Youth Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

Plumber

Work Zones in Preference Order:

Green Bay Area (Yellow)

High School:

I graduated from Preble High School

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:

Welding Experience:

Flux Core - Some Knowledge

Shift Availability:

Full-time, summer employment

Tell us about any jobs where you've learned pipetrades relevant skills:

currently work as an ironworker apprentice, where I've gained hands-on experience with tools, materials, safety procedures, and working on a job site. These skills are transferable to the pipe trades.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

Working which boost my skills getting into the field right away learning things everyday and staying focussed and listening to my higher ups.

What trades-related courses did you take in school?

Math-Algebra, Woodworking / Woodshop, Electrical Trades / Electronics

Why is an apprenticeship an attractive option to you?

An apprenticeship is an attractive option for me because it allows me to learn a skilled trade through hands-on experience while earning a paycheck. I like the idea of learning from experienced professionals, gaining valuable skills, and working toward a stable career. I also want a career where I can continue to grow, take on more responsibility, and have opportunities to increase my income as I gain experience.

What construction software or technologies do you have training in?

AutoCAD

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Well I'm currently in a trade for iron working, i just like to think smartly and have backup options and i wanna learn more about plumbing because maybe it will fit my career goals better.

Any Safety Certificates:

First Aid / CPR, OSHA 10

High School:

I did go to suring high school but I

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:

Welding Experience:

Stick - Some Knowledge

Shift Availability:

Full-time, summer employment, Part-time, school

Tell us about any jobs where you've learned pipetrades relevant skills:

Under ground utility work for a month of my summer of 2026 as well as working at a hardware store learning a lot of stuff. Seeing a bunch of videos on this stuff also helps me wanna get more into it.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

In my free time, I enjoy working on things and learning how things work. These activities have helped me develop patience, problem-solving skills, and attention to detail. I believe these skills are important in the construction trades because you need to be able to work carefully, figure out problems, and learn new skills.

What trades-related courses did you take in school?

Woodworking / Woodshop, Math-Algebra, Math-Geometry

Why is an apprenticeship an attractive option to you?

I also like that an apprenticeship allows me to work, gain real experience, and continue learning at the same time. I'm willing to work hard, take direction, and learn everything I can to become a skilled and dependable plumber.

What construction software or technologies do you have training in?

No

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I became interested in the building trades because I like working with my hands, learning practical skills, and being able to see the results of my work. I'm interested in plumbing specifically because it combines hands-on work with problem-solving, and I want to build a career where I can continue learning and developing my skills.

Any Safety Certificates:

First Aid / CPR

Youth Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

Pipe Fabricator, Steamfitter (Pipefitter)

Work Zones in Preference Order:

Green Bay Area (Yellow), Appleton Area (Green)

High School:

Green Bay Preble High School

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:

Welding Experience:

Stick - Some Knowledge, TIG - Some Knowledge, MIG - Some Knowledge

Shift Availability:

Full-time, summer employment

Tell us about any jobs where you've learned pipetrades relevant skills:

I've only worked in my families business which is a Paper Company, I don't really have any real job experience that involves pipe trades but I mainly learned it in school.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I enjoy weightlifting, working on my car, and being able to be around hands-on work that can potentially help me with the trades. I also mainly started getting into welding in school (I currently take welding for my senior year) and I've enjoyed it a lot so far. I've had previous experience in highschool with welding and other trades.

What trades-related courses did you take in school?

Welding, Metals, Woodworking / Woodshop, Automotive Technology

Why is an apprenticeship an attractive option to you?

I would love to be able to get on-the-job training and while I'm able to be at school and also learn more while doing both. I've found that an apprenticeship is a great way to experience a day in the life of someone who's a fabricator, pipe fitter, plumber, etc. Being able to potentially experience getting more time in the trades and school would further help my future career path and impact my future plans entering my early teenager years.

What construction software or technologies do you have training in?

CNC, AutoCAD

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Originally I was interested in plumbing but getting further into my high school years I found that welding was my passion. I strongly enjoy it and love to work hard to improve. I enjoy working with others, consistently bettering myself, enjoy hearing feedback, and have a good learning experience. I also really appreciate working hard and being able to help society with my skills.

Tell us about any jobs where you've learned pipetrades relevant skills:

I currently work as an Automotive Detailer at Bergstrom Automotive. In this position, I have learned the importance of attention to detail, time management, following procedures, and maintaining a safe work environment. I also worked for AZCO in their pipe fabrication shop, where I gained experience working around pipe systems, fabrication processes, tools, and shop equipment. This position gave me exposure to the type of work performed in the pipe trades and helped me

Tell us about any hobbies that have boosted pipetrade-relevant skills:

Some of my hobbies include working on vehicles, riding motorcycles, and learning how mechanical systems work. I enjoy doing maintenance, installing parts, and troubleshooting problems because it helps me understand how different components work together.

I have also had the opportunity to work with Fox Valley Technical College through my high school in a welding program. Through this experience, I have learned welding techniques, shop safety, how to read measurements accurately, and the importance of

What trades-related courses did you take in school?

Metals, Welding, Woodworking / Woodshop

Why is an apprenticeship an attractive option to you?

An apprenticeship is attractive to me because it allows me to gain real-world experience while continuing to learn. I like the idea of working alongside skilled professionals, developing hands-on skills, and earning a paycheck while training for a career.

I learn best by doing, so an apprenticeship is a great fit for me. It provides the opportunity to build valuable skills, gain industry knowledge, and work toward a long-

What construction software or technologies do you have training in?

AutoCAD

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

What interested me in the building trades is that I enjoy working with my hands and being able to see the results of my work at the end of the day. I like solving problems, learning practical skills, and working on projects that have a real impact on people and communities.

The pipetrades specifically interest me because they involve a variety of skills, including pipefitting, and working with different systems that are essential to buildings and industries. I enjoy the challenge of learning how these systems work and the satisfaction of knowing my work helps provide safe water, heating, cooling, and other important services. I am also interested in the opportunities for continued learning, career growth, and earning a good living while working in a hands-on trade. As well as my dad being in the industry and growing up around it.

Years of Full-Time Work Experience:**Welding Experience:**

TIG - Some Knowledge

Shift Availability:

Part-time, school year employment

Tell us about any jobs where you've learned pipetrades relevant skills:

At my current job, I've gained a lot of experience that applies to the pipe trades. I've been working with small Schedule 10 stainless pipe and have gotten much better at TIG welding it over time. I've been practicing and working with this type of pipe for a while, and I've learned how important good control, consistency, and attention to detail are. My experience has also taught me how to use tools safely, work with a team, and keep improving when something doesn't come out right.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

One of my main hobbies is welding and working with tools. I like practicing TIG and MIG welding and learning how to work with different metals and settings. I also enjoy working on projects and figuring out how to fix things when something doesn't go as planned. Welding has taught me to be patient, pay attention to detail, work safely, and not give up when something is difficult. I think these skills will help me a lot in the construction trades because you need to be accurate, work well with others, and be able to solve problems.

What trades-related courses did you take in school?

Welding, Math-Algebra, Math-Geometry, Automotive Technology, Drafting and Design

Why is an apprenticeship an attractive option to you?

An apprenticeship is attractive to me because I can learn the trade hands-on while getting paid and gaining real experience. I've been working at my current job for over a year and three months, and it has taught me how to be dependable, work with a team, use tools safely, and show up ready to work. I like working with my hands and learning by doing, so I think an apprenticeship would be a good way for me to keep building my skills and start a career in the trades. I also like that I can learn from experienced people while

What construction software or technologies do you have training in?**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

I'm interested in a career in the building trades because I enjoy working with my hands, learning skilled trades, and seeing the results of the work I do. I'm specifically interested in the pipetrades because I want to build my skills in pipe fabrication and TIG welding, especially working with stainless steel. I like the precision and skill that pipe welding requires, and I want to build a long-term career where I can continue improving my welding skills and take on more challenging work.

MIG - Skilled, Stick - Some Knowledge, Flux Core - Some Knowledge, MIG - Some Knowledge, TIG - Some Knowledge

Shift Availability:

Part-time, school year employment, Full-time,

Tell us about any jobs where you've learned pipetrades relevant skills:

I currently work at a small fabrication shop where I've been for 2 years now. I work part-time, and whenever I can, when school starts. Mostly MIG weld parts and pieces for certain businesses. We also do custom fabrication for mostly farmers, fixing loader buckets, fork sets, and farm equipment. Through my time at this employer, I've welded pipe multiple times but not lately. But I've become a much better welder through my time there and have been introduced to many different things outside of welding that go into the whole trade. Such as milling, assembly, and painting.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I've played football and baseball throughout my entire life. These sports have brought me great leadership, responsibility, and teamwork skills. I have seen throughout my years of playing that the best teams have multiple leaders and everyone on the team is valued. That goes the same on the job site. When everyone is valued and working together, it would make the job go smoother, and the work get done sooner.

What trades-related courses did you take in school?

Math-Algebra, Welding, Metals, Woodworking / Woodshop, Building Trades / Construction, Construction Technology, Math-Geometry

Why is an apprenticeship an attractive option to you?

To me, an apprenticeship isn't just a job. It would provide a gateway to my future and the success I want to achieve. The apprenticeship would also grant me opportunities to meet people who could help me and give me advice throughout my journey. It could also allow me to learn more and grow my passion for welding and fabricating through the paid learning I would receive.

What construction software or technologies do you have training in?**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

I loved to see the massive green stretches of pipe down south. From there, I started asking around and seeing what sort of welding or fabrication I could do in my home state to continue welding.

The 2 two jobs i had where cleaning a chiropractors office an then reffing kids soccer these skill don't really apply to pipe trades beside listening

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I enjoy playing sports throughout the year and spending time outdoors. Playing sports has taught me the importance of teamwork, communication, and staying committed to reaching a goal. It has also helped me become more disciplined, dependable, and able to work well with others.

I also like outdoor activities because they keep me active and give me opportunities to solve problems and work with my hands. These experiences have helped me build a strong work ethic, patience, and the ability to adapt to different situations. I believe

What trades-related courses did you take in school?

Welding, Math-Algebra

Why is an apprenticeship an attractive option to you?

An apprenticeship is an attractive option to me because I want to gain hands-on experience while learning from skilled professionals/I learn best by doing, and I like the idea of building real-world skills that I can use throughout my career instead of only learning in a classroom.

I also like that an apprenticeship allows me to earn money while I train and work toward

What trades-related courses did you take in school?

Building Trades / Construction, Math-Geometry, Math-Algebra, Robotics, Metals, Welding, Electrical Trades / Electronics

Why is an apprenticeship an attractive option to you?

To work while learning and getting paid for it, I'm a hands on learner so that's how i understand and learn best.

What construction software or technologies do you have training in?

AutoCAD, CNC

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

What introduced me to the trades was my welding and teacher, from there I've always kept that in mind instead of college. Now that I'm getting closer to the end of my high school era and have to make the choice of collage or not. I have made the conclusion that I want to go to the trades instead.

Tell us about any jobs where you've learned pipetrades relevant skills:

I've worked on multiple construction projects where I learned how to use tools safely, follow directions, and work as part of a team. I've also done some woodworking, which helped me develop measurement and attention-to-detail skills that apply to the pipe trades.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I enjoy skateboarding, which has taught me persistence and how to keep practicing until I improve. I also help my dad with construction work and do projects and chores around the house, which has given me experience using tools, following instructions, and working safely. These activities have helped me develop a strong work ethic and skills that can transfer to the construction trades

What trades-related courses did you take in school?

Why is an apprenticeship an attractive option to you?

A pipe trades apprenticeship is attractive to me because I can earn money while I learn valuable skills instead of taking on student debt. I like the idea of getting hands-on experience and learning directly from experienced workers in the field.

It also gives me the opportunity to build a stable career with good pay, benefits, and opportunities for advancement. I enjoy working with my hands, solving problems, and

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I am interested in the building trades because I like hands on work and learning useful skills. I also like the opportunity to build a stable career and work on projects that make a difference. I am interested in the pipe trades specifically because I enjoy problem solving and working with tools. It seems like a rewarding career where I can continue learning and improving my skills.

Appleton east high school

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:

Welding Experience:

Flux Core - Some Knowledge

Shift Availability:

Full-time, summer employment, Part-time, school

Tell us about any jobs where you've learned pipetrades relevant skills:

I had to disassemble and reassemble a sink and toilet. I had to make sure the sink didn't leak after reassembling it and was working properly, acting like it was a real job site. For the toilet I just had to make sure it was able to flush. Another job was connecting water lines using a variety of plumbing connections and fitting. I also had to connect 2 different pipe into a water line that connects to a water hose. I had to make sure it doesn't leak by soldering, crimping and mechanically connecting pipes together.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

Some hobbies I like to do is working out and getting in shape. I wake up every morning to work out for about an hour before going to school. I think the waking up part is big on discipline because it ensures consistency even when you don't feel like it. Another hobby of mine is yard work, it transfer to construction trade because of the physical endurance and project planning. I also like to fish, it helps with construction trades in developing patiences and problem solving.

What trades-related courses did you take in school?

Building Trades / Construction, Math-Algebra, Math-Geometry, Woodworking / Woodshop

Why is an apprenticeship an attractive option to you?

An apprenticeship allows me to earn an income while learning. Also it will help me gain a real working hands on experience. It also provides a faster pathway to a career. An apprenticeship will help guide me to what I like and develop valuable life skills. Also I won't need to go to college, so I can just work right away and earn a good wage. Also it helps you build a high skill set and create a strong professional network before i graduate.

What construction software or technologies do you have training in?

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

This type of work interest me because I like to do hands on work. Using different tools and putting together a pipe is fun. Soldering pipes together is also fun it's like a step by step Lego project. Pipetrades also help society like with clean drinking water and that's one thing I want to be better at. Pipetrades interest me because you can earn while you learn, you work on job site while attending classes. This career also has excellent benefits like strong health insurance and many pipe trades professional belong to unions.

Welding Experience:

MIG - Some Knowledge, TIG - Some Knowledge, Stick - Some Knowledge

Shift Availability:

Part-time, school year employment

Tell us about any jobs where you've learned pipetrades relevant skills:

This would be my first actual job in welding and in the pipe trades. The only experience I have with the pipe trades is some welding classes I took.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I enjoy playing video games and going fishing. These transfer to the construction trades because I have an interest in video games, where you can build things.

What trades-related courses did you take in school?

Math-Algebra, Welding, Woodworking / Woodshop, Electrical Trades / Electronics, Engineering, Metals, Math-Geometry

Why is an apprenticeship an attractive option to you?

I would like to earn money while learning a trade that I could have as a future career.

What construction software or technologies do you have training in?

CNC

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I have always been interested in working in hands-on jobs. I have been interested in pipe trades because there is a multitude of opportunities in pipe trades. I enjoy problem-solving while working in trades, and the sense of accomplishment after I do my job. I enjoy working in team environments and helping others at work. I enjoy working with things and creating things, which is another reason why I enjoy the trades.

I have an interest in working in the pipe trades. I think it's a good experience to have, and I can learn something from my time working here. I also have an interest in welding pipes because I took a welding class in school and really enjoyed it. I also have an interest in pipetrades because people in the pipetrades are in need right now.

In school I take various shop classes from welding to construction.

What trades-related courses did you take in school?

Building Trades / Construction, Math-Algebra, Math-Geometry, Welding, Woodworking / Woodshop

Why is an apprenticeship an attractive option to you?

I get to learn and be paid while doing something I enjoy.

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

What construction software or technologies do you have training in?

CNC, Laser Scanning

Trades pay well, and I like hands on work and learning experiences.

Any Safety Certificates:

First Aid / CPR

Youth Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

Pipe Fabricator, Steamfitter (Pipefitter)

Work Zones in Preference Order:

Green Bay Area (Yellow), Appleton Area (Green)

High School:

Seymour High School

Relevant Experience Level:

Some. I have worked for a plumber, steamfitter or HVAC/R contractor.

Years of Full-Time Work Experience:

Welding Experience:

Stick - Some Knowledge, MIG - Some Knowledge

Shift Availability:

Full-time, summer employment

Tell us about any jobs where you've learned pipetrades relevant skills:

I haven't done any

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I play baseball and that takes teamwork, communication and trust in others.

What trades-related courses did you take in school?

Automotive Technology, Electrical Trades / Electronics, Woodworking / Woodshop, Welding, Math-Algebra, Math-Geometry

Why is an apprenticeship an attractive option to you?

I can start work right out of school and I can make progress towards my future.

What construction software or technologies do you have training in?

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I've never been a big fan of school and I like doing hands on work and seeing progress in real time of things I've helped build.

Any Safety Certificates:

First Aid / CPR, OSHA 10

Youth Pre-Apprentice Candidate Pipefolio

Disciplines of Interest:

Plumber, Steamfitter (Pipefitter)

Work Zones in Preference Order:

Fond du Lac Area (Orange), Appleton Area (Green)

High School:

Omro High School

Relevant Experience Level:

A little. No specific trade experience, but I have general skills in construction or welding.

Years of Full-Time Work Experience:**Welding Experience:**

MIG - Some Knowledge, Stick - Some Knowledge

Shift Availability:

Part-time, school year employment

Tell us about any jobs where you've learned pipetrades relevant skills:

I have worked for my dad's tent company, "Tents By Tellock", since I was about 10 years old. I was doing physical labor and learned how to develop a strong work ethic early. I learned how to do many hands-on projects and build things together. I also worked with others while on the job, so I am able to communicate with people very well. I worked as a front desk/concession stand clerk at my local pool the past summer as well. I learned more about working with others and built stronger communication skills throughout my time there.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I have always played sports growing up which has kept me very fit and active allowing me to work in various conditions. Playing sports has also taught me how to be a leader and work with others in order to reach a common goal. This skill can be translated to construction trades when working in team settings on a project. I also enjoy working outside and with my hands, and often spend my free time doing just that. Having enjoyment in doing this, I have built a strong work ethic for myself.

What trades-related courses did you take in school?

Welding, Math-Algebra

Why is an apprenticeship an attractive option to you?

I have always been interested in a work-study style education program so I can learn on the job. The idea of being able to learn while doing hands on work makes me feel very confident in being able to learn productively. In addition, being able to start a career early has always been a huge goal for me. I have high expectations for myself after high school and an apprenticeship would assist me in meeting those expectations.

What construction software or technologies do you have training in?**Any Safety Certificates:**

First Aid / CPR

Add'l Details:**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

I have always been interested in a career in the building trades because I prefer doing hands on work. I am a very fast learner, and I am a visual learner who excels at taking verbal instruction and quickly applying them to physical tasks. I have been exploring other careers in the trades, and the pipe trades stuck out to me because it is an opportunity to involve blueprint reading, basic math, welding, and other skilled trades together in one job. It is also a job where each day is a little different and not the same thing every day. I find interest in working outside, with tools, and other heavy equipment. I also have distant family that owns a plumbing company, which has also brought some of my interest to pursue a career in the pipe trades.

Disciplines of Interest:

Plumber, Steamfitter (Pipefitter), HVAC/R Service Tech, Pipe Fabricator

Work Zones in Preference Order:

Appleton Area (Green)

High School:

Appleton East Highschool

Relevant Experience Level:

None. Nothing even close-but I'm a hard worker and willing to learn!

Years of Full-Time Work Experience:**Welding Experience:****Shift Availability:**

Full-time, summer employment, Part-time, school

Tell us about any jobs where you've learned pipetrades relevant skills:

I have not any applicable skills that relate to pipe trades. I have worked Kohls, and I'm currently employed at Walmart. Although both of these don't have any applicable skills to the pipe trades, they have taught me time management skills, and how it feels to work in a fast paced environment which both are applicable skills that would be benefit me.

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I'm an active person, I regularly go to the gym and go on runs. Both of these have helped me build strength and discipline which are both transferable skills in the trades. I'm used to pushing myself and staying consistent.

What trades-related courses did you take in school?

Math-Algebra, Math-Geometry, Drafting and Design

Why is an apprenticeship an attractive option to you?

I'm currently in a youth apprenticeship program called GPSed, and it's made for kids like myself who are more hands on. This program lets me get out of school at 11am and earn work credits while still learning all the basic math and reading skills. This apprenticeship interested me so much because GPSed is currently not having many apprenticeships available. I would be able to commit my time to this apprenticeship and learn real world experience that would jump start my career which is exactly what I'm looking for right

What construction software or technologies do you have training in?

I'm looking for a stable career that can set me up for the future.

Tell us about any jobs where you've learned pipetrades relevant skills:

I have worked at Walmart as an online shopper. I would pick orders for people and once they arrived at the store I would take them out. I had to quit my job as they wouldn't work around my college hours.

I also worked Dairy Queen and SandBar at the same time. At Dairy Queen I took orders and prepared the order and worked drive thru. At the Sand Bar which I am still employed with I am a good runner. I help prepare the food that is ordered and deliver it to the table., None

Tell us about any hobbies that have boosted pipetrade-relevant skills:

Taking apart things and putting them back together, building birdhouses, and playing with power tools. I think it boosts my hand eye coordination and helps me be able to use my hands for long periods of time., I like to go fishing and being outdoors

What trades-related courses did you take in school?

Welding, Welding

Why is an apprenticeship an attractive option to you?

An apprenticeship will give me the ability to try what I have worked hard on. I have had my mind set on this and would love to gain work experience from it. I know a lot of employers look for experience and it's hard to gain that experience if you can't be hired without it. An apprenticeship will provide me the experience I need to become successful!, Because I already completed some college courses in welding

What construction software or technologies do you have training in?

3D printing and laser printing

Any Safety Certificates:

Add'l Details:

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

I have always learned better when I was able to work with my hands. I would put together tinker boxes from this subscription that my parents signed me up for and I fell in love with them. Once I got older I knew I needed a job that didn't have me sitting behind a desk and one that I could be using my hands. Once I got into High School I took automotive and fell in love. My parents pushed me to look into more things in the trade field and I took welding and I fell in love with it., I'm currently enrolled in the college of Menominee nation for welding and would like to pursue this career path further.

Tell us about any jobs where you've learned pipetrades relevant skills:

I've worked at the abbey bar and grill and I'm a cook there currently and before that I was a bagger at the piggly wiggly, Through my youth apprenticeship I worked at Robinson Metal as a welder and fabricator. I gained hands on experience with MIG and flux core welding while working on tanks, skids, lifting lugs, and other fabricated assemblies. I also learned how to use fabrication tools, read measurements, fit parts, and make sure my work met quality standards. Working in a real production environment also taught me skills beyond welding. I learned how important safety, communication, reliability, and attention to detail are when other people depend on

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I workout a lot and play football and i can lift heavy and be a good leader and being a woodworker and welding will help, One of my hobbies is working on cars and learning how mechanical systems work. I enjoy fixing problems myself and figuring out why something is not working instead of immediately having someone else do it. Working on cars has helped me become more comfortable using tools, troubleshooting problems, paying attention to detail, and working with my hands. I also spend time practicing and improving my welding skills, especially as I have become more interested in pipe welding. Both of these have taught me patience and that sometimes

What trades-related courses did you take in school?

Building Trades / Construction, Engineering, Math-Geometry, Math-Algebra, Metals, Welding, Woodworking / Woodshop, Robotics, Automotive Technology, Engineering, Math-Algebra, Math-Geometry, Metals, Welding, Woodworking / Woodshop, Building Trades / Construction

Why is an apprenticeship an attractive option to you?

Because I want to get started as fast as i can and start earning up so I can retire early, An apprenticeship is attractive to me because I learn best by actually doing the work. My experience in the youth apprenticeship program showed me how valuable it is to learn on the job from people who have years of experience in the trade. I would rather be in the field developing real skills while also learning the technical side of the trade. I also like that an apprenticeship gives me a clear path toward becoming a journeyman. I can earn

What construction software or technologies do you have training in?

CNC, CNC

Any Safety Certificates:

OSHA 30, OSHA 10, First Aid / CPR

Add'l Details:**What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?**

Welding is always have been one of my favorite things to do and i want to do it for my career and then make a Living off of it, I first became interested in the building trades after starting the youth apprenticeship program and getting the opportunity to work in the welding industry. While working at Robinson Metal I gained real experience welding and fabricating in a production environment. That experience showed me that I enjoy working with my hands, learning new welding processes, and being able to look back at something I built at the end of the day. More recently I have become very interested in pipe welding and the pipetrades. I have been practicing and trying to improve my skills because I want to pursue pipe welding right out of high school. I want a career where I can continue learning, work hard, travel for jobs if needed, and eventually become a highly skilled journeyman welder.

Tell us about any jobs where you've learned pipetrades relevant skills:

Didn't really have any jobs related to metals or pipe trades but in school, Just in school experiences, Only in school with welding and in the metals shop, I am in building trades right now, I didn't really work anywhere but in school I had a welding shop class, metals class

Tell us about any hobbies that have boosted pipetrade-relevant skills:

I'm in school and have multiple trades classes like auto mechanics, 3 years of welding experience in school, 2 years of construction experience and this will be my first year in machining, Do a lot of outside things and went through classes in school, Been a laborer in construction for nearly 2 years, I've been in construction for 2 and a half years now and would like to work with metal, I have a lot of carpenter experience I know how to read a tape and I'm really good with using my hands

What trades-related courses did you take in school?

Automotive Technology, Building Trades / Construction, Math-Algebra, Math-Geometry, Metals, Welding, Woodworking / Woodshop, Building Trades / Construction, Math-Algebra, Math-Geometry, Welding, Woodworking / Woodshop, Automotive Technology, Building Trades / Construction, Welding, Woodworking / Woodshop, Metals, Automotive Technology, Building Trades / Construction, Math-Algebra, Welding, Woodworking / Woodshop

Why is an apprenticeship an attractive option to you?

So I can get a head start on a career and not be stuck not knowing what to do after high school, I know a lot about apprenticeships and would like to sign up to be one, I find trade school more interesting learning about what happens in the trades from start to finish, To get my self into school while working during the week learning useful knowledge that I can use throughout the rest of my career

What construction software or technologies do you have training in?

A little Cnc machining

What interested you in a career in the building trades in general, and specifically, a career in the pipetrades?

Just to get more hands on learning and to start a new career. In my past haven't really had much of opportunities and pipefitting just has been up there for me, I find it as a hard but more layed back labor job., I gotta do something with my life and I have a friend by the name of Chayce that works for local 400, I work in construction have a friend that is in local 400 and I'm interested in learning, I am a journeyman laborer in construction just would like to switch up my career path
