and creat a steady source of income to provide for my wife and children ., Long term steady work and good benefits for my family, I love working with my hands . I want to secure a job that's not under threat from ai and automation. I know a few people in the trades and they seem to enjoy their jobs.
